PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2010: 104 projects funded. Major program accomplishments to highlight include: 1) The Gulf Coastal Plains & Ozarks (GCPO) LCC and its partners have developed habitat modeling capabilities in its geographic area. Two new working groups, the Alligator Gar Conservation Group and the Louisiana Pearlshell Mussel Group, have begun to model habitat needs for these species, which will characterize their existing habitats, identify potential areas of new or unknown populations, and identify areas with potential for restoring populations. The modeling process will also be used as a template for aquatic habitat models for similar species within the GCPO and other LCCs with similar habitats and species. 2) The Plains and Prairie Pothole (PPP) LCC funded a project to complete the National Wetland Inventory for the Northern Great Plains. The PPP partnered with the State of Montana to complete digital maps of wetlands to cover the LCCs entire geographic area. These wetland

maps are essential for efficient conservation planning and delivery. 3) The Plains and Prairie Pothole LCC is funding a project to assess the impacts of wildlife habitat protection and restoration on rural communities in the Prairie Pothole Region. A primary factor contributing to the ongoing decline in rural communities is the lack of economic diversity as increased temperatures and reduced water availability may significantly impact traditional agricultural crop production. This project will analyze the economic significance of agricultural tillage operations and wildlife habitat activities to local communities. Fiscal Year 2011: (anticipated): Anticipated 120 projects will be funded to develop explicit and measurable biological objectives for populations of focal species to guide conservation guide and delivery; apply and refine dynamic population-habitat models and other decision-support tools to enable partners to more effectively manage species at landscape scales; apply down-scaled climate models and landscape scales to predict effects on fish, wildlife, plants, and their habitats; design and evaluate short and long term wildlife adaptation approaches to help conserve populations at landscape scales; identify and/or design protocols and methodologies found best suited to monitoring and inventorying species, habitats, and ecological functions and structures at landscape scales.

The information from these projects will provide LCCs fundamental science capacity to: 1) drive landscape-scale planning; 2) produce biological assessments (plans) and conservation designs that incorporate specific strategies and actions that will help fish, wildlife and plants adapt to changing habitats; and 3) position member organizations of LCCs and other conservation organizations to act decisively and confidently to implement those strategies on-the-ground in ways that help fish, wildlife and plants survive in a changing world. Fiscal Year 2012: (anticipated): Anticipated 150 projects will be funded and focused on: species risk and vulnerability assessments; inventory and monitoring; population and habitat assessments; biological planning and conservation design; management evaluation and research; and conservation genetics.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: Funded projects include:

The Arctic LCC is funding projects that bring together environmental physicists, GIS analysts and polar bear biologists to predict locations for polar bear dens given climate and weather variables, such as snowfall, wind, and topography. This decision support tool will increase planners' ability to route industrial ice roads from oil and gas development to minimize conflicts with denning polar bears. Partners include: FWS Marine Mammal Management, FWS Endangered Species Program, USGS Coastal Studies, USGS Marine Polar Bear Project, DOE North Slope Decision Support Tool project team, UAF Water Environment Research Center, and Alaska Department of Fish and

Game.

The Great Northern LCC Steering Committee serving the Montana and Wyoming area recognized the considerable geographic overlap between multiple entities, including the Western Governors Association, BLM, USFS, and Montana Fish, Wildlife & Parks. A demonstration project was approved to ensure that these entities work closely together, with efforts that are not duplicative. The Great Northern LCC, which counts these entities as partners, can play a primary role in this demonstration project by developing agreed upon tools, systems and assessments which align work and connect the goals of these independent players. Moreover, LCC work assists with data acquisition in the Greater Yellowstone area and provides a centralized body to facilitate communications with stakeholders, managers, and partners.

The Gulf Coastal Plains & Ozarks (GCPO) LCC has worked on an integrated coastal assessment as part of the Southeast Regional Assessment Project for USGS's National Climate Change and Wildlife Science Center. GCPO LCC funded an expansion of the assessment to the entire coastline within the GCPO geography. Objectives of the assessment include: 1) predicting coastal erosion and inundation under a range of sea level rise scenarios; 2) assessing the impact of potential sea level rise on coastal ecosystems and related wildlife resources, and; 3) developing visual products to help local resource managers anticipate sea level rise, and design adaptations to projected changes. Fiscal Year 2011: (anticipated): Anticipated funding opportunities will be focused on funding projects to develop explicit and measurable biological objectives for populations of focal species to guide conservation guide and delivery; apply and refine dynamic population-habitat models and other decision-support tools to enable partners to more effectively manage species at landscape scales; apply down-scaled climate models and landscape scales to predict effects on fish, wildlife, plants, and their habitats; design and evaluate short and long term wildlife adaptation approaches to help conserve populations at landscape scales; identify and/or design protocols and methodologies found best suited to monitoring and inventorying species, habitats, and ecological functions and structures at landscape scales. Fiscal Year 2012: (anticipated): Anticipated funding opportunities will be focused on funding projects related to: species risk and vulnerability assessments; inventory and monitoring; population and habitat assessments; biological planning and conservation design; management evaluation and research; and conservation genetics.

CRITERIA FOR SELECTING PROPOSALS:

Proposed projects will be selected on the basis of how well they meet the program and/or project-specific criteria detailed in individual Landscape Conservation Cooperative funding opportunity postings. Criteria will vary depending on the scope of the program or project for which applications are being accepted.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: (actual): Funded projects include: 1) National Stream Gauge Network Gap Analysis. The USGS National Climate Change & Wildlife Science Center will identify and prioritize flow and water level information gaps required to improve precision and accuracy for water dependent climate change adaptation predictive models; 2) Best Land Management Practices Under Climate Change. The Wildlife Habitat Council (WHC), National Wildlife Federation (NWF), NatureServe, the Refuge System, the FWS National Conservation Training Center, and several corporate biologists will develop guidance to support the planning and implementation of natural resource land management practices in the context of climate change. The product will be a handbook and/or web-based tool, in the context of the broadly accepted best management practices (BMPs) concept. It will catalogue ongoing work, identify criteria characterizing such projects, and facilitate deconstructing complex issues such as sea level rise into addressable resource management problems. 3) Dynamic Linear Modeling. The U.S. Geological Survey, University of Washington, University of Massachusetts, and U.S. Fish and Wildlife Service will work to develop models that bridge the gap between very broad-scale empirical models with lots of uncertainty and fine-scale, mechanistic models that account for every drop of water, but are not feasible at larger landscape levels. The models developed under this proposal are necessary precursors to modeling the impacts of climate change on hydrologic regimes which play a critical role in sustaining aquatic natural resources. In addition, these funds will help address unmet adaptive science needs of the Service such as: Creation of the National Fish, Wildlife, and Plants Climate Adaptation Strategy (Strategy). The Strategy will provide a unified approach reflecting shared principles and science-based practices for reducing the negative impacts of climate change on fish, wildlife, plants, habitats, and our natural resource heritage. The Strategy is a high-level framework outlining how Federal, state and tribal governments can collaborate to address the climate-related threats to

our nations fish, wildlife, and plant resources. The Service is partnering with other Federal agencies, State fish and wildlife agencies, nongovernmental organizations, academic institutions, landowners and other stakeholders to develop the Strategy using the most up to date scientific tools and information; The relationship between fish and wildlife (e.g. golden eagles) and renewable energy development; Invasive species identification, assessment and control; The population distribution and habitats of threatened and endangered species such as polar bear and Stellers eider, and; The identification of distinct population and management units in order to maintain genetic diversity essential to preserving healthy, resilient populations of fish, wildlife and plants. Fiscal Year 2012: (anticipated): Anticipated funding opportunities will be focused on funding projects related to: species risk and vulnerability assessments; inventory and monitoring; population and habitat assessments; biological planning and conservation design; management evaluation and research; and conservation genetics.

CRITERIA FOR SELECTING PROPOSALS:

Proposed projects will be selected on the basis of how well they meet the program and/or project-specific criteria detailed in individual Adaptive Science funding opportunity postings. Criteria will vary depending on the scope of the program or project for which applications are being accepted.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2010: The National Cooperative Fisheries Scholars Program (NCFSP) at the University of Arkansas, Pine Bluff continues to meet its objectives. The NCFSP continues to offer 4-year full scholarships to undergraduate students earning their Bachelor of Science degree in Fisheries Biology at UAPB. Because minorities interested in careers in natural resource management are rare, the NCFSP has continued to successfully recruit prospective students nationwide. Over the last several years, the NCFSP has developed contacts with vocational agriculture teachers, math and science instructors, and guidance counselors at high schools across the country. The program relies on these contacts to identify likely applicants for scholarships. The NCFSP also actively recruits among high school students that have participated in the American Fisheries Societys Hutton Junior Fisheries Biology Program. High school students who participate in the Hutton Program and still want to pursue a career in fisheries biology are less likely to change majors while earning their fisheries degree, and more likely to take advantage of the numerous professional development opportunities available while in school. These students also are more likely to pursue graduate degrees in fisheries or a related natural resource field. Several NCFSP participants have secured summer internships with USGS research facilities to enhance their educational experience. Other graduates of the NCFSP at UAPB have gone on to be accepted to graduate school in one of the Cooperative Research Unit program host universities. Fiscal Year 2011: Not Available. AML sites often provide critical habitat for protected and/or sensitive wildlife species such as bats and desert tortoise. Many AML sites are protected cultural sites. The AML Program mitigates AML sites throughout the national park system. 16.309 LAW ENFORCEMENT ASSISTANCE NATIONAL INSTANT CRIMINAL BACKGROUND CHECK SYSTEM

(NICS)

FEDERAL AGENCY:

Federal Bureau of Investigation, Department of Justice

AUTHORIZATION:

TYPES OF ASSISTANCE:

PROVISION OF SPECIALIZED SERVICES

USES AND USE RESTRICTIONS:

The NICS Operations Center conducts NICS background checks by analyzing and evaluating criminal history records to determine whether the transfer of a firearm to an individual may violate State or Federal law. The staff at the Operations Center provides technical and operational support to users, provides customer service to FFLs and State Point of Contacts (POCs), processes appeals of denied transactions, and prepares management and statistical reports on the operation of the NICS.

Applicant Eligibility:

All persons purchasing firearms.

Beneficiary Eligibility:

The Federal Firearm Licensees and American public.

Credentials/Documentation:

Initial request for services must be from a licensed and enrolled FFL. For checks performed by the FBI, FFLs may contact the NICS Section by telephone via a toll-free number or, electronically by the NICS E-Check via the Internet. The FFLs will provide the required descriptive information requested on the Bureau of Alcohol, Tobacco, Firearms and Explosives Form 4473 and each background check is assigned a unique NICS Transaction Number. If a NICS background check results in no matching records, the transfer will be a proceed.

If one or more matching records are found, a NICS Legal Instruments Examiner (Examiner) will review the record(s) to determine if the subject of the record may be identical with the prospective purchaser and to determine if the record contains state and/or federal firearm prohibitive criteria which may prohibit the transfer of the firearm. If it is determined that prohibitive criteria exists, the NICS Examiner will advise the FFL to deny the firearm transaction. If potentially prohibitive criteria exists and more information is required in order to make the determination, the NICS Examiner will advise the FFL to delay the firearm transaction. When a transaction is delayed, the NICS Examiner begins extensive research on the potential prohibitor. The NICS Examiner will contact local, state, and federal law enforcement agencies and courts to resolve questions about an individual who appears to be prohibited from purchasing or possessing a firearm, as well as to request clarification regarding information in a prior record or disposition. When the research is complete, the NICS Examiner calls the FFL and gives a decision on the firearm transaction. Individuals who are denied the purchase of a firearm will be advised by the FFL of the process for appealing the denial decision if he/she believes it is incorrect. To provide communities with critical resources that help them forge partnerships across agencies and disciplines to respond effectively to violent crimes against women. OVW's Technical Assistance Program was created to provide grantees with the expertise and support they need to develop and implement successful local projects, increase victim safety, and bolster offender accountability. Grantees participate in educational initiatives, conferences, peer-to-peer consultations, and targeted assistance that allow them to learn from experts and one another about how to overcome obstacles and incorporate promising practices in their efforts to address violence against women. The Federal share of these grants may not exceed 75 percent of the total costs of the projects described in the applications. States may satisfy this 25 percent match through in-kind services. All funds designated as match are restricted to the same uses as the Office on Violence Against Women funds and must be expended within the grant period. States and subgrantees may apply for a waiver of the match requirement based on an adequate demonstration of financial need. Match may not be required in subgrants for victim services or tribes.

This program has MOE requirements, see funding agency for further details.

States are responsible for submitting State reports and ensuring that subgrantees submit annual progress reports as well. Grantees receiving funding under the ARRA are also required to submit quarterly financial and programmatic reports. Expenditure reports are not applicable. Performance monitoring is not applicable.

Fiscal Year 2010: In fiscal year 2010, the Consumer Price Indexes (CPI), Producer Price Indexes (PPI), International Price Indexes (IPP), and Consumer Expenditure Surveys (CE) continued, as did regular publication of data from these prices statistics programs. During 2010, the CPI continued work on introducing a new sample of housing units and a process for updating these units on a continuous basis. The PPI continued to research and develop new aggregation structures for indexes that reflect both goods and services in its stage of processing-type outputs. The CE began a field test on measurement issues of the Interview survey, such as survey length, respondent burden, and the use of global questions. In addition, the CE developed questionnaire changes that were implemented in the Interview Survey in 2011 to keep the survey current with new products and to support CPI requirements. Fiscal Year 2011: In fiscal year 2011, the Consumer Price Indexes (CPI), Producer Price Indexes (PPI), International Price Program (IPP), and Consumer Expenditure Surveys (CE) programs continued production of core data series. In addition, the CPI continued work on introducing a new sample of housing units and a process for updating these units on a continuous basis. The PPI continued its program of outreach to stakeholders on the results of the experimental alternative aggregation index structures that reflect both goods and services in stage of processing-type products, first released in February 2011. IPP will begin calculating variance estimates for aggregate import and export price indexes. The CE will complete a field test on measurement issues of the Interview Survey, such as survey length, respondent burden, and the use of global questions. In addition, the CE will implement questionnaire changes to the Interview Survey to keep the survey current with new products and to support CPI requirements. PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2010: The Occupational Safety and Health Statistics (OSHS) program continued to produce data on occupational injuries, illnesses, and fatalities. The Survey of Occupational Injuries and Illnesses (SOII) produced statistics on nonfatal occupational injuries and illnesses including industry counts and frequency rates as well as information on case circumstances and worker characteristics for nonfatal injuries and illnesses requiring days away from work. During the fiscal year, the survey produced national estimates covering State and local government employees for the first time. The Census of Fatal Occupational Injuries (CFOI) produced fatal work injury counts at the national, State, and major metropolitan area levels and fatality rates at the national and State levels. The BLS is working with its State partners and others to research a potential SOII undercount, with results expected by the end of 2012. OSHS also released a major revision to its Occupational Injury and Illness Classification System (OIICS) during the fiscal year. The National Compensation Survey (NCS) began publishing estimates of employer compensation (wage and benefit) costs for several major metropolitan areas; these data will continue to be published annually. The program also released several special publications highlighting specific employee benefit issues, including sick leave provisions and frozen defined benefit plans. Fiscal Year 2011: The National Compensation Survey (NCS), in addition to producing its regular data on wages and benefits, released new data on health care benefits to be used by the Department of Health and Human Services in support of the Patient Protection and Affordable Care Act. The Occupational Safety and Health Statistics (OSHS) program continued to produce its annual data on occupational injuries, illnesses, and fatalities. Incidence rates for State and local government occupations were made available for the first time for cases with days away from work. In addition, the Census of Fatal Occupational Injuries (CFOI) released a new web-based data collection system to its State partners to improve the efficiency of data collection. 17.201 REGISTERED APPRENTICESHIP AND OTHER TRAINING FEDERAL AGENCY:

Employment Training Administration, Department of Labor

AUTHORIZATION:

National Apprenticeship Act of 1937 (Fitzgerald Act), Title 29, Part 29, Public Law 075-75-308, 50 Stat. 664, 29 U.S.C 50-50a-50b.

OBJECTIVES:

To stimulate and assist industry in the development, expansion, and improvement of Registered Apprenticeship and other training programs designed to provide the skilled workers required by U.S. employers, ensure equal employment opportunities in Registered Apprenticeship and other training programs, and ensure the quality of all new and existing Registered Apprenticeship programs.

TYPES OF ASSISTANCE:

Information; Project Grants; Training

USES AND USE RESTRICTIONS:

Under the Office of Apprenticeship (OA), apprenticeship training programs and apprentices are registered in 25 States. OA also provides technical assistance and works closely with State Apprenticeship Agencies (SAAs) in the remaining 25 States, the District of Columbia, and three territories that register programs and apprentices in accordance with Federal standards. OA provides information on existing and recommended standards of training in Registered Apprenticeship as well as on other types of industrial skill improvement programs. The wage rates of apprentices in registered programs (Federal and State) are exempt from the prevailing wage requirements of the Davis-Bacon Act and the Service Contract Act. Registered Apprenticeship is the combination of learning on-the-job and related technical and theoretical instruction in a skilled occupation. Registered programs are driven directly by the demands of the labor market. The training is industry-driven, voluntarily sponsored by individual employers, employer associations, and/or by joint employer-employee groups. OA brings these entities together, as appropriate, to formulate Registered Apprenticeship training programs which meet the federal standards. Various educational institutions and sponsors provide theoretical and related instruction. Special efforts are being made to introduce the apprenticeship concept of training into high-growth/emerging industries and occupations and also to build a pipeline of skilled workers, particularly in the health care, green jobs, and advanced manufacturing sectors. The Advisory Committee on Apprenticeship (ACA) is an advisory board to the Secretary of Labor whose members represents employers, labor organizations, members of the public, as well as the education community, and others entities with an interest in skill training. The ACA provides advice and recommendations to the Secretary of Labor on apprenticeship and training issues. Special grants are provided to eligible organizations to assist employers and labor unions in placement and retention of women in apprenticeship and nontraditional occupations.

Applicant Eligibility:

Employers, a group of employers, or an association of employers, or individual employers with or without in each case the participation of a labor union. For grants: community based organizations, which may be faith based - see announcement of solicitation for grant applications.

Beneficiary Eligibility:

Individuals applying for acceptance into an apprenticeship training program must be at least 16 years old and must satisfy the apprenticeship program sponsor that they have sufficient ability, aptitude, and education to master the rudiments of the occupation and to satisfactorily complete the related theoretical instruction required in the program.

Credentials/Documentation:

Along with the completed application form, each prospective apprentice may be required by the sponsor to submit a transcript of school subjects and grades, proof of age, an honorable military discharge (if applicable), and a high-school diploma or equivalence certificate (if applicable). References from all previous employers may be required. This program is excluded from coverage under OMB Circular No. A-87.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Prospective program sponsors must meet with an OA or SAA field representative, as appropriate, to develop a set of apprenticeship training

program standards. These include the age and educational background of apprentices, and a schedule of the work processes and related theoretical instruction subjects to be covered during the training program. The program will be registered if it meets Federal requirements covering (a) the apprenticeability of the occupation(s) and (b) the suitability of the training standards for providing apprentices with sufficient knowledge to become skilled workers. Grants for projects are awarded on a competitive basis, announced in Solicitation for Grant Applications (SGAs) in the Federal Register and also on ETA's Internet website at <http://www.doleta.gov>. To compete for a grant, organizations develop a proposal and budget that demonstrate how the organization will provide services to a targeted population. The SGA provides all of the necessary information for applying for federal assistance.

Award Procedure:

Not applicable for advisory services and counseling type of assistance. Procedures for grant projects are specified in the applicable request for proposals. Generally, the procedure is as follows: A technical review panel composed of staff from ETA program offices as well as peer reviewers evaluates eligible submitted applications. The panel prepares a report for the ETA Grant Officer identifying the strengths and weaknesses of the application and the cumulative rating. Once selections are made by the Grant Officer, an Award Notification is sent through the appropriate congressional channels for notification. After awardees are notified, the list of awardees is posted on the ETA website at www.doleta.gov. If an application is rejected, a letter is sent to the applicant as notification that they were not selected as a recipient of the grant.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

For grants, from 45 to 90 days.

Appeals:

OA refusal to register programs and OA de-registration of existing programs may be appealed to the OA Administrator as provided in Title 29 CFR Part 29. For grants, procedures for each project are specified in the applicable request for proposals.

Wagner-Peyser was amended by the Workforce Investment Act of 1998, making the Employment Service part of the One-Stop Career Center delivery system. Wagner-Peyser funded activities are an integral part of the One-Stop Career Center delivery system that provides an integrated array of high-quality services that workers, job seekers, and businesses can access services under one roof in easy-to-reach locations, with many services also offered through self-service electronic access. These services provide universal access to all including a variety of persons with multiple challenges to employment, including persons with disabilities.

These services include assessment of skill levels, abilities, and aptitudes, career guidance when appropriate, job search workshops, and referral to jobs or training as appropriate. The services offered to employers, in addition to referral of job seekers to job openings, include matching job requirements with job seeker experience, skills and other attributes, helping with special recruitment needs, assisting employers analyze hard-to-fill job orders, assisting with job restructuring and helping employers deal with layoffs.

PROJECT GRANTS:

Disability Employment Initiative (DEI): In Program Year (PY) 2010, the Disability Employment Initiative (DEI) was established by Congress. DOL awarded \$21,276,575 million in competitive grants to state WIA-administering entities to improve educational, training, and employment opportunities and outcomes of youth and adults with disabilities who are unemployed, underemployed, and receiving Social Security disability benefits. The funds awarded via cooperative agreements, ranging from \$1.5 to 6 million for a three-year period. This funding will continue the Disability Program Navigator Initiative's effective practices, as well as other promising practices.

DOL has approximately \$21 million in PY 2011 funds available to fund a second round of DEI grants. Approximately 6-9 cooperative agreements with state WIA administering entities will be funded for three years. These cooperative agreements will be awarded by September 30, 2011.

OBJECTIVES:

To administer a program of unemployment insurance for eligible workers through Federal and State cooperation; to administer payment of trade adjustment assistance, alternative trade adjustment assistance, disaster unemployment assistance, unemployment compensation for Federal employees and ex-service members.

TYPES OF ASSISTANCE:

DIRECT PAYMENTS WITH UNRESTRICTED USE; FORMULA GRANTS

USES AND USE RESTRICTIONS:

The states have the direct responsibility for establishing and operating their own unemployment insurance programs, while the Federal Government finances the cost of administration. State unemployment insurance tax collections are used solely for the payment of benefits. Federal unemployment insurance tax

collections are used to finance expenses deemed necessary for proper and efficient administration of the state unemployment insurance laws; to reimburse state funds for one-half the costs of extended benefits paid under the provisions of state laws which conform to the provisions of the Social Security Act and the Federal Unemployment Tax Act; and to make repayable advances to states when needed to pay benefit costs. Funds used for benefit payments may not be used for any program administration costs nor for training, job search, and job relocation payments. Disaster Unemployment Assistance (DUA) is paid out of funds provided by the Federal Emergency Management Agency (FEMA). Benefits for former Federal civilian employees, including postal workers, and former members of the Armed Forces are paid out of the Federal Employees Compensation Account (FECA) in the Unemployment Trust Fund, subject to reimbursement by the former employing agency. Trade Adjustment Assistance payments are made by states for workers adversely affected by trade imports or shifts in production. The Emergency Unemployment Compensation program is temporarily authorized.

Applicant Eligibility:

State workforce agencies, including those in the District of Columbia, Puerto Rico and Virgin Islands.

Beneficiary Eligibility:

All workers whose wages are subject to State unemployment insurance laws, Federal civilian employees, ex-service members, trade readjustment allowance for workers who become unemployed or underemployed because of the adverse effect of increased imports or because of shifts in production outside the U.S., and workers whose unemployment is caused by a Presidentially declared disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, are eligible if they are involuntarily unemployed, able to work, available for work, meet the eligibility and qualifying requirements of the state law, and are free from disqualifications. Individual State information on eligibility requirements is available from local One-Stop Career Centers or at <http://www.servicelocator.org/OWSLinks.asp>. The temporary Emergency Unemployment Compensation program was extended in subsequent legislation as noted in section 040, Authorization.

Credentials/Documentation:

Awards of grants to states are conditioned on the Secretary of Labor's determination that the states' unemployment compensation laws are in conformity with the Social Security Act and the Federal Unemployment Tax Act and that state practices substantially comply with these laws. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

National and Regional Offices issue guidance to states annually regarding the procedures and documents for the application process. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. This program is excluded from coverage under OMB Circular No. A-110. Eligible applicants are furnished applications (State Quality Service Plan) by the Employment and Training Administration for this program. States submit the plans to apply for grants to the appropriate regional office of the Employment and Training Administration based on target performance levels pursuant to nationally-developed workload estimates. All plans are to be constructed in terms of selected workloads to be undertaken and the resources and numbers of employees needed to accomplish them.

Award Procedure:

The Regional Administrator for Employment and Training issues a preliminary approval for a state within the dollar target provided by the ETA National Office, based on the state plan submitted.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

From 30 to 60 days. Approximately 45 days at the Regional Office level.

Appeals:

Contact Federal agency. A hearing is required if state law is not certified to be in conformity.

Funding is based on workload formula.

Renewals:

Not Applicable.

Formula and Matching Requirements:

This program has no statutory formula.

This program has no matching requirements.

This program does not have MOE requirements.

Length and Time Phasing of Assistance:

Annual grants for base operation of programs are based on workload projections pursuant to economic assumptions and nationally developed workload estimates. Additional quarterly funding is based on actual workloads. Financing of administrative costs is accomplished through Letter of Credit drawdowns needed to meet immediate cash requirements. Method of awarding/releasing assistance: by letter of credit.

Reports:

Weekly, monthly, quarterly and yearly statistical reports of unemployment insurance workloads are required. Cash reports include the following transactions: federal cash receipts/disbursements; Federal expenditures and unobligated balance; recipient share of obligations and expenditures; program income. Additional expenditure data required includes other federal funds expended and real property proceeds expended. The comprehensive performance management system requires a State Quality Service Plan (SQSP) be submitted as part of the application. Where performance is below the established minimum criteria, a corrective action plan (CAP) is required as part of the SQSP. The CAP identifies state activities and planning targets for performance improvement activities. Separate quarterly financial status reports are required for grants used for administration of each type of program. Data and progress towards performance targets are reviewed by the Regional and National Office staff. The State Quality Service Plan and corrective action plans are reviewed quarterly by Regional Office staff.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. State Workforce Agencies are subject to audits by the Department of Labor or other authorized Government agencies.

Records:

State laws and requirements are to be in conformity with Federal statutes. States are expected to report any legislative and regulatory changes to the federal agency. National office staff provide guidance on the time frame for data and corrections to data reports. The state determines the time period to maintain tax records; however, the IRS recommends 4 years after the date tax is due or is paid, whichever is later. The recommendation for performance records is 3 years.

17.245 TRADE ADJUSTMENT ASSISTANCE

FEDERAL AGENCY:

Employment Training Administration, Department of Labor

AUTHORIZATION:

Trade Act of 1974, as amended, Title II, Public Law 93-618, 88 Stat. 1979, 19 U.S.C 2271-2322.

OBJECTIVES:

To provide adjustment assistance to qualified workers adversely affected by foreign trade which will assist them to obtain suitable employment.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

State Workforce Agencies (SWAs) serve as agents of the United States for administering the worker adjustment assistance benefit provisions of the Trade Act. SWAs, through the local offices, provide testing, counseling, and job placement services; job search and relocation assistance; training; and payment of weekly trade readjustment allowances (TRA). State unemployment compensation and extended benefits must be exhausted before TRA is paid to eligible claimants. Trade impacted workers are eligible to receive job search and relocation allowances in addition to the costs of training. They may be paid subsistence and transportation allowances to attend approved training outside the normal commuting distance of a worker's regular place of residence.

Applicant Eligibility:

In FY 2011 ETA administered two separate TAA programsthe program implemented by the Trade and Globalization Adjustment Assistance Act of

2009 (TGAAA), that was in effect for petitions filed between May 18, 2009 and February 15, 2011, and the TAA program that was administered under the Trade Act as amended by the TAA Reform Act of 2002, which existed before May 18, 2009, and resumed after February 15, 2011 as part of the Omnibus Trade Act of 2010. TGAAA expanded TAA coverage to more workers and firms, including workers and firms in the service sector; made benefits available to workers whose jobs have been off-shored to any country (as opposed to covering a more limited set of shifts in production), improved workers training options, and increased the affordability of health insurance coverage. TGAAA also expanded the scope of the program to better assist adversely affected workers in finding new employment. It authorized funding for employment and case management services, and encouraged the type of long-term training necessary for jobs in the 21st century economy through an extension of income support, an increase in the cap for training funding, and access to training for adversely affected incumbent workers.

For a worker to be eligible to apply for TAA, the worker must be part of a group of workers that are the subject of a petition filed with the Department. Three workers of a company, a company official, a union or other duly authorized representative, or a One-Stop Career Center operator or One-Stop partner may file that petition with the Department. In response to the filing, the Department institutes an investigation to determine whether foreign trade was an important cause of the workers job loss or threat of job loss. If the Department determines that the workers meet the statutory criteria for group certification of eligibility for the workers in the group to apply for TAA, the Department grants the petition and issues a certification.

Once covered by a certification, individual workers apply for benefits and services through the One-Stop delivery system. Most benefits and services have specific individual eligibility criteria that must be met, such as previous work history, unemployment insurance eligibility, and individual skill levels.

Beneficiary Eligibility:

The TAA program currently offers the following services to eligible individuals: training, weekly income support, out-of-area job search and relocation allowances, case management and employment services, assistance with payments for health insurance coverage through the utilization of the Health Coverage Tax Credit (HCTC), and wage insurance for some older workers through ATAA or RTAA. ATAA is the wage insurance option available to reemployed older workers authorized by the TGAAA. ATAA provides wage insurance to reemployed older workers as a pilot project under the TAA Reform Act of 2002 for adversely affected workers covered by certifications of petitions filed before May 18, 2009 and after February 15, 2011. Under TGAAA, ATAA was replaced with RTAA, which was a wage insurance benefit for older workers that provided expanded eligibility options and benefits in comparison with the ATAA program.

Credentials/Documentation:

No Credentials or documentation are required. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Cash trade readjustment allowances (TRA) generally becomes payable only after workers have exhausted their entitlement to State unemployment compensation including extended benefits. For TAA certifications on petitions filed between May 18, 2009 and February 15, 2011, the maximum number of weeks of State unemployment compensation, extended benefits and trade readjustment allowances cannot exceed 52 weeks except that up to 78 additional weeks may be paid to workers while participating in approved training and an additional 26 weeks for workers whose approved training program includes pre-requisite and/or remedial education. Participation in RTAA allows older workers, for whom retraining may not be appropriate, to accept reemployment at a lower wage and receive a wage subsidy instead of benefits under the regular TAA program. The RTAA allows for payments of 50 percent of the wage difference between old employment and new employment, not to exceed \$12,000 for up to two years. The individual must earn not more than \$55,000 a year in wages in reemployment, and must not return to employment from which the worker was separated. Base formula funding grants for training services are provided to States at the beginning of the year; additional funds may be requested by States based on additional needs above the base funding provided.

OBJECTIVES:

The H-1B Job Training Grant Program funds projects that provide training and related activities to workers to assist them in gaining the skills and competencies needed to obtain or upgrade employment in high-growth industries or economic sectors. funds used by the Department of Labor for grants administration, technical assistance, and performance reporting.

Applicant Eligibility:

Grants may be awarded to a partnership of private and public sector entities as defined in ACWIA. Applicants may generally be public and non-profit organizations. See the Solicitation for Grant Applications (SGAs) for specific requirements.

Grants for projects are awarded on a competitive basis, announced in Solicitation for Grant Applications (SGAs) in the Federal Register and also on ETA's Internet Web site at <http://www.doleta.gov>. To compete for a grant, organizations develop a proposal and budget that demonstrate how the organization will provide services to a targeted population. The SGA provides all of the necessary information for applying for federal assistance.

Award Procedure:

Procedures for each project are specified in the applicable request for proposals. Generally, the procedure is as follows: A technical review panel composed of staff from ETA program offices as well as peer reviewers evaluates eligible submitted applications. The panel prepares a report for the ETA Grant Officer identifying the strengths and weaknesses of the application and the cumulative rating. Selections are made based on the best rated proposals, as well as other factors cited in the SGA. Once selections are made by the Grant Officer, an Award Notification is sent through the appropriate congressional channels for notification. After awardees are notified, the list of awardees is posted on the ETA website at www.doleta.gov. If an application is rejected, a letter is sent to the applicant as notification that they were not selected as a recipient of the grant.

TYPES OF ASSISTANCE:

Federal Employment; FORMULA GRANTS; PROVISION OF SPECIALIZED SERVICES

USES AND USE RESTRICTIONS:

The Department of Labor issues labor certifications for temporary employment under several programs: H-1B Specialty (Professional) Worker Program, H-1B1 Specialty Worker Program (professionals from Chile or Singapore working in specialty occupations), E-3 Specialty Worker Program (professionals from Australia working in specialty occupations), H-2A Temporary Labor Certification (Agricultural), H-2B Temporary Labor Certification (Non-Agricultural), and D-1 Crewmember Program.

Applicant Eligibility:

H-2A Program: An agricultural employer who anticipates a shortage of U.S. workers needed to perform agricultural labor or services of a temporary or seasonal nature. The employer may be an individual proprietorship, a partnership or a corporation. An association of agricultural producers may file as a sole employer, a joint employer with its members, or as an agent of its members. An authorized agent, whether an individual (e.g., and attorney) or an entity (e.g., an association), may file an application on behalf of an employer. Associations may file master applications on behalf of their members. H-2B Program: The job and the employer's need must be one time, seasonal, peak load or intermittent; the job must be for less than one year; and there must be no qualified and willing U.S. workers available for the job. An employer can file

an application for labor certification with the appropriate National Processing Center of the Employment and Training Administration. State Workforce Agencies are federally funded to issue prevailing wage determinations for foreign labor certification programs.

These foreign labor certification programs govern employers who have a need for workers in specialty occupations or as fashion models or in temporary agricultural or non-agricultural employment.

Credentials/Documentation:

In the major temporary labor certification programs, employers sponsoring foreign workers to fill a temporary need file the certification from the Department of Labor as documentation in support of their respective I-129 nonimmigrant worker petitions with the Department of Homeland Security, United States Citizenship and Immigration Services (USCIS). In the H-1B1 and E-3 programs, a USCIS petition is not needed for initial visa issuance, and the foreign national may use proof of certification in support of the visa application. Employers contact the appropriate office of the Employment and Training Administration. Also see <http://www.doleta.gov/business/gw/guestwkr/> for additional details on specific programs.

Award Procedure:

State workforce agencies receive notification of grant award after federal approval of their workplans. TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

These NEG funds may be used to provide assistance and support services, including qualifying health insurance coverage, transportation, child care, dependent care and income assistance, to eligible individuals waiting to receive payments through the HCTC. Under the Recovery Act, the HCTC is equal to 80 percent of the amount paid by an eligible individual for qualified health coverage. Monthly payments are made directly to a health plan administrator

on behalf of participants, allowing them to receive the benefit of the tax credit at the time of need. States may request HCTC NEG funds to cover up to three months of gap payments to support 80 percent of the qualified premium for eligible individuals. The gap period is defined as the period after the state determines a candidate's eligibility for HCTC until the IRS enrolls, processes, and pays a candidate's first payment under the HCTC program. This period is usually one month, but depending on the timing and other factors can take up to three months, and sometimes slightly longer in rare instances. NEG funding for gap periods is predicated on the fact that the individual remains eligible for the HCTC for all gap months. All of these funds are awarded to States that apply.

Green industries include the energy efficiency and renewable energy industries as well as sectors that impact our environment such as transportation, green construction, environmental protection, sustainable agriculture, forestry, and recycling and waste reduction. The Green Jobs Innovation Fund will allow ETA to build upon the lessons learned from the green job investments provided under the American Recovery and Reinvestment Act. Through a competitive grant opportunity, the Department is emphasizing critical steps along green career pathways by: 1) forging linkages between Registered Apprenticeship and pre-apprenticeship programs, and/or 2) integrating the delivery of technical and basic skills training through community-based partnerships. The Fund will help workers receive job training in green industry sectors and occupations and access green career pathways.

To compete for a grant, organizations develop a proposal and budget that demonstrate how the organization will provide services to a targeted population. The SGA provides all of the necessary information for applying for federal assistance.

Award Procedure:

Procedures for each project are specified in the applicable request for proposals. Generally, the procedure is as follows: A technical review panel composed of federal staff and peer reviewers evaluates eligible submitted applications. The panel prepares a report for the ETA Grant Officer identifying the strengths and weaknesses of each application and the cumulative rating. Selections are made based on the best rated proposals, as well as other factors as cited in the SGA. Once selections are made by the Grant Officer, an Award Notification is sent through the appropriate congressional channels for notification. After awardees are notified, the list of awardees is posted on the ETA website at www.doleta.gov. If an application is rejected, a letter is sent to the applicant as notification that they were not selected as a recipient of the grant.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2010: In FY 2010, the Womens Bureau continued to support and develop on-going projects in its effort to promote an environment responsive to the demands and challenges of the 21st Century workforce. These targeted initiatives were designed to enhance opportunities for women under the Departments vision of Good Jobs for Everyone, and the Bureaus vision To empower all working women to achieve economic security. In cooperation with numerous womens, Federal, state, community, and faith-based organizations, the Bureau worked to develop, implement, and promote green jobs initiatives, flexible workplace policies, equal pay recommendations, assistance to homeless women veterans, and education and training for women in nontraditional occupations. GREEN JOBS INITIATIVE During FY2010, The Womens Bureau developed nine training pilots in conjunction with experts in green industries to serve as models for engaging and preparing women for a variety of high-growth and emerging green jobs over the next decade. In addition to technical skills training, pilot participants also learned basic skills such as resume writing, interview preparation, computer skills, and financial education. The pilots provided an opportunity for the Bureau to conduct action-based research on successes in preparing women for green jobs. The Womens Bureau also hosted a series of five teleconferences for workforce practitioners, designed to offer information and an exchange of ideas to better connect women with green jobs training and green employment. Topics included Why is Green Good for Women?, Womens Entrepreneurship in Green Industries, Recruiting and Retaining Women, Women Working in Green Construction and Energy Efficiency, and Women Working in Alternative Energy. NATIONAL DIALOGUE ON WORKPLACE FLEXIBILITY The Womens Bureau kicked off its National Dialogue on Workplace Flexibility with an announcement made by the Secretary Of Labor at the White House, building on efforts to gather information and promote best practices for workplace flexibility. The Bureau will be working with the White House Council on Women and Girls to host a series of meeting throughout the country. EQUAL PAY On Equal Pay Day, the Womens Bureau and the White House Council on Women and Girls hosted a briefing by several non-governmental organizations on the current status of the wage gap and equal pay for women. The non-governmental organizations shared their insights and recommendations about equal pay with policymakers in the Womens Bureau, the Department of Labor, and other Federal agencies. HOMELESS WOMEN VETERANS The Bureau's Region III office held a Women Vets @ Work Job Summit in Washington, DC, that successfully assisted 19 unemployed, under-employed and homeless women veterans in gaining employment in public and private sector jobs. The Bureau also created a Homeless Women Veterans Report that included information and data collected from listening sessions hosted throughout the country. The report identifies the needs of homeless women veterans and explores factors that lead to homelessness among female veterans as well issues regarding reintegration into the workforce and how to improve services and resources for this population. Information gathered for the report will also provide a basis for the development of future research, projects and funding opportunities. WOMEN IN THE TRADES As part of the Departments observance of Womens

History Month, the Womens Bureau and the Secretary of Labor hosted a roundtable discussion on the status of women in the trades. The event aimed to enhance communication and share useful strategies and ideas on womens entrance and advancement in trade occupations. DOL leadership joined twenty participants representing Labor, tradeswomen organizations, researchers and advocates to discuss recruitment, training and on-the-job issues, and barriers to retention. 19.026 GLOBAL PEACE OPERATIONS INITIATIVE

GPOI

FEDERAL AGENCY:

U.S. Department of State

AUTHORIZATION:

Foreign Assistance Act, 1961, Section 632, Public Law 112-10.

OBJECTIVES:

GPOI was initially envisioned as a five-year program (FY 2005-2009) to help address major gaps in international capacity to conduct peace support operations (PSOs), with a focus on Africa. Such gaps included a shortage of capable peacekeepers and formed police units (FPUs), limited national capabilities to train and sustain peacekeeping proficiencies, and a lack of international coordination mechanisms to assist the deployment of troop and police contingents to PSOs. Despite considerable progress in these areas since FY 2005, significant capacity shortfalls continue to impact the effectiveness of United Nations (UN) and regional PSOs. Addressing these gaps will require a long-term commitment to capacity building by the United States and other contributor countries. Toward this end, a National Security Council Deputies Committee approved a five-year renewal of GPOI's mandate (FY 2010-2014) in October 2008. Through policy statements and budgetary allocations, the current Administration subsequently affirmed support for the continuation of PSO capacity building activities through GPOI.

Reflective of global PSO requirements at the time of GPOI's establishment, the programs first five years focused on significantly increasing the number of peacekeepers available for deployment. Accordingly, the primary objective of Phase I was to train and, as appropriate, equip at least 75,000 peacekeepers by 2010. GPOI met and, in fact, surpassed this target, training 86,969 peacekeepers as of 30 September 2009. Through GPOI, the United States further provides deployment support, obligating \$ 76.6 million to date to facilitate the equipping, transportation, and sustainment of troops deploying to various UN and regional missions. Overall, GPOI train, equip, and deployment support activities have facilitated the deployment of 122,202 personnel from 31 countries to 19 PSOs around the world.

GPOI funds a wide range of regional capacity building initiatives, to include technical assistance, staff training, equipment provisions, and building refurbishments for two regional headquarters (the African Union (AU) and the Economic Community of West African States (ECOWAS)) and 32 national and regional PSO training centers. Additionally, GPOI provides financial, technical, and staffing support to the Center of Excellence for Stability Police Units (COESPU), an Italian-led center to facilitate the training of stability/formed police unit (FPU) trainers.

During Phase II (FY 2010-2014), GPOI will seek to continue to ensure sufficient numbers of capable peacekeepers are available for PSOs, with the target of facilitating training for an additional 242,500 troops. However, program emphasis has shifted from the direct training of peacekeepers by U.S. personnel to building sustainable, indigenous PSO training capabilities in partner countries/ organizations. GPOI-funded activities emphasize the establishment and strengthening of partner countries training infrastructures, with a focus on both military troops and FPUs, where appropriate. Accordingly, at least two-thirds (or approximately 162,500) of the peacekeepers trained will be trained indigenously by GPOI-trained instructors. GPOI will further continue to serve as a mechanism for supporting units deploying to UN and regional peacekeeping missions, as well as to build the capacity of regional organizations to train for, plan, deploy, manage, sustain, and integrate lessons learned from PSOs.

19.515 CONTRIBUTIONS TO INTERNATIONAL ORGANIZATIONS FOR OVERSEAS ASSISTANCE**FEDERAL AGENCY:**

Bureau of Population, Refugees, and Migration, U.S. Department of State

AUTHORIZATION:

Migration and Refugee Assistance Act of 1962, as amended, Public Law 87-510, 22 U.S.C 2601.

OBJECTIVES:

Provision of voluntary and assessed contributions to Public International Organizations to carry out humanitarian assistance activities overseas benefitting refugees, victims of conflict, and other persons of concern.

TYPES OF ASSISTANCE:

Direct Payments for Specified Use; Project Grants

USES AND USE RESTRICTIONS:

Voluntary and assessed contributions provide funds to key international organizations to address pressing humanitarian needs overseas and to resettle refugees in the United States. These funds support programs that sustain life; provide protection and assistance to the most vulnerable, particularly women and children and the elderly; assist refugees with voluntary repatriation, local integration, or permanent resettlement in a third country; and foster the humane and effective management of international migration policies. These contributions meet the international organization's objectives as approved by the Bureau. Funding documents approved by the Bureau authorize funds based on the organization's budget submission, funding request or appeal document.

Applicant Eligibility:

Voluntary and assessed contributions to Public International Organizations to provide assistance to refugees and victims of conflict overseas.

Beneficiary Eligibility:

Refugees, victims of conflict, and other persons of concern requiring protection and assistance.

Credentials/Documentation:

No Credentials or documentation are required. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110.

Award Procedure:

As authorized, the Bureau provides funds multilaterally as voluntary and assessed contributions to international organizations (IOs). To ensure that the international system is effectively and efficiently addressing the humanitarian needs of refugees, internally displaced persons (IDPs), victims of conflict, stateless persons, and vulnerable migrants, the Bureau ensures that the U.S. Government (USG) works closely with other donor governments to achieve a common understanding of humanitarian requirements and what constitutes satisfactory performance in responding to them by the international humanitarian system. Through its active participation in international organizations' governing boards, the USG promotes efforts to strengthen the UN system and increase the effectiveness of multilateral humanitarian action. The Bureau makes USG contributions to major IO partners including the Office of the United Nations High Commissioner for Refugees, the International Committee of the Red Cross, the International Organization for Migration, the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA), and other international organizations. To demonstrate continued U.S. leadership and commitment to these institutions, the U.S. contributions aim to constitute a fair share of the IOs funding requests and appeals with the expectation that other donors -- in the spirit of responsibility sharing -- will support the remaining funding request. Each contribution funding decision is based on Bureau budget and policy prioritization considerations. Each contribution action contains award conditions that are signed and countersigned by authorized representatives of the Bureau and the recipient organization.

Length and Time Phasing of Assistance:

Each voluntary and assessed contribution contains award conditions that are accepted by the recipient organization. Most contribution award agreements stipulate that funds may be used to continue authorized designated activities beyond the initial time period of the appeal, if needed. See the following for information on how assistance is awarded/released: Recipients should request funds based on immediate disbursement requirements and disburse funds as soon as possible to minimize the Federal cash on hand in accordance with the established policies. Payment requests should be submitted only in amounts that are required to meet the immediate cash needs of the contribution.

Reports:

Copies of all program and financial reports concerning the activities specified by the contribution are required to be provided to the Bureau within thirty days of issuance. Cash reports are not applicable. Progress reports are not applicable. Contribution awards require that financial records regarding the contribution be maintained in accordance with the Recipients established accounting policies and procedures. Monitoring programs funded through contributions to international organizations remains a Bureau priority to ensure that funds meet core objectives of providing protection and assistance to populations of concern. The Bureau pursues its monitoring of its primary IO partners, as applicable, by negotiating frameworks for cooperation between the USG and the IO incorporating rigorous, mutually-agreed strategic goals, indicators, and

performance targets for the year. With these organizations, the Bureau plays an important role in shaping and supporting strategic planning and performance management. The Bureau monitors its programs closely using a range of performance measures to gauge humanitarian impact, assess progress toward strategic priorities, and ensure accountability to beneficiaries and American taxpayers. IO programs are monitored by routine visits of agency staff to program sites and to IO headquarters and regional/country offices.

Audits:

This program is excluded from coverage under OMB Circular No. A-133. Annual and/or bi-annual audits are required depending on the PIO. External audits may also be required. Key achievements of CWD global resources used in FY 2010 included significant program support of the programs in Iraq and Afghanistan: Despite a government of Iraq ban on demining that was in place at the beginning of FY10, State Department-funded NGOs managed to clear more than 18 million square meters of landmines and unexploded ordinance. This will save countless Iraqis from death or injury and will boost economic and agricultural productivity. Iraq remains heavily contaminated by ERW, but with WRA funded assistance, NGOs provided mine risk education to nearly 35,000 Iraqis, another step to saving lives and limbs ahead of actual land clearance. WRA also trained more than 350 Iraqi officials or teachers in governments

from the national to the local level on how to implement ERW programs. Lastly, WRA funded the UNDPs Iraqi mine action team which works closely with the national government in Baghdad to help develop and implement effective and transparent procedures for the registration and licensing of demining entities and the supervision and documentation of all mine action activities in Iraq. 20.106 AIRPORT IMPROVEMENT PROGRAM

(AIP)

FEDERAL AGENCY:

Federal Aviation Administration (FAA), Department of Transportation

AUTHORIZATION:

Airport Improvement Act, Public Law 103-272, U.S.C.

OBJECTIVES:

To assist sponsors, owners, or operators of public-use airports in the development of a nationwide system of airports adequate to meet the needs of civil aeronautics. The purpose of the law includes the investment in transportation, environmental protection, and airport infrastructure that will provide long-term economic benefits.

TYPES OF ASSISTANCE:

ADVISORY SERVICES AND COUNSELING; PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grants can be made for integrated airport system planning in a specific area; and airport master planning, construction, or rehabilitation at a public-use airport or portion thereof. Authorizing legislation refers to an airport as any area of land or water used or intended to be used for the landing or taking off of aircraft and includes, within the five categories of airports listed below, special types of facilities such as seaplane bases and heliports. The statute further defines airports by categories which include commercial service, primary, cargo service, reliever, and general aviation airports. They are defined as follows: Commercial Service Airports are publicly owned airports that have at least 2,500 passenger boarding each year and receive scheduled passenger service. Passenger boarding refer to revenue passenger boarding on an aircraft in service in air commerce. The definition also includes passengers who continue on an aircraft in international flight that stops at an airport in any of the 50 states for a non traffic purpose. Passenger boardings at airports that receive scheduled passenger service are also referred to as Enplanements. Nonprimary Commercial Service Airports are Commercial Service Airports that have at least 2,500 and no more than 10,000 passenger boardings each year. Primary Airports are Commercial Service Airports that have more than 10,000 passenger boardings each year. These airports are further categorized as Hub Airports, based on the level of passenger boardings. Hub categories for Primary Airports are defined as a percentage of total passenger boardings in the most current calendar year ending before the start of the current fiscal year. The definition and formulae used for designating Primary Airports by Hub Type and percentage of annual passenger boardings are: Large 1 percent or more; Medium - at least 0.25 percent, but less than 1 percent; Small - at least 0.05 percent, but less than 0.25 percent; and Non hub - more than 10,000, but less than 0.05 percent. Cargo Service Airports are airports that, in addition to any other air transportation services that may be available, are served by aircraft providing air transportation of only cargo with a total annual landed weight of more than 100 million pounds. Reliever airports are airports designated by the FAA to relieve congestion at a Commercial Service Airports and to provide more general aviation access to the overall community. The remaining airports, while not specifically defined in Title 49 U.S.C., are referred to as general aviation (GA) Airports and comprise the largest single group of airports in the U.S. airport system. Eligible work at airports consists of: (1) airport master plans; (2) airport noise compatibility plans; (3) land acquisition; (4) site preparation; (5) construction, alteration, and rehabilitation of runways, taxiways, aprons, and certain roads within airport boundaries; (6) construction and installation of airfield lighting, navigational aids, and certain offsite work; (7) safety equipment required for certification of airport facility; (8) security equipment required of the sponsor by the Secretary of Transportation by rule or regulation for the safety and security of persons and property on the airport; (9) snow-removal equipment; (10) terminal development; (11) aviation-related weather reporting equipment; (12) equipment to measure runway surface friction; (13) burn area training structures and land for that purpose, on or off airport; (14) agency-approved noise compatibility projects; (15) relocation of air traffic control towers and navigational aids (including radar) if they impede other projects funded under AIP; (16) land, paving, drainage, aircraft deicing equipment and structures for centralized deicing areas; and (17) projects to comply with the Americans with Disabilities Act of 1990, Clean Air Act, and Federal Water Pollution Control. Under limited criteria construction of hangars

OBJECTIVES:

To conduct long term continuing research in specific areas of aviation related technology. Responsibilities of Centers may include, but are not limited to: the conduct of research concerning catastrophic failure of aircraft; airspace and airport planning and design; airport capacity enhancement techniques; human performance in the air transportation environment; aviation safety and security; the supply of trained air transportation personnel including pilots and mechanics; and other aviation issues pertinent to developing and maintaining a safe and efficient air transportation system, and the interpretation, publication, and dissemination of the results of such research.

TYPES OF ASSISTANCE:

PROJECT GRANTS; PROVISION OF SPECIALIZED SERVICES; USE OF PROPERTY, FACILITIES, OR EQUIPMENT

USES AND USE RESTRICTIONS:

Centers of Excellence are established for long term continuing mission critical research in specific areas of technology areas. Funding may be used for the establishment and operation of the Centers of Excellence and the related training, education and research projects. The FAA determines a need for a Center of Excellence in a specific area of technology and publishes a Notice of Availability of Solicitation in Grants.gov. In response to this announcement, each applicant submits a description of their institutional capabilities, available faculty, facilities and equipment, and additional information as required in the solicitation. Researchers at each Center are expected to maintain a close working relationship with relevant FAA program offices that have responsibility in areas related to their research. Centers conduct semi-annual reviews, and a major symposium at the conclusion of each 3-year phase of research to satisfy Congressional requirements to disseminate research results to a broad audience. CONGRESSIONAL RESTRICTIONS: (1) Matching Funds - The Federal share of the grant awarded shall be 50 percent of the cost

to establish and operate and conduct related research within the Center of Excellence and related research activities. (2) Maintenance of Effort - Each recipient will maintain its aggregate expenditures from all other sources for establishing and operating the Center and related research activities at or above the average level of such expenditures in its 2 fiscal years preceding November 5, 1990. (3) Locations of centers and distribution of funds shall be geographically equitable. (4) Contract tasks may be awarded following the competitive process and include negotiable cost share. (5) Funds are awarded to universities. Industry affiliates must align with academic institutions who may then sub-contract to others as appropriate. Centers of Excellence are established to conduct aviation related research, education, training and technology transfer. Discretionary funds are made available by sponsoring organizations and are awarded to establish, operate and conduct related research.

Applicant Eligibility:

Applicants are limited to colleges and universities with the financial resources to meet statutory requirements for matching Federal funds and maintenance of effort. Academic institutions may partner with industry affiliates, other public and private entities, and government laboratories.

Beneficiary Eligibility:

Recipients are limited to colleges and universities with the financial resources to meet statutory requirements for matching Federal grants and maintenance of effort. In conducting research, a Center of Excellence may contract with nonprofit research organizations and other appropriate persons.

Credentials/Documentation:

Required documentation is outlined in each solicitation package. After each Draft Notice of Solicitation is published, copies of the Solicitation are available during a Public Meeting and/or from the FAA Centers of Excellence Program Office, FAA Technical Center, Atlantic City International Airport, NJ 08405. To establish a Center of Excellence, a competitive process is conducted to include a: public announcement, publication of a draft and a final solicitation, period of public comment, management/fiscal review, and a technical evaluation. Public Law 101-508 established the following six selection criteria: (1) The extent to which the needs of the State in which the applicant is located are representative of the needs of the region for improved air transportation services and facilities. (2) The demonstrated research and extension resources available to the applicant for carrying out this program. (3) The capability of the applicant to provide leadership in making national and regional contributions to the solution of both long- range and immediate air transportation problems. (4) The extent to which the applicant has an established air transportation program. (5) The demonstrated ability of the applicant to disseminate results of air transportation research and educational programs through a State-wide or region-wide continuing education program. (6) The projects which the applicant proposes to carry out under the grant. Each proposal must include the following: (a) description of current research projects being conducted in the specific research area, (b) a schedule of anticipated costs to establish and operate the Center of Excellence, (c) a plan for meeting the 50 percent nonfederal contribution toward the matching requirements, (d) a statement showing aggregate expenditures from all other sources for aviation research in its 2 fiscal years preceding November 5, 1990, (e) all data sufficient for the evaluation team to determine the extent to which the applicant is able to satisfy the six selection criteria outlined.

Each proposal must contain a: 1. completed Application for Federal Assistance (SF-424 Research and Related); 2. table of contents; 3. technical statement addressing the problems inherent in the specific technical area(s) and probable solutions; 4. summary of results from FAA funding in the past five years; 5. biographical sketch for all senior personnel and a list of their principal accomplishments and publications during the past five years; 6. proposed budget for the initial three years including the anticipated costs of managing a new Center of Excellence, and a management plan; 7. listing of all current and pending support on all research awards from all sources; 8. listing of all available facilities and major items of equipment to be available to conduct research, and that which is necessary to acquire. 9. a cover letter and letters of support from various industry representatives, state and local officials, etc. Other required forms are to be included such as Disclosure of Lobbying Activities Form SF-LLL and certification of Compliance with the Civil Rights

Act. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

FAA may hold a public information meeting prior to submission of proposals. Questions may be submitted to the FAA Centers of Excellence Program Director, AJP-9, FAA Technical Center, Atlantic City International Airport, NJ 08405. Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

OMB Circular No. A-102 applies to this program. This program is excluded from coverage under OMB Circular No. A-110. Colleges and universities may apply after the FAA has published a Notice of Availability of Solicitation for a Center of Excellence in a specific research area on the Grants.gov website. Solicitation and application packages are available from the FAA Centers of Excellence Program Office, FAA Technical Center, Atlantic City International Airport, NJ 08405.

Award Procedure:

The FAA Administrator is the selecting official for each Air Transportation Center of Excellence. The FAA Centers of Excellence Program Director issues solicitations, receives all proposals, convenes evaluation teams to evaluate eligible institutions for Centers of Excellence awards. Applicants should be prepared to host an onsite inspection of existing research facilities when being considered for a Center of Excellence designation. Grant award authority has been delegated to the FAA COE Grants Officer and Program Director, AJP-92, located at the William J. Hughes Technical Center, Atlantic City International Airport, NJ 08405. Awards are made to COE members throughout the term of the Center. No further announcements are issued.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

From the closing date for applications, the FAA requires at least 6 months for evaluation and selection procedures.

Appeals:

Formal protests are not an option; however, those submitting a proposal may request a debriefing.

Renewals:

Grants: Multi-year grants and cooperative agreements are available; extensions are possible. No-cost extensions are available upon request. Centers of Excellence designation: Centers are evaluated during the last year of each research Phase. Cooperative agreements are renewed upon successful completion of each previous Phase throughout the 10-year term.

Length and Time Phasing of Assistance:

The FAA intends to support a Center of Excellence in three year increments over a period of ten years. Each Center will undergo a reassessment every three years. Research is reviewed semi-annually. Budgets and research projects are negotiated yearly. As a consequence of changing needs, or diminished requirements, the agency reserves the right not to renew support for a Center of Excellence at any time. Funds from program offices and additional appropriations may increase at any time providing the institution can demonstrate matching funds. See the following for information on how

assistance is awarded/released: Funds are awarded as proposals are submitted for related projects, evaluated and determined to be beneficial to the FAA.

COE status and technical reports are required on a quarterly basis. Technical Reporting Requirements per Attachment H of OMB Circular No. A-110 and Attachment I to OMB Circular No. A-102. Financial reporting requirements as per Attachment G of OMB Circular No. A-110 and Attachment H of OMB Circular No. A-102. Semi-annual reports on matching Funds and technical reports, as well as an annual review of the research completed and in progress at each Center of Excellence. The annual review focuses on the relevance, merit and direction of research efforts in the designated area, and negotiation of projects and budget for the next year. A symposium is required by the end of each 3-year period as part of close-out activities and serves to highlight research results and discuss plans for the next 3-year phase. Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. Single Audit Act assigns responsibility to either the Department of Health and Human Services or the Department of Defense for most institutions. The FAA calls for an audit of each Center every 3 years as a part of close-out activities, and reserves the right to conduct individual audits annually, and as needed, within the constraints of applicable laws and regulations.

20.205 HIGHWAY PLANNING AND CONSTRUCTION

(Federal-Aid Highway Program, Federal Lands Highway Program).

FEDERAL AGENCY:

Federal Highway Administration (FHWA), Department of Transportation

AUTHORIZATION:

Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), Public Law 109-59, 23 U.S.C 101.

OBJECTIVES:

Federal-aid Highway Program: To assist State transportation agencies in the planning and development of an integrated, interconnected transportation system important to interstate commerce and travel by constructing and rehabilitating the National Highway System (NHS), including the Eisenhower Interstate System; and for transportation improvements to most other public roads; to provide aid for the repair of Federal-aid highways following disasters; to foster safe highway design; to replace or rehabilitate deficient or obsolete bridges; and to provide for other special purposes. This program also provides for the improvement of roads in Puerto Rico, Guam, the U.S. Virgin Islands, American Samoa, the Northern Mariana Islands, and the Alaska Highway. The Federal Lands Highway Program (FLHP), as an adjunct to the Federal Aid Highway Program, provides assistance to the Federal Land Management Agencies (FLMAs) for Federally owned roads. It provides transportation engineering services for planning, design, construction, and rehabilitation of the highways and bridges providing access to federally owned lands. The Federal Lands Highway organization also provides training, technology, deployment,

engineering services, and products to other customers.

TYPES OF ASSISTANCE:

FORMULA GRANTS; PROJECT GRANTS

USES AND USE RESTRICTIONS:

Federal-aid highway funds are generally apportioned by statutory formulas to the States. They are generally restricted to roads open to the public and not functionally classified as rural minor collectors or local. Exceptions to this highway functional classification restriction include: planning and research activities; bridge, bicycle and pedestrian, and safety improvements that may be on any public road; transportation enhancement activities; the recreational trails program (see program 20.219); safe routes to school, nonmotorized transportation, the FLHP, and public transportation improvement. The FLHP is not a grant program. For highway projects, funds may be used for environmental studies, engineering and design services, right-of-way acquisition and relocation assistance, and construction for capital improvement projects classified as new construction, reconstruction, restoration, rehabilitation, and resurfacing, or for functional, geometric, or safety reasons. Funds may also be used for planning; research, development, and technology transfer; intelligent transportation systems projects; roadside beautification; wetland and natural habitat mitigation, traffic management and control improvements; improvements necessary to accommodate other transportation modes, development and establishment of transportation management systems; billboard removal; construction of bicycle facilities and pedestrian walkways; fringe and corridor parking; car pool and van pool projects; transportation enhancements such as scenic and historic highway improvements; and recreational trails. Funds generally cannot be used for routine highway operational activities, such as police patrols, mowing, snow plowing, or maintenance, unless it is preventative maintenance. Also, funds authorized for the NHS, Surface Transportation Program (STP), Congestion Mitigation and Air Quality (CMAQ) Improvement Program, Equity Bonus (BE) program, and some additional programs may be used for mass transportation improvements; CMAQ funds are limited to projects and programs in air quality, non-attainment and maintenance areas for ozone, carbon monoxide, and small particulate matter that reduce transportation related emissions. Eligibility criteria for the programs differ, so program guidance should be consulted. Projects in urban areas of 50,000 or more population must be based on a transportation planning process carried out by a Metropolitan Planning Organization (MPO) in cooperation with the State and transit operators, and the projects must be included in metropolitan transportation plans and improvement programs. Projects in non-metropolitan areas of a State must be consistent with a statewide transportation plan. Projects in both metropolitan and non-metropolitan areas must also be included in a fiscally constrained Statewide Transportation Improvement Program (STIP) developed as part of the required statewide transportation planning process. The FHWA and the Federal Transit Administration (FTA) must approve the STIP jointly.

Applicant Eligibility:

By law, the Federal-aid highway program is a federally assisted State program that requires each State to have a suitably equipped and organized transportation department. Therefore, most projects are administered by or through State transportation departments (State DOTs). Projects to be funded under the Federal-aid highway program are generally selected by State DOTs or MPOs, in cooperation with appropriate local officials, as specified in 23 U.S.C. and implementing regulations. Territorial highway projects are funded in the same manner as other Federal aid highway projects, with the territorial transportation agency functioning in a manner similar to a State transportation department. Most FLHP projects are administered by the FHWA Office of Federal Lands Highway and its Divisions or by the various FLMAs. Under the FLHP, projects in the Indian Reservation Road (IRR) Program are selected by Tribal governments and are approved by the Bureau of Indian Affairs (BIA) and the Federal Highway Administration. Due to recent legislation, Tribal governments meeting certain requirements may now administer various IRR projects on behalf of the BIA and FHWA. The Fish and Wildlife Service (FWS) and the National Park Service (NPS) select projects in the Refuge Road and Park Roads and Parkways programs, respectively. For the Forest Highway Program, the Forest Service, the States and the Federal Highway Administration jointly select projects.

Beneficiary Eligibility:

State transportation departments, and in some instances, Federal agencies, other State agencies, local agencies, and private, community-based organizations.

Credentials/Documentation:

Eligible activities and allowable costs will be determined in accordance with Title 23 and the OMB cost principles applicable to the recipient/sub-recipient. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

An environmental impact assessment is required for most projects under this program, although the level of review varies with the project. Projects under the FLHP have similar requirements; however, an interested applicant would need to contact the designated FLMA or the local FLH Division for more information. An environmental impact assessment is required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

OMB Circular No. A-102 applies to this program. This program is excluded from coverage under OMB Circular No. A-110. In general, projects/programs proposed for funding must be included in a fiscally constrained STIP, submitted by the State DOT, and approved jointly by the FHWA and the FTA. In addition, the State DOT may need to submit statements of work or plans, specifications, and estimates for certain proposed projects to the FHWA division office located in each State for approval. The FHWA has an agreement with each State that details the extent to which the State assumes the responsibilities of the FHWA for projects in that State. For projects on the Interstate System costing more than \$1 million, FHWA oversight of design and construction is required. For projects that are on the National Highway System but not on the Interstate System, the State may assume the responsibilities of the FHWA for oversight of design and construction, unless the State or the FHWA determines that such assumption is not appropriate. For projects that are not on the National Highway System, the State shall assume the responsibilities of the FHWA for oversight of design and construction, unless the State determines that such assumption is not appropriate. For the discretionary portion of public lands highways, State DOTs submit desired projects to the FHWA division office located in each State. Following the appropriate project selection process, a Transportation Improvement Program (TIP) for the Park Roads and Parkways, Forest Highway and Refuge Road programs is developed by one of the Federal Lands Highway Division offices, and forwarded to the respective State for inclusion in the appropriate MPO TIP and STIP. For the Indian Reservation Roads program, a TIP is submitted to the FHWA Office of Federal Lands Highway for approval and then forwarded to the respective State for inclusion in the appropriate MPO TIP and STIP. Projects under the FLHP are subject to the metropolitan and statewide planning requirements.

Award Procedure:

The State DOTs generally decide which projects will be developed within funding levels but the FHWA division office located in each State makes the final decision on the eligibility of specific projects. There are several categories where funding is allocated at the discretion of the Secretary of Transportation and administered by the FHWA. Candidate projects for discretionary allocations are usually solicited before the start of the Federal fiscal year (October 1) and must be submitted by the State DOTs. FHWA approval of a project and execution of a project agreement constitute a commitment to pay the Federal share of the project's allowable costs. Projects administered by the FHWA Office of FLH or the FLMAs are subject to procurement processes identified in the Federal Acquisition Regulations. Project awards are subject to the availability of funds.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Formula and Matching Requirements:

Statutory Formula:

This program has no matching requirements.

This program has MOE requirements, see funding agency for further details.

Length and Time Phasing of Assistance:

Federal-aid highway funds generally become available at the beginning of the fiscal year for which they are authorized and must be obligated within 3 years after the close of that fiscal year. However, some categories of funds are available until expended. Method of awarding/releasing assistance: lump sum.

Reports:

No program reports are required. No cash reports are required. No progress reports are required. SF-425. Except for projects that a state has oversight responsibility for, the FHWA division office in each State monitors and reviews State projects and programs during highway project location, design and construction. After the project is completed State maintenance of the project is reviewed periodically. Certain non-construction activities, such as transportation planning, require periodic progress reports. Similar procedures apply to the FLMAs and FLHP projects with the FHWA Office of FLH providing the mandatory stewardship and oversight. A value engineering analysis or other cost-reduction analysis is required for each project on the Federal-aid system with an estimated total cost of \$25,000,000 or more, a bridge project with an estimated total cost of \$20,000,000 or more; and any other project determined to be appropriate. Annual financial plans are required for projects with an estimated total cost of \$100,000,000 or more. In addition, a project management plan must be submitted for projects with an estimated total cost of \$500,000,000 or more.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133.

Records:

Project records and documents must be retained by the State or other governmental recipients/ subrecipients as specified in 49 CFR Part 18 or by non-profit recipients/subrecipients as specified in 49 CFR Part 19. PRISM States achieve greater success in matching crash and inspection records to DOT numbers. Carriers domiciled in PRISM States with at least some vehicles registered in PRISM States have higher data quality than other States as reflected by more up-to-date MCS-150 reports. Furthermore, PRISM States that use bar-code readers have 20% to 30% higher valid Vehicle Identification Number (VIN) rates than other States. Bar-code readers also reduce the time required to conduct roadside inspections by about one-third the duration of an average inspection. These successes help the States and the US DOT to accurately identify and remove high-risk carriers from our nation's highways. Fiscal Year 2011: No Current Data Available Fiscal Year 2012: 2010.

20.239 MOTOR CARRIER RESEARCH AND TECHNOLOGY PROGRAMS

Not Applicable

FEDERAL AGENCY:

Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation

AUTHORIZATION:

Surface Transportation Assistance Act of 1982, Public Law 97-242; Motor Carrier Safety Act of 1992, Public Law 102-240; Transportation Equity Act for the 21st Century, 49 U.S.C 31108.

OBJECTIVES:

The Analysis Research and Technology (ART) Office administers FMCSA Research and Technology (R&T) Program. Through the R&T program, FMCSA seeks to reduce the number and severity of crashes to reduce injuries and fatalities contributing to a safe and secure commercial transportation network. The R&T program is targeting crashes involving CMVs and the efficiency of CMV operations through conducting systematic studies directed toward fuller scientific discovery, knowledge, or understanding, adopting, testing, and deploying innovative driver, carrier, vehicle, and roadside best practices and technologies, and expanding the knowledge and portfolio of deployable technology. The development, testing, and deployment of simple and advanced innovative driver/vehicle technologies and integrated IT solutions support the Agency's priorities by demonstrating new roadside safety technologies and operational concepts, accelerating the deployment of vehicle-based and other safety and security technologies. Also by managing IT projects that integrate data collected and exchanged by various information systems and networks, and providing technical support and assistance to States and the motor carrier industry. The R&T Program has a number of projects directed towards driver behavior, as well as vehicle and carrier safety. The R&T Program also supports information-based safety and security projects. In addition, the support extends to FMCSA programs, specifically, enforcement (HM safety and bus safety), policy (regulations and medical qualifications), and outreach.

The R&T programs strategic objective Produce Safer Drivers supports the FMCSA's "Safety Goal. The ART Office will continue to evaluate the most critical driver risk factors through the Case-Control Commercial Driver Individual Differences Study. The factors include demographic characteristics, medical conditions, personality traits, attitudes, work environmental conditions, and behavioral history. A medical examination and battery of psychological and behavioral history measures will be administered to as many as 21,000 CMV drivers. The ART Office continues research to determine the effectiveness different restart provisions in the hours of service regulations (HOS) governing CMV drivers in restoring performance.

The R&T programs strategic objective Improve Safety of Commercial Motor Vehicles supports the FMCSA's "Safety Goal by continuing research aimed at accelerating the deployment of vehicle-based, and other safety and security technologies to reduce crashes. The ART Office will continue conducting fast-turnaround and independent evaluation of promising safety technologies aimed at commercial vehicle operations. FMCSA funding will be used for the

evaluation, and the technology developer will partner with the Agency to provide the technology for testing. The FMCSA envisions that individual test and evaluation programs could be completed in 612 months. This program should greatly reduce both the time and the resources required to conduct independent evaluations of potentially life-saving safety technologies. The ART Office will continue a DOT multimodal (NHTSA, FMCSA) sponsored study of collecting and analyzing data on bus and motor coach fires. The study will conduct detailed engineering root cause analyses to determine the causes of bus and motor coach fires.

The R&T programs strategic objective Produce Safer Carriers supports the FMCSA's "Safety Goal by continuing programs aimed at producing science-based regulations to advance the Agency's strategic and policy goals. This research will support rulemaking activities by gathering and consolidating research for inclusion into the Agency's rulemakings and required analyses. The ART Office will continue to evaluate the Effectiveness of Fostering Safety Culture in Motor Carriers. This study will use the Service Corps of Retired Executives (SCORE) to help new entrant motor carriers to foster development of a culture for making daily operating decisions based on both good business practices and FMCSA regulatory requirements.

The R&T programs strategic objective Advance Safety through Information-Based Initiatives supports the FMCSA strategic objective Commercial Motor Vehicle Safety and the DOT strategic objective Safety by continuing programs aimed at assuring interoperability of systems supporting safety, security, and productivity and providing technical assistance to States. The ART Office will continue Roadside/On-Board Safety Technology Countermeasures/Wireless Inspection Pilot Test. This study will evaluate the safety benefits of a state-wide wireless inspection network where drivers logs and vehicle fault codes are electronically checked on a weekly basis. The R&T programs strategic objective Enable and Motivate Internal Excellence supports the FMCSA's strategic goal of Organizational Excellence by improving performance to serve the customers of the ART Office more effectively and economically. The ART Office has a long-standing partnership with the National Academies of Sciences TRB, which will be broadened to increase TRB's participation and expertise in FMCSA's analysis, research, and technology programs. Specific joint activities include publishing truck and bus synthesis reports and special reports, conducting conferences, and publishing reports from the Innovations Deserving Exploratory Analysis (IDEA) program.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2010: FR-RRD-0014-10-01-00 Railroad Research Foundation on Countermeasures to Reduce Suicides on Railway Rights-of-Way DRAFT report entitled Recommendations to Prevent Railway Suicides in the United States, April 2010, has been prepared and is currently in review.

FR-RRD-0002-10-01-00 Railroad Research Foundation Vital PTC:

The Lockheed Martin Vital PTC (LM VPTC) system incorporated the new adaptive braking algorithm with emergency braking backup developed by FRA R&D and Transportation Technology Center, Inc (TTCI). Various trains with LM VPTC on board were tested extensively in various test track segments in TTCI and the algorithm was found to perform very satisfactorily, with trains stopped within 500 feet from below 30 mph and within 1000 feet from above 30 mph, as per original objectives in the specification. The project as per description in this grant has been completed and is now closed.

FR-RRD-0007-10-01-00 Railroad Research Foundation Research and

Development Projects for Enhancement of Positive Train Control Specifications and requirements for the positive train location systems were

developed. Several proposals responding to the Request for Proposal this system were received and reviewed by the industrial advisory group. Eliminating the ones which were technically insufficient, two prospective bidder, SAIC and Boeing, remained. Negotiation on the pricing just ended for phase 1, and both are to be awarded in accordance with the recommendation of the industrial advisory group. (note: the costs for these proposals are higher than originally estimated, and we are in the process of adding FRA funding to this project.)

FR-RRD-0001-10-01-00: Rail Defect Detection System Prototype Development, UCSD

Rail inspection prototype successfully blind tested at Herzog, Inc. in June 2010 with flaw detection performance exceeding both AREMA standards and industry average for rail flaw detection system. Personnel from FRA, Volpe, ENSCO, Herzog, and BNSF and UP observed the test.

A 250-ft long Rail Defect Farm with more than 25 known rail flaws has been constructed at the University of California San Diego with FRA support and BNSF in-kind contribution, for continued development of rail inspection technologies of interest to the FRA.

AREMA Committee 4 (Rail) meeting was held at the University of California San Diego in April 2011 pursuant to BNSF recommendation, showcasing successful FRA projects. Presentations and demonstrations were given by Dr. Lanza di Scalea on both Rail Flaw Inspection Prototype and Rail Neutral Temperature/Buckling Measurement Projects.

Technical paper on FRA rail flaw detection prototype was presented at the TRB Annual Meeting, Washington DC, in January 2011. That paper was also accepted for publication in the Journal of the Transportation Research Board.

Technical paper on FRA rail flaw detection prototype has been accepted for presentation and publication at the AREMA Annual Meeting in September 2011, to be held in Minneapolis, MN.

A patent application has been filed with the US Patent Office by the University of California San Diego on the rail inspection prototype.

FR-RRD-0009-10-01-00: Automated Measurement of Stress in Continuous CWR

A 70-ft long Large-Scale CWR Test-bed has been constructed in the Structural Engineering Laboratories of the University of California San Diego with FRA funding and BNSF in-kind contribution of the materials. This is a one-of-a-kind test setup, heavily instrumented, to study techniques for in-situ stress measurement/neutral temperature (NT) under controlled laboratory environment. A rail switch heater rod has been installed to simulate environmental temperature changes.

The University of Nebraska Lincoln- UNL (separate FRA grant) principal investigator has also tested different NT measurement (DUB) approach at UCSD's test-bed in February of 2011 at no extra laboratory costs. A second test by UNL in San Diego is planned for summer of 2011.

A live demonstration of NT temperature measurement in the Large-Scale CWR setup was given to AREMA Committee 4 (Rail) during their meeting in San Diego in April 2011.

Results from this Large-Scale test setup show measurement of NT to within +/- 2 degrees. This accuracy surpasses standard requirements for NT measurements (e.g. TTCI considers +/- 10 degrees as an acceptable standard). Testing devoted to confirming the repeatability of this measurement is on-going.

FR-RRD-0010-10-01-00: Composite Materials Use for Railroad Infrastructure, WVU

Designed and Fabricated 15 thermoplastic composite railroad crossties, and installed at the TTC, Pueblo, CO for testing and data collection for both technical performance and economic feasibility.

FR-RRD-0011-10-01-00: Automated Measurement of Longitudinal Stress in Rail

Developed method to perform diffuse ultrasonic backscatter (DUB) measurements and a prototype for these measurements on the web of rail, Developed advanced instrumentation to measure three channels of DUB simultaneously,

Developed theoretical basis for stress measurements by examining the acoustoelastic effect at the grain level and corresponding influence on

scattering,

Have shown the sensitivity of DUB with respect to changes in load and temperature independently within UNL lab,

Have shown that DUB measurements can be made through a thin elastomeric material which allows a rolling contact DUB device to be developed

Testing at the Large-scale test-bed at the UCSD showed the sensitivity of DUB to changes in longitudinal rail stress (LRS.)

FR-RRD-0008-10-01-00 Illinois Commerce Commission Railroad Safety Section

Illinois Commerce Commission has awarded 50 grants to various municipalities, police departments, Operation Lifesaver, etc. which will be spent of public education and enforcement activities running Jan 1, 2011 through Dec 31, 2011.

FR-RRD-0018-10-01-00 Evaluation of Wheel/Rail Contact Mechanics

1. Completed the design specifications for a state-of-the art roller rig system that will allow for precise measurement and evaluation of the wheel-rail contact mechanics

2. Conducted an extensive survey of the available roller rig systems, worldwide, along with their capabilities for studying wheel-rail contact mechanics. (Did not find any systems that can perform the tasks needed by FRA and the U.S. Railroads.)

3. Completed conceptual designs for a dozen of roller rig systems that are currently being reviewed with our industrial partner (Norfolk Southern) and will be reviewed with FRA in the near future

4. Completed a parametric dynamic model of the roller rig for evaluating the feasibility of the preliminary design concepts, and aiding during the detail design stage.

FR-RRD-0019-10-01-00 Study of Rail Grinding Optimization and Wheel/Rail Friction Management

Obtained rail profile data from Amtrak, worked with Amtrak and Holland to evaluate the grinding practice. Conducted field measurements on Amtrak NEC. Fiscal Year 2011: FR-RRD-0004-10-01-00 Peninsula Corridor Joint Powers Board Caltrain PTC/CBOSS Development Project
The specification for the CBOSS PTC system has been developed and the bidding process has begun. Proposals have been received and in the review process by Peninsula Corridor Joint Powers Board and their consultants.

FR-RRD-0001-10-01-00: Rail Defect Detection System Prototype Development, UCSD

Discussions are underway to transition elements of the rail inspection prototype to commercial rail inspection service providers (Herzog) under close partnership with BNSF. This transition is envisioned as a technology license from the University of California San Diego through Dr. Lanza di Scalea Start-up Company. Fiscal Year 2012: FR-RRD-0021-11-01-00 with General Electric Transportation is expected to produce a design concept for a high speed locomotive truck.

Matching Requirements: Program funds are apportioned annually to the states

according to a statutory formula. Twenty percent of the funds are allocated by the ratio of nonurbanized land area of each State to the nonurbanized land area of all the States with no State receiving more than five percent of these funds. Eighty percent are allocated by the ratio of nonurbanized population of each State to the nonurbanized population of all of the states. In addition to the funds made available to States under section 5311, approximately 16 percent of the funds authorized for the new section 5340 Growing States and High Density States formula factors will be apportioned to States for use in nonurbanized areas. Rural Transit Assistance Program (RTAP) is funded as a two percent takedown from the amount authorized and appropriated for Section 5311 and can be used for technical assistance, training, Research and related support activities. From the amounts made available for RTAP, up to 15 percent may be used by the Secretary to carry-out projects of national scope with the remaining balance to the states. Funds are allocated annually based on an administrative formula that provides a base amount to each state and allocates the balance according to the nonurbanized area population. The maximum Federal share eligible capital and project administration costs is 80 percent, except for three categories of projects that can be funded at 90 percent share: projects designed specifically to increase the accessibility of public transportation to bicycles and vehicle related equipment required to comply with the ADA or the Clean Air Act. The maximum FTA share for operating assistance is 50 percent of the net operating deficit. Other Federal funds may be used for half of the local match requirement. Income from purchase of service contracts with human service agencies may be used for the entire local share for operating assistance. There is no matching requirement for RTAP or for state administration.

This program has MOE requirements, see funding agency for further details.

For projects directly administered by a Federal land management agency, these funds will be administered by interagency agreement between the FTA and the respective agency. For programs administered by a State, tribal, or local Governmental authority, these funds will be administered through a grant administered by FTA. With regard to interagency agreement and grant requirements, 49 U.S.C. 5320(i) authorizes the Secretary to apply the requirements of 49 U.S.C. 5307 (Urbanized Area Formula Grant) and 5333(a) (Prevailing Wages Requirement) to the extent the Secretary deems appropriate.

Additionally, each recipient (Federal land management agency, and State, tribal, and local governments) of Federal funds must comply with requisite Federal guidelines governing the management of Federal funds and specific program requirements. Program Oversight, as defined by FTA, will ensure that projects meet the basic statutory, administrative, and regulatory requirements as stipulated by the conditions for accepting Federal funds.

After evaluating the projects on the basis of criteria in the law and further explained in Section 180 of this program description, the team will provide a recommendation to the Secretary of the Interior. The Secretary of the Interior, after consultation with and in cooperation with the Secretary of Transportation, will determine the final selection and amount of funding for each project.. The Department of the Interior will notify each Federal land management agency of projects awarded for sites under the agency's jurisdiction. FTA will publish the list of all selected projects and funding levels in the Federal Register, as well as in FTAs annual report to Congress on the Alternative Transportation in Parks and Public Lands program submitted as part of FTAs Annual Report on New Starts in early February 2008. Criteria and application procedures may be reassessed for subsequent years.

Once proposals have been reviewed and projects have been chosen on the basis of selection criteria, the cognizant Federal agency (or agencies), will award funds to the proposing entity to implement the project. These funds will be administered according to Federal requirements as well as the appropriate policies, guidelines and rules of the pertinent agencies. For projects directly administered by a Federal land management agency, these funds will be administered by interagency agreement between the FTA and the respective agency. For programs administered by a State, tribal, or local Governmental authority, these funds will be administered through a grant administered by FTA. With regard to interagency agreement and grant requirements, 49 U.S.C. 5320(i) authorizes the Secretary to apply the requirements of 49 U.S.C. 5307 (Urbanized Area Formula Grant) and 5333(a) (Prevailing Wages Requirement) to the extent the Secretary deems appropriate.

20.700 PIPELINE SAFETY PROGRAM BASE GRANTS

FEDERAL AGENCY:

Pipeline and Hazardous Materials Safety Administration, Department of Transportation

AUTHORIZATION:

Natural Gas Pipeline Safety Act of 1968, Public Law 090-481, 86 Stat. 616, 49 U.S.C 1971.

OBJECTIVES:

To develop and maintain State gas and hazardous liquid pipeline safety programs.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

The Federal Pipeline Safety Law authorizes Federal reimbursement of up to 80 percent of a State's expenditure during the year for personnel, equipment, and activities reasonably required by the State agency for the conduct of its pipeline safety program. The Law further stipulates that the State expenditures in any given year, without Federal assistance, cannot be less than the average amount expended by the State for gas and hazardous liquid safety programs for the 3 fiscal years prior to the fiscal year in which the Secretary makes the payment, except when the Secretary waives this requirement. The State agency must also agree to provide the remaining cost of the safety program(s). Within these limitations, the available funds are allocated by a method designed to reflect the degree to which a State has met certain goals established. The allocation is determined by assigning point values to the States for having achieved certain levels of program participation, dividing this point score by the sum of the States' point scores, and multiplying this ratio by the amount available for the distribution. PHMSA distributed the remaining funds according to certain criteria designed to seek improvements in State programs. The criteria used by PHMSA were the extent of intrastate jurisdiction, inspector qualifications, recommended number of inspection person-days, State adoption of applicable Federal regulations, and other relevant criteria. In 2010, the Federal allocations represented 75.57 percent of the total estimated State requests in the natural gas program (range: 51.64 to 70.56 percentage of request). The Federal allocation in the hazardous liquid program represented 64.68 percent of the total estimated State requests (range: 63.503 to 70.559 percent). Funds must be dedicated to the Certified Pipeline Safety Program.

Applicant Eligibility:

State must have a 60105 Certification or 60106 Agreement with PHMSA. The Department provides Federal funds, up to 80 percent of the States total program costs to any State agency with a certificate under Section 60105 of Title 49, United States Code, an agreement under Section 60106 of Title 49, United States Code, or to any State acting as a DOT agent on interstate pipelines. State must agree that the aggregate expenditures of State funds, exclusive of Federal funds, on the pipeline program for the calendar year to which the Federal funds apply are/not less than the average level of such expenditures for the previous 3 years.

Beneficiary Eligibility:

State, District of Columbia, and Puerto Rico.

Credentials/Documentation:

Appropriate State legal official must approve legality of agency application and agreement. Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments, and "Procedural Guide for the Pipeline Safety Grant Program." Application Procedures:

OMB Circular No. A-102 applies to this program. This program is excluded from coverage under OMB Circular No. A-110. Each State submits with its annual application a summary of estimated program costs by calendar year covering the State gas and/or hazardous liquid pipeline safety activities to the Pipeline and Hazardous Materials Safety Administration, DOT. This program is excluded from coverage under OMB Circular No. A-110.

Federal Hazardous Materials Transportation Act, Public Law 49-5101 et seq.

OBJECTIVES:

To increase State, local, territorial and Native American tribal effectiveness to safely and efficiently handle hazardous materials accidents and incidents; enhance implementation of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA); and encourage a comprehensive approach to emergency planning and training by incorporating response to transportation standards.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

The grant program will be used to increase the emphasis on transportation in ongoing efforts and to improve the capability of communities to plan for and respond to the full range of potential risks posed by accidents and incidents involving hazardous materials. The grants have two principal uses: First, to assist States, Territories and Native American Tribes in developing, improving

and implementing emergency response plans under EPCRA; including the determination of flow patterns of hazardous materials within a State, between States and Native American lands; determining the need for regional hazardous materials response teams. Applicants must certify that they meet or exceed a nonfederal maintenance of effort level equivalent to the average of aggregate nonfederal applicant expenditures for the preceding 2 years. They must also certify that the State, Territory or Native American Tribe is complying with sections 301 and 303 of EPCRA. Those States, Territories or Native American Tribes must agree to make at least 75 percent of the Federal planning funds awarded available to Local Emergency Planning Committees (LEPCs) for developing, improving, or implementing emergency plans, and 75 percent of the benefit of training funds available to local emergency responders. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact his or her, State, Territory or Native American Tribe for more information on the process required to follow in applying for assistance. This program does not have MOE requirements.

Length and Time Phasing of Assistance:

The length of project periods may extend from time of initial award through fiscal year 2011; however phased accomplishments or budget periods will limit the time frame for the funds awarded. Payments will generally be reimbursable, paid based on submission of a Request For Advance or Reimbursement Form 270 using DOT automated clearinghouse electronic transfer procedures. DOT data systems indicate that there are 15,000 -17,000 incidents each year, of which 500 are serious. Appropriate response to even one accident can more than compensate for the cost of the program, and an inappropriate response can easily cost many millions of dollars in property loss, and loss of human life.

2. The extent to which the proposed project scope demonstrates an understanding of the specific concern the Applicant wishes to address, as well as the range of risks affected pipelines pose to the affected geographic area and the risks the community poses to the pipelines;
3. The extent to which the proposal demonstrates the Applicants experience with and commitment to open communication with affected operators and to partnerships with other key members of the community;
4. The extent to which the Applicants project is designed to improve performance and safety over time in areas such as engineering, damage prevention, land use, public education, emergency response, and community awareness;
5. The extent to which the Applicants project plan establishes clear goals, objectives, milestones, and estimates of project costs;
6. The extent to which the Applicant has a plan for evaluating and disseminating results; and

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2010: This project is conducting measurements on complex hydrogen storage systems to determine if they will be suitable for hydrogen storage. The following accomplishments can be reported:

Have done kinetics and modeling studies on sodium alanate and have demonstrated that absorption is controlled by the reaction at a moving boundary.

Have done kinetics studies on the LiBH₄/MgH₂ system using different ratios of LiBH₄ and MgH₂ and shown that the kinetics decrease as the amount of LiBH₄ in the system increases.

Have continued studies on hydrogen storage systems based on MgH₂ mixed additives such as TiH₂ and Mg₂Ni. We have shown that both these additives can lower reaction temperature and improve reaction rates.

Have begun to study complex borohydride systems that are based on Mg(BH₄)₂. Analyses show that these systems have some partial reversibility. Fiscal Year 2011: Continue to study the hydrogen sorption characteristics and determine their suitability for hydrogen storage. Continuing to do thermodynamics, kinetics and modeling studies. New catalysts will be tested including one based on niobium fluoride. Continue studying several new destabilized studies based on first principles calculations to have good potential for hydrogen storage. These will include a study of some amide based hydrogen storage systems. Thermodynamics, kinetics, and modeling will be done on these systems. Continue collaboration with the University of Delaware on a new project involving a hydrogen storage containment system for vehicular transportation. Fiscal Year 2012: No Current Data Available
