Public: None

Minter: opened the meeting

1. Ohio University Roundtable Recap- Greg Simonton, DOE: Stephane Howe, OU

<p>Howe: Some of what we learned at the roundtable was: There has to be someone leading the effort. A site master plan is needed, real estate transfer is crucial and there is a need to identify private companies that would be suitable.</p>	
<p>Simonton: If an industry comes looking here and the site cannot accommodate them at this time, do not leave the area, look at Zahn's Corner. The roundtable was a good first step. We are moving forward but not sure how long it</p>	

will take.	
Craft: Seeing people come here with interest was very good.	
Morgan: The roundtable was a great meeting very eye opening. There is a lot of work to be done.	
Cisco: The plant was built here in the middle of nowhere and now the plant is gone. It is turning into an open space again? It is an asset if we can get things together?	
Galanti: You almost need someone making contacts within the next few years not 10 years down the road.	

Minter: Meeting adjourned

2. Action Items: None
