

Fishing Fleet Profiles 2012 Addendum

Fishing Fleet Profiles 2012 Addendum

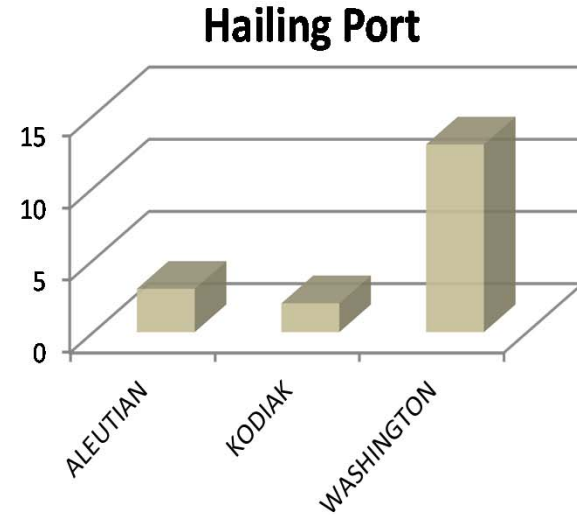

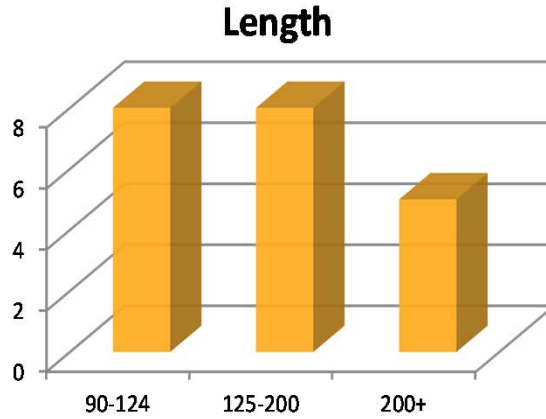

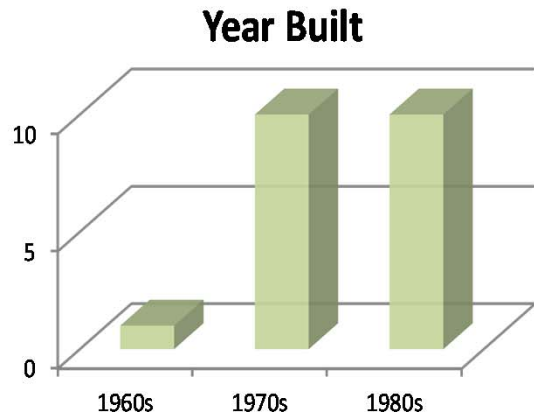

This is an addendum to the *Fishing Fleet Profiles* report published in April, 2012. This addendum profiles the same fleets, but examines catch data and vessel registration data from vessels that participated in the 2012 federal fisheries of groundfish, crab, halibut, and scallops and assigns vessels to fleets accordingly. In 2012 the Jig fleet doubled in size from 2011, this was after a significant increase from 2010 to 2011 (58%). Since the original fleet profiles were determined the Jig fleet has increased 217%. Although the number of vessels in the Halibut IFQ fleet decreased since 2010 the participation with the Jig fleet increase by 34 vessels (262%). Similar to the original *Fishing Fleet Profiles* report, the purpose is to provide the public with readily available and accessible information about the fishing fleets prosecuting federally managed fisheries off Alaska. The original document as well as information on the management of fleets and fisheries is accessible via the North Pacific Fishery Management Council's website, www.alaskafisheries.noaa.gov/npfmc.

Michael Fey
Data Manager, PSMFC-AKFIN

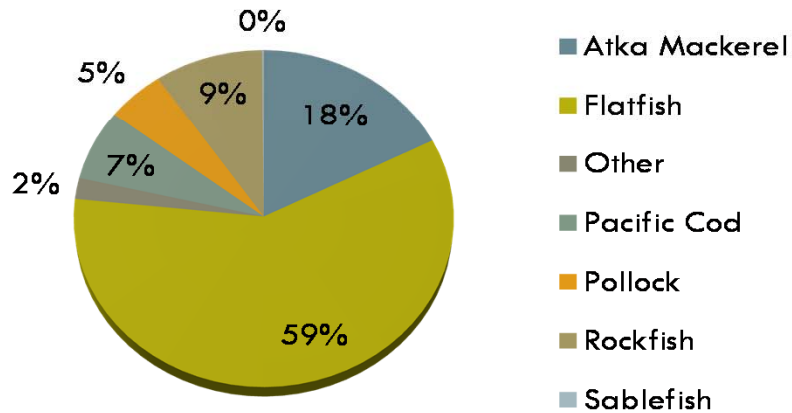

This report was prepared by Michael Fey (PSMFC-AKFIN) and Rob Ames (PSMFC-AKFIN), based on the fleet logic of the *Fishing Fleet Profiles* prepared by David Witherell (NPFMC), Michael Fey (PSMFC-AKFIN), and Mark Fina (NPFMC).

About the Cover: This picture was taken from the stern of the F/V Pacific Sun leaving the dock of Westward Seafoods in Dutch Harbor. The F/V Pacific Sun was part of four fleets in 2011, the halibut IFQ, sablefish IFQ, groundfish pot vessels, and BSAI crab fleet.

Amendment 80 Fleet

Catch by Weight

**NOTES

Fleet determined by Amendment 80 Official Record, removed CV's delivering to CPs from the fleet. Atka Mackerel catch went up 6% YOY as a percent of total catch.

- *21 total vessels
- *8 vessels are also in the CG Trawl Fleet
- *15 vessels are also in the WG Trawl Fleet
- *1 vessel is also in the AFA CP Fleet

Jig Fleet

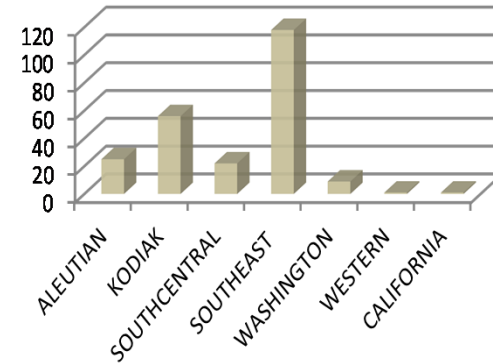

Year Built

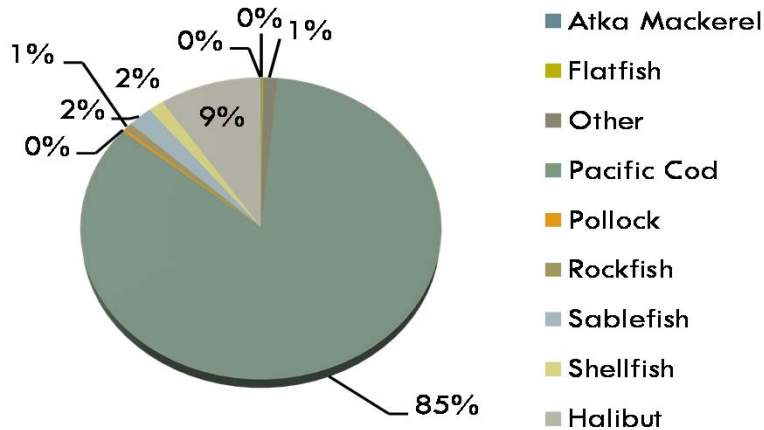

Length

Hailing Port

Catch by Weight

**NOTES

Fleet determined by a targeted groundfish jig landing on a vessel with a non-trawl llp. The fleet added 126 vessels YOY, an increase of 107%. The influx appears to be mainly Southeastern Alaska based vessels. The catch by weight of Pacific cod dropped from 94% to 85% YOY with a shift to halibut.

*244 total vessels

*47 vessels are also in the Halibut IFQ Fleet

*4 vessels are also in the Groundfish Pot Fleet

*6 vessels are also in the CV Hook and Line Fleet

*14 vessels are also in the Sablefish Fleet

*3 vessels are also in the Halibut CDQ Fleet
