By Holly Bowen, Daily News staff writer |

A two-week cruise through the waters surrounding the Bahamas sounds like a luxury vacation, but for Logos School teacher Wes Struble, his recent trip was a twice-in-a-lifetime professional development opportunity.

Struble participated in his second Teacher at Sea Program in February, when he spent 17 days on a National Oceanic and Atmospheric Administration (NOAA) ship, the Ronald H. Brown, studying ocean currents and conditions in the Atlantic Ocean.
