**FOOTNOTES:**

~ Vessels participating in the "Gulf of Alaska sablefish trawl fishery" were part of the Gulf of Alaska rockfish trawl fishery; trips were designated as sablefish trawl when sablefish was the predominate retained species.

a Landings of this species are prohibited in the federal groundfish fisheries.

b Greenland halibut (*Reinhardtius hippoglossoides*) is also commonly called Greenland turbot and this is the market name and fishery name for this species in Alaska.

c Species is not landed in the federal groundfish fisheries (forage/non-target species).

d Flathead sole as currently managed by the North Pacific Fishery Management Council in the BSAI represents a two-species complex consisting of true flathead sole (*Hippoglossoides elassodon*) and its morphologically-similar congener Bering flounder (*H. robustus*).

f Prior to the 2012/2013 groundfish harvest specifications, dusky rockfish were managed as part of the Gulf of Alaska pelagic shelf rockfish complex with widow and yellowtail rockfish. In the 2012/2013 groundfish harvest specifications, widow and yellowtail rockfish were removed from the complex and included with the 'other rockfish' species group. Dusky rockfish were managed as a separate, individual species.
