

What Is The Compliance Date?

- Existing Sources: December 26, 2007.
- New Sources: Upon initial startup.

What Are The Permitting Requirements?

- This area source category is exempt from Title V.

What Are the Impacts?

- The only cost associated with the area source rule is for initial notifications and inspections, estimated to be \$390 per facility. This is a one-time cost.
- Emissions of HAP metals from this industry are already well-controlled as a result of existing State or local standards, permitting requirements, and/or industry practices. This area source rule is not expected to change the level of existing emissions control.

What Records Are Required?

Reporting:

- Initial Notification due no later than 120 days after publication of rule in the Federal Register.
- Affected sources not required to conduct a performance test must submit Notification of Compliance Status no later than 120 days after publication of rule in the Federal Register.
- Affected sources required to conduct a performance test must submit Notification of Compliance Status, including performance test results, within 60 days of completion of the performance test.
- No ongoing compliance reports are required beyond Title V Requirements.

Recordkeeping:

- Records to include copies of notifications submitted to EPA and records of monitoring and inspection.
- Records to be maintained in a form suitable and readily available for expeditious review.

Office of Air Quality Planning & Standards (EI 43-02)

Summary of Regulations Controlling Air Emissions from the SECONDARY NONFERROUS METALS PROCESSING INDUSTRY

NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS NESHAP (SUBPART TTTTTT)

FINAL RULE

SECONDARY NONFERROUS METALS PROCESSING (SUBPART TTTTTT)

What Is An Area Source?

- Any source that is not a major source. (A major source is a facility that emits, or has the potential to emit in the absence of controls, at least 10 tons per year (TPY) of individual hazardous air pollutants (HAP) or 25 TPY of combined HAP.)

Who Does This Rule Apply To?

- All secondary nonferrous metals processing facilities that are area sources. Secondary nonferrous metals processing facility means a brass and bronze ingot making, secondary magnesium processing, or secondary zinc processing plant that uses furnace melting operations to melt post-consumer nonferrous metal scrap to make products including bars, ingots, and blocks, or metal powders.

What Am I Required To Do?

Control Requirements

Existing Furnaces and Zinc Crushers:

- Install and properly operate a baghouse achieving at least 99% efficiency or an outlet PM limit ≤ 0.015 gr/dscf.

New Furnaces and Zinc Crushers:

- Install and properly operate a baghouse achieving at least 99.5% efficiency or an outlet PM limit ≤ 0.010 gr/dscf.
