# Report to Congress on the Recovery of Threatened and Endangered Species

*Fiscal Years 2007-2008*

# From the Director

The ultimate goal of the Endangered Species Act (Act) is recovery of threatened and endangered species. Recovery is the process by which the decline of threatened and endangered species is arrested and threats are removed or reduced so that long-term survival of the species can be maintained in the wild, thus alleviating the need for the protections of the Act. As of September 30, 2008, the U.S Fish and Wildlife Service (Service) had lead responsibility for recovering 1,268 federally listed threatened (280) and endangered (988) species.

The purpose of this Recovery Report to Congress is to provide an update on the recovery of listed species for Fiscal Years 2007-2008. During this time, recovery has been achieved for three species. The Service has delisted the Yellowstone distinct population segment (DPS) of the grizzly bear, the bald eagle (except in Arizona), and the West Virginia northern flying squirrel. In addition, the Florida DPS of the American crocodile has been downlisted and six other species have been proposed for delisting.

Polar bear and Sonoran Desert DPS of the bald eagle (in Arizona) were added to the Federal List of Threatened and Endangered Wildlife and Plants.

As part of this Recovery Report, updates on recovery plan information are given. Recovery plans define goals for downlisting and delisting by making recommendations for specific conservation measures. The Service has demonstrated a marked improvement in finalizing recovery plans for threatened and endangered species. By the end of this reporting period, 1,087 species (85%) had final recovery plans, which is a three percent increase from two years ago. In addition, 47 more species had draft plans that were waiting to be finalized.

Because species' declines often occur over the course of decades or centuries prior to their listing, recovery often requires substantial time and resources to achieve. By conducting 5-year status reviews, the Service can determine how much progress is being made towards recovery. These reviews also help us determine whether a species should be delisted or reclassified. In the past, the Service had not regularly conducted 5-year status reviews because of other competing statutory requirements. However, recent lawsuits and notices of intent to sue have highlighted the need to undertake 5-year status reviews. The Service's Washington Office has recommended that each region complete 20% of its species' 5-year status reviews annually. So far, 887 or 70% of all listed species have had 5-year status reviews initiated, and of those initiated, 329 or 37% have been completed. Of the 329 completed 5-year status reviews, 285 (87%) recommended no change in status for the species, 23 recommended downlisting, 18 recommended delisting, and only 3 recommended uplisting from threatened to endangered.

This Recovery Report also provides information on overall species' status relative to the previous reporting period. These results are not intended to provide status review results such as are available after a 12-month petition finding or a 5-year status review. They are intended only to represent the relative progress that is being made on listed species. By the end of this reporting period, 551 species or 43% were considered stable or improving. However, there were 389 species whose status was decreasing (30%), 301 species' status was unknown (24%), and 19 species were presumed extinct (1%).

Recovering species that are threatened with or in danger of becoming extinct is a daunting task. The Service cannot accomplish this alone. We must rely on Federal, State, local agencies, Tribes, non-governmental organizations, universities, private landowners, and other stakeholders for their help. We recognize that the authorities, resources, and cooperation of all of our partners will be required to achieve recovery of threatened and endangered species.

Rowan W. Gould, Acting Director

# Report to Congress on the Recovery of Threatened and Endangered Species

## Fiscal Years 2007-2008

### Data

Data are presented for each U.S. listed species under the jurisdiction of the U.S. Fish and Wildlife Service (Service), organized by major taxonomic groupings. Data include:

- the species' inverted common name, or scientific name where no common name is available;
- the lead Service Region;
- the date the species was listed under the Act;
- the date of the species' first final recovery plan (if there is one);
- the stage of development of the recovery plan;
- the date of the species' most current recovery plan;
- the species' current listing classification;
- the species' recovery priority number;
- the date the species' 5-year review was initiated;
- the date the species' 5-year review was completed;
- the species' population status at the end of FY 2008;
- the number of actions outlined in the current recovery plan that have been implemented;
- the estimated costs for recovery, if available; and
- the estimated time to recovery (from plan completion), if available.

### Common Name

Species are listed in the table by inverted common name within their respective taxonomic groups. Where a species has more than one commonly accepted common name, the alternate name is indicated in parentheses with an "equals"

symbol followed by the alternate name. The scientific name is also given in parentheses behind the common name. Many plants and some invertebrates have no common name, so only the scientific name is given.

### Lead Region

This indicates which Service Region has the lead responsibility for the species (see Map on inside back cover). For example, a number "8" indicates a species for which the California-Nevada Regional Office has lead responsibility. Some species are wide ranging and may be found in more than one region.

### Date Listed

This indicates the date the species was added to the list of federally Endangered and Threatened Species.

### Date of First Final Plan

This indicates the date that the first final recovery plan was ap-

proved (signed by the Regional Director or Director). An N/A in this column indicates that the species does not yet have a final recovery plan.

### Plan Status

The status of recovery plan development is reported as indicated below:

- F = Final plan has been approved by the Regional Director and a Notice of Availability has been published in the Federal Register.
- D = Draft plan has been approved by the Regional Director and published in the Federal Register as available for public comment.
- RD(#) = Draft of the revised plan has been approved by the Regional Director and published in the Federal Register as available for public comment. The draft of the first revision to the final plan is recorded as RD(1), draft of the second revision to the final plan is recorded as RD(2), etc.
- RF(#) = Final revision has been approved by the Regional Director and a Notice of Availability has been published in the Federal Register. The first revision is recorded as RF(1), the second revision is RF(2), etc.
- E = Species that are exempted from recovery plan development. Species are "exempt" if the Service has determined that developing a recovery plan will not promote the conservation of the species.
- N/A = the species does not yet have an approved recovery plan.

Matt Braun/FWS

## Date of Current or Active Plan

This indicates the date of the species' most current recovery plan. An "N/A" in this column indicates that a recovery plan for the species is still under development. A date in this column that is different from the date in the Date of First Final Plan column indicates that the plan has undergone a revision (or is currently undergoing a revision) or that earlier drafts and final plans for some individual species may have been incorporated into later multi-species or ecosystem plans.

## Listing Classification

The species' listing classification, as of September 30, 2008, is identified as threatened (T) or endangered (E).

## Recovery Priority Number

The first step for the conservation of any species is to prevent its extinction. Thus the species with the highest degree of threat have the highest priority for preparing and implementing recovery plans.

Additionally, appropriate use of the limited resources available to implement the Act, must be considered. To this end, each species is assigned a recovery priority from 1 to 18 according to the degree of threats, recovery potential, and taxonomic distinctness. In addition, a species' rank may be elevated by adding a "C" designation to its numerical rank to indicate that it is, or may be, in conflict with construction or other development projects, or other forms of economic activity. Species with a high priority rank (1, 1C, 2, 2C) are those that are the most threatened and have the highest potential for recovery. Species with a low rank (16, 17, 18) are the least threatened and have low recovery potentials. See 48 FR 43098-43105 (Sept. 21, 1983), and Table 3 on 48 FR 51935 (Nov. 15, 1983) for additional information on this prioritization system.

Although Recovery Priority Numbers are intended to serve as guidelines for prioritizing development and implementation of recovery plans, many other

factors affect how we allocate limited recovery resources. The Service allocates the majority of its general recovery funding to the Regional Offices through a methodology that uses the number of species and the likely complexity of recovery, for instance a wide-ranging animal species would be weighted higher (and receive more funding) than an endemic plant. Individual regions and field offices prioritize funding for listed species based on a variety of other factors that likely include the species recovery priority rankings, degree of threat, and potential for success. However, many other factors affect how we allocate our limited recovery funding. These other factors include the number of species benefitting from an action, partnership opportunities, leveraging of funding with other partners, whether the action will benefit other species, and whether the action will promote recovery or improve species status over a large geographic area. In addition, some recovery funding is necessarily expended to maintain a species status or move a species closer to recovery and delisting. As a species moves closer towards achieving recovery, the degree of threats to the species decreases, and is reflected in a lower RPN. However, without continued funding for ongoing or remaining recovery actions, it is often impossible to maintain a species' improved status or to delist the species. Therefore, some funding decisions are made based on the need to maintain a species' improved status, on the ability to move a species closer to recovery, or to move a species to the point that it is fully recovered and ready for delisting.

Relying more on RPNs as a factor in allocating recovery funding is challenging due to the difficulty in keeping RPNs up to date to reflect the species' current status under

*The Palos Verde blue butterfly of southern California benefits from captive-rearing facilities set up to recover this endangered species.*

© Moose Peterson/Wildlife Research Photography

changing threat conditions. In some cases, it may even be difficult to assess whether changing conditions warrant a change in RPNs. For example, the Indiana bat, gray bat, and Virginian big-eared bat have RPNs of 8, 8, and 9C, respectively (indicating species with moderate threats and high recovery potential). However, the appearance of the disease “white-nose syndrome” in the Northeastern U.S. poses a potentially deadly threat to all bat species. The degree of threat is unknown but could potentially be very high. The ability to protect bat species from or remove the threat of white-nose syndrome (recovery potential) is also unknown, making it difficult to determine an appropriate RPN based on degree of threat and recovery potential. The Service moved forward to fund proposals to investigate the causes and monitor the extent of the disease over funding actions for species that have higher RPNs. In this case, the Service needed to respond quickly to a potentially grave threat before knowing enough to positively quantify it in a changed RPN. Additionally, swift actions to monitor and prevent spread of the disease are likely needed to prevent recovery potential of these species from moving from high to low. As we describe below, we are implementing several measures to ensure that RPNs are periodically reviewed and updated and expect to examine the RPNs of our listed bat species through this process.

While the Service’s RPN guidelines are intended to be used as a guide for prioritizing recovery planning and implementation rather than being an inflexible framework, we have undertaken several steps to ensure that RPNs are regularly reviewed and updated. These changes will help RPNs keep pace with the on-the-ground conditions for our

listed species, and increase their relevance in decision-making. We have implemented yearly review of RPNs during our annual performance reporting, and included review of RPNs as part of our periodic species 5-year reviews required by section 4(c)(2) of the Act. Currently, changes in RPNs can only be entered once a year in the Service’s TESS (Threatened and Endangered Species System) database during our annual perfor-

mance reporting. We are developing mechanisms in TESS that will allow us to update RPNs as needed throughout the year so that the RPN displayed in the Service’s databases won’t lag behind the actual species’ condition. This change will also allow us to display accurate RPNs on the species profiles posted on our Endangered Species public website, and to better communicate our recovery priorities to our partners and stakeholders.

## Five-year Status Reviews

The information displayed represents the five-year status reviews currently defined for the species. The initiation date is the date a notice was published in the Federal Register which announced the initiation of the five-year status review and requested any new information relevant to the species. The completion date is the date the five-year status review was signed by the Service's Regional Director or appropriate delegated authority.

## Species Status (FY 2008)

The population status of each species is identified as:

- Improving: Species for which information available indicates that the species status improved since the last reporting period (i.e. population numbers increased, threats decreased or were managed, or both).
- Stable: Species for which the information available indicates that the species status neither improved nor declined since the last reporting period (i.e., population numbers remained constant, and threats did not affect species status during reporting period).

- Declining: Species for which the information available indicates that the species status declined since the last reporting period (i.e., population numbers decreased, threats increased or continued to impact the species, or both).
- Uncertain: Species for which the information available is not sufficient to determine their status since the last reporting period (i.e. significant level of

uncertainty in effects of threats, or significant and/or extended lack of information on population numbers or other demographic characteristics over most or all the species range).

- Captivity: Species that are found only in captivity, and not in the wild within its range.
- Presumed Extinct: Species that are believed to be extinct, but may not be confirmed so, or species for which surveys have been conducted to confirm extinction, but are awaiting completion of the delisting rule.
- Presumed Extirpated in the U.S. and Extant outside the U.S.: Cross-border species believed or confirmed to no longer exist in the U.S., but still occur elsewhere within its range outside the U.S.

## Number of Actions Implemented

The “number of actions implemented” represents the total number of recovery actions identified in the implementation schedules of the recovery documents in the Recovery Online Activity Reporting (ROAR) database that have been implemented. Recovery Actions are defined as actions

*Rio Grande silvery minnow.*

Aimee Roberson/FWS

relevant to eliminating or reducing the threats identified in listing rules, recovery plans, and through subsequent 5-year reviews that are identified as such in ROAR. A recovery action in ROAR will count as “implemented” if it has an action status of ongoing current, ongoing not current, partially complete, or complete (if it has an associated completion date within the current FY). Caution needs to be applied when reviewing the total number of recovery actions implemented. Many species are included in multi-species recovery plans so some actions may be listed more than once. These data represent the number of actions implemented in FY 2008 only. Prior to FY 2008 we only collected data on the number of actions initiated for which the Service was identified as the lead or co-lead in the implementation schedule.

The “number of actions implemented” replaces the “recovery achieved” data that we have included in previous Recovery Reports to Congress. For recovery achieved, we reported a value of 1 to 4 that corresponded with a percentage of the species recovery objectives that had been achieved. However, this number did not necessarily correspond with the percentage of recovery actions implemented and we found that it was difficult to ensure that the measure was being applied consistently for all listed species. With the development and widespread use of the ROAR database, we now have an efficient means of tracking the actual number of recovery actions implemented. We believe that this value serves as a better indicator of the level of effort being invested to recover each listed species. We first began collecting these data in FY 2008 as we implemented reporting on the performance measures identified in the Endangered Species Program’s draft strategic plan.

An endangered black-footed ferret gains its freedom at a reintroduction site in Kansas.

Dan Mullen/FWS

### Estimated Costs for Recovery

This column indicates the estimated costs of recovering the species as reported in their most current final recovery plans. In many cases, this estimate is a minimum estimate because many plans include recovery actions for which the costs are yet to be determined. Multi-species plans often only report an estimated cost for recovery for all species in the plan, thus a single action might benefit multiple species simultaneously. In these cases, the total cost provided in the multi-species plan has been associated with every species from the plan. Cost estimates are not adjusted for inflation, but are relevant to the year the plan was completed.

### Estimated Time to Recovery

This reports the estimated number of years (from the date of the current plan) the recovery plan forecasts it will take the species to recover in order to begin delisting. All time estimates are based

on the assumption that adequate resources are available to implement all recovery actions identified as necessary for the recovery of the species in a timely fashion. Data are reported only for those recovery plans which provide an estimate of time to delisting. An “N/A” in this column indicates that the recovery plan only reports the time estimated to reclassification, not delisting, or that the time to delisting is expected to be determined at some later date.

Ambersnail, Kanab ( <i>Oxyloboma haydeni kanabensis</i> )	6	8/8/1991	10/12/1995	F	10/12/1995	23	N/A	N/A	E	6C	Stable	4/7/2006	N/A
Campeloma, slender (Campeloma decampi)	4	2/25/2000	N/A	N/A	N/A	N/A	N/A	N/A	E	5	Stable	8/2/2007	N/A
Cavesnail, Tumbling Creek ( <i>Antrobia culveri</i> )	3	8/14/2002	9/22/2003	F	9/22/2003	77	2,174,000	20	E	4	Stable	N/A	N/A
Elminia, lacy (snail) ( <i>Elminia crenatella</i> )	4	10/28/1998	12/22/2005	F	12/22/2005	28	N/A	N/A	T	8	Unknown	6/14/2005	8/29/2006
Limpet, Banbury Springs ( <i>Lanx sp.</i> )	1	12/14/1992	11/26/1995	F	11/26/1995	47	N/A	N/A	E	6	Stable	4/11/2006	9/15/2006
Lioplax, cylindrical (snail) ( <i>Lioplax cydostomaformis</i> )	4	10/28/1998	12/2/2005	F	12/2/2005	28	N/A	N/A	E	8	Improving	6/14/2005	8/29/2006
Marstonia, royal (snail) ( <i>Pyrgulopsis ogmorhapha</i> )	4	4/15/1984	8/11/1995	F	8/11/1995	13	N/A	N/A	E	5	Decreasing	7/28/2006	N/A
Pebblesnail, flat ( <i>Lepyrium showalteri</i> )	4	10/28/1998	12/2/2005	F	12/2/2005	28	N/A	N/A	E	5	Unknown	6/14/2005	8/29/2006
Riversnail, Anthony's ( <i>Atheanaia anthonyi</i> )	4	4/15/1984	8/13/1997	F	8/13/1997	13	422,500	N/A	E	5	Stable	N/A	N/A
Rocksnail, painted ( <i>Leptoxis taeniata</i> )	4	10/28/1998	12/2/2005	F	12/2/2005	28	N/A	N/A	T	8	Unknown	6/14/2005	8/29/2006

\*Earlier drafts and final plans for some individual species may have become incorporated into later multi-species or ecosystem plans.

GENERAL SPECIES INFORMATION				RECOVERY PLAN INFORMATION					SPECIES/RECOVERY STATUS				
Species Name	Lead Region	Date Listed	Date of First Final Plan	Plan Status*	Date of Current or Active Plan	Number of Actions Implemented	Estimated Costs for Recovery	Estimated Time to Recovery (years)	Listing Classification	Recovery Priority Number	FY 2008 Species' Status	Date 5-Year Status Review Initiated	Date 5-Year Status Review Completed
Rock snail, plicate ('Leptoxis plicata')	4	10/28/1998	12/22/2005	F	12/22/2005	28	N/A	N/A	E	5C	Stable	6/14/2005	8/29/2006
Rocksnail, round ('Leptoxis ampla')	4	10/28/1998	12/22/2005	F	12/22/2005	28	N/A	N/A	T	8	Unknown	6/14/2005	8/29/2006
Shagreen, Magazine Mountain (Mesodon magainensis)	4	4/17/1989	2/1/1994	F	2/1/1994	7	N/A	N/A	T	8	Stable	N/A	N/A
Snail, armored ('Pyrgulopsis (=Marstonia) pachya')	4	2/25/2000	N/A	D	7/1/1994	N/A	N/A	N/A	E	5	Unknown	8/2/2007	N/A
Snail, Bliss Rapids (Taylorconcha serpentiscola)	1	12/14/1992	11/26/1995	F	11/26/1995	47	N/A	N/A	T	7C	Stable	7/27/2004	N/A
Snail, Chittenango ovate amber ('Succinea chittenangoensis')	5	8/2/1978	3/24/1983	RF(1)	8/21/2006	39	N/A	N/A	T	5	Stable	7/6/2005	10/4/2006
Snail, flat-spined three-toothed ('Triodopsis platy sayoides')	5	8/2/1978	5/9/1983	F	5/9/1983	12	N/A	N/A	T	8C	Decreasing	4/21/2006	11/6/2007
Snail, Iowa Pleistocene ('Discus macclintocki')	3	8/2/1978	3/22/1984	F	3/22/1984	12	N/A	N/A	E	14	Stable	3/30/2006	N/A
Snail, Morro shoulderband (=Banded dune) ('Hemimnithoglypta walkeriiana')	8	12/15/1994	9/28/1998	F	9/28/1998	36	N/A	N/A	E	8C	Stable	7/7/2005	9/11/2006
Snail, Newcomb's ('Erimna newcombi')	1	1/26/2000	9/18/2006	F	9/18/2006	23	2,530,000	14	T	1	Unknown	3/8/2007	N/A
Snail, noonday (Mesodon clarki nantahala)	4	8/2/1978	9/7/1984	F	9/7/1984	15	N/A	N/A	T	9	Decreasing	9/21/2007	N/A
Snail, Oahu tree ('Achatinella spp.)	1	2/12/1981	6/30/1992	F	6/30/1992	44	N/A	N/A	E	2	Unknown	N/A	N/A
Snail, painted snake coiled forest ('Anguispira picta')	4	8/2/1978	10/14/1982	F	10/14/1982	14	N/A	N/A	T	8C	Stable	9/20/2005	1/16/2008
Snail, Pecos assiminea ('Assiminea pecos')	2	8/9/2005	N/A	N/A	N/A	N/A	N/A	N/A	E	5	Stable	N/A	N/A
Snail, Snake River physa ('Physa natricula')	1	12/14/1992	11/26/1995	F	11/26/1995	47	N/A	N/A	E	5C	Improving	N/A	N/A
Snail, Stock Island tree ('Orthalicus reses' (not incl. nesodryas))	4	8/2/1978	5/18/1999	F	5/18/1999	1404	N/A	N/A	T	3	Unknown	4/16/2008	N/A
Snail, tulotoma ('Tulotoma magnifica')	4	1/9/1991	11/17/2000	F	11/17/2000	29	N/A	N/A	E	8	Stable	6/14/2005	2/29/2008
Snail, Utah valvata ('Valvata utahensis')	1	12/14/1992	11/26/1995	F	11/26/1995	47	N/A	N/A	E	5C	Stable	4/11/2006	N/A
Snail, Virginia fringed mountain ('Polygyriscus virginianus')	5	8/2/1978	5/9/1983	F	5/9/1983	14	N/A	N/A	E	4	Unknown	8/29/2007	1/29/2008
Springsnail, Alamosa ('Tryonia alamosae')	2	9/30/1991	8/31/1994	F	8/31/1994	15	N/A	N/A	E	14	Stable	N/A	N/A
Springsnail, Bruneau Hot ('Pyrgulopsis brunneauensis')	1	1/25/1993	9/30/2002	F	9/30/2002	28	15,000,000	15	E	2C	Decreasing	4/11/2006	6/24/2007
Springsnail, Koster's ('Juatumia kosteri')	2	8/9/2005	N/A	N/A	N/A	N/A	N/A	N/A	E	5	Stable	N/A	N/A
Springsnail, Roswell ('Pyrgulopsis roswellensis')	2	8/9/2005	N/A	N/A	N/A	N/A	N/A	N/A	E	5	Stable	N/A	N/A
Springsnail, Socorro ('Pyrgulopsis neomexicana')	2	9/30/1991	8/31/1994	F	8/31/1994	15	N/A	N/A	E	5	Unknown	3/20/2008	N/A

Want more information on a particular endangered species or endangered species recovery effort near you? Please contact the appropriate office below:

#### **Washington D.C. Office**

Endangered Species Program  
4401 N. Fairfax Drive, Room 420  
Arlington, VA 22203  
<http://www.fws.gov/endangered/>

*Chief Division of Conservation and Classification:* Nicole Alt, 703-358-2171

*Chief Division of Consultation, HCPs, Recovery, and State Grants:* Rick Sayers; 703-358-2171

*Acting Chief Division of Partnerships and Outreach:* Jim Serfis; 703-358-2307

#### **Region One — Pacific**

Eastside Federal Complex  
911 N.E. 11th Avenue  
Portland, OR 97232-4181  
<http://www.fws.gov/pacific/ecoservices/>

*Chief Division of Endangered Species:* Patrick Sousa; 503-231-6158

*States/Territories:* California, Hawaii, Idaho, Nevada, Oregon, Washington, American Samoa, Commonwealth of the Northern Mariana Islands, Guam and the Pacific Trust Territories

# **Endangered Species Program Contacts**

#### **Region Two — Southwest**

500 Gold Avenue, SW  
Albuquerque, NM 87102  
<http://www.fws.gov/southwest/>

*Chief Division of Endangered Species:* Susan Jacobsen; 505-248-6641

*States:* Arizona, New Mexico, Oklahoma, and Texas

#### **Region Three — Great Lakes, Big Rivers**

Bishop Henry Whipple Federal Building  
One Federal Drive  
Ft. Snelling, MN 55111-4056  
<http://www.fws.gov/midwest/endangered/>

*Chief Division of Endangered Species:* T.J. Miller; 612-713-5334

*States:* Illinois, Indiana, Iowa, Ohio, Michigan, Minnesota, Missouri, and Wisconsin

#### **Region Four — Southeast**

1875 Century Boulevard  
Atlanta, GA 30345  
<http://www.fws.gov/southeast/es/>

*Assistant Regional Director for Ecological Services*  
Patrick Leonard; 404-679-7085

*States/Territories:* Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Puerto Rico, and the U.S. Virgin Islands

#### **Region Five — Northeast**

300 Westgate Center Drive  
Hadley, MA 01035-9589  
<http://www.fws.gov/northeast/endangered/>

*Chief Division of Endangered Species:* Marty Miller; 413-253-8615

*States:* Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, and West Virginia

#### **Region Six — Mountain Prairie**

134 Union Boulevard, Suite 650  
Lakewood, CO 80228  
<http://www.fws.gov/mountain-prairie/endspp>

*Chief Division of Endangered Species:* Bridget Fahey; 303-236-4258

*States:* Colorado, Kansas, Montana, Nebraska, North Dakota, South Dakota, Utah, and Wyoming

#### **Region Seven — Alaska**

1011 E. Tudor Road  
Anchorage, AK 99503-6199  
<http://alaska.fws.gov/fisheries/endangered/>

*Regional Endangered Species Coordinator:* Sonja Jahrsdoerfer, 907/786-3323

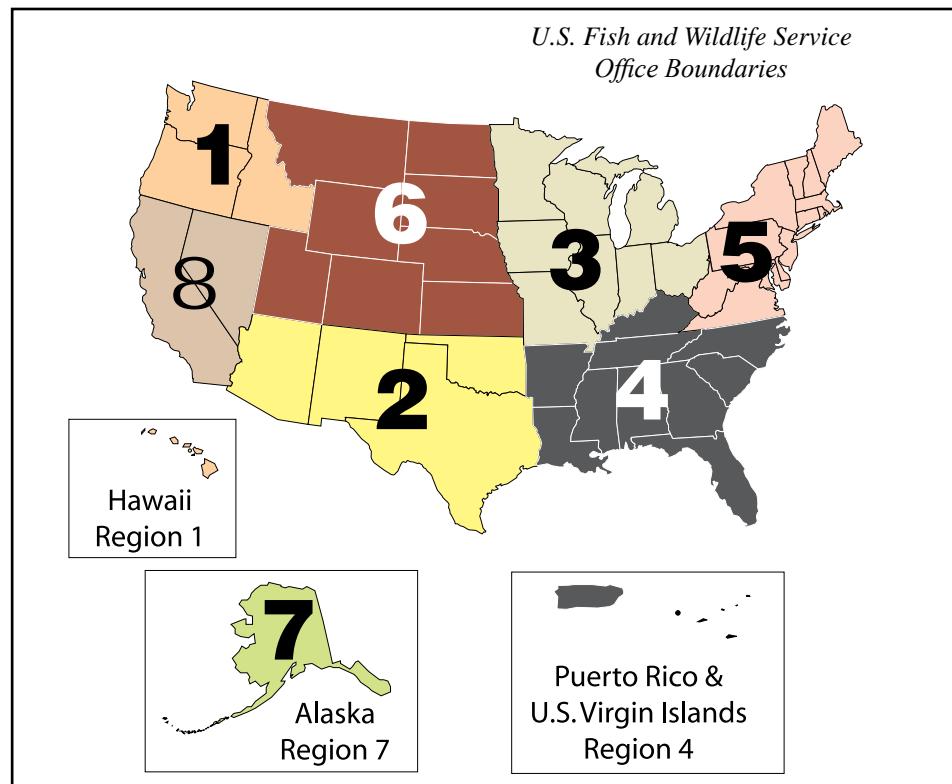

*State:* Alaska

#### **Region 8 — California and Nevada**

2800 Cottage Way, Suite W2606  
Sacramento, CA 95825  
<http://www.fws.gov/cno>

*Assistant Regional Director for Ecological Services*  
Mike Fris; 916-414-6464

*States:* California, Nevada

The U.S. Fish and Wildlife Service is responsible under the Endangered Species Act for conserving and recovering our nation's rarest plant and animal species and their habitats, working in cooperation with other public and private partners.
