

However, if the Department determines that it is not practicable to complete the review within this time period, section 751(a)(3)(A) of the Act and section 351.213(h)(2) of the Department's regulations allow the Department to extend the 245-day period to 365 days and the 120-day period to 180 days.

Pursuant to section 751(a)(3)(A) of the Act and section 351.213(h) of the Department's regulations, we determine that it is not practicable to complete this administrative review within the statutory time limit of 245 days. The Department requires additional time to analyze the production inputs that Foshan Shunde utilized to compile its Section D factors of production response. Additionally, the Department requires additional time to consider comments from interested parties concerning the proper valuation of Foshan Shunde's production inputs. Therefore, in accordance with section 751(a)(3)(A) of the Act and section 351.213(h)(2) of the Department's regulations, the Department is extending the time limit for the completion of these preliminary results by 120 days. The deadline for completion of the preliminary results is now September 1, 2009. The final results will continue to be due 120 days after the date of publication of the notice of preliminary results.

This notice is published in accordance with sections 751(a)(3)(A) and 777(i) of the Act.

Dated: April 24, 2009.

**SUPPLEMENTARY INFORMATION:** This notice is relevant to the following species and evolutionarily significant units (ESUs):

Chinook salmon (*Oncorhynchus tshawytscha*): threatened Puget Sound Steelhead (*Oncorhynchus mykiss*): threatened Puget Sound

#### Background

Section 9 of the ESA and Federal regulations prohibit the taking of a species listed as endangered or threatened. The term take is defined under the ESA to mean harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. NMFS may issue permits to take listed species for any act otherwise prohibited by section 9 for scientific purposes or to enhance the propagation or survival of the affected species, under section 10(a)(1)(A) of the ESA. NMFS regulations governing permits for threatened and endangered species are promulgated at 50 CFR 222.307.

NMFS expects to take action on a ESA section 10(a)(1)(A) submittal received from the applicant. In an application received on February 27, 2009, WDFW applied to NMFS for an ESA section 10(a)(1)(A) permit for the direct take of ESA-listed threatened Puget Sound Chinook salmon and threatened Puget Sound steelhead from the South Fork Skykomish River in Washington state. The existing fishway at Sunset Falls will continue to be operated to trap Chinook salmon and steelhead arriving at the trap, and to haul trapped fish upstream for release into available habitat above three impassable waterfalls.

This notice is provided pursuant to section 10(c) of the ESA. NMFS will evaluate the application, associated documents, and comments submitted thereon to determine whether the application meets the requirements of section 10(a)(1)(A) of the ESA. If it is determined that the requirements are met, a permit will be issued to the WDFW for the purpose of carrying out the research and enhancement program. NMFS will publish a record of its final action in the **Federal Register**.
