

Green Our Rides

The National Park Service is working to address climate change by conserving energy, fuel, water, and other valuable resources. We can take meaningful action through our approach to transportation. I pledge to join in this effort by taking the following steps whenever possible while at work, commuting, or on travel:

- Carpool
- Travel by foot or bicycle
- Use shuttles or other transit systems
- Limit vehicle idling to no more than 30 seconds
- Avoid aggressive driving habits that reduce fuel economy, including jackrabbit starts, hard braking, and rapid acceleration
- Remove excess cargo from my vehicle
- Coordinate and combine my trips to minimize the number of miles I travel
- Select the most efficient vehicle available for the job when I drive a pool vehicle
- Use alternative fuels that are compatible with my vehicle
