MEMORANDUM FOR: Distribution

SUBJECT: Approval and Implementation of the Performance Accountability Council Background Investigator Training Standards

This memorandum provides the approved Federal training standards for persons responsible for performing background investigations in support of suitability and national security adjudicative determinations. On June 30, 2008, the President issued Executive Order 13467, "Reforming Processes Relating to Suitability for Government Employment, Fitness for Contractor Employees, and Eligibility for Access to Classified National Security Information." This EO established the Performance Accountability Council (PAC) to assure continued reform, alignment, and enhancement of related investigative and adjudicative processes.

To this end, the PAC established a Training Subcommittee to develop uniform training standards to support background investigation, suitability, and security reciprocity decisions across the Federal Government. The PAC Training Subcommittee subsequently stood up three interagency working groups led by the Office of Personnel Management (OPM) and the Department of Defense to develop comprehensive training programs (skill standards, core competencies, training objectives, and Programs of Instruction) for background investigators, suitability adjudicators, and national security adjudicators.

The attached Background Investigator Training Program was unanimously approved by the PAC as the federal training standard for background investigators working for or on behalf of the Federal Government to conduct suitability and national security investigations. This standardized background investigator training will do much to support uniformity in the continued professional development of the background investigator workforce, and to promote reciprocal recognition of investigations supporting suitability for employment, fitness for duty, eligibility to access classified information, and eligibility for a sensitive position.

In addition to the attached approved federal training standards, this memorandum serves as advance notice of implementation guidance that will be developed in consultation with interested agencies. Within 180 days, the PAC Training Subcommittee will organize an interagency working group composed of representatives of interested agencies to develop and integrate implementation planning efforts. The working group will assist agencies in developing phased plans that will define how each agency will satisfy the training standards.

Each plan should address how the agency will implement the standards to include a timeline for full compliance and any resource or policy issues that may require resolution. These agency plans will then be compiled into an overarching government-wide implementation plan that will be disseminated by the Office of the Director of National Intelligence and OPM.

Background Investigator Skill Standards

This document describes the entry level background investigator function. It consists of a delineation of the work-oriented (i.e., critical work functions, key activities, and performance indicators) and worker-oriented (i.e., academic/employability knowledge and skills, and specific occupational/technical knowledge and skills) components of the skill standards for this function.

The skill standards described in this document are based on the general expectations provided below:

- Individual has completed at least four (4) weeks of basic training associated with the Background Investigation function;
- Individual will require supervision in performing the critical work functions and associated key activities in order to meet the relevant performance indicators; and
- Individual will be involved in routine background investigation cases.
