Re: Save the Endangered Pallid Sturgeon

Dear U.S. Army Corps of Engineers and Bureau of Reclamation,

On July 8, 2016, Defenders of Wildlife asked our online community to write in support of protecting the endangered pallid sturgeon by removing Intake Dam from the Yellowstone River. Since then, we have collected 28,540 signatures. Enclosed is a CD containing the names of all the signers. The petition reads as follows:

Thank you for the opportunity to comment on the Lower Yellowstone Fish Passage Project in Montana. I support an open river alternative for the Lower Yellowstone Fish Passage Project. Your own analysis shows that the best outcome for the endangered pallid sturgeon from this project is to remove the outdated Intake Dam, open the river and allow full river passage. I do not support building a new dam and artificial bypass, as the likelihood that endangered pallid sturgeon will use it is slim. The pallid sturgeon needs all the help it can get. Please adopt an alternative that removes the dam, provides pumps or other means to get irrigators water and gives the pallid sturgeon a fighting chance. Spending taxpayer dollars on an alternative that won't work will cost more money in the future - pay to do this right the first time.

Thank you for your consideration.

Sincerely,
Defenders of Wildlife
