Subject: Fwd: annexed load treatment in RD ROD (p32-33) and Ex B of templates

Larry, there are two contract sections that would be affected and I've made that change below.

>>> Randy Gregg 7/2/2008 3:34 PM >>>

Add the following to the top of p33 of the Regional Dialogue ROD and Ex B 1.2.2 and 1.2.3 of the contract templates:

However, if both utilities agree on the amount of CHWM to transfer or, if the utility losing the load can provide verifiable load data on what the actual load was, of the service territory that is being annexed, in FY 2010, that load data will be used to establish the CHWM transfer to the acquiring utility.
