## Supplements to Title XVII Loan Guarantee Solicitations

Today, the U.S. Department of Energy's Loan Programs Office (LPO) has released important supplements to the Title XVII [Advanced Fossil Energy Projects](#) and [Renewable Energy and Efficient Energy Projects \(REEE\)](#) solicitations.

These supplements provide detailed information about the three following updates to the Advanced Fossil Energy and REEE solicitations:

- Part I and Part II application due dates have been adjusted, and additional application due dates have been added
- Treasury Wiring Instructions have been modified
- A life-cycle greenhouse gas analysis is now required for all Renewable Energy and Efficient Energy Projects solicitation applicants

For more information, including fact sheets and frequently asked questions about the solicitations, please see the [Advanced Fossil Energy solicitation page](#) and the [REEE solicitation page](#).

The [Loan Programs Office](#) has more than \$40 billion in remaining loan and loan guarantee authority to finance innovative energy projects and advanced technology vehicles manufacturing. Information on each solicitation can be found by visiting the LPO website at: [energy.gov/lpo/services/solicitations](http://energy.gov/lpo/services/solicitations)

The U.S. Department of Energy's Loan Programs Office (LPO) is now offering a periodic newsletter with updates and information on financing opportunities, LPO project and portfolio news, and more.

LPO facilitates the accelerated deployment of innovative clean energy projects and advanced technology vehicles manufacturing in the United States. For more information, please visit our new website: [energy.gov/lpo](http://energy.gov/lpo)
