- 500-1000
- >500
- Steller Sea Lion Critical Habitat (NMFS / NWR, 2008)
- OR Islands (USFW, 2004)

Critical habitat includes an air zone that extends 3,000 feet (0.9 km) above areas historically occupied by sea lions at each major rookery, measured vertically from sea level. Critical habitat includes an aquatic zone that extends 3,000 feet (0.9 km) seaward in State and Federally managed waters from the baseline or basepoint of each major rookery.
