COMMENTS OF NEW YORK INDEPENDENT SYSTEM OPERATOR, INC.

The New York Independent System Operator, Inc. ("NYISO") submits these comments in the above-captioned proceeding. On August 17, 2011, the NYISO filed a Motion to Intervene and Request for Comment Period (the "NYISO Motion"). The NYISO appreciates the comment period granted by the Department.

COMMENTS

A. Operating Rules

The NYISO Motion expressed concerns that proposed rules developed by International Transmission Company d/b/a *ITCTransmission* ("ITC"), the Midwest Independent Transmission System Operator, Inc. ("MISO") and the Independent Electricity System Operator of Ontario ("IESO") for operating the Phase Angle Regulators ("PARs") at the Ontario/Michigan interface could adversely affect the reliability of transmission service in New York.

The NYISO's reliability concerns related to the modeling of the PARs in the NERC Interchange Distribution Calculator ("IDC") have been addressed by the additional explanation of how the PARs at the Ontario/Michigan interface will be operated, and the explanation of the intended meaning of the term "Max Tap," contained in the Joint Comments of the MISO and the

IESO Answering Petition To Intervene and Request for a Comment Period of NYISO, filed in this proceeding on October 12, 2011.

B. Settlement Agreement

The NYISO has received a service copy of a settlement agreement filed today in this proceeding by ITC, MISO, PJM Interconnection, L.L.C. ("PJM") and others (the "Settlement Agreement").

Paragraph 2 of the Settlement Agreement refers to a data collection arrangement among MISO and PJM (with IESO intending to submit comparable data) reflected in a Letter Agreement that is Attachment 1 to the Settlement Agreement. The NYISO is currently working with MISO, ITC and PJM to consider whether, and on what terms, NYISO is willing to participate in the data collection arrangement.

Respectfully submitted,

Alex M. Schnell
New York Independent System Operator, Inc.
