## Introduction

This report is based on findings from a nationally representative survey – *Climate Change in the American Mind* – conducted by the [Yale Program on Climate Change Communication \(climatecommunication.yale.edu\)](http://climatecommunication.yale.edu) and the [George Mason University Center for Climate Change Communication \(climatechangecommunication.org\)](http://climatechangecommunication.org). Interview dates: November 18-December 1, 2016. Interviews: 1,226 Adults (18+), 1,061 of whom are registered to vote. Average margin of error for both the full sample and registered voter subset: +/- 3 percentage points at the 95% confidence level. The research was funded by the 11th Hour Project, the Energy Foundation, the Grantham Foundation, and the MacArthur Foundation.

## Reading notes

- This report is based only on registered voters.
- References to Republicans and Democrats throughout include respondents who initially identify as either a Republican or Democrat as well as those who do not initially identify as Republicans or Democrats but who say they “lean” toward one party or the other in a follow-up question. The category “Independents” does not include any of these “leaners.”
- In all tables and charts, bases specified are unweighted, but percentages are weighted.
- Weighted percentages of each of the parties discussed in this report:
  - Democrats (total) including leaners: 46%
  - Liberal Democrats including leaners: 23%
  - Moderate/Conservative Democrats including leaners: 22%
  - Independents excluding leaners: 9%
  - Republicans (total) including leaners: 41%
  - Liberal/Moderate Republicans including leaners: 14%
  - Conservative Republicans including leaners: 27%
  - No party/Not interested in politics/Refused: 5% (included in results reported for “All Registered Voters”)
- In the appendix tables, note that: -- = 0; \* = >0 but <0.5.
- For tabulation purposes, percentage points are rounded off to the nearest whole number. As a result, percentages in a given chart may total slightly higher or lower than 100%. Summed response categories (e.g., “strongly support” + “somewhat support”) are rounded after sums are calculated (e.g., 1.3% + 1.3% = 2.6%, which, after rounding = 3%).

## Key Findings

Drawing on a nationally representative survey (n=1,226; including 1,061 registered voters) conducted soon after the 2016 election, this report describes how American registered voters view a variety of current and proposed global warming and clean energy policies. Key findings include:

### Global Warming Policies

- Seven in ten registered voters (69%) say the U.S. should participate in the international agreement to limit climate change (the Paris COP21 agreement), compared with only 13% who say the U.S. should not.
- Two-thirds of registered voters (66%) say the U.S. should reduce its greenhouse gas emissions, regardless of what other countries do.
- A majority of registered voters want President-elect Trump (62%) and Congress (63%) to do more to address global warming.
- A majority of registered voters say corporations and industry should do more to address global warming (72% of all registered voters; 87% of Democrats, 66% of Independents, and 53% of Republicans).
- Nearly eight out of ten registered voters (78%) support taxing global warming pollution, regulating it, or using both approaches, while only one in ten opposes these approaches.
- If Congress passes a fossil fuel tax, the most popular uses of the revenue are developing clean energy (solar, wind), improving America's infrastructure, assisting workers in the coal industry who may lose their jobs as a result of the tax, and paying down the national debt.
- Seven in ten registered voters (70%) support setting strict carbon dioxide emission limits on existing coal-fired power plants to reduce global warming and improve public health, even if the cost of electricity to consumers and companies would likely increase – a core component of the EPA's Clean Power Plan. Democrats (85%), Independents (62%) and Republicans (52%) all support setting strict limits on these emissions.
- Two in three registered voters (66%) support requiring fossil fuel companies to pay a carbon tax and using the money to reduce other taxes (such as income tax) by an equal amount – a plan often referred to as a “revenue neutral carbon tax.” 81% of Democrats, 60% of Independents, and 49% of Republicans support this policy.
- A large majority of registered voters say the Federal government should prepare for the impacts of global warming, prioritizing impacts on public water supplies (76%), agriculture (75%), people's health (74%), and the electricity system (71%).

## **Energy Policies**

Registered voters support diverse energy policies, including many designed to reduce carbon pollution and dependence on fossil fuels, and to promote clean energy. Democrats are the most likely to support such policies, but majorities of Independents and Republicans do as well. Policies include:

- Funding more research into renewable energy sources such as solar and wind power (82% of all registered voters, 90% of Democrats, 76% of Independents, and 74% of Republicans).
- Providing tax rebates to people who purchase energy-efficient vehicles or solar panels (80% of all registered voters, 89% of Democrats, 70% of Independents, and 71% of Republicans).
- Regulating carbon dioxide as a pollutant (76% of all registered voters, 90% of Democrats, 71% of Independents, and 60% of Republicans).
- Generating renewable energy on public land in the U.S. (83% of all registered voters, 87% of Democrats, 76% of Independents, and 79% of Republicans). Comparatively fewer support drilling or mining fossil fuels on public land (47% of all registered voters, 27% of Democrats, 46% of Independents, and 69% of Republicans).
- Most registered voters think the U.S. should use more renewable energy (81%) and less fossil fuel (55%). Support for using more renewable energy cuts across party lines (it is supported by 85% of Democrats, 78% of Independents, and 76% of Republicans).
- Half of registered voters (51%) think government policies intended to transition away from fossil fuels and toward clean energy will improve economic growth and provide new jobs. An additional one in five (21%) think it will have no impact on the economy or jobs. Only about one in four (27%) think it will reduce economic growth and cost jobs.

## **Infrastructure Policies**

- Across political lines, registered voters support a major investment in the nation's infrastructure (69%) including majorities of Democrats (75%), Independents (58%), and Republicans (67%).
- Across political lines, registered voters' highest priorities for infrastructure improvements are the nation's roads, bridges, and highways, followed by water supply systems, and the electricity grid.

The report includes these and additional policy questions broken down further, including by liberal Democrats, moderate/conservative Democrats, Independents, liberal/moderate Republicans, and conservative Republicans.

## 1. Should the U.S. Act on Global Warming?

### 1.1. Most registered voters say the U.S. should participate in the international agreement to limit global warming

In December 2015, officials from 197 countries (nearly every country in the world) met in Paris at the United Nations Climate Change Conference (Conference of the Parties – COP21) and negotiated a global agreement to limit global warming. Earth Day, in April 2016, the U.S. and 174 other countries signed the agreement, with most of the others following suit since then. During the U.S. presidential campaign of 2016, however, now [President-elect Trump said he would cancel U.S. participation in the COP21 agreement.](#)<sup>1</sup>

Seven in ten registered voters (69%) say the U.S. should participate in the COP21 agreement, compared with only 13% who say the U.S. should not. Majorities of Democrats (86%) and Independents (61%), and half of Republicans (51%) say the U.S. should participate (including 73% of moderate/liberal Republicans). Only conservative Republicans are split, with marginally more saying the U.S. should participate (40%) than saying we should not participate (34%).

<sup>1</sup> Volcovici, V., & Stephenson, E. (2016, May 27). *Trump vows to undo Obama's climate agenda in appeal to oil sector.* Retrieved from <http://www.reuters.com/article/us-usa-election-trump-energy-idUSKCN0YH2D9>.

## 1.2. Two-thirds of registered voters say the U.S. should reduce its greenhouse gas emissions, regardless of what other countries do.

Most registered voters think the U.S. should reduce its greenhouse gas emissions, regardless of what other countries do (66%). Majorities of liberal Democrats (85%), moderate/conservative Democrats (74%), and liberal/moderate Republicans (61%) take this position, while nearly half of conservative Republicans (45%) do too.

Only 7% of registered voters (including only 3% of Democrats, 9% of Independents, and 11% of Republicans) say the U.S. should *not* reduce its emissions (see Table, p. 23).

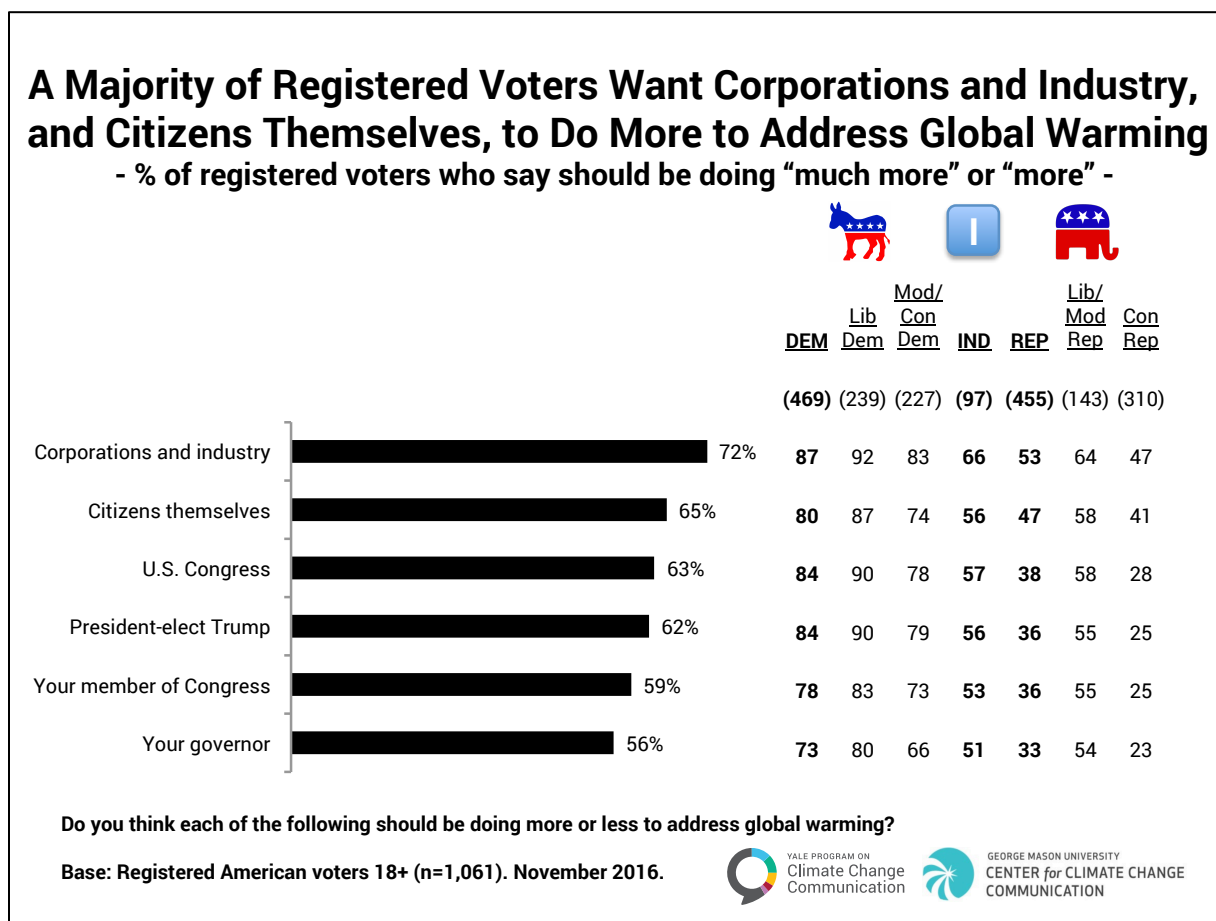

## 2. Who is Responsible to Act on Global Warming?

### 2.1. A majority of registered voters want corporations and industry, and citizens themselves, to do more to address global warming. Voters are also looking for more action from President-elect Trump, Congress, and their own Governor.

Across party lines, a majority of registered voters say corporations and industry should do more to address global warming (72% of all registered voters; 87% of Democrats, 66% of Independents, and 53% of Republicans).

Half or more of registered voters, including Democrats, Independents, and liberal/moderate Republicans, but not conservative Republicans, think citizens, the U.S. Congress, President-elect Trump, their own member of Congress, and their own governor should do more.

## 2.2. Half of registered voters think global warming should be a “high” or “very high” priority for the president and Congress.

Half of registered voters (50%) think global warming should be a high or very high priority for the president and Congress, including three in four Democrats (74%), but only 38% of Independents and one in four Republicans (24%).

### 3. Support for Policies to Address the Pollution that Causes Global Warming

#### 3.1. Nearly eight in ten registered voters support taxing and/or regulating the pollution that causes global warming, and half support doing both.

Nearly eight out of ten registered voters (78%) support taxing and/or regulating the pollution that causes global warming, and half (49%) support doing both. Only one in ten (10%) support neither approach. Nine in ten Democrats (90%) favor one or both approaches, along with two in three Independents (68%) and Republicans (68%).

Liberal Democrats most strongly favor taking one or both approaches (95%), followed by moderate/conservative Democrats (85%), and liberal/moderate Republicans (82%). Even among conservative Republicans, 61% favor taking one or both approaches.

### 3.2. Registered voters, except conservative Republicans, support setting strict carbon dioxide emission limits on coal-fired power plants – a core component of the EPA’s Clean Power Plan.

Seven in ten registered voters (70%) support setting strict carbon dioxide emission limits on existing coal-fired power plants to reduce global warming and improve public health, even if the cost of electricity to consumers and companies would likely increase.

A majority of Democrats (85%), Independents (62%), and liberal/moderate Republicans (76%) support setting strict limits; four in ten (40%) conservative Republicans support such limits.

### 3.3. Registered voters, except conservative Republicans, support requiring fossil fuel companies to pay a carbon tax.

Two in three registered voters (66%) support requiring fossil fuel companies to pay a carbon tax and using the money to reduce other taxes (such as income tax) by an equal amount – a plan often referred to as a “revenue neutral carbon tax.”

Democrats (81%), Independents (60%), and liberal/moderate Republicans (67%) are all highly likely to support a revenue-neutral carbon tax. However, only 39% of conservative Republicans support it.

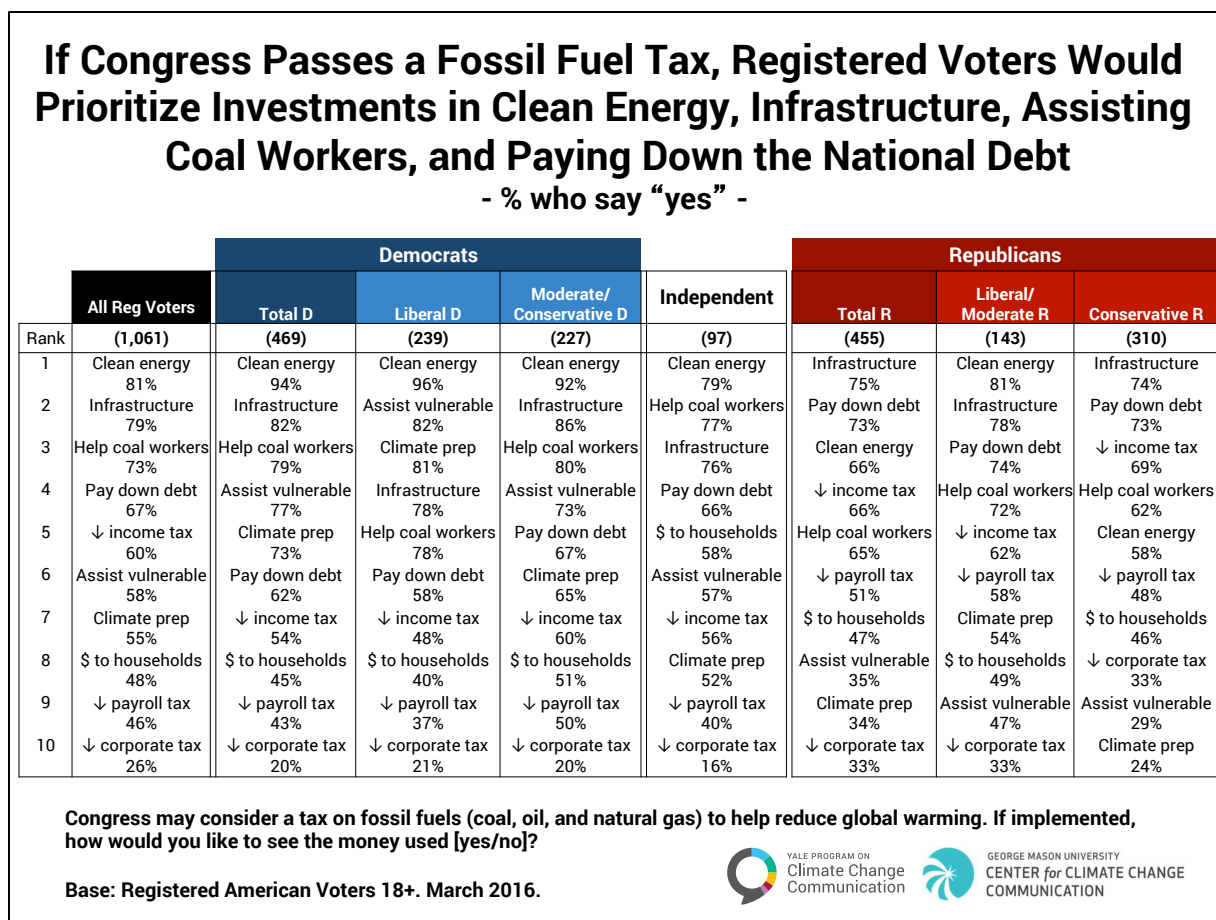

### 3.4. If Congress passes a fossil fuel tax, registered voters would prioritize investments in clean energy, infrastructure, assisting coal workers, and paying down the national debt.

If Congress were to pass a tax on fossil fuels to help reduce global warming, about eight in ten registered voters would like to see the money used to support the development of clean energy (solar, wind) (81%) and fund improvements to America’s infrastructure (79%). Two in three or more would like to see the money used to assist workers in the coal industry who may lose their jobs as a result of the tax (73%) and to pay down the national debt (67%). The least popular uses of tax revenue are reducing corporate taxes (26%), reducing payroll taxes (46%), or returning the money directly to households in equal amounts (48%).

Democrats and Republicans share many of the same priorities for fossil fuel tax revenues. For instance, 82% of Democrats and 75% of Republicans would use some of the money to fund infrastructure, and 79% of Democrats and 65% of Republicans would assist displaced workers in the coal industry.

Democrats and Republicans differ most in how they would prioritize investment in clean energy: 94% of Democrats would use some of the tax money to do this, compared with 66% of Republicans.

Survey respondents were then asked what percentage of the total revenues from a fossil fuel tax they would allocate to each option they chose. For Democrats, Independents, and liberal/moderate Republicans, the largest allocation was for developing clean energy (18% of the budget allocated, on average, among all registered voters). The next highest allocation priorities among registered voters were improving America’s infrastructure (15%), paying down the national debt (13%), and assisting workers in the coal industry (10%). The smallest allocation was for reducing corporate taxes (3%).

## If Congress Passes a Fossil Fuel Tax, Registered Voters Would Allocate the Revenues to Clean Energy, Infrastructure, the National Debt, and Assisting Coal Workers

- Average % of total fossil fuel tax revenue allocated to each option -

### 3.5. Most registered voters support generating renewable energy on public land in the U.S. About half support drilling or mining fossil fuels on public land.

Registered voters across the political spectrum support generating renewable energy (solar and wind) on public land in the U.S. This policy has the support of more than eight in ten (83%) of registered voters, including Democrats (87%), Republicans (79%), and Independents (76%).

In contrast, about half of registered voters (47%) support drilling for and mining fossil fuels (coal, oil, and natural gas) on U.S. public land. Seven in ten Republicans support this policy (69%), as do about half of Independents (46%), and about one quarter of Democrats (27%). All political subgroups, except conservative Republicans, support using public land to generate renewable energy more than to develop fossil fuels – conservative Republicans support both equally.

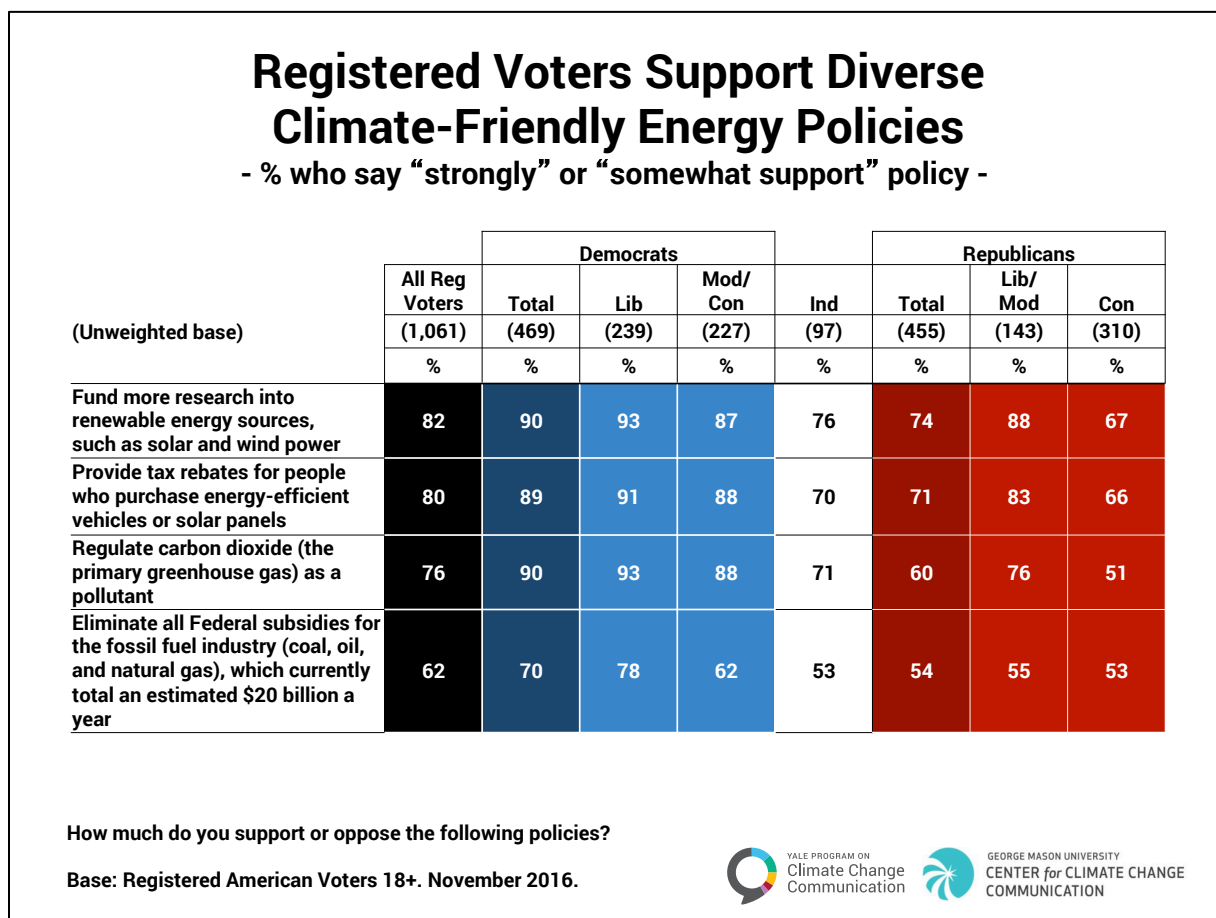

### 3.6. Registered voters support diverse climate-friendly energy policies.

Registered voters support diverse energy policies, including many designed to reduce carbon pollution and dependence on fossil fuels, and to promote clean energy. Democrats are the most likely to support such policies, but majorities of Independents and Republicans do as well, including:

- Funding more research into renewable energy sources such as solar and wind power (82% of all registered voters, 90% of Democrats, 76% of Independents, and 74% of Republicans).
- Providing tax rebates to people who purchase energy-efficient vehicles or solar panels (80% of all registered voters, 89% of Democrats, 70% of Independents, and 71% of Republicans).
- Regulating carbon dioxide as a pollutant (76% of all registered voters, 90% of Democrats, 71% of Independents, and 60% of Republicans).
- Eliminating all Federal subsidies for the fossil fuel industry (62% of all registered voters, 70% of Democrats, 53% of Independents, and 54% of Republicans).

### 3.7. A large majority of registered voters say the Federal government should prepare for the impacts of global warming.

Seven in ten or more registered voters say the Federal government should make it a priority to prepare for the impacts of global warming on public water supplies (76%), agriculture (75%), people’s health (74%), and the electricity system (71%).

Six in ten or more say preparing for global warming’s impacts on coastlines/wetlands (68%), forests/wildfires (67%), transportation/roads/bridges (67%), and public sewer systems (64%) should be a priority; about half (52%) say preparing for global warming’s impacts on state and local parks should be a priority.

## A Large Majority of Registered Voters Say the Federal Government Should Prepare For the Impacts of Global Warming

- % who say “medium” or “high” priority -

(Unweighted base)	All Reg Voters (1,061)	Democrats				Republicans		
		Total (469)	Lib (239)	Mod/ Con (227)	Ind (97)	Total (455)	Lib/ Mod (143)	Con (310)
		%	%	%	%	%	%	%
Public water supplies	76	91	91	91	69	61	78	53
Agriculture	75	88	89	87	64	61	80	52
People’s health	74	89	89	89	64	57	70	51
The electricity system	71	84	86	83	62	58	76	49
Coastlines/wetlands	68	83	89	78	62	51	70	41
Forests/wildfires	67	82	83	81	59	51	67	43
Transportation/roads/bridges	67	81	80	80	59	53	65	47

State and local parks	52	66	65	66	44	36	51	29

In your opinion, how much priority should the Federal government give to preparing for the impacts of global warming on...

Base: Registered American Voters 18+. November 2016.

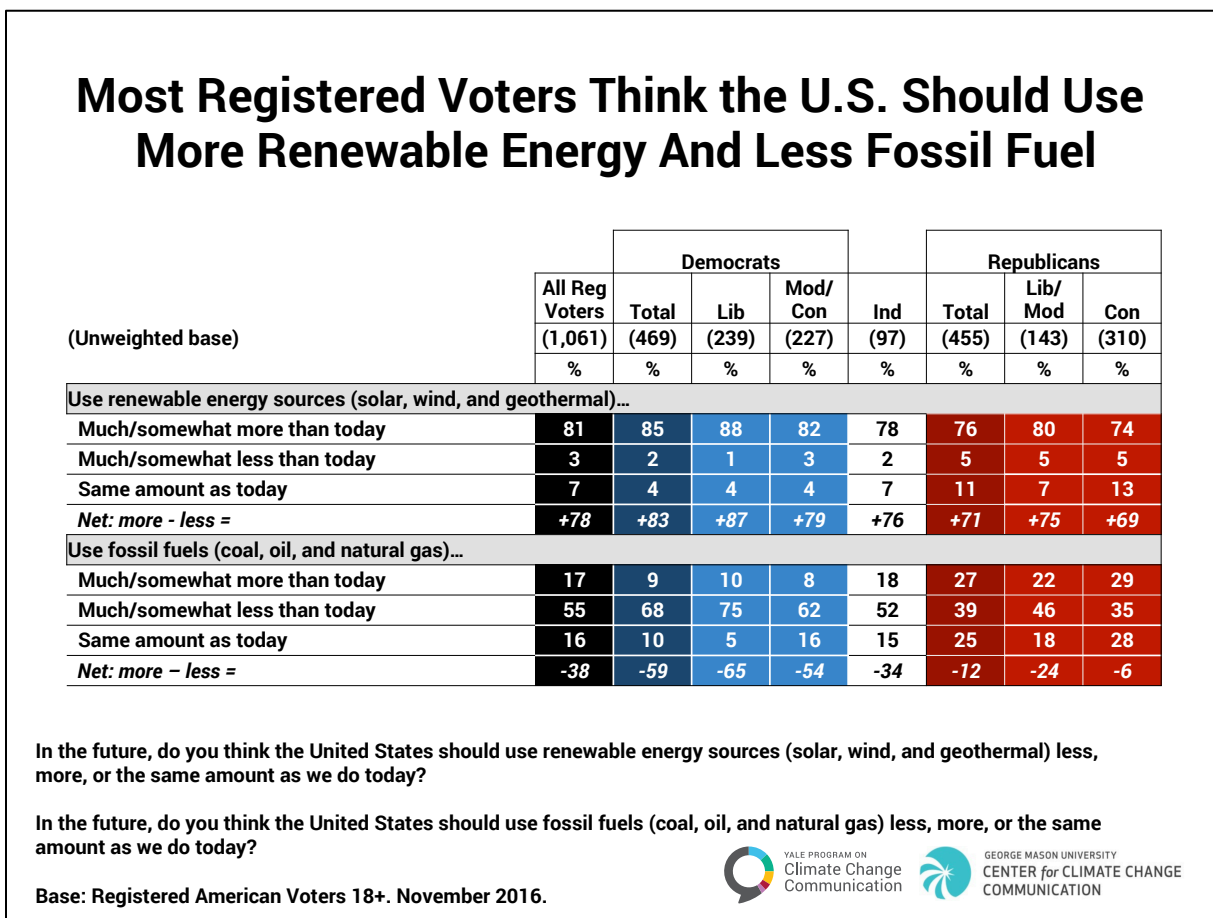

## 4. Support for Transitioning From Fossil Fuels to Clean Energy

### 4.1. Most registered voters think the U.S. should use more renewable energy and less fossil fuel.

A large majority of registered voters (81%) say that, in the future, the U.S. should use more renewable energy sources (solar, wind, and geothermal), and 61% say the U.S. should begin to do so “immediately.” This is the case across the political spectrum – with three in four or more Democrats (85%), Independents (78%), and Republicans (76%) saying the U.S. should use more renewable energy.

A majority of registered voters (55%) also say that, in the future, the U.S. should use less fossil fuel (coal, oil, and natural gas), with 38% saying that this should begin “immediately.” Majorities of Democrats (68%), and Independents (52%) say the U.S. should use less fossil fuel. A plurality of Republicans (39%) also say the U.S. should use less fossil fuel.

## 4.2. Most registered voters think transitioning from fossil fuels to clean energy will improve economic growth and create jobs.

Half of registered voters (51%) think government policies intended to transition away from fossil fuels and toward clean energy will improve economic growth and provide new jobs. An additional one in five (21%) think it will have no impact on the economy or jobs. Only about one in four (27%) think it will reduce economic growth and cost jobs.

Democrats (88%) are the most likely to think policies to transition from fossil fuels to clean energy will *either* improve economic growth and provide new jobs or have no impact. A majority of Independents (64%) and Republicans (55%) also think a clean energy transition will improve the economy or have no impact, although 52% of conservative Republicans believe it would *reduce* economic growth and cost jobs.

## 5. Support for Infrastructure Investments

### 5.1. Across political lines, registered voters support a major investment in the nation’s infrastructure.

Seven in ten registered voters (69%) support a major government investment in the nation’s infrastructure. Majorities of Democrats (75%, 82% of liberal Democrats), Independents (58%), and Republicans (67%, 66% of conservative Republicans) support a major investment in the nation’s infrastructure.

Only one in twenty (5%) registered voters oppose a major investment in infrastructure, while one in four (25%) are neutral.

## 5.2. Across political lines, registered voters' highest priorities for infrastructure improvements are roads/bridges and water systems, followed by the electricity grid.

If Congress were to invest in the nation's infrastructure, nearly all registered voters, across political lines, would prioritize using the money to repair and improve the nation's roads, bridges, and highways (94%) and repair and improve public water supply systems (92%).

Eight in ten or more would allocate funds to modernize and upgrade the nation's electricity grid (84%) and repair and improve dams and levees (81%). About seven in ten would allocate funds to repair and improve National Parks (71%) and install solar panels and wind turbines across the country (69%). More than six in ten would allocate funds to repair and improve the nation's ports and harbors (67%), modernize and upgrade the nation's oil pipelines and natural gas lines (64%), and repair and improve the nation's airports (62%).

Democrats and Republicans differ most in their preference for investments to install solar panels and wind turbines across the country (81% of Democrats favor, versus 54% of Republicans), and modernize and improve oil pipelines and gas lines (75% of Republicans favor, versus 54% of Democrats).

**Across Political Lines, Registered Voters' Highest Priorities For Infrastructure Improvements - Roads/Bridges and Water Systems**  
- % who say "yes" -

Rank	All Reg Voters (1,061)	Democrats			Independent (97)	Republicans

**If Congress were to invest in the nation's infrastructure, how would you like to see the money used [yes/no]?**

**Base: Registered American Voters 18+. March 2016.**

Survey respondents were then asked what percentage of the total infrastructure investment they would like to see allocated to each option they chose. Across the political spectrum, the largest allocation was for improving the nation’s roads, bridges, and highways (20% of the budget allocated, on average, among all registered voters), followed by repairing and improving public water supply systems (14%).

The next largest allocations – at about ten percent of the infrastructure budget, on average – were to modernize and upgrade the nation’s electricity grid (11%) and install solar panels and wind turbines across the country (10%).

### Across Political Lines, Registered Voters’ Highest Infrastructure Spending Priorities Are Roads/Bridges and Water Systems

- Average % of total infrastructure spending allocated to each option -

Rank	All Reg Voters (1,061)	Democrats			Independent (97)	Republicans

## Appendix II: Survey Method

The data in this report are based on a nationally representative survey of 1,226 American adults, aged 18 and older, 1,061 of whom are registered to vote. The survey was conducted November 18 – December 1, 2016. All questionnaires were self-administered by respondents in a web-based environment. The survey took, on average, about 26 minutes to complete.

The sample was drawn from GfK's KnowledgePanel®, an online panel of members drawn using probability sampling methods. Prospective members are recruited using a combination of random digit dial and address-based sampling techniques that cover virtually all (non-institutional) resident phone numbers and addresses in the United States. Those contacted who would choose to join the panel but do not have access to the Internet are loaned computers and given Internet access so they may participate.

The sample therefore includes a representative cross-section of American adults – irrespective of whether they have Internet access, use only a cell phone, etc. Key demographic variables were weighted, post survey, to match US Census Bureau norms.

The survey instrument was designed by Anthony Leiserowitz, Seth Rosenthal, and Matthew Cutler of Yale University, and Edward Maibach and Connie Roser-Renouf of George Mason University.

### Margins of error

All samples are subject to some degree of sampling error—that is, statistical results obtained from a sample can be expected to differ somewhat from results that would be obtained if every member of the target population was interviewed. Average margins of error, at the 95% confidence level, are as follows:

- Total registered voters: Plus or minus 3 percentage points.
- Democrats (total): Plus or minus 5 points.
- Liberal Democrats: Plus or minus 6 points.
- Moderate/conservative Democrats: Plus or minus 7 points.
- Independents: Plus or minus 10 points.
- Republicans (total): Plus or minus 5 points.
- Liberal/moderate Republicans: Plus or minus 8 points.
- Conservative Republicans: Plus or minus 6 points.

### Rounding error

For tabulation purposes, percentage points are rounded off to the nearest whole number. As a result, percentages in a given chart may total slightly higher or lower than 100%. Summed response categories (e.g., “strongly support” + “somewhat support”) are rounded after sums are calculated (e.g., 1.3% + 1.3% = 2.6%, which, after rounding = 3%).

## Appendix III: Demographics

### Registered Voters

	N (unweighted)	% (weighted)
<b>Total</b>	<b>1,061</b>	<b>100</b>
Men	537	48
Women	524	52
Millennial (18-34)	204	27
Generation X (35-50)	188	21
