

SALEM-ALBANY TRANSMISSION LINE REBUILD PROJECT

PROJECT UPDATE: On Oct. 16 and 17, 2014, BPA will conduct a Bidder's Tour of the Salem-Albany Transmission Line. Contractors and BPA staff will drive and park in BPA transmission line right-of-way areas and associated access roads where BPA has existing right-of-access or permission to enter the property from the landowner. You might see a large number of people walking along these areas and taking pictures and measurements during these two days. In the days that immediately follow, the contractors may individually revisit sites to ensure accuracy of their construction bids. Thank you for your patience during this portion of the project.

STATUS OF ENVIRONMENTAL REVIEW: BPA is currently preparing the Final Environmental Assessment for the proposed rebuild of the Salem-Albany Transmission Line. BPA will make a decision whether to proceed with the rebuild in November 2014. If BPA decides to rebuild the line, construction would begin in the summer of 2015.

FOR MORE INFORMATION: If you have any concerns or questions about this work or the Salem-Albany Transmission Line Rebuild Project, contact **Amanda Williams** at **360-619-6634** or **amloran@bpa.gov** or **Michelle Doiron** at **360-563-3641** or **medoiron@bpa.gov** or toll-free at 800-282-3713 or visit *www.bpa.gov/goto/SalemAlbanyRebuild*.
