

9TH ANNUAL NW INDUSTRIAL
ENERGY EFFICIENCY
SUMMIT

JANUARY 11, 2017 | PORTLAND, OREGON

JANUARY 11, 2017

NW INDUSTRIAL ENERGY EFFICIENCY SUMMIT

The region's premier gathering of industry and energy experts working together to advance Northwest manufacturing competitiveness through energy efficiency.

The 9th annual edition of this Summit will again feature a dynamic range of topics to provide inspiring ideas for attendees. Speakers will join us from around the region and across the country to share detailed and overarching strategies to implement energy efficiency in manufacturing sites.

Sessions will focus on practical applications of energy efficient technologies in production and management. Energy experts and industry peers present real-life energy savings success stories, strategies, and challenges. Ample time for networking makes this another can't-miss event!
