Local Teacher Brings Research Experience Back to the Classroom

Posted by on April 15, 2014 | [0 comments](#)

Angela Greene, a teacher at Tecumseh Middle School in New Carlisle, recently participated in the National Oceanic and Atmospheric Administration's (NOAA) Teacher at Sea Program.

A well-known supporter of science, technology, engineering and math (STEM) education, Boehner said, "I applaud Angela on her participation in the Teacher at Sea Program. As she shares this real-world experience with her students at Tecumseh Middle School, many will continue to learn from her trip. Angela has made our local area proud."

Angela was one of 25 teachers selected from an applicant pool of 250. She spent 12 days aboard the *Gordon Gunter* with NOAA scientists conducting research on the Northern Right Whale.

Through the program, Angela gained unique insight into how NOAA scientists conduct their research. In addition to the knowledge and experience Angela was able to take back to her eighth grade class at Tecumseh Middle School, her students were able to keep up with her while she was aboard the *Gordon Gunter* by following her blog. You can view her blog, as well as additional information about her time aboard the *Gordon Gunter*, by clicking [here](#).
