

UNITED STATES OF AMERICA FEDERAL
ENERGY REGULATORY COMMISSION

Florida Gas Transmission Company, LLC

Docket No. CP15-144-000

NOTICE OF AVAILABILITY OF THE ENVIRONMENTAL
ASSESSMENT FOR THE PROPOSED **JACKSONVILLE**
EXPANSION PROJECT

(January 15, 2016)

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Jacksonville Expansion Project, proposed by the Florida Gas Transmission Company, LLC (FGT) in the above-referenced docket. FGT requests authorization to construct about 8.7 miles of natural gas pipeline and associated aboveground facilities in Suwannee, Columbia, Bradford, and Clay Counties, Florida. The purpose is to provide a total of approximately 75,000 MMBtu/d of natural gas capacity to be delivered at various amounts at several points throughout Florida.

The EA assesses the potential environmental effects of constructing and operating the Jacksonville Expansion Project in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The proposed Jacksonville Expansion Project includes the following facilities:

- approximately 3.0 miles of 30-inch-diameter looping pipeline and associated facilities¹ in Suwannee and Columbia Counties;
- one new compressor unit, re-wheel an existing turbine compressor unit, and construct and modify piping and valves at Compressor Station 16 in Bradford County;
- approximately 5.7 miles of 20-inch-diameter looping pipeline and associated facilities in Bradford and Clay Counties; and
- a new regulation station in Bradford County.

¹ Associated facilities include new or relocated pig launchers and receivers, valves, and cathodic protection equipment
