PMCDP Curriculum Learning Map

Updated May 4, 2016

This interactive map provides an overview of the Department of Energy’s Project Management Career Development Program (PMCDP) as well as all pertinent details for each course within the program. Use this map to guide you through your certification process. Click on any course to view the course details, including available equivalent courses. Many of the previously instructor-led courses are now available as desktop deliveries or online as on-demand training. These courses are highlighted in either red or green; standard instructor-led courses are outlined in gray. To print the map, print only page 2.

Ok, let's get started

Project Management Essentials

Level 1 Required Course
50 CLPs*

In this course, participants learn about the primary concepts of project management and are introduced to best practices in project management from Federal agencies and the private sector. This introductory course focuses on four major aspects of project management: The discipline of project management; Project planning; Teambuilding and effective leadership; and Project execution.

Based on the Project Management Institute's Project Management Body of Knowledge (PMBOK® Guide) Fifth edition and J. Davidson Frame's, The New Project Management, 2nd Edition, students will gain an understanding of how to apply this knowledge to their current DOE projects, and identify ways to incorporate best practices. Various Federal guides and manuals will be referenced throughout the course. The course is presented at an intermediate level of expertise similar to what would be expected of an accredited graduate level college course.

Intended Audience: Prospective Level 1 Federal Project Directors, DOE Program Managers, IPT members assigned to projects (including matrixed personnel).

Course Format: Online on-demand*

Equivalent Courses:

- [PMP Certification](#)- If you are PMP certified, you do not need to take Project Management Essentials.
- FPM 101
- FPM 120

Level 3	<p>Project Management Systems and Practices in DOE Level 1 Required Course 60 CLPs</p> <p>This course is designed to instruct participants in the specific project management systems and practices required by DOE Order 413.3b for all capital asset projects in the Department. The course also explains the specific roles and responsibilities of a Federal Project Director in managing a capital asset project in DOE. The course is organized around the processes specified in DOE Order 413.3b and the associated Guides 413.3-1 through 413.3-19. Participants will learn how to manage the critical decision process in the Order as well as other requirements necessary to be a Federal Project Director at DOE, including the federal budget process; NEPA and other environmental, safety and health laws; and understanding of DOE field relations and Lead Program Secretarial Officers (LPSOs).</p> <p>This course is not a general overview of project management; therefore, it is highly recommended that participants take Project Management Essentials prior to taking this course. This course is presented at an intermediate level of expertise similar to what would be expected of an accredited graduate level college course.</p> <p>Intended Audience: Prospective Level 1 Federal Project Directors, DOE Program Managers, IPT members assigned to projects (including matrixed personnel). This is a Level 1 core course for certification in the Project Management Career Development Program (PMCDP).</p> <p>Course Format: This course is delivered via Adobe Connect in a series of 11 webinars over a period of 7 weeks. Webinars are held twice weekly for 2 hours each.</p> <p>Equivalent Courses:</p> <ul style="list-style-type: none"> • None <p>CHRIS Code: 001024</p>

Level 3	<p>Every year the Department of Energy spends over 90 percent of its budget on purchases from the private sector. Because of the Federal Government's special fiduciary relationship, the acquisition system established to manage these expenditures of taxpayer monies is very different in some respects from commercial transactions between private parties. The principal purpose of the DOE acquisition system is to deliver on a timely basis the best value product or service to the customer while adhering to the laws, regulations, policies, and directives of the United States Government and the Department. This course examines the portion of the acquisition process commonly referred to as "procurement." This part of the process typically begins with the completion of the acquisition strategy and the development of the acquisition plan. The process proceeds through development of a solicitation, solicitation and evaluation of proposals, and contract award. Another course (see below), Contract Administration for Technical Representatives, continues through contract administration and contract closeout (although these topics are summarized at the end of this course to provide a complete picture of the acquisition process).</p>	Negotiation Strategies and Techniques 24 CLPs
Level 2	<p>Intended Audience: Prospective Level 1 Federal Project Directors, DOE Program Managers, and IPT members assigned to projects (including matrixed personnel). Project Management Simulation

Level 2 Required Course

5 days / 40 CLPs

This computer-based project management simulation enables participants to exercise and integrate a wide variety of project management skills, including developing defensible project plans; applying PM tools and techniques to plan, track, and control projects; improving project team performance; analyzing project information; identifying complex project tradeoff decisions; and recognizing when to focus on task and when to focus on process.

Intended Audience: Level 2 Federal Project Directors, DOE Program Managers, IPT members assigned to projects (including matrixed personnel). This is a Level 2 core course for certification in the Project Management Career Development Program (PMCDP).

Federal Budgeting Process in DOE

Level 2 Elective Course

4 days / 32 CLPs

This course is designed to provide DOE and NNSA program and project managers a working knowledge of Federal financial and managerial systems to accomplish their Department’s budgeting and accounting processes, including budget submissions, managing authorized funding and establishing success criteria. Participants apply the foundational skills required to successfully manage a project through its financial life cycle. These skills include: integrating projects, programs, and missions; resourcing and funding programs; validating and funding projects; effectively participating in the budget process; managing the flow of funds to your programs and projects and; effectively using financial accounting and reporting systems to attain program and project success.

Intended Audience: Prospective Level 2 Federal Project Directors, DOE Program Managers, IPT members assigned to projects (including matrixed personnel). This is a Level 2 elective course for certification in the Project Management Career Development Program (PMCDP). Other DOE personnel may wish to take this course for continuing education credit.

Course Format: 4-day instructor-led course

- 4-day instructor led classroom delivery for those wishing to take the course to meet Level II PMCDP certification requirements. This version of the course **MUST** be taken to receive PMCDP credit.

Value Management

Level 2 Elective Course

3 days / 24 CLPs

Value Management (VM) provides participants with techniques for re-examining projects with a view to reducing total project costs. Designed for Federal and contractor personnel from Senior Managers to Project Directors and their extended teams, the course includes an overview of VE/VM concepts, principles, and definitions, and the various legal and regulatory drivers that now mandate its application. It also focuses on building skills and understanding for applying VE/VM practices, tools and techniques to improve project and program cost and schedule results, especially Return on Investment (ROI).

This course also teaches skills for organizing a VM effort, structuring a job plan, and analyzing the functions of systems, equipment, facilities and supplies to achieve the lowest life-cycle costs while maintaining the essential values of safety, performance, reliability, and quality. The course applies modern practices in the field of Value Engineering and Value Management (VE/VM) that emphasize good communications and effective leadership of the people involved.

Intended Audience: Prospective Level 2 Federal Project Directors, DOE Program Managers, and IPT members assigned to projects (including matrixed personnel). This is a Level 2 elective course for certification in the Project Management Career Development Program (PMCDP).

The course includes key DOE directives (especially DOE O 450.1A, DOE O 413.3B and DOE O 430.2B) and applicable Federal regulations and executive orders.</p> <p>The course introduces participants to the wide range of environmental requirements that apply to DOE facilities and operations and the resources available to assist DOE staff and managers if they are asked to support or manage a project with potential environmental impacts. This course also serves to inform DOE employees of their roles in helping the Department to achieve its environmental sustainability goals, including reducing energy use, enhancing pollution prevention, and conserving water. This course is not meant to be an instruction manual for environmental topics at the department; rather, it aims to educate participants as to when to ask questions and to whom they should be directed.</p> <p>Intended Audience: Prospective Level 2 Federal Project Directors, DOE Program Managers, IPT members assigned to projects (including matrixed personnel). Level 3	<p style="text-align: center;">Advanced Risk Management Level 3 Required Course 3.5 days / 28 CLPs</p> <p>The purpose of this course is to provide the Federal Project Director with an advanced understanding of the concepts and applications of risk and opportunity management, within the context of federally managed Department of Energy acquisition projects. This course improves Federal Project Directors' ability to develop and execute project risk management plans and to oversee the risk management activities of their contractors.</p> <p>The course provides participants with more advanced treatment of risk management principles and concepts. It builds upon the concepts included in the basic Risk Analysis and Management course and reviews topics that are appropriate for Level 3 and 4 Federal Project Directors. It also introduces the notion of opportunity with respect to DOE acquisition project management.</p> <p>In addition to a review of topics covered in the basic course, participants discuss the impact of technology development and how new technology risk affects the typical project. The course also addresses representative project risk management software risk analysis tools, and uses two large capital and operating dollar projects to enhance the learning through case study work.</p> <p>Intended Audience: Prospective Level 3 Federal Project Directors, DOE Program Managers, and IPT members assigned to projects (including matrixed personnel). This is a Level 3 core course for certification in the Project Management Career Development Program (PMCDP). Other members of the acquisition workforce may wish to take this course for continuing education credit.</p> <p>Course Format: 3.5 days Instructor-led classroom delivery</p> <p>Equivalent Courses:</p> <ul style="list-style-type: none"> • None <p>CHRIS Code: 001042</p>

Labor Management Relations

Level 3 Elective Course

3 days / 24 CLPs

This course provides participants with a basic overview of labor management relations. Participants learn about labor laws and regulations, implementing bargaining practices, and specific methods for resolving disputes. Additionally, the course discusses techniques for working with unions and unionized employees, and presents guidance on contract interpretation.

Intended Audience: Prospective Level 3 Federal Project Directors, DOE Program Managers, and IPT members assigned to projects (including matrixed personnel). This is a Level 3 elective course for certification in the Project Management Career Development Program (PMCDP). Other members of the acquisition workforce may wish to take this course for continuing education credit.
