

Green Rides Pledge

The National Park Service is working to protect the natural and historical resources in this park by reducing vehicle emissions and conserving fuel. I pledge to join in this effort by taking the following steps to “Green My Ride” whenever possible, both here and at home:

- **Avoid idling:** Turn off my engine when parked for more than 30 seconds.
- **Drive sensibly:** Avoid jackrabbit starts, hard braking, and rapid acceleration.
- **Remove excess weight from my vehicle:** Carry only what I need.
- **Keep my tires inflated:** Check the sticker inside my door or glove box for the proper pressure.
- **Observe the speed limit:** Fuel economy generally drops at speeds above 50 mph.
- **Decrease drag:** Remove rooftop boxes and racks when I’m not using them.
- **Keep my engine tuned:** Delaying maintenance can impact my fuel economy.
- **Reduce vehicle miles traveled:** Travel by foot or bicycle, carpool, and use shuttles or other transit systems.
- **Combine my trips:** Opt for one multipurpose trip instead of many short trips.
- **Go alternative:** Use alternative fuels that are compatible with my vehicle.
