

Partners Working Together to Reduce Energy Consumption in the United States

Through the Better Buildings Initiative, leaders representing the nation's commercial building industry including building owners, operators, engineers, facility managers, and sustainability professionals work together to share and advance solutions in energy efficiency to reduce energy use and costs, and create new and lasting jobs, while avoiding carbon emissions and other pollutants. The **Better Buildings Challenge** and **Better Buildings Alliance** are free and voluntary energy efficiency programs available to the commercial buildings industry aimed at facilitating peer-to-peer exchange between organizations and accelerating energy savings across building portfolios.

STEP UP TO THE BETTER BUILDINGS CHALLENGE

- ▶ National recognition for energy efficiency leadership
- ▶ Data insights and technical assistance to analyze your energy use
- ▶ Showcase project tours with DOE to spotlight your organization's energy efficiency

PARTICIPATE IN THE BETTER BUILDINGS ALLIANCE

- ▶ Be featured in trade, local, and national media articles
- ▶ Access technology demonstration opportunities
- ▶ Develop public resources such as technical performance specifications and sample lease clauses
- ▶ Tap into expert-led technology and market solutions teams
- ▶ Participate in peer-to-peer networking opportunities addressing sector specific energy topics
