

Cullman County Earth Day Celebration at West Point Elementary School

On April 19, 2013, Cullman County District Administrative Coordinator Deborah Widner and Project Coordinator Travis Kress presented an Earth Day program for West Point Elementary School 3rd graders. There were 6 classes present with approximately 135 children. They learned the importance of the preservation of the Earth for future generations. Also, each teacher was given a packet (see picture below) with information about Earth Day for them and the students.

After the Earth Day program they took a group of children outside where they presented them with an oak tree to plant. This is the 6th tree that the district has planted at this school to celebrate Earth Day.
