

ERRATUM: “IMPROVING THE VISUAL MAGNITUDES OF THE PLANETS IN *THE ASTRONOMICAL ALMANAC*. I. MERCURY AND VENUS” (AJ, 129, 2902 [2005])

JAMES L. HILTON
US Naval Observatory

The first sentence of the third paragraph of § 4 should read “The valid range for the relation for Mercury is $2^{\circ}.1 < i < 169^{\circ}.5$.” This change is required to make the valid range consistent with the range of phase angles observed for Mercury stated in the second paragraph of § 2.
