(2) Total content reflects most recent area capacity tables.

(6) Total content based on latest resurvey effective May 1, 2014.

(7) Includes conservation pool for silvery minnow agreement.

(9) Accumulated sediment is estimated from latest resurvey to present. The total actual accumulated sediment within the Abiquiu SJ-C pool until the last sediment survey of December 31, 1998 was 16119 acre-feet. Estimated sediment accumulation since last survey is 75 acre-feet for a total accumulation of 16194 acre-feet.
