

submitted as such to the Postal Service by a Product/Service Provider.

Section 502.30 *Provider Infrastructure* (published in the **Federal Register** of March 28, 1997, on page 14842, incorrectly references the Information Based Indicia Program Product/Service Provider Infrastructure Specifications. The first sentence of § 502.30 is hereby corrected as follows: "The Provider must establish and maintain an interface to USPS systems."

These proposed regulation changes are not intended to change any of the current published requirements for the approval and distribution of postage meters (closed systems).

The rest of the document was correct as published.

**Stanley F. Mires,**

*Chief Counsel, Legislative.*

### Revised Technical Standards for Hazardous Waste Combustion Facilities; Correction

**ACTION:** Notice of data availability; correction.

**SUMMARY:** The Environmental Protection Agency published a notice of data availability and invitation for comment in the **Federal Register** of May 2, 1997, on the following information pertaining to the proposed revised standards for hazardous waste combustors (61 FR 17358 (April 19, 1996)): Report on the status of setting national emission standards for hazardous air pollutants (NESHAPS) based on the revised emissions database; report on the selection of pollutants and source categories, including area and major sources; report on the status of various implementation issues, including compliance dates, compliance requirements, performance testing, and notification and reporting requirements; and report on the status of permit requirements, including waste minimization incentives. The notice inadvertently omitted four paragraphs and contained six incorrect numbers.

#### FOR FURTHER INFORMATION CONTACT:

Larry Denyer, Office of Solid Waste (5302W), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, 703-308-8770, e-mail address: denyer.larry@epamail.epa.gov.

## Correction

In the **Federal Register** issue of May 2, 1997, in FR Vol. 62, No. 85, insert the following four paragraphs of text between the last paragraph on page 24240 and the first paragraph on page 24241:

Option 1: Eliminate DRE Testing Except for Potentially Problematic Sources. Under this option, DRE testing would be waived for all sources, except those that are considered to be potentially problematic—sources that inject hazardous waste into the combustor at locations other than the flame zone. Thus, for example, the source discussed above that injected waste into an unfired afterburner (and failed to achieve 99.99% DRE at low CO and HC levels) would be required to perform DRE testing under this option.

Option 2: Single DRE Test for All Sources or Only for Potentially Problematic Sources. Under this option, either all or only potentially problematic sources (as defined above) would be required to perform a single DRE test, unless the facility undergoes a major modification of pollution control equipment, process change, or waste feed composition that could significantly affect combustion performance. We request comment on how to determine when such a change is about to occur and thus trigger the need for a DRE test. One approach is to rely on the requirements for applying for a revised Title V or RCRA permit modification (Class 2 or 3) to identify changes warranted a DRE re-test.

Option 3: Periodic DRE Testing for All Sources or Only for Potentially Problematic Sources. Under this option, all or specific sources must perform a periodic demonstration of DRE. Potential frequencies under consideration are a five, ten or twenty year frequency. The purpose of these tests would be to confirm that the unit is still achieving a high level of combustion performance over the life of the unit. As for option 2, a DRE test would have to be performed at any time that a major change to the facility occurred that could significantly affect combustion performance.

The Agency specifically invites comment on these options for waiving DRE testing. In addition, note that these options are not mutually exclusive.

## Correction

In the **Federal Register** issue of May 2, 1997, in FR Vol. 62, No. 85, on page 24232, in the last paragraph, in two different sentences, correct the number 15 to read: 20.

## Correction

In the **Federal Register** issue of May 2, 1997, in FR Vol. 62, No. 85, on page 24232, in the last paragraph, correct the number 33 to read: 47.

## Correction

In the **Federal Register** issue of May 2, 1997, in FR Vol. 62, No. 85, on page 24233, in the first partial paragraph, correct the number 15 to read: 20.

## Correction

In the **Federal Register** issue of May 2, 1997, in FR Vol. 62, No. 85, on page 24233, in the third full paragraph, correct the number 15 to read: 20.

## Correction

In the **Federal Register** issue of May 2, 1997, in FR Vol. 62, No. 85, on page 24233, in the third full paragraph, correct the number 33 to read: 47.

Dated: May 5, 1997.

## ENVIRONMENTAL PROTECTION AGENCY

**40 CFR Part 63**

[AD-FRL-5824-5]

### National Emission Standards for Hazardous Air Pollutants: Source Category List

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Advance notice of proposed rulemaking (ANPR).

**SUMMARY:** The Clean Air Act (Act) requires the EPA to list (for regulation under section 112 of the Act) all categories of major sources of hazardous air pollutants (HAP's), and categories of area sources if they present a threat of adverse effects to human health or the environment. The EPA has listed many sources categories, but has yet to list or regulate research and development (R&D) facilities. Today's notice provides advance notice that the EPA intends to list R&D, and solicits comments and information on the best way to list and regulate such sources.

**DATES:** *Comments.* Comments must be received on or before June 11, 1997.

**ADDRESSES:** *Comments.* Comments should be submitted (in duplicate) to: Air and Radiation Docket and Information Center (6102), Attention: Docket No. A-97-11, U.S.

Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460.

*Docket.* Docket No. A-97-11 is available for public inspection and copying from 8:00 a.m. to 5:30 p.m. Monday through Friday, at the EPA's Air and Radiation Docket and Information Center, Waterside Mall, Room M-1500, Ground Floor, 401 M Street SW, Washington, DC 20460. A reasonable fee may be charged for copying.

**FOR FURTHER INFORMATION CONTACT:** For information concerning this ANPR, contact Mr. Mark Morris at (919) 541-5416, Organic Chemicals Group, Emission Standards Division (MD-13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

**SUPPLEMENTARY INFORMATION:** The Clean Air Act (Act) requires that EPA evaluate and control emissions of hazardous air pollutants (HAP's). The control of HAP's is achieved through promulgation of emission standards under section 112 of the Act for sources that emit HAP's. The Act requires the EPA to publish a list of all categories and subcategories of sources of HAP's. This list is required to be revised (no less often than every 8 years), if appropriate, in response to public comment or new information. The EPA published an initial list of source categories on July 16, 1992. The list was last revised on June 14, 1996 (correction notice on July 18, 1996).

Section 112(c)(7) of the Act requires the EPA to "establish a separate category covering research or laboratory facilities, as necessary to assure the equitable treatment of such facilities." Such language was included in the Act because Congress was concerned that research and laboratory facilities should not arbitrarily be included in regulations that cover manufacturing operations. The Act defines research or laboratory facility as "any stationary source whose primary purpose is to conduct research and development into new processes and products, where such source is operated under the close supervision of technically trained personnel and is not engaged in the manufacture of products for commercial sale in commerce, except in a de minimis manner."

The EPA has interpreted the Act as requiring the listing of R&D major sources. It is clear from section 112(c)(7) of the Act that Congress intended for R&D to receive special treatment. The EPA has interpreted this section of the Act as requiring the creation of a separate category for R&D (as necessary to ensure equitable treatment of such

facilities); the EPA does not believe this section of the Act provides the Agency with discretion regarding whether to list R&D major sources. The EPA welcomes other interpretations (with legal basis) regarding the discretion of the EPA in listing R&D major sources.

Research and development (R&D) is performed at many sources which are already included in listed source categories. For example, R&D is performed in the synthetic organic chemical manufacturing industry (SOCMI), an industry which is addressed by the Hazardous Organic NESHAP (HON). The HON does not apply to R&D operations, regardless of whether they are located on the same site as a commercial chemical manufacturing process. In the preamble to the proposed HON rule, the EPA stated it had limited information on the operations of R&D facilities and the appropriate controls for them. The EPA stated it was uncertain how to structure a standard for R&D facilities, and concluded it would be appropriate to establish a separate source category covering R&D facilities to ensure equitable treatment of them. For reasons similar to those given in the HON, R&D has been exempted from other NESHAP's.

The EPA is now considering adding major R&D sources to the source category list. The term "major source" is defined as any stationary source or group of stationary sources located within a contiguous area and under common control that emits or has the potential to emit (considering controls), in the aggregate, 10 tons per year or more of any HAP or 25 tons per year of any combination of HAP's. Sources that emit HAP's in amounts smaller than those of a major source are called area sources.

Language in the Act specifying special treatment of R&D facilities (section 112(c)(7)), along with language in the legislative history of the Act, suggests that Congress considered inequitable subjecting the R&D facilities of an industry to a standard designed for the commercial production processes of that industry. The application of such a standard may be inappropriate because the wide range of R&D operations and sizes, and the frequent changes in R&D operations, may be significantly different from the typically large and continuous production processes.

The Act requires the EPA to list all categories of major sources of HAP's, and categories of area sources if they present a threat of adverse effects to human health or the environment. The EPA has no information indicating there are major or area R&D sources that are

required to be listed and regulated, other than those associated with sources already included in listed source categories. Although the EPA is not aware of other R&D sources that need to be added to the source category list, such sources may exist, and the EPA is seeking information about them. For example, what Federal, State, or private research facilities, hospitals, universities, military facilities, etc. require listing?

Since R&D is performed in many different industries, the EPA is considering various ways of listing and addressing R&D. R&D major sources could be listed as one category covering all R&D operations in all industries. However, it may be difficult in this case to develop standards general enough for the variety of sources, and to ensure the standards are consistent with the minimum control requirements ("floors") required by the Act. R&D could also be listed as several (or many) different source categories to account for the significant differences between sources. The source categories already listed could provide a guide for listing the R&D sources of the associated industries, that is, for each listed source category, a corresponding source category for R&D operations could be listed.

The EPA is seeking comments on the advantages and disadvantages of the different ways to list R&D facilities described above, as well as any other options for listing. The EPA is also seeking information on R&D sources so it can assess the most reasonable and practical way to list and regulate R&D. Such information includes descriptions of R&D processes, magnitude of HAP emissions and methods of HAP emission estimation, emission controls and their costs, and any existing State or local regulations that may apply to R&D facilities. The EPA also invites any trade groups associated with R&D operations to provide information and participate in the process of listing and regulating R&D.

#### **Electronic Submission of Comments**

Comments may be submitted electronically by sending electronic mail (e-mail) to: a-and-r-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file, avoiding the use of special characters and any form of encryption. Comments will also be accepted on diskette in WordPerfect 5.1 or ASCII file format. All comments in electronic form must be identified by the docket number A-97-11. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments

may be filed online at many Federal Depository Libraries.

### Administrative Requirements

Because today's notice is not a rule or a proposed rule, the EPA has not prepared an economic impact analysis pursuant to section 317 of the Act, a regulatory flexibility analysis pursuant to the Regulatory Flexibility Act, or a written statement under section 202 of the Unfunded Mandates Act of 1995. Also, this notice does not contain any information collection requirements and, therefore, is not subject to the Paperwork Reduction Act.

Under Executive Order 12866 [58 FR 5173 (October 4, 1993)], the EPA must determine whether the regulatory action is "significant" and therefore subject to Office of Management and Budget (OMB) review and the requirements of the Executive Order. The Executive Order defines "significant regulatory action" as one that is likely to result in standards that may:

(1) Have an annual effect on the economy of \$100 million or more or adversely affect, in a material way, the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlement, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of the Executive Order, the OMB has notified the EPA that it considers this a "significant regulatory action" within the meaning of the Executive Order. The EPA submitted this action to the OMB for review. Changes made in response to suggestions or recommendations from the OMB were documented and included in the public record.

### 40 CFR Part 80

[FRL-5825-3]

### Regulations of Fuels and Fuel Additives: Baseline Requirements for Gasoline Produced by Foreign Refiners

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule; notice of public hearing.

**SUMMARY:** This document announces the time and place for a public hearing regarding EPA's proposed rule to revise the requirements for imported gasoline. The Agency is proposing that a foreign refiner could choose to petition EPA to establish an individual baseline reflecting the quality and quantity of gasoline produced at a foreign refinery in 1990 that was shipped to the United States. The foreign refiner would be required to meet the same requirements relating to the establishment and use of individual refinery baselines as are met by domestic refiners. The agency published this proposed rule in the **Federal Register** on May 6, 1997 (See 62 FR 24775 for further information on the proposal).

**DATES:** EPA will conduct a public hearing on the proposed rule from 9:00 a.m. on May 20, 1997, in Washington, D.C. If you wish to testify at this public hearing, contact Karen Smith at (202) 233-9674 by Tuesday, May 13, 1997. If there are no parties interested in testifying on this proposal, the hearing will be subject to cancellation without further notification. If you want to know if the hearing has been canceled contact the person named above.

**ADDRESSES:** The public hearing will be held from 9:00 a.m. until noon at the The Wyndham Bristol Hotel, The Potomac Rooms 2430 Pennsylvania Avenue, N.W. Washington, D.C. 22037. If additional time is needed to hear testimony, the hearing will continue from 1:00 until 5:00 p.m. in the same location. Materials relevant to this document have been placed in Docket A-97-26. The docket is located at the Air Docket Section, Mail Code 6102, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, in room M-1500 Waterside Mall. Documents may be inspected from 8:00 a.m. to 5:30 p.m. A reasonable fee may be charged for copying docket materials.

Written comments should be submitted (in duplicate, if possible) to Air Docket Section, Mail Code 6102,

U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460. A copy should also be sent to Karen Smith at U.S. Environmental Protection Agency, Office of Air and Radiation, 401 M Street, SW (6406J), Washington, DC 20460.

**FOR FURTHER INFORMATION CONTACT:** Karen Smith at U.S. Environmental Protection Agency Office of Air and Radiation, 401 M Street, SW (6406J), Washington, DC 20460, (202) 233-9674. **SUPPLEMENTARY INFORMATION:** A copy of this notice is available on the OAQPS Technology Transfer Network Bulletin Board System (TTNBBS) and on the Office of Mobile Sources' World Wide Web site, <http://www.epa.gov/OMSWWW>.

### Procedures for Public Participation

#### A. Comments and the Public Docket

The Agency is proposing that a foreign refiner could choose to petition EPA to establish an individual baseline reflecting the quality and quantity of gasoline produced at a foreign refinery in 1990 that was shipped to the United States. The foreign refiner would be required to meet the same requirements relating to the establishment and use of individual refinery baselines as are met by domestic refiners. Additional requirements are also being proposed to address issues that are unique to refiners and refineries located outside the United States, related to tracking the movement of gasoline from the refinery to the United States border, monitoring compliance with the requirements that apply to parties outside the United States, and imposition of appropriate sanctions for violations. EPA is also proposing that it would monitor the quality of imported gasoline, and if it exceeded a specified benchmark, EPA would apply appropriate remedial action. EPA is proposing that the baseline for gasoline imported from refiners without an individual baseline would be adjusted to remedy the exceedance.

Persons with comments containing proprietary information must distinguish such information from other comments to the greatest extent and label it as "Confidential Business Information." If a person making comments wants EPA to base the final rule in part on a submission labeled as confidential business information, then a non-confidential version of the document which summarizes the key data or information should be placed in the public docket. Information covered by a claim of confidentiality will be disclosed by EPA only to the extent allowed by the procedures set forth in
