HISTORY OF NUCLEAR WASTE MANAGEMENT

DEVELOPMENT OF NUCLEAR POWER

Enrico Fermi splits the atom; achieves world's first nuclear fission Manhattan project forms, build atomic bomb for use in World War II U.S. produces first nuclear weapons U.S. launches first nuclear-powered submarine, the U.S.S. Nautilus

Congress passes Atomic Energy Act of 1954, providing direction for the peaceful use of atomic energy

U.S. begins using nuclear power to generate electricity

1934

As a nation, we have been studying nuclear waste management and geologic disposal for decades. Geologic disposal is widely accepted by experts nationally and internationally as the safe, responsible solution.

DEVELOPMENT OF GEOLOGIC DISPOSAL

1957

1970

1970

1972

National Academy of Sciences recommends geologic disposal for disposing of nuclear waste

U.S. begins search for potential repository sites
Lyons, Kansas site selected as the first national repository
Government withdraws from operations at Lyons site due to
technical uncertainties and public opposition

NUCLEAR WASTE POLICY ACT AND YUCCA MOUNTAIN

Congress passes NWPA, establishing the process for selecting a disposal site

DOE recommends 3 sites for further study, including Yucca Mountain Congress amends NWPA, directing DOE to study only Yucca Mountain

DOE studies Yucca Mountain extensively
DOE misses deadline to begin accepting spent nuclear fuel
DOE recommends Yucca Mountain as the nation's first disposal site
and President Bush submits recommendation to Congress
Nevada Governor Guinn submits notice of disapproval to Congress
President Bush signs joint resolution approving Yucca Mountain
DOE submits license application for construction of repository to NRC
Administration determines Yucca Mountain is not a workable solution
and DOE suspends activities at the site

The Nuclear Waste Policy Act (NWPA) provides the basic policy framework for U.S. efforts to manage nuclear waste. The Act establishes the procedures for evaluating and selecting sites for geologic repositories and sets key milestones for federal agencies, including the Department of Energy, to meet in implementing the policy.

The Administration issued the 2013 Strategy for the Management and Disposal of Used Nuclear Fuel and High-Level Radioactive Waste, which applies the principles of the Blue Ribbon Commission recommendations to a framework for a sustainable program to manage our nation's nuclear waste.

BLUE RIBBON COMMISSION AND CONSENT-BASED SITING

Secretary of Energy Chu establishes the Blue Ribbon Commission on America's Nuclear Future (BRC)

BRC recommends DOE adopt a consent-based approach to siting nuclear waste facilities

DOE releases Strategy for the Management and Disposal of Used Nuclear Fuel and High-Level Radioactive Waste

Secretary of Energy Moniz announces DOE will pursue consentbased approach to siting facilities for interim storage and disposal
