

## **EPA Region 2 to Review Site Cleanups and Remedies at 38 Superfund sites in New York & New Jersey**

November 14, 2016

The EPA conducts evaluations every five years at Superfund sites including Federal Facilities listed on the “National Priorities List” (Superfund sites) to evaluate the implementation and performance of a remedy, in order to determine if the remedy is and will continue to be protective of human health and the environment and is functioning as intended by the decision documents. The methods, findings, and conclusions of reviews are documented in the five-year review. In addition, five-year review reports identify issues found during the review, if any, and document recommendations to address them.

The Superfund sites where the EPA will begin five-year reviews in fiscal year 2017 (October 1, 2016, through September 30, 2017) are identified below. The web link provided after each site provides detailed information on the site status and past assessment and cleanup activity. The web link also provides contact information for the EPA Remedial Project Manager and Community Involvement Coordinator at each site. Community members and local officials are invited to call the EPA with any comments or current concerns about a Superfund site, or about the conclusions of previous five-year reviews at a site.

The Superfund sites at which the EPA is conducting five-year reviews include the following:

### **New York**

#### **Brewster Well Field**

Putnam County
