NA:--Not available.

NOTE:--Table may not add due to rounding. Clams, oysters and mussels are reported as meat weights (excludes shell) while other identified species such as shrimp are reported as whole (live) weights. Some clam and oyster aquaculture production are reported with U.S. commercial landings. Only pen-reared aquaculture production is indicated for salmon. Weights and values usually represent final sales of products to processors and dealers. Shrimp (saltwater) are primarily Pacific white shrimp (*Penaeus vannamei*). Miscellaneous includes ornamental fish, alligators, algae, aquatic plants, eels, scallops, tilapia, and others.
