In Section 5.14 (Contributions to Qualified RD&D Activities), we ask that up to 40 percent of the participating utility's total rate credit over the rate period be eligible for Contribution. The participating utility would be eligible for this incremental amount (the additional percent between 20 and 40 percent of its total rate credit) if the utility : 1)meets all the criteria in a,b,c,d,and f in Section 5.15 (and is not excluded by e) and 2) has permission from the RTF to contribute up to 40 percent toward a specified project.
