 USDA U.S. Department of Agriculture

1. In these descriptions, "new" indicates this is the first time that data from the specific source are being incorporated into the component estimate for the given year, and "revised" indicates that data from the specific source were incorporated previously and now revised data from that source are being

incorporated.

2. Revisions reflect the annual revision of BEA's international transactions accounts (ITAs). For more information, see C. Omar Kebbeh and Eric Bryda, Annual Revision of the U.S. International Transactions Accounts, SURVEY OF CURRENT BUSINESS 96 (July 2016). Additionally, revisions may reflect changes previously incorporated into the ITAs but not into the NIPAs because they affected years outside of the periods open for revision. The years impacted by the incorporation of revised ITA data are noted in the "Major source data incorporated" column.

3. Revisions are not shown because this component was not previously published.

4. The statistical discrepancy is gross domestic product (GDP) less gross domestic income (GDI); it is also the difference between gross national product (GNP) and gross national income (GNI), which is GDI plus net income receipts from the rest of the world. The statistical discrepancy arises because the product-side measures of GDP and GNP are estimated independently from the income-side measures of GDI and GNI.

5. CCAAdj is calculated as capital consumption allowances less consumption of fixed capital.
