---

The data used in this section are from the U.S. Census Bureau Merchandise Trade Statistics (FT900: U.S. International Trade in Goods and Services) for 2014 as revised on June 3, 2015. Data for imports and exports are primarily compiled from records filed with U.S. Customs and Border Protection. Data for U.S. exports to Canada are based on import documents filed with Canadian agencies and forwarded to the U.S. Census Bureau. Estimates are made for low-value imports or exports by trading partner, and based on bilateral trade patterns. See <http://www.census.gov/foreign-trade/index.html> for more information.

## DATA NOTES

The weights reported in this section are the weights of individual products as imported or exported, i.e., fillets, steaks, whole, headed, etc. The reported import value is value of the product as appraised by the U.S. Customs Service according to the Tariff Act of 1930, as amended. It may be based on foreign market value, constructed value, American selling price, etc. It generally represents a value in a foreign country, and therefore excludes U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States.

The export value is generally equivalent to f.a.s. (free alongside ship) value at the U.S. port of export, based on the transaction price, including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation. The value excludes the cost of loading, freight, insurance, and other charges or transportation cost beyond the port of exportation.

Re-exports are commodities which have entered the U.S. as imports and are subsequently exported in substantially the same condition as when originally imported. These are also referred to as foreign exports or exports of foreign origin.
