

Healthy Forests Reserve Program OKLAHOMA

Ozark Plateau Karst Dependent Species Conservation Initiative

Overview and Eligibility

The Healthy Forests Reserve Program (HFRP) is a voluntary program established for the purpose of restoring and enhancing forest ecosystems to:

1. Promote the recovery of threatened and endangered species
2. Improve biodiversity
3. Enhance carbon sequestration

The HFRP was signed into law as part of the Healthy Forests Restoration Act of 2003. The program was reauthorized to be carried out in the 2008 Farm Bill.

The federally listed threatened or endangered species targeted for habitat and population recovery activities in Oklahoma are the:

- Gray Bat
- Ozark Big-eared Bat
- Ozark Cavefish

The program will be offered in five counties in northeastern Oklahoma:

- Adair
- Cherokee
- Delaware
- Part of Ottawa
- Part of Sequoyah

To be eligible for enrollment, land must be private land or Tribal lands which will restore, enhance, or measurably increase the likelihood of recovery of a threatened or endangered species, must improve biological diversity, or increase carbon sequestration.
