ENERGY SUPPLY, RESEARCH AND DEVELOPMENT
ACTIVITIES

(Including Transfer of Funds)

For expenses of the Department of Energy activities including the purchase, construction and acquisition of plant and capital equipment and other expenses incidental thereto necessary for energy supply, research and development activities, and other activities in carrying out the purposes of the Department of Energy Organization Act (Public Law 95-91), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion; purchase of passenger motor vehicles (not to exceed [18] 21 for replacement only), [\$1,347,048,000,] \$1,909,710,000, to remain available until expended; [in addition \$684,158,000 shall be derived by transfer from Uranium Supply and Enrichment Activities provided in prior years and shall be available until expended; and of which \$84,100,000 which shall be available only for the Center for New Industrial Materials; the Center for New Industrial Materials; the Center for Nuclear Imaging Research; the Energy Research Complex; Saint Christopher's Hospital for Children - Energy Demonstration Project; Center for Excellence in Education - Energy Utilization Performance Project; the Institute of Nuclear Medicine; the Advanced Science Center; the Center for Science and Engineering; and funds provided for byproducts utilization activities shall be available only for the following regional projects: Florida Department of Agriculture and Consumer Services; Hawaii Department of Planning and Economic Development; Iowa State University; Oklahoma, Red-Ark Development Authority; Washington, Port of Pasco; State of Alaska.] (Energy and Water Development Appropriations Act, 1987 as included in Public Laws 99-500 and 99-591, section 101(e),) and in addition, as authorities by section 201 of Public Law 95-238 and notwithstanding 31 U.S.C. 3302, revenues received as user fees for use of the Liquefied Gaseous Fuels Spill Test Facility in Fiscal Year 1988 shall be retained and used to provide toxic and flammable spill test facilities and activities.

Explanation of Change

Deletes Language contained in Public Laws 99-500 and 99-591 which had specific application to fiscal year 1987.

Proposed Language provides fees from non-Federal users of the Liquefied Gaseous Fuels Spill Test Facility in Nevada to be received into the account as reimbursable expenses to be retained and used to operate, manage and maintain the facility.

ENERGY SUPPLY RESEARCH AND DEVELOPMENT

OVERVIEW

Energy Research Analysis

The Office of Program Analysis manages the Energy Research Analysis Program to fulfill one of the responsibilities of the Director of the Office of Energy Research. The Department of Energy Organization Act (Public Law 95-91) states "It shall be the duty and responsibility of the Director--[Office of Energy Research] 1) to advise the Secretary with respect to the physical research program... (and) 2) to monitor the Department's energy research and development programs in order to advise the Secretary with respect to any undesirable duplication or gaps in such programs;...." Accordingly, the Office of Program Analysis (OPA) assesses research projects and programs in order to judge the significance of these efforts and to identify undesirable duplications and gaps.

There are three types of independent technical assessments performed by OPA on research programs throughout the Department. First, OPA staff performs comprehensive project-by-project evaluations of major programs using outside experts from industry, academia and the National Laboratories. These peer reviews provide judgments on the quality of the research and its impact. DOE Principal Officers responsible for energy R&D recognize that without this program less technically competitive projects would be awarded. Second, technical assessments provide independent views on the directions that future R&D in specific areas should take to be more productive and relevant to DOE missions. Research assessments are performed by contractors and OPA staff drawing on the world's leading experts in the specific fields being addressed. Tasks by the Foreign Applied Sciences Assessment Center (FASAC) and JASON's are included in these assessments. In addition, the Energy Research Advisory Board (ERAB) funded by this office addresses questions posed directly by the Secretary or the Director, Office of Energy Research, and provides views based upon their expertise. Third, OPA investigates the accomplishments of programs by determining specific advances in science or marketable products that arise from the program's R&D. Accounts of scientific developments are prepared in lay English to communicate the program's accomplishments to the general public.

A project has been initiated that will result in a report in FY 1988 on the accomplishments, over the last 30 years, of the Department's High Energy Physics program. The FY 1988 request would also allow a report to be initiated on the accomplishments of the Advanced Research and Technology program under Fossil Energy. In addition, in-depth technical peer reviews will be prepared on two major research programs, Advanced Process Technology (APT/FE) and Small Business Innovation Research (SBIR). Three research needs assessments are planned, Coal Liquefaction, Mixed-Wastes and Materials by Design. A new class of peer reviews will be performed in FY 1988 with

the review of the exploratory R&D programs at each of the National Laboratories for which the Office of Energy Research (ER) has oversight responsibility--Lawrence Berkeley Laboratory, Argonne National Laboratory, Oak Ridge National Laboratory, Brookhaven National Laboratory, and Pacific Northwest Laboratory.

OPA also has the responsibility within DOE for providing financial support for management of the National Acid Precipitation Assessment Program (NAPAP) created by the Acid Precipitation Act of 1980 (P.L. 96-294). OPA is also charged with providing funds under NAPAP for summarizing and synthesizing the state of the science in acid rain research and producing assessment reports useful for policymakers. In FY 1988 an increase in funds is needed for the studies that must be initiated to support the preparation of the Second Interim Assessment which will synthesize the results of \$300 million worth of Federal acid rain research. In the absence of adequate support, decisionmakers will not have an updated assessment of acid rain research in 1988, and the preparation of the NAPAP's Final Assessment at the end of the mandated major 10 year research program by 1990 will be severely impaired.

KEY ACTIVITY SUMMARY

ENERGY RESEARCH ANALYSIS

I. Preface: Energy Research Analysis

The Office of Program Analysis manages the Energy Research Analysis program to fulfill one of the responsibilities of the Director, Office of Energy Research. The Department of Energy's Organization Act (Public Law 95-91) states "it shall be the duty and responsibility of the Director--(Office of Energy Research) 1) to advise the Secretary with respect to the physical research program . . . (and) 2) to monitor the Department's energy research and development programs in order to advise the Secretary with respect to any undesirable duplication or gaps in such programs;. . . ." Accordingly, the Office of Program Analysis assesses research projects and programs in order to judge the significance of these efforts and to identify undesirable duplications and gaps.

II. A. Summary Table

Program Activity	FY 1986	FY 1987	FY 1988	% Change
Program Technology Assessment.....	\$1,990	\$1,450	\$2,550	+ 76
Acid Rain Support.....	577	550	1,150	+109
Total, Energy Research Analysis....	\$2,567	\$2,000	\$3,700	+ 85

II. B. Major Laboratory and Facility Funding

Argonne National Laboratory.....	\$ 465	\$ 89	\$ 210	+135
Brookhaven National Laboratory.....	306	255	300	+ 18
Oak Ridge National Laboratory.....	776	110	800	+627
Pacific Northwest Laboratory.....	40	325	420	+ 29
Total.....	\$1,587	\$ 779	\$1,730	+122

III. Activity Descriptions

Program Activity	FY 1986	FY 1987	FY 1988
Program Technology Assessment	Prepared technical assessments of Wind Energy Turbodynamics, Nonhighway Transportation, Accomplishments of the Seed Money Program of ORNL and the Magnetic Fusion Energy Program, as well as a compilation of all DOE Geosciences related research. Support ERAB, JASON, and FASAC.	Perform technical assessments of Coal Gasification, peer review of the Advanced Research and Technology Development (AR&TD/FE) program, and accomplishments of the Basic Energy Sciences (RES) program. Support ERAB, JASON, and FASAC.	Perform technical assessments of Coal Liquefaction, Mixed Wastes and Materials by Design. Prepare Program Accomplishments of High Energy Physics (ER) and AR&TD (FE), conduct Peer Reviews of Advanced Process Technology (APT/FE) and Small Business Innovation Research (ER). Fact finding surveys of the Exploratory Funds R&D (ER). Support ERAB, JASON, FASAC.
	\$1,990	\$1,450	\$2,550

III. Activity Descriptions

Program Activity	FY 1986	FY 1987	FY 1988
Acid Rain Support	Provide DOE share of support for NAPAP management and technical staff under P.L. 96-294. Perform technical assessment of the results of the research program conducted by national laboratories, et. al., and coordinated by the interagency National Acid Precipitation Assessment Program (NAPAP). Drafted First Interim Assessment for 1986. Begin Second Interim National Assessment Report (due 1988).	Provide DOE share of support for NAPAP management and technical staff under P.L. 96-294. Conclude first interim assessment. Assess interim results of major research projects, including the National Stream Survey, the Mountain-Cloud Network, and the National Trends Network.	Provide DOE share of NAPA management and technical staff under P.L. 96-294. Begin assessments for 1988 and 1990 concluding the 10-year NAPAP program. Assess the results of the validation of the Regional Atmospheric Deposition Model, the Direct-Delayed Response Program and the materials research program. Synthesize the results of over \$300 million worth of Federal acid rain research funded through FY 1987 for use by decisionmakers.
	\$ 577	\$ 550	\$1,150
Total Energy Research Analysis	\$2,567	\$2,000	\$3,700
