TRANSMISSION SERVICES

April 26, 2016

In reply refer to: Salem-Albany No 2 line rebuild

Line: Salem-Albany No 2
Project: 28-mile Line Rebuild
Dates: April – November 2016

Dear Landowner:

This letter is to notify you of the Bonneville Power Administration's (BPA) planned Salem-Albany No. 2 transmission line rebuild project, scheduled to start the week of April 25th. The project includes replacement of aging transmission line wood poles, hardware and conductor wire. Necessary road improvements will be completed in conjunction with the line work. BPA crews and contractors plan to use both new and established access routes to reach the work sites. If access is restricted, a representative from BPA will contact you to discuss. This project is necessary to maintain system reliability and to ensure the electrical facilities meet demand for years to come. Please contact a member of BPA's project team if you have any questions or concerns and to address any issues that may impact the work area. See the Project Team Contact List below:

Project Team Contact List

- **BPA** toll free at 1-800-836-6619
- **Jim Clark** BPA Realty Specialist (503) 304-5906 Land Questions
- **Allison Krasnow** K2 Environmental (541) 385-6028 Land Liaison
