93.445 INDIAN HEALTH SERVICE SANITATION FACILITIES CONSTRUCTION PROGRAM

FEDERAL AGENCY:

Indian Health Service, Department of Health and Human Services

AUTHORIZATION:

25 U.S.C. 13 Snyder Act, Public Law 83-568, Transfer Act, 42 U.S.C. 2001, Public Law 86-121, Indian Sanitation Facilities Act; and Title III of Public Law 94-437, Indian Health Care Improvement Act, as amended.

OBJECTIVES:

To provide essential sanitation facilities, such as safe drinking water and adequate waste disposal systems, for Indian homes and communities. The IHS Sanitation Facilities Construction Program, an integral component of the IHS disease prevention activity, has carried out those authorities since 1960 using funds appropriated for Sanitation Facilities Construction to provide potable water and waste disposal facilities for AI/AN people. As a result, the rates for infant mortality, the mortality rate for gastroenteritis and other environmentally related diseases have been dramatically reduced, by about 80 percent since 1973. The IHS physicians and health professionals credit many of these health status improvements to IHS' provision of water supplies, sewage disposal facilities, development of solid waste sites, and provision of technical assistance to Indian water and sewer utility organizations. The provision of Indian sanitation facilities is a very important component of the overall effort required to achieve a reduction in infant mortality, a goal highlighted in Healthy People 2010 "The Year 2010 Objectives for the Nation. Safe drinking water supplies and adequate waste disposal facilities are essential preconditions for most health promotion and disease prevention efforts, as well as being a major factor in the quality of life of Indian people.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2010: 50 projects funded for activities supported under this CFDA.

The evidence indicates a strong rationale for this type of program. Studies indicate that: parent to parent support increased parents confidence and problem-solving capacity (1) ; family-to-family support can also have beneficial effects on the mental health status of mothers of children with chronic illness (2) ; and that family participation and family-centered providers are associated with improved transition, less unmet needs, better community based systems, and fewer problems with specialty referrals.(3)

In FY 2011, 51 centers are collecting data on the issues facing families regarding services and financing of those services while working with Medicaid, Education, Title V, and other agencies to inform them of families needs. Centers are also disseminating information on the implementation of ACA and encouraging family leaders to be involved in the planning within their states such as planning for health insurance Exchanges and Navigator Programs. Other information disseminated through fact sheets, newsletters and listservs are helping families understand the new provisions and how they impact individual access to coverage, such as the extension of Federal dependant coverage to age 26. In addition, many are working with Bureau of Primary Health Cares Federally Qualified Health Centers to implement medical/health homes through training, and providing materials. Some of the centers are also working with the Administration on Agings Aging and Disability Resource Centers on no wrong door approach for sharing resource information across the life span for people with disabilities. 50 centers reported an unduplicated count of 121,476 families served in FY 2010. Additionally, In FY 2010, 81% of families served by 50 centers said that the centers were somewhat useful, very useful or extremely useful in helping them to be better able to partner in decision making at any level.

Assistance is available to eligible Tribes (or consortia of Tribes), Tribal Organizations, and Urban Indian Organizations, to strengthen and improve maternal and child health programs, improve service coordination for at-risk communities, and identify and provide comprehensive evidence-based home visiting services to families who reside in at-risk communities.

The ACF, Office of Planning, Research and Evaluation (OPRE), in collaboration with HRSA, is administering the Tribal Research Center for Early Childhood (TRCEC), which will provide leadership and support to promote excellence in community-based participatory research and evaluation of ACF early childhood initiatives that serve Tribal communities (i.e., Home Visiting, Head Start, Early Head Start). The TRCEC is expected to engage in a variety of activities that are designed to identify and develop effective practices and

systems for home visiting, Head Start, and Early Head Start programs in Tribal communities; to establish the culturally meaningful processes and outcomes of those programs; to build research capacity within Tribal communities; and to build the capacity of researchers to conduct research and evaluation in partnership with Tribal communities. TRCEC will provide leadership and support to promote excellence in community-based research and evaluation of Tribal MIECHV, Head Start, and EHS initiatives that serve AI/AN children and families. TRCEC is expected to engage in activities that support the identification and development of effective practices and systems for integrated services for Tribal MIECHV, Head Start, and EHS in tribal communities.

TYPES OF ASSISTANCE:

Consistent with statutory authority, Home Visiting funds for the TRCEC will be used for: (a) activities to promote excellence in research and evaluation of Tribal MIECHV programs in tribal communities; and (b) measurement development activities that will expand the evidence base around home visiting programs for AI/AN populations. Consistent with the relevant statutory authority, Head Start funds for the TRCEC will be used for research and evaluation activities to: (a) foster continuous improvement in the quality of the Head Start programs and in their effectiveness in enabling participating AI/AN children and their families to succeed in school and otherwise; and (b) develop, test, and disseminate new ideas based on existing scientifically valid research, for addressing the needs of AI/AN children and their families and communities. Costs of organized fundraising, including financial campaigns, endowment drives, solicitation of gifts and bequests, and similar expenses incurred solely to raise capital or obtain contributions, are unallowable.

Grant awards will not allow reimbursement of pre-award costs.

Construction and purchase of real property are not allowable activities or expenditures under this grant award.

The statute requires that grantees supplement and not supplant funds from other HV initiatives.

Awards issued under this announcement are subject to the uniform administrative requirements and cost principles of 45 CFR Part 74 (Awards and Subawards to Institutions of Higher Education, Hospitals, Other Non-Profit Organizations, and Commercial Organizations), or 45 CFR Part 92 (Grants and Cooperative Agreements to State, Local, and Tribal Governments).

An application funded with the release of Federal funds through a grant award, does not constitute, or imply, compliance with Federal regulations. Funded organizations are responsible for ensuring that their activities comply with all applicable Federal regulations.

Grantees are subject to the limitations set forth in 45 CFR Part 74.81 (Prohibition against profit), which states that, "... no HHS funds may be paid as profit to any recipient even if the recipient is a commercial organization. Therefore, organizations must take steps to separate, in time or location, their inherently religious activities from the services funded under this program. Regulations pertaining to the Equal Treatment for Faith-Based Organizations, which includes the prohibition against Federal funding of inherently religious activities, can be found at the HHS web site at: <http://www.hhs.gov/fbci/waisgate21.pdf>.

A faith-based organization receiving HHS funds retains its independence from Federal, State, and local governments, and may continue to carry out its mission, including the definition, practice, and expression of its religious beliefs. For example, a faith-based organization may use space in its facilities to provide secular programs or services funded with Federal funds without removing religious art, icons, scriptures, or other religious symbols. In addition, a faith-based organization that receives Federal funds retains its authority over its internal governance, and it may retain religious terms in its organization's name, select its board members on a religious basis, and include religious references in its organization's mission statements and other governing documents in accordance with all program requirements, statutes, and other applicable requirements governing the conduct of HHS funded activities." certifications, which must be submitted prior to or simultaneous with
submission of an application package. OMB Circular No. A-87 applies to this
program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact
information is not required for this program. This program is excluded from
coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110
applies to this program. Applicants should review each of the individual
funding opportunity announcements issued under this CFDA program for any
additional application procedures, which must be followed when submitting an
application package.

Award Procedure:

For the Tribal HV program: each application will be screened to determine
whether it was received by the closing date and time and whether the requested
amount exceeds the award ceiling. Applications that are designated as late or
those with requests that exceed the award ceiling will be returned to the
applicant with a notation that they were deemed non-responsive and will not be
reviewed.

Applications competing for financial assistance will be reviewed and evaluated
by objective review panels using the criteria described in the funding
opportunity announcement. Each panel is made up of experts with knowledge
and experience in the area under review. Generally, review panels are
composed of three reviewers and one chairperson.

Results of the competitive objective review are taken into consideration by
ACF in the selection of projects for funding; however, objective review scores
and rankings are not binding and are one element of the decision-making
process.

ACF may elect to not fund applicants with management or financial problems
that would indicate an inability to successfully complete the proposed project.
Applications may be funded in whole or in part. Successful applicants may be
funded at an amount lower than that requested. ACF reserves the right to
consider a preference to fund organizations serving emerging, unserved, or
under-served populations, including those located in pockets of poverty, and to
consider the geographic distribution of Federal funds in its funding decisions.

ACF may refuse funding for projects with what it regards as unreasonably high
start-up costs for facilities or equipment, or for projects with unreasonably high
operating costs. In addition, federal staff will conduct an administrative review
of the applications and the results of the competitive review and will make
recommendations for funding to the Director, Office of Child Care (OCC)
With the results of the competitive review and information from federal staff,
the Director of OCC, in consultation with Deputy Assistant Secretary and
Inter-Departmental Liaison for Early Childhood Development, will make the
final funding decisions.

For the TRCEC, grant awards are subject to the availability of Federal funds.
Note that funds for the Tribal MIECHV are not appropriated for the full length

of the specified project period.

The Federal share of project costs shall not exceed \$600,000 for any of the
12-month budget periods, inclusive of indirect costs (\$250,000 will be from the
Tribal MIECHV Program and \$350,000 will be from Head Start research
funds). Consistent with statutory authority, Home Visiting funds will be used
for: (a) activities to promote excellence in research and evaluation of Tribal
MIECHV programs in tribal communities; and (b) measurement development
activities that will expand the evidence base around home visiting programs for
AI/AN populations. Consistent with the relevant statutory authority, Head Start
funds will be used for research and evaluation activities to: (a) foster continuous
improvement in the quality of the Head Start programs and in their
effectiveness in enabling participating AI/AN children and their families to
succeed in school and otherwise; and (b) develop, test, and disseminate new
ideas based on existing scientifically valid research, for addressing the needs of
AI/AN children and their families and communities.

No grant award will be made under this announcement on the basis of an
incomplete application. No grant award will be made to an applicant or
sub-recipient that does not have active CCR registration (www.ccr.gov or
1-866-606-8220).

Each application will be screened to determine whether it was received by the
closing date and time and whether the requested amount exceeds the award
ceiling. Applications that are designated as late, or those with requests that
exceed the award ceiling, will receive a screen-out letter noting that the
application was deemed non-responsive and will not be considered for
competitive review or funding. For those applications that have been deemed
disqualified under the initial ACF screening, notice will be given of such
determination by postal mail.

Applications competing for financial assistance will be reviewed and evaluated
by objective review panels using the criteria described in the funding
opportunity announcement. Each panel is made up of experts with knowledge
and experience in the area under review. Generally, review panels are
composed of three reviewers and one chairperson.

Results of the competitive objective review are taken into consideration by
ACF in the selection of projects for funding; however, objective review scores
and rankings are not binding. They are one element in the decision-making
process.

Applications recommended for approval that were not funded under the
competition because of the lack of available funds, may be held over by ACF
and re-considered in a subsequent review cycle if a future competition under the
program area is planned. These applications will be held over for a period of up
to one year and will be re-competed for funding with all other competing
applications in the next available review cycle. For those applications that have
been deemed as approved but unfunded, notice will be given of such
determination by postal mail.

Announcement of awards and the disposition of applications will be provided to
applicants at a later date.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application
deadlines.

Range of Approval/Disapproval Time:

From 60 to 90 days. For the TRCEC, successful applicants will be notified
through the issuance of a Financial Assistance Award (FAA) document that sets
forth the amount of funds granted, the terms and conditions of the grant, the
effective date of the grant, the budget period for which initial support will be
given, the non-Federal share to be provided (if applicable), and the total project
period for which support is contemplated. The FAA will be signed by the
Grants Officer and transmitted via postal mail. Following the finalization of
funding decisions, organizations whose applications will not be funded will be
notified by letter, signed by the Program Office head.

Formula and Matching Requirements:

This program has no statutory formula.
Matching requirements are not applicable to this program.
This program does not have MOE requirements.

Length and Time Phasing of Assistance:

For the Tribal HV, grants (cooperative agreements) are generally awarded for a 5-year project period. In the first year of the project, grants will be awarded on a competitive basis. Pending successful completion of Year 1 activities, submission of a plan that meets requirements, and approval of this plan, applications will be considered on a noncompetitive continuation basis for Years 2-5 subject to availability of funds, satisfactory progress of the grantee, and a determination that continued funding would be in the best interest of the Federal Government. Grants will be awarded for 12-month budget periods with a 5-year project period.

Funds awarded to grantees under this program will be made available for expenditure through the end of the second succeeding fiscal year after award.

For the TRCEC, grants (cooperative agreements) are generally awarded with a project period of up to five years. The initial award will be for the first 12-month budget period. Budget requests for the second through fifth year of funding within the project period should be identified in the current application (on SF-424A), but such requests will be considered in subsequent years on a noncompetitive basis, subject to the applicant's eligibility status, the availability of funds, satisfactory progress of the grantee, and a determination that continued funding would be in the best interest of the Federal Government. Method of awarding/releasing assistance: lump sum.

Reports:

Grantees under this announcement will be required to submit performance progress and financial reports periodically throughout the project period.

The frequency of required reporting is described in each funding opportunity announcement. Final reports may be submitted in hard copy to the Grants Management Office Contact identifiable post-award. Instructions on submission of reports electronically will be provided with award documents.

ACF grantees are required to submit the SF-PPR Cover Page. ACF Programs that utilize reporting forms or formats in addition to, or instead of, the SF-PPR have listed the reporting requirements.

Grant award documents will inform grantees of the appropriate performance progress report form or format to use. Grantees should consult their award documents to determine the appropriate performance progress report format required under their award. Performance progress reports are due 30 days after the end of the reporting period.

Final program performance reports are due 90 days after the close of the project period. The SF-PPR may be found at http://www.acf.hhs.gov/grants/grants_resources.html.

Further instructions will be provided, as necessary, with award terms and conditions that will address specific reporting periods and due dates on an award-by-award basis. Additional information on frequency of reporting is available on the ACF Funding Opportunities web site at http://www.acf.hhs.gov/grants/msg_sf425.html. Federal Financial Report (FFR) - Federal Cash Transaction Report. Progress reports are not applicable. As of February 1, 2011, the Department of Health and Human Services (HHS) began the transition from use of the SF-269, Financial Status Report (Short Form or Long Form) to the use of the SF-425 Federal Financial Report for expenditure

reporting. SF-269s will no longer be accepted for expenditure reports due after that date. If an SF-269 is submitted, the ACF will return it and require the recipient to complete the SF-425.

The transition strategy is allowing individual HHS Operating Divisions to select--from a limited number of options--the approach that best fits their programs and business process. This transition does not affect completion or submission of the cash reporting to the HHS Division of Payment Management's Payment Management System (PMS). The primary features of this transition for recipients are that OPDIVs that previously required electronic submission of the SF-269 will receive the SF-425 expenditure reports electronically and, until further notice, OPDIVs that have been receiving expenditure reports in hard copy will continue to do so.

All expenditure reports will be due on one of the standard due dates by which cash reporting is required to be submitted to PMS OR at the end of a calendar quarter as determined by the Operating Division. As a result, a recipient that receives awards from more than one OPDIV may be subject to more than one approach, but will not be required to change its current means of submission or be subjected to more than eight standard due dates.

Beginning with budget periods which end from January 1 - March 31, 2011, and for all budget periods thereafter, all affected ACF grantees will be required to submit an SF-425 report as frequently as is required in the terms and conditions of their award using due dates for reports to PMS.

Fillable versions of the SF-425 form in Adobe PDF and MS-Excel formats, along with instructions, are available at http://www.whitehouse.gov/omb/grants_forms, www.forms.gov, and on the ACF Funding Opportunity website Forms page.

Further instructions will be provided, as necessary, with award terms and conditions that will address specific reporting periods and due dates on an award-by-award basis. Additional information on frequency of reporting is available on the ACF Funding Opportunities web site at http://www.acf.hhs.gov/grants/msg_sf425.html.

Awards issued as a result of this funding opportunity may be subject to the Transparency Act subaward and executive compensation reporting requirements of 2 C.F.R. Part 170. See ACF's Award Term for Federal Financial Accountability and Transparency Act (FFATA) Subaward and Executive Compensation Reporting Requirement implementing this requirement and additional award applicability information. No performance monitoring is required.

93.521 THE AFFORDABLE CARE ACT: BUILDING EPIDEMIOLOGY, LABORATORY, AND HEALTH INFORMATION SYSTEMS CAPACITY IN THE EPIDEMIOLOGY AND LABORATORY CAPACITY FOR INFECTIOUS DISEASE (ELC) AND EMERGING INFECTIONS PROGRAM (EIP) COOPERATIVE AGREEMENTS

FEDERAL AGENCY:

Centers for Disease Control and Prevention, Department of Health and Human Services

AUTHORIZATION:

Patient Protection and Affordable Care Act (Public Law 111-148), Title IV, Section 4002; Public Health Service Act (PHS Act), Section 301 and 317, 42 U.S.C 241 and 247b.

OBJECTIVES:

Funding was appropriated under regular CDC appropriations, HHS/CDC H1N1 appropriations, and the Patient Protection and Affordable Care Act (the Affordable Care Act) (Public Law 111-148). The Prevention and Public Health Fund (Title IV, Section 4002) was established under PPACA to provide for expanded and sustained national investment in prevention and public health programs to improve health and help restrain the rate of growth in private and public sector health care costs. The Epidemiology and Laboratory Capacity for Infectious Diseases (ELC) and Emerging Infections Program (EIP) cooperative agreements were formed in 1995 as key components of CDC's national strategy to address and reduce emerging infectious disease (EID) threats. The programs play a critical role in strengthening national infectious disease infrastructure by serving as collaborative platforms for state and local health departments, CDC programs, and academic and various other public health partners to improve the ability to detect and respond to EIDs and other public health threats. Specifically, the programs build epidemiology, laboratory, and information systems capacity, integrate epidemiology and laboratory practice, implement active surveillance, and conduct targeted research aimed at improving methods and informing national surveillance and response activities. Overall, additional funds from multiple sources including PPACA will allow ELC and EIP partner agencies to substantially address gaps in EID epidemiology and laboratory capacity (e.g. number and training level of epi and lab staff, efficient/functional information systems, etc).

Developing information systems to support adoption, implementation, enforcement, and/or evaluation of public health legislation, codes, rules, regulations, ordinances, and other policies.

Improving public health system development/redevelopment by building or reengineering of infrastructure to improve networking, coordination, standardization, and centralization of public health services to effectively and efficiently address priority health indicators.

Implementing best health care practices and impact evaluation

Improving information and data system capacity through policy/communication for standardized data collection and analysis systems, information management technology, information dissemination, and meaningful data use and translation

**93.540 AFFORDABLE CARE ACT STREAMLINED SURVEILLANCE FOR VENTILATOR-ASSOCIATED PNEUMONIA: REDUCING BURDEN AND DEMONSTRATING PREVENTABILITY
FEDERAL AGENCY:**

Centers for Disease Control and Prevention, Department of Health and Human Services

AUTHORIZATION:

This program is authorized under Sections 317, 317(k)(2), 318 and 318B of the Public Health Service Act (42 U.S.C. Sections 247b, 247b(k)(2) and 247c), as

amended; and the Patient Protection and Affordable Care Act (PL 111-148), Title IV, Sections 4002, (Prevention and Public Health Fund) for expanded and sustained national investment in prevention and public health programs, IV U.S.C 4002.

OBJECTIVES:

Ventilator-associated pneumonia (VAP) is one of the most common and deadly healthcare-associated infections (HAIs). Program activities under this funding will facilitate a study to demonstrate the utility and relevance of sVAP and promote acceptance of sVAP within the critical care community. Implementation of a new, reliable, valid, clinically credible and potentially automatable VAP surveillance definition will provide the foundation for national surveillance and prevention efforts and for pay-for-reporting and pay-for-performance programs, leading to improved patient safety and fewer complications for patients needing mechanical ventilation. Specifically, the objectives of this project are to: 1. Implement prospective sVAP surveillance in 9 acute-care hospitals currently conducting VAP surveillance using existing National Healthcare Safety Network (NHSN) definitions; 2. Compare the total sVAP surveillance burden to the total burden associated with use of existing NHSN VAP definitions; and 3. Implement an evidence-based VAP prevention initiative and evaluate sVAP preventability by assessing the association between sVAP rates and prevention measure compliance rates. Nine hospitals currently engaged in NHSN VAP surveillance will be recruited.

CRITERIA FOR SELECTING PROPOSALS:

Procedures for assessing the technical merit of grant applications have been instituted to provide for an objective review of applications and to assist the applicant in understanding the standards against which each application will be judged. Critical indicators have been developed for each review criterion to assist the applicant in presenting pertinent information related to that criterion and to provide the reviewer with a standard for evaluation. Review Criteria are used to review and rank applications. The Primary Care Services Resource Coordination and Development Program have six (6) review criteria: I: NEED - The applicant must clearly identify the purpose and state needs for grant support for this project. The need for the project is fully described and documented with relevant data. II: RESPONSE - The objectives for the project should relate to the identified problems/needs as related to the program goals and objectives. The work plan should clearly articulate and address the specific program expectations outlined in the program narrative section; organizational effectiveness, technical assistance, assessment of need/data sharing, workforce development, and shortage area designations. It is critical that the applicant demonstrate it addresses the broad array of primary care issues, services and organizations throughout the State. Objectives are measurable, realistic, and have specific outcomes indicated with timeframes stated. Outcome measures which are attainable within the states time frame are included.

III: EVALUATIVE MEASURES - Each application will be reviewed on the extent to which the proposal: 1) includes a clear, practical, and viable work plan including timeframes and proposed outcomes; and 2) clearly links project activities to the project objectives and outcomes. IV: IMPACT - Activities described clearly contribute to the accomplishment of each objective. Proposed activities are reasonable given the level and experience of staff, resources available, and length of the project period to carry out the proposed expectations.

V: RESOURCES/CAPABILITIES - Evidence is provided of the programs commitment, personnel experience, and success in working with State policies and resources addressing primary care for the underserved. VI: SUPPORT REQUESTED - A fiscal plan assuring effective use of grant funds and resources to carry out the project is provided. The proposed budget is reasonable and reflects effective use of funds to carry out the proposed activities. A detailed justification for each overarching goal and line item is provided. Funding plan by years is provided.

93.558 TEMPORARY ASSISTANCE FOR NEEDY FAMILIES

(TANF)

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

Social Security Act, Title IV, Part A, 42 U.S.C 601 et seq.

OBJECTIVES:

To provide grants to States, Territories, the District of Columbia, and Federally-recognized Indian Tribes operating their own Tribal TANF programs to assist needy families with children so that children can be cared for in their own homes; to reduce dependency by promoting job preparation, work, and marriage; to reduce and prevent out-of-wedlock pregnancies; and to encourage the formation and maintenance of two-parent families.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

States, Territories, the District of Columbia, and Federally-recognized Indian Tribes operating their own TANF programs have broad flexibility to use the grant funds in any manner that meets the purposes of the program (including providing low-income households with assistance in meeting home heating and cooling costs) and in ways that States and Territories were authorized to use funds received under the predecessor Aid to Families with Dependent Children (AFDC), Job Opportunities and Basic Skills Training (JOBS), and Emergency Assistance (EA) programs. States and Territories may also transfer a limited portion of their assistance grant funds to the Child Care and Development Block Grant (CCDBG) and Social Services Block Grant (SSBG) Programs. Not more than 15 percent of any State grant may be spent on administrative costs, exclusive of certain computerization and information technology expenses. Cash grants, work opportunities, and other services are made directly to needy families with children. For Tribal programs, ACF will negotiate a limitation on administrative costs for the first year of the program's operation not to exceed 35 percent, for the second year of the program's operation not to exceed 30 percent, and then for the third and subsequent years of the program's operation not to exceed 25 percent. For the TANF program, there are certain prohibitions, restrictions, and limitations on the provision of assistance. For example, families may only receive Federally-funded assistance for five years. In

addition, Federal funds may not be used to provide medical services, unless they are pre-pregnancy family planning services (Tribes, however, may use Federal funds for medical services if they are job-related).

Applicant Eligibility:

In general, all States, Territories, the District of Columbia, and all Federally-recognized Tribes in the lower 48 States and 13 specified entities in Alaska are eligible. State and local agencies and Tribes that operate TANF programs must do so under plans determined to be complete (or for Tribes approved) by the Department of Health and Human Services (DHHS). For Contingency Funds, all States and the District of Columbia are eligible if they are determined to be a "needy State" by satisfying either an unemployment trigger or a food stamp trigger. Territories and Tribes are not eligible for Contingency Funds.

Beneficiary Eligibility:

Needy families with children, as determined eligible by the State, Territory, or Tribe in accordance with the State or Tribal plan submitted to the Department of Health and Human Services (HHS).

Credentials/Documentation:

Federal funds go to the State, Territory, or Tribal agency certified by the Chief Executive Officer. Needy families must meet State or Tribal eligibility requirements. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. Each State, Territory, and the District of Columbia must develop a State plan and include the certifications signed by the Executive Officer (Governor). Applicants must consult with local governments and private organizations and provide them 45 days to comment on the plan. The State plan and certifications must be submitted to the Secretary of HHS. Tribes may apply to the Secretary to receive funds and to administer the TANF block grant. Tribes would submit a 3-year family assistance plan. The Secretary, in consultation with the Tribe, would set program requirements and time-limits for receipt of welfare-related services, consistent with the purposes of the program and economic conditions/resources of each Tribe. Tribes should contact the OFA Regional TANF Program Manager for further Tribal plan submittal procedures. For Contingency Funds, each State must request these funds monthly for each month they meet either the unemployment or food stamp triggers. For Supplemental Grants, there is no application. Supplemental Grants are awarded annually and issued quarterly to the States (in number 17) with exceptionally high population growth in the early 1990s, historic (1994) welfare grants per poor person lower than 35 percent of the national average, or a combination of above average population growth and below average historic welfare grants per poor person.

Award Procedure:

Once a plan is determined complete, or in the case of a Tribe the plan is approved, by the DHHS, Family Assistance Grants are awarded in quarterly payments. Supplemental Grants are also awarded in quarterly payments. Contingency Fund awards will be made monthly.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

States, Territories, the District of Columbia, and Tribes implement their assistance programs according to their State and Tribal plans. The Secretary does not have authority to approve or disapprove a State plan, only to determine its completeness. Tribal plans are subject to approval by the Secretary. For Contingency Funds, approval/disapproval will be from 30 to 60 days after receipt of the request for funds.

Appeals:

States, Territories, the District of Columbia, and Tribes facing an adverse action by the Secretary may appeal under both administrative and judicial procedures.

In addition, States, Territories, the District of Columbia, and Tribes must provide opportunities for recipients who have been adversely affected to be heard in a State or Tribal administrative or appeal process.

Renewals:

States, Territories, and the District of Columbia must periodically (every 2 or 3 years) renew their funding status by submitting their TANF plan. Tribes must renew their funding status every 3 years. For Contingency Funds, requests for additional funding must be made monthly.

Formula and Matching Requirements:

Statutory Formula: Title 45 CFR, Chapter 2, Part 260; 286.

This program has no matching requirements.

This program has MOE requirements, see funding agency for further details.

Length and Time Phasing of Assistance:

States, Territories, the District of Columbia, and Tribes are awarded their assistance grants in quarterly payments. They may reserve grant moneys, without fiscal year limitation, to provide any allowable benefits and services that are consistent with the purposes of the TANF program. With certain exceptions, most families are limited to no more than 5 years of assistance under the Federal grant. Tribes have the flexibility to establish time limits on receipt of assistance. For Contingency Funds, grant awards are issued monthly to States meeting the eligibility criteria stipulated under Section 101. Method of awarding/releasing assistance: quarterly.

Reports:

States, Territories, the District of Columbia, and Tribes operating their own Tribal TANF programs are required to collect and report to the Secretary on a quarterly basis case record information on the families receiving assistance. They are also required to report administrative costs and overhead expenditures on programs for needy families, participation by noncustodial parents in work activities, and transitional services provided to former recipients. They may be required to report child poverty information annually in accordance with the methodology the Secretary has established by regulation. No cash reports are required. No progress reports are required. Quarterly financial reports. No performance monitoring is required.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. Audits shall be conducted by the Inspector General under Chapter 75 of Title 31, United States Code. If a State or Territory is found to have used funds from the State Family Assistance Grant in violation of the statute, the Secretary shall reduce the grant payable to them for the immediately succeeding fiscal year by that same amount. For Tribes, the Secretary will have the ability to maintain program funding accountability consistent with generally accepted accounting principles and the requirements of the Single Audit Act of 1984 and OMB Circular A-133.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

(1) States receive block grants to ameliorate the causes of poverty in communities. The block grant approach gives the States flexibility to tailor their programs to the particular services needs in their communities. (2) States are required to use at least 90 percent of their allocations for grants to "eligible entities" as defined in the Community Services Block Grant (CSBG) Act, as amended; this includes primarily locally-based community action agencies and/or organizations that serve seasonal or migrant farm workers. (2) No more than the greater of \$55,000 or 5 percent of each State's allocation may be used for administrative expenses at the State level.

Applicant Eligibility:

The Secretary is authorized to make grants to States. This includes each of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Commonwealth of the Northern Mariana Islands. The Secretary also provides assistance directly to the governing body of an Indian Tribe or Tribal organization upon application by the tribe. Only State-recognized tribes, as evidenced by a statement to that effect by the Governor, or tribes formally recognized by the Secretary of the Interior, under the procedure for such recognition in 25 CFR 54, are eligible to receive direct grants.

Beneficiary Eligibility:

States make grants to qualified locally-based nonprofit community antipoverty agencies and other eligible entities which provide services to low-income individuals and families. The official poverty line, as established by the Secretary of Health and Human Services, is used as a criterion of eligibility in the Community Services Block Grant program. When a State determines that it serves the objectives of the block grant, it may revise the income limit, not to exceed 125 percent of the official poverty line.

Credentials/Documentation:

No Credentials or documentation are required. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is required. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Each application must contain assurances by the appropriate State designee that the State will comply with Section 676 of the Community Services Block Grant Act and also meet conditions enumerated in Sections 678(B-D). The State is required to hold at least one legislative hearing every three years in conjunction with the development of the State Plan (Section 676(a)(3)). States are also required to conduct public hearings on the proposed use and distribution of funds to be provided under the Act. The latter sets forth the general purpose for which funds will be used, restrictions on administrative expenses, eligible recipients, board requirements for community action agencies and other nonprofit organizations, fiscal control, monitoring, and Federal investigation provisions, coordination between antipoverty programs in each community and certain prohibitions on political activities. The Chief Executive Officer of each State is also required to designate a lead agency to prepare and submit a plan to the Secretary of HHS describing how the State will carry out the assurances in Section 676. This program is excluded from coverage under 45 CFR, Part 1050.

Award Procedure:

HHS determines the amount of funds to be allocated as block grants to each State in accordance with the formula set forth in the Community Services Block Grant Act. The Office of Management and Budget (OMB) has the authority to apportion to the HHS through the course of a year the Congressional appropriation for block grants. Consistent with OMB's apportionment of funds, HHS will assign allotments to the States through individual awards or a series of awards, normally on a quarterly basis.

To make grants to States, Territories, Tribes, and tribal organizations serving federally-recognized tribes (public institutions of higher education and hospitals are not eligible applicants) for child care assistance for low-income families and to: (1) allow each State maximum flexibility in developing child care programs and policies that best suit the needs of children and parents within such State; (2) promote parental choice to empower working parents to make their own decisions on the child care that best suits their family's needs; (3) encourage States to provide consumer education information to help parents make informed choices about child care; (4) assist States to provide child care to parents trying to achieve independence from public assistance; and (5) assist

States in implementing the health, safety, licensing, and registration standards established in State regulations. Current priorities include: making systemic investments in quality child care to promote child development and learning; and creating a system that is child focused, family friendly, and fair to providers.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

In the Fiscal Year 2011 Full-Year Continuing Appropriations Act, Congress directs that funds appropriated for the Child Care and Development Block Grant (CCDBG or Discretionary Funds) must be used to supplement, not supplant, State general revenue funds for child care assistance for low-income families. Lead Agencies must use Discretionary Funds for child care services on a sliding fee scale basis, activities that improve the quality or availability of such services, and other activities that realize the goals of the CCDBG. Certain amounts of Discretionary Funds must be used for specific purposes: quality expansion; infant and toddler quality improvement; and child care resource and referral, including a national toll-free hotline; and school-age child care activities. A portion of the Discretionary Funds is also designated for the U.S. Department of Health & Human Services to carry-out research, demonstration, and evaluation projects. Not more than five percent of the aggregate amount of CCDF Funds expended by the State or Territory (15 percent for Tribes or tribal organizations) may be expended for administrative costs incurred by the State or Territory to carry-out all of its functions and duties. The term "administrative costs" does not include the costs of providing direct services. A State or Territory shall use not less than four percent of the CCDF Funds to improve child care quality and availability including comprehensive consumer education, activities to increase parental choice, and other activities such as resource and referral services, provider grants and loans, monitoring and enforcement of requirements, training and technical assistance, and improved compensation for child care staff. Except for approved construction of child care facilities by tribal grantees, no Discretionary Funds may be used for the purchase or improvement of land, or for the purchase, construction, or permanent improvement of any building or facility (other than for minor remodeling and for upgrading facilities to meet State and local child care standards). No Discretionary Funds provided directly to child care providers through grants or contracts may be expended for any sectarian purpose or activity, including sectarian worship or instruction. However, Grantees must give parents the option of receiving vouchers or certificates to allow parents the choice of faith-based or community child care providers. No Discretionary Funds may be provided for any services provided to students enrolled in grades 1 through 12 during the regular school day; for any services for which such students receive academic credit toward graduation; or for any instructional services which supplant or duplicate the academic program of any public or private school. Lead Agencies shall assure that a substantial portion of the Discretionary Funds will be used to provide assistance to low-income working families who are not receiving assistance under the Temporary Assistance for Needy Families program, attempting through work activities to transition off of temporary assistance programs, nor at risk of becoming dependent on temporary assistance programs.

Applicant Eligibility:

Eligibility: All 50 States, the District of Columbia, the Virgin Islands, Puerto Rico, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and Federally recognized Tribal Governments, including Alaskan Native Corporations.

Beneficiary Eligibility:

In advance of the hearing, the Lead Agency must make the content of the plan available to the public. The Lead Agency must also coordinate the provision of services under the program with other Federal, State, and local child care and early childhood development programs. In addition, the WF program allows ORR to ensure that refugee assistance programs exist in every State where refugees are resettled. Projects must serve all eligible refugees in a community. Wilson/Fish projects comprise two types of projects. (1) Nine projects currently establish or maintain a refugee program in a State where the State is not participating in the

refugee program or has withdrawn from the refugee program or a portion of the program. (Alabama, Alaska, Idaho, Kentucky, Louisiana, Nevada, North Dakota, South Dakota, and Tennessee). The Child Care Mandatory and Matching Funds of the Child Care and Development Fund (CCDF)

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

Social Security Act, Title IV, Section 418, 42 U.S.C 618; Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (Public Law 104-193); Child Care and Development Block Grant Act of 1990, as amended (Public Law 101-508, 42 USC 9858, et seq); Balanced Budget Act of 1997 (Public Law 105-33); and the Deficit Reduction Act of 2005 (Public Law 105-171).

OBJECTIVES:

The Child Care Mandatory and Matching Funds are a part of the Child Care and Development Fund (CCDF) program, along with the Child Care and Development Block Grant (CCDBG) or Discretionary Funds (see CFDA 93.575). To make grants to States, Tribes, and tribal organizations for child care assistance for low-income families and to: (1) allow each State maximum flexibility in developing child care programs and policies that best suit the needs of children and parents within such State including systemic investments in quality child care to promote child development and learning, and to create a system that is child focused, family friendly, and fair to providers; (2) promote parental choice to empower working parents to make their own decisions on the child care that best suits their family's needs; (3) encourage States to provide consumer education information to help parents make informed choices about child care; (4) assist States to provide child care to parents trying to achieve independence from public assistance; and (5) assist States in implementing the health, safety, licensing, and registration standards established in State regulations. Current priorities include: making systemic investments in quality

child care to promote child development and learning; and creating a system that is child focused, family friendly, and fair to providers.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

Title IV of the Social Security Act appropriates funds (Mandatory and Matching Funds) for the purpose of providing child care assistance. Lead Agencies must use Mandatory and Matching Funds for child care services on a sliding fee scale basis, activities that improve the quality or availability of such services, and other activities that realize the goals of the CCDBG Act. Lead Agencies must ensure that not less than 70 percent of the total amount of Mandatory and Matching Funds are used to provide child care assistance to families who are receiving assistance under the Temporary Assistance for Needy Families program, families who are attempting through work activities to transition off of temporary assistance programs, and families who are at risk of becoming dependent on temporary assistance programs. Not more than five percent of the aggregate amount of CCDF Funds expended by the State (15 percent for Tribes or tribal organizations) may be expended for administrative costs incurred by the State to carry-out all of its functions and duties. The term "administrative costs" does not include the costs of providing direct services. A State shall use not less than four percent of the CCDF Funds to improve child care quality and availability including comprehensive consumer education, activities to increase parental choice, and other activities such as resource and referral services, provider grants and loans, monitoring and enforcement of requirements, training and technical assistance, and improved compensation for child care staff. Except for approved construction of child care facilities by tribal grantees, no Mandatory or Matching Funds may be used for the purchase or improvement of land, or for the purchase, construction, or permanent improvement of any building or facility (other than for minor remodeling and for upgrading of facilities to meet State and local child care standards.) No Mandatory or Matching Funds provided directly to child care providers through grants or contracts may be expended for any sectarian purpose or activity, including sectarian worship or instruction. However, Grantees must give parents the option of receiving vouchers or certificates to allow parents the choice of faith-based or community child care providers. No Mandatory or Matching Funds may be provided for any services provided to students enrolled in grades 1 through 12 during the regular school day; for any services for which such students receive academic credit toward graduation; or for any instructional services which supplant or duplicate the academic program of any public or private school.

Applicant Eligibility:

Eligibility: All 50 States, the District of Columbia, the Virgin Islands, Puerto Rico, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and Federally recognized Tribal Governments, including Alaskan Native Corporations.

Beneficiary Eligibility:

Children under age 13 (or, at the option of the grantee, up to age 19, if physically or mentally incapable of self-care or under court supervision), who reside with a family whose income does not exceed 85 percent of the State median income for a family of the same size, and who reside with a parent (or parents) who is working or attending job training or educational program, or are in need of, or are receiving protective services.

Credentials/Documentation:

Lead Agencies must operate under a CCDF plan approved by the Administration for Children and Families, and must provide assurances that the grantee will comply with the requirements of the CCDBG Act and all applicable Federal law. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Each Grantee must designate a Lead Agency to which grants are awarded and that is accountable for the use of the Mandatory and Matching Funds provided, the duties of which shall include developing a CCDF plan. In conjunction with the development of the CCDF plan, the Lead Agency must hold at least one public hearing no earlier than nine months before the CCDF plan becomes effective and after at least 20 days of statewide public notice, to provide the public an opportunity to comment on the provision of child care services under

the plan. In advance of the hearing, the Lead Agency must make the content of the plan available to the public. The Lead Agency must also coordinate the provision of services under the program with other Federal, State, and local child care and early childhood development programs. Also, the Lead Agency must consult with appropriate representatives of local governments. Tribal Lead Agencies submitting applications for construction must submit an environmental impact assessment. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. A Lead Agency desiring to receive an allotment for a fiscal year is required to submit a two-year CCDF plan to the Administration for Children and Families, as well as, financial and other information necessary for the grants process. Each plan must contain certifications and assurances by the Lead Agency that it will comply with the requirements of the Child Care and Development Block Grant Act (CCDBG). The plan must also include: the designation of a Lead Agency; the provision of assurances regarding policies and procedures as stated in Section 658E(c)(2) of the amended CCDBG; an outline of the proposed use of block grant funds in compliance with Section 658E(c)(3) of the CCDBG; the provision of certification regarding payment rates as stated in Section 658E(c)(4) of the CCDBG; and the establishment of a sliding fee scale. Additional requirements are specified by 45 CFR Parts 98 and 99.

Appeals:

Guidelines for appealing disapprovals of CCDF plans are specified in regulations at 45 CFR Part 99.

Renewals:

CCDF plans must be submitted every two years.

Formula and Matching Requirements:

Statutory Formula: Title 45 CFR, Part 98.53.
Matching Requirements: Allocations of the Mandatory Funds are based on a State's Federal share of the expenditures for the now-repealed AFDC-linked child care programs (AFDC/JOBS Child Care, Transitional Child Care, and At-Risk Child Care) in 1994 or 1995, or the average of 1992 through 1994, whichever was greater. A State is not required to expend any State funds in order to receive its share of the Mandatory Funds. The remaining funds are Matching Funds and are distributed based on the number of children under age 13 in a State compared with the national total of children under age 13. To access Matching Funds, a State must obligate all of its Mandatory Funds allotted in a fiscal year and maintain 100 percent of the State's share of expenditures for the former programs in fiscal year 1994 or fiscal year 1995, whichever is greater. Matching Funds must be matched at the applicable FMAP rate, which is the Medicaid Program matching rate. Not less than one percent, but not more than two percent of the total Mandatory and Matching Funds are reserved for Tribes and tribal organizations based on the number of children living on or near tribal reservations or other appropriate area served by the tribal grantee. Tribes and tribal organizations are not required to provide matching funds. The District of Columbia is treated as a State for purposes of receiving its share of Mandatory and Matching Funds. Territories are not eligible to receive Mandatory or Matching Funds.
This program has MOE requirements, see funding agency for further details.

Length and Time Phasing of Assistance:

Grant awards are made to Lead Agencies with approved CCDF plans. If Matching Funds are requested, Mandatory Funds must be obligated by the end of the first fiscal year. There is no time limit on liquidation of Mandatory Funds

and no time limit on obligation of Mandatory Funds if no Matching Funds are requested. Matching Funds must be obligated by the end of the first fiscal year and liquidated by the second fiscal year. State funds expended toward the Maintenance of Effort requirement must be both obligated and expended by the end of the first fiscal year. Mandatory and Matching Funds awarded to Tribes and tribal organizations must be obligated by the end of the second fiscal year and liquidated by the end of the third fiscal year. Method of awarding/releasing assistance: quarterly.

Reports:

As specified in 45 CFR Part 98, States must report to the Administration on Children and Families on an annual basis aggregate data on families, children in care, providers, payment methods, and consumer education. One-third of the 50 States, DC, and Puerto Rico must report annually on a three-year cycle. Tribes report expenditures for the Tribal Mandatory, Discretionary, and Construction/Renovation funds. TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

A State shall not expend an amount paid to the State under this grant except to provide to children of families any activity or service (including post-adoption services) that may be provided under Part B or E of Title IV of the Social Security Act. Amounts expended by a State in accordance with the preceding sentence shall be disregarded in determining State expenditures for purposes of Federal matching payments under Sections 423, 434, and 474 of the Social Security Act.

Applicant Eligibility:

Applications are not required. The States, including Puerto Rico and the District of Columbia, may receive payments. The Children's Bureau shall determine the numbers of foster child adoptions, the special needs adoptions, and the older child adoption in a State on the basis of AFCARS data as reported by each State and accepted by the Children's Bureau no later than May 15 of the fiscal year subsequent to the fiscal year in which the adoptions were finalized (i.e., the "earning year").

Beneficiary Eligibility:

Beneficiaries are those children and families eligible under Title IV-B and Title IV-E of the Social Security Act, as amended.

Credentials/Documentation:

The Children's bureau shall determine the numbers of foster child adoptions, the special needs adoptions, and the older child adoptions, as well as the highest ever foster child adoption rate in a State on the basis of data reported by each State to the Adoption and Foster Care Analysis and Reporting System (AFCARS) data and accepted by the Children's Bureau no later than May 15 of the fiscal year subsequent to the fiscal year in which the adoptions were finalized (i.e., the "earning year"). OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. This program is excluded from coverage under OMB Circular No. A-110. States are automatic applicants.

Award Procedure:

Incentive payments will be issued annually, in the fiscal year subsequent to the earning year. Payment will be based on AFCARS data submitted no later than May 15 of the fiscal year following the earning year. AFCARS data must be accepted and approved by the Children's Bureau.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application

deadlines.

Range of Approval/Disapproval Time:

AFCARS reports must be received no later than May 15 of subsequent fiscal years in order to be considered for incentive payments.

Appeals:

Not Applicable.

Renewals:

Each "earning year" (fiscal years 2008 - 2012), State adoption data received through AFCARS will be considered on its own merit.

Formula and Matching Requirements:

Statutory Formula: The adoption incentive payment payable to a State for a fiscal year shall be equal to the sum of (a) \$4,000, multiplied by the number of foster child adoptions in the State during the fiscal year which exceeds the base number of foster child adoptions for the State for the fiscal year; (b) \$8,000 multiplied by the number of foster child adoptions of children age 9 or older in the State during the fiscal year in which exceeds the base number of foster child adoption of children age 9 or older for the State for the fiscal year; and (c) \$4,000, multiplied by the number of special needs adoptions of children under age nine in the State during the fiscal year which exceeds the base number of special needs adoptions of children under age 9 for the State for the fiscal year, if the state receives a bonus under (a) or (b). Awards are pro-rated if insufficient funds are available to make the full awards. In addition, if funds remain available after making the above awards, a State is eligible to earn an additional incentive award by exceeding the highest ever foster child adoption rate in the State between FY 2002 and the immediately preceding fiscal year. The incentive is calculated by multiplying the State's highest ever foster child adoption rate times the number of children in foster care on the last day of the preceding fiscal year and subtracting that number from the number of foster child adoptions in the State in that fiscal year. That number is rounded to the nearest whole number and then multiplied by \$1,000. If a State does not qualify for an incentive payment under (a) or (b), the State may still receive an award for (c) if the State exceeds the highest ever adoption rate. There are no matching requirements for these funds.

This program has no matching requirements.

Actual expenditures of incentive funds must be reported annually on SF-425, Financial Status Report. No progress reports are required. Actual expenditures of incentive funds must be reported annually on SF- 425, Financial Status Report. Performance monitoring is not applicable.

Social Security Act, Title IV-E, Section 470, et seq.; as amended.

OBJECTIVES:

The Title IV-E Foster Care program helps States, Indian Tribes, Tribal organizations and Tribal consortia (Tribes) to provide safe and stable out-of-home care for children under the jurisdiction of the State or Tribal child welfare agency until the children are returned home safely; placed with adoptive families, or placed in other planned arrangements for permanency.

USES AND USE RESTRICTIONS:

Formula grant funds may be used by the State or local (under State supervision) child welfare agency or by the Tribal child welfare agency for FFP in foster care maintenance payments on behalf of eligible children; for administrative and training costs; and for costs related to design, implement and operate a statewide data collection system. Funds may not be used for costs of social services such as those that provide counseling or treatment to ameliorate or remedy personal problem, behaviors, or home conditions for a child, the child's family, or the child's foster family. Plan development/implementation grants to Tribes are one-time grants for projects lasting up to 24 months that are to be used to develop a plan to operate a Title IV-E program for foster care, adoption assistance and kinship guardianship as specified under section 479B of Title IV-E. The Tribe must submit a plan for the Title IV-E program within 24 months of receiving the plan development grant or must repay the grant funds, unless the HHS Secretary waives the requirements under section 471 to carry out a program under section 479B. There is \$3 million reserved for technical assistance and plan development/implementation grants to eligible Tribes beginning in FY 09.

Applicant Eligibility:

FFP for foster care maintenance payments incurred by a title IV-E State agency is equal to the Federal medical assistance percentage (FMAP) rate for that State, i.e., the Federal share of payments is from 50 percent to 83 percent, depending on the State (Section 474(a)(1) and 1905(b) of the Social Security Act). FMAP rates are also temporarily enhanced by at least 6.2 percentage points through Section 5001 of Public Law 111-5, the American Recovery and Reinvestment Act of 2009 (ARRA). For Tribes, the applicable FMAP rate is the highest of either a separate FMAP rate calculated based on the Tribe's service population or the FMAP rate for any State in which the Tribe is located. Training of agency staff and other administrative expenditures are matched at 75 and 50 percent Federal share, respectively (Sec. 474(a) of the Social Security Act). Short term training provided to specified professional partners is subject to a special FFP rate that varies by fiscal year (60% FFP in FY 2010; 65% for FY 2011, 70% for FY 2012).

Plan Development/Implementation grants are available up to a maximum of \$300,000.

Matching Requirements: Formula Grants: The non-Federal share of program costs (difference between total cost and FFP) in each funding category constitutes the required match to be met by the title IV-E agency. Matching funds from State agencies must be appropriated monies raised from non-Federal revenue sources. Matching funds from Tribal agencies must also be appropriated monies, but may at the option of the Tribe include Federal funds specifically authorized by Federal statutes to be used as match for other Federal programs and, for a specified portion of administration and training costs only, in-kind expenditures (or contributions) from specified third party sources.

93.710 ARRA - COMMUNITY SERVICES BLOCK GRANT

CSBG, Recovery Act.

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

Community Services Block Grant Act (CSBG Act), as amended by the Community Opportunities, Accountability, Training, and Educational Services Act of 1998, Public Law 105-285; American Recovery and Reinvestment Act of 2009, Public Law 111-5.

OBJECTIVES:

This funding will provide economic stimulus to the nation while furthering the ACF mission to promote the economic and social well-being of children, youth, families and communities. Objectives are to provide assistance to States and local communities, working through a network of community action agencies and other neighborhood-based organizations, for the reduction of poverty, revitalization of low-income communities, and empowerment of low-income families and individuals in rural and urban areas to become fully self-sufficient (particularly families who are attempting to transition off a State program carried out under part A of Title IV of the Social Security Act). Additional objectives are (1) to provide services and activities having a measurable and potential major impact on causes of poverty in the community or those areas of the community where poverty is a particularly acute problem; (2) to provide activities designed to assist low-income participants, including the elderly poor, to: (a) secure and retain meaningful employment; (b) attain an adequate education; (c) make better use of available income; (d) obtain and maintain adequate housing and a suitable living environment; (e) obtain emergency assistance through loans or grants to meet immediate and urgent individual and family needs, including health services, nutritious food, housing, and employment-related assistance; (f) remove obstacles and solve problems which block the achievement of self-sufficiency; (g) achieve greater participation in the affairs of the community; and (h) make more effective use of other related programs; (3) to provide on an emergency basis for the provision of such supplies and services, nutritious food, and related services, as may be necessary to counteract conditions of starvation and malnutrition among the poor; and (4) to coordinate and establish linkages between governmental and other social services programs to assure the effective delivery of such services to low-income individuals.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

Uses and restrictions for CSBG Recovery Act funds differ from the uses and restrictions that apply to allotments to States from regular CSBG annual appropriations with regard to use and percentage of funds retained by the States. As with regular CSBG grants, States receive CSBG Recovery Act funds to ameliorate the causes of poverty in communities. The block grant approach gives the States flexibility to tailor their programs to the particular services needs in their communities. States are required to pass through 99 percent of their Recovery Act allocations for grants to eligible entities, as defined in the CSBG Act and use the remaining one percent of funds for benefits enrollment coordination activities relating to the identification and enrollment of eligible individuals and families. See Above.

Applicant Eligibility:

The Secretary is authorized to make grants to States. This includes each of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Island, American Samoa, and the Commonwealth of the Northern Mariana Islands. The Secretary also provides assistance directly to the governing body of an Indian Tribe or Tribal organization upon application by the tribe. Only State-recognized tribes, as evidenced by a statement to that effect by the Governor, or tribes formally recognized by the Secretary of the Interior, under the procedure for such recognition in 25 CFR 54, are eligible to receive direct grants.

Beneficiary Eligibility:

States make grants to qualified locally-based nonprofit community anti-poverty agencies and other eligible entities which provide services to low-income individuals and families. The official poverty line, as established by the Secretary of Health and Human Services, is used as a criterion of eligibility in the Community Services Block Grant program. When a State determines that it serves the objectives of the block grant, it may revise the income limit, not to exceed 200 percent of the official poverty line.

Credentials/Documentation:

No Credentials or documentation are required. OMB Circular No. A-87 applies

to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Under the regularly-funded CSBG Program, each State desiring to receive an allotment for a fiscal year is required to submit an application to the Secretary of HHS. For Recovery Act funds, States will receive a separate allotment of funds based on the statutory formula. Within 30 days of receiving new grant allotments, each State must submit an application amendment outlining the intended use of Recovery Act funds, to include how the State will carry out the assurances in Section 676(b) of the CSBG Act. The application amendment must be a separate document from the original application and must contain assurances by the Chief Executive Officer of the State that the State will comply with the allowable uses of funds under Section 675C of the CSBG Act, with modifications to allowable uses specified in the Recovery Act. The application amendment must set forth the general purposes for which funds will be used, including a description of the State intended use for benefits enrollment coordination activities relating to the identification and enrollment of eligible individuals and families in Federal, State, and local benefit programs. The State also must describe how it will incorporate monitoring of Recovery Act funds into its regular monitoring of CSBG eligible entities. This includes descriptions of how the State will monitor restrictions on administrative expenses, eligible recipients, board requirements for community action agencies and other nonprofit organizations, fiscal control, monitoring, and Federal investigation provisions, coordination between antipoverty programs in each community and certain prohibitions on political activities. States also must include a description of how they plan to track CSBG funds from ARRA separately from CSBG funds provided through the regular FY 2009 and 2010 appropriations process. In addition, States must indicate how they plan to evaluate the effectiveness of ARRA CSBG funds, including tracking the number of jobs created. This program is excluded from coverage under 45 CFR Part 1050.

Award Procedure:

HHS determines the amount of funds to be allocated as block grants to each State in accordance with the formula set forth in the CSBG Act. The Office of Management and Budget (OMB) has the authority to apportion to HHS through the course of a year the Congressional appropriation for block grants. Consistent with OMB's apportionment of funds, HHS will assign allotments to the States through individual awards or a series of awards.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Not Applicable.

Appeals:

Funds may be withheld from any State which does not utilize its allotment substantially in accordance with the provisions of the CSBG Act, the American Recovery and Reinvestment Act, and the assurances provided in its application. 93.711 ARRA STRENGTHENING COMMUNITIES FUND

SCF, Recovery Act.

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009 , Public Law 111-5.

OBJECTIVES:

This funding will provide economic stimulus to the nation while furthering the ACF mission to promote the economic and social well-being of children, youth, families, and communities.

The objectives of the Strengthening Communities Fund (SCF) are to (1) fund entities to provide training, technical assistance, and financial assistance to local faith-based and community organizations enabling them to more fully participate in economic recovery and (2) build the capacity of State, Local, and Tribal governments to provide outreach to faith-based and community-based organizations. The funding is used to build capacity of government and nonprofit organizations to partner with local faith-based and community-based organizations, with a focus on expanding economic recovery efforts, increasing community access to public benefits (including ARRA benefits), and helping low- and moderate-income people secure and retain employment.

SCF is composed of two programs:

(1) SCF Nonprofit Capacity Building Program

The focus of the SCF Nonprofit Capacity Building Program is to fund organizations that provide training, technical assistance, and competitive financial assistance to faith-based and community-based nonprofit organizations to help them address the broad economic recovery issues present in their communities, including helping low-income individuals secure and retain employment, earn higher wages, obtain better-quality jobs, and increase access to State and Federal benefits and tax credits.

(2) SCF Government Capacity Building Program

The focus of the SCF State, Local, and Tribal Government Capacity Building Program is to build the sustainability and effectiveness of the government entities that provide outreach to faith-based and community-based organizations. Ultimately, these partnerships will enable local nonprofit organizations to better serve those in need and to increase nonprofit organizations' involvement in the economic recovery. Government entities or their designees will use program funds to develop their capacity to serve as a resource to nonprofit organizations and other government agencies regarding ARRA funding/benefits to ensure that disadvantaged and hard-to-serve populations are aware of and understand how to access the benefits and services described in the ARRA. Grantees also will use program funds to offer free capacity building services to nonprofit organizations to improve awareness of and access to ARRA efforts/benefits, improve nonprofits organizational capacities to be active participants in ARRA efforts, and facilitate partnerships between and among nonprofits and other government agencies. For example, grantees could establish a beneficiary benefits clearinghouse for individuals and a funding opportunities clearinghouse for nonprofit organizations, provide outreach and education, and deliver training and technical assistance.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Under the SCF Nonprofit Capacity Building Program, lead organizations assist nonprofit project partners in distressed communities with capacity building activities in four critical areas: (1) organizational development, (2) program development, (3) collaboration and community engagement (4) leadership development and (5) evaluating their effectiveness. Capacity building activities are designed to increase an organization's sustainability and effectiveness, enhance its ability to provide social services, and create collaborations to better serve those in need. Lead organizations use the award funds to provide two services within their communities: (1) training and technical assistance to nonprofit organizations; and (2) competitive financial assistance to some subset of the nonprofit organizations receiving training and technical assistance. Training and technical assistance activities are conducted at no cost to interested nonprofit organizations. Each organization will also provide subawards to local non-profits to help these organizations build the capacity to expand and strengthen programs and services related to helping low-income

individuals secure and retain employment, earn higher wages, and obtain better-quality jobs. Examples of these capacity building activities include staff training, technical assistance, and materials and equipment to enhance efficiency or enable the ability to provide a new service. Funds also help organizations build capacity to expand and strengthen programs aimed at increasing low- and moderate-income individuals access to the state and Federal benefits and tax credits for which individuals are eligible. Examples include developing organizational capacity to offer a counselor-assisted centralized electronic screening and application tool, establishing procedures to assess eligibility of prospective and current clients for benefits and tax credits, developing referral protocols with other local service providers, developing a guide/clearinghouse of benefits and tax credits, and developing the capacity to offer free tax preparation assistance.

Under the SCF State, Local, and Tribal Government Capacity Building Program, funds are awarded to State, city, county and tribal government offices (e.g., offices responsible for outreach to faith-based and community organizations or those offices interested in initiating such an effort) or their designees for the purpose of building the sustainability and effectiveness of the government entities, other government agencies and ultimately local nonprofits to better serve those in need. Specifically, funds are used to build the capacity of organizations that are contributing to the economic recovery and help Federal, State, and local governments ensure that the information and services described in the ARRA reach disadvantaged and hard-to-serve populations. Grantees use program funds to provide free capacity building services to nonprofit organizations, such as developing a funding opportunities clearinghouse and/or training and technical assistance to improve access to ARRA funding/benefits and to improve organizational capacity to be competitive applicants for ARRA funding/benefits. Grantees also will use program funds to build their own capacity to provide these services to nonprofits. Priority for awards will be given to State and Indian/Native American Tribal governments and such governments designees. Grantees must also use funds to measure their own effectiveness and help non-profit organizations develop ways to measure their effectiveness. Costs of organized fund raising, including financial campaigns, endowment drives, solicitation of gifts and bequests, and similar expenses incurred solely to raise capital or obtain contributions, are unallowable under this program. Awards will not allow reimbursement of pre-award costs. Construction is not an allowable activity or expenditure under this program. Purchase of real property is not an allowable activity or expenditure under this program. The SCF grantees and project partners (including subawardees) may not use funds for direct social service provisions. Funds are intended to help grantees and their partners build and strengthen their capacity to provide services. The cost of the augmentation or supplanting of direct services is unallowable. Direct Federal grants, financial assistance funds, or contracts under the Department of Health and Human Services shall not be used to support inherently religious activities such as religious instruction, worship, or proselytization. Organizations that receive HHS funds may not engage in inherently religious activities, such as worship, religious instruction, or proselytization, as part of the programs or services funded with HHS funds. An organization receiving a SCF award shall not, in providing Federally-funded services, discriminate against a program beneficiary or prospective program beneficiary on the basis of religion or religious belief. SCF program funding may not pay for capacity building activities that support medical and/or health care related activities or items such as medical equipment or supplies or medically-oriented trainings, certifications, or licensures. SCF Nonprofit Capacity Building Program lead organizations may not provide competitive financial assistance to a health care organization. A grantee is not to use award funds to provide a contract to organizations that provide the grantee with a cost share match..

Applicant Eligibility:

(SCF Nonprofit Capacity Building Cooperative Agreements): state governments; county governments; city or township governments; special district governments; public and state-controlled institutions of higher education; Indian/Native American Tribal governments (Federally recognized); nonprofits with 501(c)(3) IRS status (other than institutions of higher education); nonprofits without 501(c)(3) IRS status (other than institutions of higher education); private institutions of higher education; for profit organizations (other than small businesses); small businesses; and faith-based

and community organizations that meet the statutory eligibility requirements. Application Eligibility (SCF State, Local, and Tribal Government Capacity Building Grants): state governments; county governments; city or township governments; Indian/Native American Tribal governments (federally recognized); nonprofits with or without 501(c)(3) IRS status (other than institutions of higher education), if designated as Authorized Entities by the government entity.

Beneficiary Eligibility:

Funds are used to build the capacity of organizations that are contributing to the economic recovery and help Federal, State, and local governments ensure that the information and services described in the ARRA reach disadvantaged and hard-to-serve populations. Funds help organizations build the capacity to expand and strengthen programs and services related to helping low-income individuals secure and retain employment, earn higher wages, and obtain better-quality jobs. Funds also help organizations build the capacity to expand and strengthen programs that increase low- and moderate-income individuals access to the state and federal benefits and tax credits for which individuals are eligible, such as by offering counselor-assisted use of a centralized electronic eligibility screening tool that simplifies the benefit application process. A nonprofit organization receiving training, technical or financial assistance under this program could operate a one-stop center where individuals can obtain free, customized benefits information, tax information, information on ARRA, and/or apply for benefits and file tax returns.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. The audit must be completed along with a data collection form, and the reporting package shall be submitted within the earlier of 30 days after receipt of the auditors report(s), or 9 months after the end of the audit period. The audit report must be sent to: Federal Audit Clearing House, Bureau of the Census, 1201 East 10th Street, Jeffersonville, IN 47132. The grantee must also ensure that appropriate corrective action is taken within 6 months after receipt of the sub-recipient audit report in instances of non-compliance with Federal law and regulations. The grantee is to consider whether sub-recipient audits necessitate adjustment of the grantees own accounting records. If a sub-recipient is not required to have a program-specific audit, the Grantee is still required to perform adequate monitoring of sub-recipient activities. The grantee is to require each

sub-recipient to permit independent auditors to have access to the sub-recipients records and financial statements. The grantee should include this requirement in all sub-recipient contracts.

93.713 ARRA CHILD CARE AND DEVELOPMENT BLOCK GRANT

Child Care and Development Block Grant (CCDBG), Recovery Act Funds.

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

Child Care and Development Block Grant Act of 1990, Public Law 101-508, 42 U.S.C 9858; American Recovery and Reinvestment Act of 2009, Public Law 111-5, 42 U.S.C 9858.

OBJECTIVES:

The ARRA - CCDBG is a part of the Child Care and Development Fund (CCDF) program, along with Child Care Discretionary Funds (CFDA number 93.575) the Child Care Mandatory and Matching Funds (CFDA number 93.596). This supplemental FY 2009 CCDBG funding was appropriated under the American Recovery and Reinvestment Act of 2009 (Public Law 111-5). This funding will provide economic stimulus to the nation while furthering the ACF mission to promote the economic and social well being of children, youth, families, and communities. Objectives under the CCDBG Act are: To make grants to States, Territories, Tribes, and tribal organizations for child care assistance for low-income families and to: (1) allow each State maximum flexibility in developing child care programs and policies that best suit the needs of children and parents within such State; (2) promote parental choice to empower working parents to make their own decisions on the child care that best suits their family's needs; (3) encourage States to provide consumer education information to help parents make informed choices about child care; (4) assist States to provide child care to parents trying to achieve independence from public assistance; and (5) assist States in implementing the health, safety, licensing, and registration standards established in State regulations.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

Congress directs that Recovery Act funds appropriated for the CCDBG must be used to supplement, not supplant, State general revenue funds for child care assistance for low-income families. Lead Agencies must use CCDBG Recovery Act Funds for child care services on a sliding fee scale basis, activities that improve the quality or availability of such services, and other activities that realize the goals of the CCDBG Act. Not more than 5 percent of the aggregate amount of CCDF Funds, including CCDBG Recovery Act Funds, expended by the State or Territory (15 percent for Tribes or tribal organizations) may be expended for administrative costs incurred by the State or Territory to carryout all of its functions and duties. The term "administrative costs" does not include the costs of providing direct services. A State or Territory shall use not less than 4 percent of the aggregate CCDF Funds, including CCDBG Recovery Act Funds, to improve child care quality and availability including comprehensive consumer education, activities to increase parental choice, and other activities such as resource and referral services, provider grants and loans, monitoring and enforcement of requirements, training and technical assistance, and improved compensation for child care staff. In addition to the minimum four percent quality expenditures, \$255,186,000 of the CCDBG Recovery Act Funds shall be reserved by the States for quality improvement activities, of which \$93,587,000 shall be for activities that improve the quality of infant and toddler care. Except for approved construction of child care facilities by Tribal Grantees, no CCDBG Recovery Act Funds may be used for the purchase or improvement of land, or for the purchase, construction, or permanent improvement of any building or facility (other than for minor remodeling and for upgrading facilities to meet State and local child care standards). No CCDBG Recovery Act Funds provided directly to child care providers through grants or contracts may be expended for any sectarian purpose or activity, including sectarian worship or instruction; however, Grantees must give parents the option of receiving vouchers or certificates to allow parents the choice of faith-based or community child care providers. No CCDBG Recovery Act Funds may be provided for any services provided to students enrolled in grades 1 through 12 during the regular school day; for any services for which such students receive academic credit toward graduation; or for any instructional services which supplant or duplicate the academic program of any public or private school. Lead Agencies shall assure that a substantial portion of the total CCDBG (CCDF Discretionary) Funds will be used to provide assistance to low-income working families who are not receiving assistance under the Temporary Assistance for Needy Families program, attempting through work activities to transition off of temporary assistance programs, nor at risk of becoming dependent on temporary assistance programs.

Applicant Eligibility:

Eligibility: All 50 States, the District of Columbia, the Virgin Islands, Puerto Rico, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and Federally recognized Tribal Governments, including Alaskan Native Corporations.

Beneficiary Eligibility:

None.

Credentials/Documentation:

Grantees must operate under a CCDF plan approved by the Administration for Children and Families (ACF), and must provide assurances that the Grantee will comply with the requirements of the CCDBG and the Recovery Act and all applicable Federal law. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

State, Tribal, and Territorial Lead Agencies already receiving FY2009 funds under the CCDBG program (i.e., Discretionary Funds) have received CCDBG Recovery Act Funds. Separate applications for the CCDBG Recovery Act Funds are not required. To receive funds under the CCDBG Act (CFDA number 93.575), each Grantee must designate a Lead Agency to which grants are awarded and that is accountable for the use of the Discretionary Funds provided, the duties of which shall include developing a CCDF plan. In conjunction with the development of the CCDF plan, the Lead Agency must hold at least one public hearing no earlier than nine months before the CCDF plan becomes effective and after at least 20 days of statewide public notice, to provide the public an opportunity to comment on the provision of child care services under the plan. In advance of the hearing, the Lead Agency must make the content of the plan available to the public. The Lead Agency must also coordinate the provision of services under the program with other Federal, State, and local child care and early childhood development programs. Also, the Lead Agency must consult with appropriate representatives of local governments. Tribal Lead Agencies submitting applications for construction must submit an environmental impact assessment. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. State, Tribal, and Territorial Lead Agencies already receiving FY 2009 funds under the CCDBG Act (i.e., Discretionary Funds) will receive CCDBG Recovery Act Funds. Separate applications for the CCDBG Recovery Act Funds are not required. However, should a Grantee decide to make a substantial change to its approved CCDF plan in FY 2009 as a result of the availability of CCDBG Recovery Act Funds, the Lead Agency must submit an amendment to its existing approved FY 2008-2009 CCDF plan within 60 days of making the change. A decision on the approval of the amendment will be made by ACF within 90 days from the date the amendment is received. (An extension of the time period may be made by a written agreement.)

To receive funds under the CCDBG Act, a Lead Agency desiring to receive an allotment for a fiscal year is required to submit a two-year CCDF plan to ACF, as well as, financial and other information necessary for the grants process. Each plan must contain certifications and assurances by the Lead Agency that it will comply with the requirements of the CCDBG Act. The plan must also include: the designation of a Lead Agency; the provision of assurances regarding policies and procedures as stated in Section 658E(c)(2) of the CCDBG Act; an outline of the intended use of block grant funds in compliance with Section 658E(c)(3) of the CCDBG Act; the provision of certification regarding payment rates as stated in Section 658E(c)(4) of the CCDBG Act; and the establishment of a sliding fee scale. Additional requirements are specified by 45 CFR Parts 98 and 99.

Award Procedure:

In April 2009, ACF awarded CCDBG Recovery Act Funds to all State, Tribe, and Territory Lead Agencies that were currently receiving FY 2009 funds under the CCDBG Act.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

ACF will review for approval any amendments to approved FY 2008-2009 CCDF plans submitted by Lead Agencies within 90 days after receipt of the amendment. To receive CCDBG Act Funds, CCDF plans must be submitted for approval every two years. FY 2010-2011 CCDF plans will be approved by ACF within 90 days after the due date.

Appeals:

Guidelines for appeals of disapprovals of CCDF plans or plan amendments are specified in regulations (45 CFR Part 99).

Renewals:

To receive CCDBG Act Funds, CCDF plans must be submitted to ACF for approval every two years.

Formula and Matching Requirements:

Statutory Formula: Title 42, Chapter 105, Part II-B, Subpart 9858m, Public Law 101-508.

This program has no matching requirements.

MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

CCDBG Recovery Act Funds were made available to Lead Agencies with approved FY 2008-2009 CCDF plans. Grantees must obligate all CCDBG Recovery Act Funds in the fiscal year in which they are granted or in the succeeding fiscal year. Those funds must be liquidated by the third year.

Method of awarding/releasing assistance: lump sum.

Reports:

Funded grantees must submit quarterly programmatic reports. In addition, as specified in 45 CFR Part 98, States must report to ACF annually aggregate data on families, children in care, providers, payment methods, and consumer education. Quarterly case-level reports are required to provide data on families, children, and providers, and payment information. No cash reports are required. No progress reports are required. Funded grantees must submit quarterly financial reports. Monitoring is in accordance with 45 CFR 98.90.

Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133.

Records:

Proper grant accounting records must be maintained. State, Territorial and Tribal Lead Agencies must separately track and report on expenditures of CCDBG Recovery Act Funds.

Account Identification:

Obligations:

(Formula Grants) FY 10 \$10,000,000; FY 11 est \$0; and FY 12 est \$0 - One-fourth of 1 percent of these supplemental CCDBG funds is reserved to provide technical assistance to Grantees via contracts. FY 2010 amounts reflect contract obligations for technical assistance activities.

Range and Average of Financial Assistance:

For States, including the District of Columbia and Puerto Rico, the range of CCDBG Recovery Act Funds in FY 2009 was approximately \$2.5 million to \$220 million; the average award was approximately \$38 million. For 260 Tribal Grantees, the approximate range of CCDBG Recovery Act Funds in FY 2009 was: \$3,000 to \$5 million; the average was approximately \$154,000. For the four Territories, the range of CCDBG Recovery Act Funds in FY 2009 was approximately \$1.8 million to \$4 million; the average grant was \$2.5 million (These figures do not include other FY 2009 CCDF funds received through CCDF Mandatory and Matching Funds (93.575) and CCDF Discretionary Funds (93.596)). These funds were not available in Fiscal Year 2008.

One-fourth of 1 percent of these supplemental CCDBG funds is reserved to provide technical assistance to Grantees via contracts.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2010: Over 1.6 million children receive a child care subsidy from the Child Care and Development Fund (CCDF) each month. In addition, CCDF helps leverage child care investments from the Temporary Assistance for Families (TANF) program and other funding streams, resulting in financial support to make child care more affordable for at total of 2.5 million children each month. Building on the existing \$5 billion annual Federal funding for CCDF, the American Recovery and Reinvestment Act (ARRA) provided an additional \$2 billion for CCDF, and the ARRA funds supported child care services for an estimated 220,000 children. States used ARRA funds to: shorten, eliminate, or avoid wait lists for services; reduce family co-payments; increase eligibility limits, and add or extend eligibility during periods of job search for parents who lost their jobs. The following are few examples of program accomplishments.

Illinois used part of the CCDF ARRA funds to decrease parent co-pays by 15 percent and to increase job search time from 30 to 90 days.

In Tennessee, the Child Care Recovery Scholarship program helped low-income families who are working or enrolled in school full time pay for child care services offered by licensed providers and Boys and Girls Clubs across the State. Tennessee expects the program to serve 2,450 more children, bringing the total to 7,000 in 2010.

In Yakama Nation (in Washington), 93 families continued to receive child care financial assistance through CCDF ARRA funding, enabling 118 parents to stay in the workforce. The San Carlos Apache Tribe in Arizona was able to hire four additional staff for its new child center in the Bylas District of the reservation.

On the family level, a parent from Iowa (Angi) summed up the impact of CCDF programs and ARRA as follows:

When our second son, Jack, was born, my husband and I decided that I would return to work when Jack was two months old. We wanted to send Jack to the same quality child care center that our older son, Robby, attended for the last two years. We knew the staff at the center and it was very important to us to keep both boys together at the same facility. However, it was soon apparent that we were not going to be able to afford the cost of infant child care. My husband is self-employed and the economic downturn has seriously affected our income. After crunching the numbers, it was obvious that my income was only covering child care, health insurance premiums and co-payments for medical care and prescriptions, and car payments and gas. It was clear that I was only working because I loved my job. I had a tough decision ahead of me, whether to continue working or to stay home with my boys. Then, I learned about the child care program supported through ARRA funds. We qualified for Jack to receive child care through the ARRA program. Because of this assistance, Jack is still at the child care center that we love and I continue to work at a job I love. If it weren't for this assistance, I would have had to quit my job and apply for public assistance. Words cannot express how grateful I am for this program supported through ARRA funds and the people behind it. Its hard enough to raise a family with good values in today's world, no matter whether you are labeled as poor or wealthy, financially speaking. Fiscal Year 2011: No new grants will be awarded. Fiscal Year 2012: No new grants will be awarded.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: Increased CCDF funding under the American Recovery and Reinvestment Act provided an opportunity for many States, Territories and Tribes to expand their quality improvement efforts. States invested in systemic infrastructure--which includes health and safety standards, quality improvement systems, and professional development systems--that improves quality and child outcomes for all children in child care, not just those receiving child care subsidies. 25 States have established Quality Rating and Improvement Systems (QRIS) to set standards of excellence for child care providers and to provide a pathway to help programs continually improve to meet the higher standards. QRIS represent a systemic approach to assess, improve, and communicate the level of quality in early and school-age care and education settings. Fiscal Year 2011: N/A. Fiscal Year 2012: N/A.

93.714 ARRA EMERGENCY CONTINGENCY FUND FOR TEMPORARY ASSISTANCE FOR NEEDY FAMILIES (TANF) STATE PROGRAM

TANF Emergency Fund, Recovery Act

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

TANF Emergency Fund, Recovery Act, Title IV, Part A, Section 2101, Public Law 111-5, 42 U.S.C 603(c).

OBJECTIVES:

This funding will provide economic stimulus to the nation while furthering the ACF mission to promote the economic and social well being of children, youth, families, and communities. The objective of the program is to provide up to \$5 billion for jurisdictions (States, Territories, and Tribes) in fiscal year (FY) 2009 and FY 2010 that have an increase in assistance caseloads and/or certain types of expenditures. This Emergency Fund is in addition to the TANF Contingency Fund in section 403(b) of the Act that currently gives money to qualifying States (but not Territories or Tribes) during an economic downturn.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

Emergency Fund grants are Federal TANF funds. Jurisdictions must use these funds in accordance with section 404 of the Act. This does not include authority to transfer emergency funds to either the Social Services Block Grant (SSBG) or the Child Care and Development Block Grant (CCDBG) because that transfer authority is limited to grants made under section 403(a) of the Act. Emergency funds are available until expended.

Jurisdictions may carry over emergency funds for use in a succeeding fiscal year as authorized under section 404(e) of the Act, i.e., the funds are available until expended. Section 403(c)(5) of the Act imposes a cumulative cap on the amount of emergency funding that a jurisdiction can receive for the two-year period. The capped amount consists of the cumulative combined grants from the existing Contingency Fund (section 403(b)) and the Emergency Fund (section 403(c)) and the total of the two cannot exceed 50 percent of the jurisdictions annual Federal TANF family assistance grant.

The same financial and programmatic rules pertaining to the appropriate use of the jurisdictions Federal TANF block grant funds also apply when using the emergency funds. This also means that all TANF requirements, including work participation requirements and time limits, apply to families receiving assistance with emergency funds exactly as they do to families receiving other

Federal TANF-funded assistance. See above.

OBJECTIVES:

To improve health outcomes by providing evidence to enhance medical decisions made by patients and their medical providers. This goal is pursued by generating research comparing different interventions and strategies to prevent, diagnose, treat and monitor health conditions. Funds are available under the American Recovery and Reinvestment Act of 2009 to support research and evaluations, demonstration projects, research networks and multidisciplinary centers, predoctoral and postdoctoral training opportunities, individual fellowships, and to disseminate rigorous evaluations of the impact of different options that are available for treating a given medical condition for a particular set of patients.

TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

The research will contribute to the health services and clinical knowledge base in comparative effectiveness of different treatment and practices from which empirically based information can be derived by patients, providers,

policymakers, and other stakeholders, both immediately and over the coming decades. Grant funds will be available in FYs 2009 and 2010 for costs necessary to carry out an approved project. Unallowable costs, as well as those for which prior written approval is required, are indicated in the HHS Grants Policy Statement. Grantees must comply with all Recovery Act reporting requirements. Approximately 66% of the \$300,000,000 in Recovery Act funds provided to AHRQ for CER research was awarded for discretionary grants.

Applicant Eligibility:

Award recipients include a combination of academic institutions, States, community-based organizations, and private or non-profit national organizations.

Beneficiary Eligibility:

Funds will be spent to research and provide information on the relative strengths and weaknesses of various medical interventions. Such research will give clinicians and patients valid information with which to make decisions that will improve the performance of the U.S. health care system.

Award Procedure:

Following review for scientific merit by a group composed primarily of nonfederal scientists, grant applications may be reviewed by the National Advisory Council for Healthcare Research and Quality, after which AHRQ makes final decisions to support recommended applications. When such decisions are made, applicants are notified directly by AHRQ staff and all required steps are taken to issue the Notice of Award.

93.716 ARRA TEMPORARY ASSISTANCE FOR NEEDY FAMILIES (TANF) SUPPLEMENTAL GRANTS

Supplemental Grants for Population Increases in Certain States, Recovery Act

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

Supplemental Grants for Population Increases in Certain States, Recovery Act, Title IV, Part A, Section 2102, Public Law 111-5, 42 U.S.C 603(a)(3).

OBJECTIVES:

These funds will help promote the economic and social well being of children, youth, families, and communities. The objective of the program is to provide supplemental TANF funds for States with exceptionally high population growth in the early 1990s, historic (1994) welfare grants per poor person lower than 35 percent of the national average, or a combination of above average population growth and below average historic welfare grants per poor person.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

The Federal TANF Supplemental Grants are in addition to the States annual Federal TANF block fund. Thus, these funds are subject to the same uses and restrictions as the States annual Federal TANF block grant (see CFDA 93.558 Temporary Assistance for Needy Families), and repeated below.

Each State designs and operates its own TANF program, and establishes the specific eligibility criteria that must be met to receive financial assistance payments or other types of benefits and services. Each State has broad flexibility to use the grant funds in any manner that is reasonably calculated to accomplish a purpose of the TANF program (including providing low-income households with assistance in meeting home heating and cooling costs). The purposes of the TANF program are to assist needy families to care for their children in their own homes; reduce dependency of needy parents by promoting job preparation, work and marriage; prevent and reduce the incidence of out-of-wedlock pregnancies; and encourage the formation and maintenance of two-parent families. A State may also use the funds in ways that had been authorized and allowable under its former approved Aid to Families with Dependent Children (AFDC), Job Opportunities and Basic Skills Training (JOBS), and Emergency Assistance (EA) plans. A State may also transfer a limited portion of its Federal TANF funds to the Child Care and Development Block Grant (CCDBG) and Social Services Block Grant (SSBG) Programs. No State may spend more than 15 percent of its Federal TANF funds on administrative costs, exclusive of certain computerization and information technology expenses. See above.

Applicant Eligibility:

None.

Beneficiary Eligibility:

None.

Credentials/Documentation:

Federal funds go to the State (the grantee). States decide the objective eligibility criteria and verification required to determine eligibility and payment of TANF benefits. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110.

Award Procedure:

Supplemental Grants, like the annual Federal TANF block grant, are awarded in quarterly payments.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

Varies by State (usually within 45 days).

Appeals:

States must provide opportunities for recipients who have been adversely affected to be heard in a State administrative or appeal process.

Renewals:

Not Applicable.

Formula and Matching Requirements:

This program has no statutory formula.

Matching Requirements: Percent: 75.%. The TANF program, which includes the standard TANF block grant and the additional Supplemental Grants for 17 States, has an annual cost-sharing requirement known as maintenance-of-effort (MOE). This means that every fiscal year, each State receiving Federal TANF funds must spend an applicable percentage of its own money to help eligible families in ways that are consistent with the purposes of the TANF program. The applicable percentage depends on whether the State meets the minimum work participation rate requirements for that fiscal year. If the State does not meet the work participation rates, then it must spend 80 percent of the amount it spent for fiscal year 1994 on AFDC and AFDC-related programs. If the State meets the work participation rates, then the applicable percentage is 75 percent of the amount it spent for fiscal year 1994 on AFDC and AFDC-related programs.

This program does not have MOE requirements.

Length and Time Phasing of Assistance:

States are awarded Supplemental Grants in quarterly payments. Once awarded, the funds are available to the State until expended. See the following for information on how assistance is awarded/released: No information provided.

Reports:

States receiving the TANF block grant and Supplemental Grants must submit quarterly data reports on families receiving assistance. States must also report expenditures of grant funds on a quarterly basis. Expenditure data related to Supplemental Grants will be reported in a separate category on the quarterly TANF expenditure report for FY 2011. Cash reports are not applicable. Progress reports are not applicable. Expenditure reports are not applicable. Performance monitoring is not applicable.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. The TANF program (including the additional TANF supplemental grants) is subject to the Single Audit Act under Chapter 75 of Title 31, United States Code.

Records:

States are subject to the uniform administrative requirements in 45 CFR Part 92. In particular, the regulations at 45 CFR 92.20 require that all grantees have a financial management system that can adequately trace expenditures to ensure that the funds have been used appropriately, and not in violation of any programmatic restrictions and prohibitions; and require that accounting records are supported by source documentation to support all expenditures. Also, the regulations at 45 CFR 92.42 and TANF Program Instruction TANF-ACF-PI-2003-1, dated January 28, 2003 (<http://www.acf.hhs.gov/programs/ofa/policy/pi-ofa/2003/pi2003-1.PDF>), address record retention and access requirements applicable to all financial and programmatic records, supporting documents, statistical records, and other records of grantees or subgrantees.

93.722 ARRA - IHS TRIBAL AGREEMENTS

ARRA IHS Tribal Agreements

FEDERAL AGENCY:

Indian Health Service, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009 (ARRA), Public Law 111-5; Indian Self-Determination and Education Assistance Act, Title 1, Section 102, Public Law 93-638, Title 1, Section 102, Public Law 93-638.

OBJECTIVES:

\$500 Million in Recovery Act Funds to Improve Health Care and Boost Economy in Indian Country. These funds will be obligated both through tribal agreements and under contracts subject to the Federal Acquisition Regulation, as summarized in the Agency implementation plans.

The Recovery Act health facility construction funds will be used to complete the construction of the new IHS Eagle Butte Health Center in Eagle Butte, South Dakota and the Norton Sound Regional Hospital in Nome, Alaska. The Eagle Butte Health Center will serve approximately 9,300 American Indians residing on the Cheyenne River Reservation. The facility will replace the existing Eagle Butte IHS Hospital which, at approximately one-third the size of the new facility, is stressed to meet the needs of the entire service population. The new Norton Sound facility replaces a 61-year-old hospital that is stretched to serve an estimated 10,000 users. The project will create a substantial number of new jobs in construction, transportation, and other professions and help fight unemployment in Nome.

Sanitation facilities funds will be used to complete 169 sanitation facilities projects constructed in 24 states. These projects will provide potable water, waste water disposal and solid waste systems to American Indian and Alaska Native homes and communities. An estimated 16,000 homes will be served by these projects, which will also help foster economic growth and create jobs.

The ARRA will also fund 302 maintenance and improvement projects. Many IHS and tribal facilities require structural renovations, additional space, and design updates to accommodate modern health care delivery practices. These projects will help maintain and improve facilities, which will improve patient care. These projects will also result in enhanced energy conservation and provide local jobs and economic stimulus.

Finally, Recovery Act funds will be used to purchase over 200 pieces of medical equipment, including 35 ambulances and 10 Computed Tomography (CT) scanners, all of which will contribute substantially to patient care. Other equipment to be purchased includes cardiac monitoring equipment, equipment for integration of electronic patient records, blood chemistry analyzers, dental equipment, emergency defibrillators, x-ray systems, among other items. The equipment will be distributed across 24 states.

93.726 ARRA ACCELERATING ADOPTION OF COMPARATIVE EFFECTIVENESS RESEARCH (CER)

CER

FEDERAL AGENCY:

Office of the Secretary, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act (ARRA), Public Law 111-5; Public Health Services Act, Title 42, Section 301.

OBJECTIVES:

Comparative effectiveness research is the conduct and synthesis of research comparing the benefits and harms of different interventions and strategies to prevent, diagnose, treat and monitor health conditions in real world settings. The purpose of this research is to improve health outcomes by developing and disseminating evidence-based information to patients, clinicians, and other decision-makers, responding to their expressed needs, about which interventions are most effective for which patients under specific circumstances.

The purpose of this program is to develop and test strategies to improve the dissemination of CER information and the resultant translation of this evidence into practice in the non-profit and private sector. Doing so effectively would demonstrate a return on the CER investment, and, more importantly, improve the health of the patients served by a given organization. Funds will be used to support organizations that 1) develop evidence-informed, yet innovative dissemination and translation strategies; 2) develop proposals that study the implementation of dissemination and translation strategies within their organization.

93.728 ARRA - STRATEGIC HEALTH IT ADVANCED RESEARCH PROJECTS (SHARP)

SHARP

FEDERAL AGENCY:

Office of the Secretary, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009 (Public Law 111-5) (Recovery Act), Title XIII, Part A, Section 3011.

OBJECTIVES:

To competitively-awarded cooperative agreements to establish Strategic Health IT Advanced Research Projects (SHARP). The awardees will conduct research focusing on where breakthrough advances are needed to address well-documented problems that have impeded adoption of health IT and to accelerate progress towards achieving nationwide meaningful use of health IT in support of a high-performing, learning health care system.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

ONC expects to award four cooperative agreements to support establishment of Strategic Health IT Advanced Research Projects (SHARP) sites for a project period of four years. Each such research site will have a two-part mission:

- (1) to implement a collaborative, interdisciplinary program of research addressing a specific focus area from the list provided below, addressing short-term as well as long-term challenges; and
- (2) to develop and implement a cooperative program between researchers, patient groups, health care providers, and other health IT sector stakeholders to transition the results of research into practice.

Each site will focus on areas where breakthrough improvements are needed to address well-documented problems that have impeded adoption of health IT and thereby accelerate progress on the pathway towards achieving the goals outlined in the strategic plan for health IT developed by the National Coordinator pursuant to PHSA Section 3001(c)(3) as added by the Recovery Act, specifically including the nationwide achievement of meaningful use of health IT to achieve transformational improvement of the health care system.

Each site will implement a collaborative, inter-disciplinary research program addressing one of the specific focus area(s) listed below. An eligible entity may, apply for funding in separate applications to establish more than one site, and thus it is possible a single eligible entity (institution) may receive more than one award under this program. Regardless of the total number of institutions funded to establish sites under this program, it is expected that the all of the awardees will collaborate with each other, as there will be numerous points of intersection among the sites' agendas.

Within its focus (listed below) area, each site will carry out at least the following set of activities:

- Initially define and subsequently update or redefine on a yearly basis, the key issues and research challenges within their respective area(s) of focus. The research areas identified will be those that significantly address barriers and solutions to achieving widespread adoption and meaningful use of health IT. Projects to address the identified issues will be mapped to either a short-term (< 2 years) or long-term (4 years) timeframe. Because this is a cooperative agreement, recipients shall plan and allow for collaboration with ONC and other federal staff with relevant expertise as identified or approved by ONC in establishing and updating the definition of key issues and research challenges in the sites focus area;
- Conduct ambitious research addressing these key issues and challenges. This work will draw on the scientific methods and expertise of researchers and practitioners in diverse fields;
- Collect specific, uniform data about the research activities and track progress toward milestones;
- Facilitate practical and efficient processes that enable translation of research into health care and public health innovations, facilitating the transition of multidisciplinary research outcomes into new healthcare products and services

both the short- and long-term;

Partner with industry to rapidly transfer short term results of this research into health IT products;

Publish and otherwise disseminate these research findings, preferably in open source journals that maximize the accessibility of this knowledge to the entire health IT community

Participate in an external evaluation; and

Select desired, measurable outcomes specific to the chosen research issue and methods for attaining results.

Research focus areas

In no particular order, the four foci for research identified below will be addressed by this program. The areas have been assigned numbers for ease of reference. Appendix B provides further detail about each of these areas.

1. Security of Health Information Technology This research area addresses the challenges of developing security and risk mitigation policies and the technologies necessary to build and preserve the public trust as health IT systems become ubiquitous.

This research area is responsive to paragraphs (1), (4), (5), and (6) of the PHSA 3011(a), as added by the Recovery Act, through the following activities:

Promoting the development and implementation of health information technology solutions that will support the electronic exchange and use of health information in a secure, private manner;

Promoting the development and implementation of technologies and best practices that enhance the protection of health information by all holders of individually identifiable health information;

Enhancing the capabilities and functionalities of tools to support privacy and security of individually identifiable health information as it is exchanged and used; and,

Supporting and enhancing the assurance of privacy needed providers and patients widespread acceptance of telemedicine and robust participation in clinical data repositories and registries.

2. Patient-Centered Cognitive Support This research area addresses the challenge of harnessing the power of health IT so that it integrates with, enhances and supports clinicians reasoning and decision making, rather than forcing them into a mode of thinking that is natural to machines but not to people.

PHSA 3011(a), as added by the Recovery Act, directs the support of health IT architecture that will support the use of health information in an accurate manner. Additionally, paragraphs (3) and (5) of the same subsection of the statute authorize use of funding appropriated under PHSA Section 3018, as added by the Recovery Act, to disseminate training and information on best practices to integrate health IT into a providers delivery of care, and to promote the use of clinical data repositories and registries. All of these paragraphs ((1), (3), and (5) of PHSA 3011(a) as added by the Recovery Act) point to longstanding challenges that require new and creative research related to the accurate and effective use of electronic health information to enhance the safety, quality, efficacy, and thus the overall value of care.

3. Healthcare Application and Network Platform Architectures This research area focuses on the development of architectures that are necessary to achieve electronic exchange and use of health information in a secure, private and accurate manner.

PHSA 3011(a)(1), as added by the Recovery Act, authorizes support of health IT architecture that will support the nationwide electronic exchange and use of health information in a secure, private, and accurate manner. This research focus specifically supports the development of new and improved architectures and technology infrastructure needed to achieve the goals outlined in the plan for health IT by the National Coordinator in support of PHSA 3001(c)(3), as added by the Recovery Act, and to support measures for determination of meaningful use of health IT by providers over time (required by Social Security Act (SSA) Sections 1848(o) and 1866(n), as added by Title IV in Division B of the Recovery Act).

4. Secondary Use of EHR Data This research area focuses on strategies to enhance the use of health IT in improving the overall quality of health care.

PHSA 3011(a), as added by the Recovery Act, states that the Secretary shall invest in the infrastructure necessary to allow for and promote the electronic exchange and use of health information for each individual in the United States consistent with the goals outlined in the strategic plan developed by the National Coordinator. PHSA 3001(c)(3), as added by the Recovery Act, directs that the National Coordinator shall, in consultation with other appropriate Federal agencies (including the National Institute of Standards and Technology), update the Federal Health IT Strategic Plan (developed as of June 3, 2008) to include specific objectives, milestones, and metrics with respect to a specific set of topic areas. The current Federal Health IT Strategic Plan (developed as of June 3, 2008), as referenced in the statute, advances secondary use as a key mode of information technology use to transform health care. This is consistent with, and will be updated and expanded upon pursuant to the direction of PHSA 3001(c)(3)(i), (vii) and (viii), as added by the Recovery Act, to add to the updated strategic plan such objectives, milestones, and metrics with respect to:

(Reference: PHSA 3001(c)(3)(i)) the electronic exchange and use of health information and the enterprise integration of such information.

(Reference: PHSA 3001(c)(3)(vii)) strategies to enhance the use of health IT in improving the quality of health care, reducing medical errors, reducing health disparities improving public health, increasing prevention and coordination with community resources, and improving the continuity of care among health care settings.

(Reference: PHSA 3001(c)(3)(viii)) the specific plans for ensuring that populations with unique needs, such as children, are appropriately addressed in the technology design, as appropriate.

public or private institution of higher education; or
other public or private institution or organization with a research mission.

Beneficiary Eligibility:

This Funding Opportunity Announcement (FOA) will result in new competitively-awarded cooperative agreements to establish Strategic Health IT Advanced Research Projects (SHARP). 93.767 CHILDREN'S HEALTH INSURANCE PROGRAM

The Children Health Insurance Program (CHIP)

FEDERAL AGENCY:

Centers for Medicare and Medicaid Services, Department of Health and Human Services

AUTHORIZATION:

Title XXI of the Social Security Act as amended by the Children's Health Insurance Program Reauthorization Act of 2009 (CHIPRA; Public Law 111-003) and the Affordable Care Act (ACA; Public Law 111-148 taken together with Public Law 111-152).

OBJECTIVES:

To provide funds to States to enable them to maintain and expand child health assistance to uninsured, low-income children, and at a state option, low-income pregnant women and legal immigrants, primarily by three methods: (1) obtain health insurance coverage that meets the requirements in Section 2103 relating to the amount, duration, and scope of benefits; (2) expand eligibility for children under the State's Medicaid program; or (3) a combination of the two.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

No State is eligible for payments for child health assistance for coverage provided prior to October 1, 1997. Standards used to determine eligibility may include those related to geographic areas to be served by the plan. Age, income and resources, residency, disability status (as long as the standard does not restrict eligibility), access to or coverage under other health coverage, and duration of eligibility are factors. Standards may not discriminate on the basis of diagnosis. Eligibility standards must not cover higher-income children without covering lower-income children, and must not deny eligibility based on a child having a pre-existing medical condition. The State must ensure that only targeted low-income children are furnished child health assistance under the plan. Children found through screening to be eligible for Medicaid are to be enrolled in Medicaid. The insurance provided using Federal funds under the State plan does may not substitute for coverage under group health plans. Coordination with other public and private programs providing creditable coverage for low-income children should occur. Child Health Assistance (other than Medicaid), must consist of any of the following: Benchmark coverage;

benchmark equivalent coverage (which can be FEHBP-equivalent coverage); State employee coverage or coverage offered through the HMO with the largest insured commercial non-Medicaid enrollment in the State; existing comprehensive State-based coverage; or Secretary-approved coverage. A State child health plan must include a description of the amount (if any) of cost-sharing and must be in accordance with a public schedule. Cost-sharing may be varied in a way that does not favor higher-income children over lower-income children. No cost-sharing is permitted for well-baby and well-child care, including age-appropriate immunizations. Cost-sharing for children at 150 percent of poverty must be consistent with Medicaid; Cost-sharing for children at 150 percent of poverty and above must be based on an income-related sliding scale. The aggregate cost sharing for all children in a family cannot exceed 5 percent of the family's income. The State child health plan may not impose pre-existing condition exclusions for covered benefits. States that provide for benefits through a group health plan or group health insurance coverage may permit pre-existing condition exclusions as allowed under the applicable Section of the Employee Retirement Income Security Act (ERISA) and the Health Insurance Portability and Accountability Act (HIPAA). Funds provided to a State under this Title may only be used to carry out the purposes of this Title. Health insurance coverage provided may include coverage of abortion only if necessary to save the life of the mother or if the pregnancy is the result of an act of rape or incest. States may spend up to 10 percent of their total CHIP expenditures (Federal and State) on non-benefit activities, including: outreach conducted to identify and enroll eligible children in CHIP; administration costs; health services initiatives; and other child health assistance. These expenditures are matched at the enhanced CHIP matching rate and counted against both the 10 percent limit and the allotment. Monetary amounts provided by the Federal government or services assisted or subsidized to any extent by the Federal government, may not be included in determining the amount of nonfederal contributions required for State matching purposes.

Applicant Eligibility:

All States and Territories may apply.

Beneficiary Eligibility:

Targeted low-income children will benefit. These children are defined (for the purposes of Title XXI) as children who have been determined eligible by the State for child health assistance under their State plan; are low-income children; or are children whose family income exceeds the Medicaid applicable income level but does not exceed 50 percentage points above the Medicaid applicable income level; and are not found to be eligible for medical assistance under Title XIX or covered under a group health plan or under health insurance coverage.

Credentials/Documentation:

States and Territories must submit and have approved by the Secretary of DHHS, a State Child Health Plan. Individuals must meet State requirements. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is required. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Title XXI plans and amendments are submitted by the State Governor, or designee, to the CMS Center for Medicaid and State Operations; Families and Children Health Program Group (CMSO/FCHPG). The Title XXI plan should be a stand alone document that fully addresses each relevant Section of the statutory requirements.

Award Procedure:

The CMS Administrator exercises delegated authority to approve Title XXI plans and amendments. Letters of approval will be signed by the CMS Administrator.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Section 2106 of the Law, specifies that a State plan is considered approved

unless the Secretary notifies the State in writing, within 90 days after receipt of the plan, that the plan is disapproved (and the reasons for disapproval) or that specific additional information is needed. Informal clarification and discussion between the State and the DHHS review team is permitted and encouraged during the review period. This does not stop the "90-day clock." The 90-day review period may be stopped by formal written requests for additional information and clarification. The 90-day review period may be stopped as many times as necessary to obtain completed information necessary to disapprove or approve the plan. The 90-day period will resume when the finalized additional information is received by CMS.

Appeals:

If a State wishes to appeal a disapproval, it may petition for a reconsideration of this decision within 60 days after the date of receipt of the disapproval letter, by submitting a written request for reconsideration to the project officer and the regional office. States also have the option to submit a new application following the disapproval, starting a new 90-day review clock.

Renewals:

An approved State child health plan shall continue in effect unless the State amends that plan or the Secretary finds substantial noncompliance of the plan in accordance with the requirements of Title XXI.

Formula and Matching Requirements:

Statutory Formula:

Matching Requirements: Section 2105(b), Title XXI, provides for an "enhanced Federal Matching Assistance Percentage (EFMAP)" for child health assistance provided under Title XXI that is equal to the current FMAP for the fiscal year (FY) in the Medicaid Title XIX program, increased by 30 percent of the difference between 100 and the current FMAP for that fiscal year. For fiscal years 2013 and prior, the EFMAP may not exceed 85 percent. As a result of the implementation of the Affordable Care Act (ACA), states shall receive a 23 percentage point increase in their respective EFMAPs for fiscal years 2016-2019 for most CHIP expenditures; however the EFMAP for a state may not exceed 100 percent. In FY 2009, the CHIPRA implemented a limitation on matching rates for states that propose to cover children with effective family income that exceeds 300 percent of the poverty line to FMAP rather than EFMAP, unless a waiver or State Plan Amendment or state law was in place to cover this population before the enactment of CHIPRA.

Section 2104(a) of the Social Security Act as amended by section 10203 of the ACA provide appropriations through through September 30, 2015 for the purpose of providing annual allotments to the states to fund their CHIP programs. Only States with approved State Plans by the end of the fiscal year will be included in the final allotment calculation.

In general, in FY 2010, the states annual allotments were calculated as the sum of the following four amounts, multiplied by the applicable growth factor for the year.

--the FY 2009 CHIP allotments;

--FY 2006 unspent allotments redistributed to and spent by shortfall states in FY 2009;

--spending of funds provided to shortfall states in the first half of FY 2009; and
--spending of Contingency Fund payments in FY 2009, although there were no Contingency Fund payments made in FY 2009.

Note: States may also qualify to receive an increase in their FY 2010, FY 2012, or FY 2014 allotments if they meet the criteria described in section 2104(m)(6) and 2107(m)(7) of the Social Security Act (the Act) as previously amended by section 102 of CHIPRA and further amended by sections 2102(a)(1)(B) 10203 of the ACA.

For FY 2011, FY 2013, and FY 2015 the allotments will be rebased on prior year spending. This will be done by multiplying the states growth factor for the year by the new base, which will be the prior years federal CHIP spending (including any contingency fund payments or redistribution amounts). For FY 2012 and FY 2014, the allotment for a state will be calculated as the previous fiscal years allotment amount and any previous fiscal years contingency fund spending, multiplied by the states growth factor for the year. The ACA extended the availability of the Child Enrollment Contingency Fund which may

be available for states that meet the criteria provided in section 2104(n) of the Act through FY 2015.

This program has MOE requirements, see funding agency for further details.

Length and Time Phasing of Assistance:

Enrolled children receive medical services as necessary. Federal funds are obligated to the States by issuing Title XXI grant awards. To ensure that all of the appropriated funds are available to States, CMS will issue grant awards to all States with Title XXI State plans approved by the end of the fiscal year equaling the national amount available for allotment to the 50 States, the District of Columbia, and the Commonwealths and Territories for that fiscal year. Grant awards must be issued by the time the CMS/HHS accounting system closes with respect to that fiscal year. Method of awarding/releasing assistance: lump sum.

Reports:

No program reports are required. No cash reports are required. Section 2108 of the Law specifies that States must develop annual reports assessing the operation of their State Plan for each fiscal year, including the progress made in reducing the number of uncovered low-income children and report to the Secretary by January 1, of the following year the results of the assessment. By March 31, 2000, each State with a child health plan must submit to the Secretary an evaluation that includes an assessment of the effectiveness of the State Plan in increasing the number of children with creditable health coverage, in increasing the availability of affordable quality individual and family health insurance for children, and in coordinating recommendations for improving the program under this Title. By December 31, 2001, the Secretary must submit to Congress and make available to the public, a report based on the evaluations submitted by the States recommendations and conclusions. No expenditure reports are required. No performance monitoring is required.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. A State child health plan under Title XXI must include an assurance that the State will afford the Secretary access to any records or information relating to the plan for the purposes of review or audit.

Records:

A State child health plan must include an assurance that the State will collect the data, maintain the records, and furnish the report to the Secretary at the times and in standardized format (as the Secretary requires), in order to enable the Secretary to monitor State program administration and compliance and to evaluate and compare the effectiveness of State Plans under this Title.

(Medicare Part A)

FEDERAL AGENCY:

Centers for Medicare and Medicaid Services, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009, Public Law 111-5, Title XVIII of the Social Security Act; Affordable Care Act (Public Law 111-148).

OBJECTIVES:

To provide hospital insurance protection for covered services to persons age 65 or above, to certain disabled persons and to individuals with chronic renal disease.

TYPES OF ASSISTANCE:

DIRECT PAYMENTS FOR A SPECIFIED USE

USES AND USE RESTRICTIONS:

Hospital insurance benefits are paid to participating hospitals, inpatient rehabilitation facilities, skilled nursing facilities, home health agencies, and hospice agencies. Payments are made in order to cover the prospective payment amount or reasonable cost of medically necessary services furnished to individuals entitled under this program. In limited circumstances, Medicare will also pay for certain aspects of receiving care in an inpatient religious non-medical health care setting.

Applicant Eligibility:

Persons age 65 or over and certain disabled persons are eligible to receive hospital insurance benefits. Nearly all individuals who had reached the age of 65 before 1968 are eligible for Part A, including people not eligible for cash Social Security benefits. A person reaching the age of 65 from 1968 to the present, and who is not eligible for social security benefits, needs to have accumulated work credits (amount dependent on age) to qualify for hospital insurance benefits.

Hospital insurance (Medicare Part A) is also available to persons aged 65 and over through payment of a monthly premium, which is currently \$450 per

month, effective January 1, 2011. A reduced Part A premium of \$248 per month is applied to persons with 30 or more quarters in which they have paid into the social security system. This reduced Part A premium applies to their spouse, surviving spouse or divorced spouse as well.

Federal employees began contributing toward Medicare hospital insurance coverage in 1983. Employees who have worked in the federal government prior to this year are still eligible to receive credit for prior non-contributory quarters of Federal employment. State and local government employees not already in Social Security-covered positions and who were hired on or after April 1, 1986 also contribute toward Medicare hospital insurance coverage. Although states may request agreements to cover individuals employed prior to April 1, 1986, no credit is given toward establishing Medicare entitlement for prior employment. Persons under the age of 65 who have been entitled to Social Security or Railroad Retirement disability benefits for at least 29 months are also eligible to receive hospital insurance benefits, as are any individuals who have been diagnosed with End Stage Renal Disease (ESRD).

93.779 CENTERS FOR MEDICARE AND MEDICAID SERVICES (CMS) RESEARCH, DEMONSTRATIONS AND EVALUATIONS

(CMS Research)

FEDERAL AGENCY:

Centers for Medicare and Medicaid Services, Department of Health and Human Services

AUTHORIZATION:

Social Security Act, Title XI, Sections 1110 and 1115; 42 U.S.C. 1310 and 1315(a); Title XVIII, Section 1875; 42 U.S.C. 1395 and 42 U.S.C. 1881 (f); Section 402, Public Law 90-248, as amended; Section 222, Public Law 92-603.

OBJECTIVES:

The Centers for Medicare & Medicaid Services (CMS) conducts research, demonstrations, and evaluations in support of CMS' key role as a beneficiary-centered purchaser of high-quality health care at a reasonable cost. These grants are awarded in the form of research grants and cooperative agreements; Hispanic health services grants; historically black colleges and university grants. For fiscal years 2010 and 2011, CMS research, demonstrations and evaluations will focus on expanding agency efforts to improve the efficiency of payment, delivery, access and quality of our health care programs that serve millions of beneficiaries.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Under all authorizations, all applications must meet standards of excellence in research or evaluation design. Funds may not be used for construction or renovation of buildings. Funds authorized by Section 1115 of the Social Security Act are limited to State agencies administering the Medicaid program.

The research issues and/or hypotheses identified by a project should be clearly stated and realistic and should reflect the issues of interest to CMS and, where appropriate, HHS, Federal Government, and the broader health services research community.

The research design should clearly identify the measures that will be collected and analyzed to address the issues and/or hypotheses. These proposed

measures should reflect concepts and variables that are consistent with the stated issues and hypotheses.

The research design should also address the reliability of measures i.e., a measurement should not change when the concept being measured remains constant in value. A common reliability concern is the level of inter-rater reliability of an instrument, determined by the extent to which two or more persons measuring the same characteristic would assign the same score.

The research design should address the validity of proposed measures i.e., the extent to which differences in scores on variable or the measuring instrument represent true differences in the characteristic we are trying to measure, rather than constant or random errors or the influence of other factors.

93.789 ALTERNATIVES TO PSYCHIATRIC RESIDENTIAL TREATMENT FACILITIES FOR CHILDREN

(Demonstration Projects Regarding Home and Community-Based Alternatives to Psychiatric Residential Treatment Facilities for Children)

FEDERAL AGENCY:

Centers for Medicare and Medicaid Services, Department of Health and Human Services

AUTHORIZATION:

Section 6063, Deficit Reduction Act of 2005, Public Law 109-171.

OBJECTIVES:

Over the last decade, Psychiatric Residential Treatment Facilities (PRTFs) have become the primary provider for youth with serious emotional disturbances requiring an institutional level of care. However, since they are not recognized as hospitals, nursing facilities or intermediate care facilities for the mentally retarded, many States have been unable to use the 1915(c) waiver authority to provide home and community-based alternatives to care, which would keep the youth in their homes and with their families. Section 6063 of the Deficit Reduction Act of 2005 addresses this issue by providing up to \$218 million to up to 10 States to develop demonstration programs that provide home and community-based services to youth as alternatives to PRTFs. CMS anticipates awarding each successful applicant between \$5 and \$60 million. The PRTF Demonstration is authorized for up to 5 years. Payments may not be made to States after fiscal year 2011. CMS will review and approve each State's Implementation Plan prior to allowing States to access funds for Federal reimbursement of services under this grant. Section 6063 also provides \$1 million for a National Demonstration Evaluation.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Budget Neutrality: In conducting these demonstration projects, The Secretary of Health and Human Services shall ensure that the aggregate payments made by the Secretary under title XIX of the Social Security Act (42 U.S.C. 1396 et seq.) do not exceed the amount which the Secretary estimates would have been paid under the title, if the demonstration projects under Section 6063 had not

been implemented. Any funding allocated for the Federal match for home and community-based services provided under the demonstration for the first year of this grant that remain unspent will be carried over to the next year of the Grant. Indirect Costs: The provisions of the OMB Circular A-87 govern reimbursement of indirect costs under this solicitation. A copy of OMB Circular A-87 is available online at: <http://www.whitehouse.gov/omb/circulars/a087/a087.html>.

Applicant Eligibility:

Any single State Medicaid Agency, State Mental Health Agency, or instrumentality of the State may apply for this Demonstration Grant. Only one application can be submitted for a given State. By "State" we refer to the definition provided under 45 CFR 74.2 as "any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or any agency or instrumentality of a State exclusive of local governments." By "territory or possession" we mean Guam, the U.S. Virgin Islands, American Samoa, and the Commonwealth of the Northern Mariana Islands.

Beneficiary Eligibility:

The level of care for Medicaid eligible individuals for this demonstration at a minimum must be under the age of 21 and require the need for a PRTF as defined in the State's Medicaid State Plan. For the purposes of this demonstration, youth are defined as "any child, adolescent or young adult under the age of 21". States shall ensure that each participant under the demonstration meets this level of care criterion to participate in the demonstration. Further, States may elect to add additional criteria to carve out or target a specific sub-population to receive home and community-based services under this demonstration. As a part of the application process, States shall submit a copy of the level of care assessment used to assess eligibility for participation in this demonstration. PRTFs are defined as any non-hospital facility with a provider agreement with a State Medicaid Agency to provide the inpatient services benefit to Medicaid-eligible individuals under the age of 21 (CFR 42 441.150 - 441.182). The facility must be accredited by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO) or any other accrediting organization with comparable standards recognized by the State. Additionally PRTFs must comply with Conditions of Participation on the use of restraint and seclusion (CFR 483.350 - 483.376).

Credentials/Documentation:

Each application for this Demonstration Grant must include a letter of endorsement from the Director of the Mental Health Authority and the State Medicaid Director, if the applicant is not the single State Medicaid Agency/State Agency. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is required. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Applicants must submit their applications electronically through <http://www.grants.gov>. Please note when submitting your application electronically, you are required, additionally, to mail a signed SF 424 to Nicole Nicholson, Centers for Medicare & Medicaid Services, Office of Operations Management, Acquisition and Grants Group, C2-21-15 Central Building, 7500 Security Boulevard, Baltimore, MD 21244-1850. The mailed SF 424 form may be received at the Centers for Medicare & Medicaid Services within 2 business days of the application closing date.

Award Procedure:

How the Merit of Applications Will Be Determined: CMS will employ a multiphase review process to determine the applications that will be reviewed and the merit of the applications that are reviewed. The multiphase review process includes the following: "Applications will be screened by Federal staff to determine eligibility for further review using the criteria detailed in the "Eligibility Information" section of the solicitation. Applications that are received late or fail to meet the eligibility requirements as detailed in the "Applicant Eligibility" section of this solicitation will not be reviewed."

Applications will be objectively reviewed by a panel of experts, the exact number and composition of which will be determined by CMS at its discretion, but may include private sector subject matter experts, beneficiaries of Medicaid supports, and Federal and Applicant policy staff. The review panels will utilize the objective criteria described in the "Application Review Criteria Information" section of the solicitation to establish an overall numeric score for each application. The results of the objective review of applications will be used to advise the approving CMS official. Additionally, CMS staff will make final recommendations to the approving official after ranking applications using the scores and comments from the review panel and weighing other factors as described below. 93.791 MONEY FOLLOWS THE PERSON REBALANCING DEMONSTRATION

(Money Follows the Person Demonstration)

FEDERAL AGENCY:

Centers for Medicare and Medicaid Services, Department of Health and Human Services

AUTHORIZATION:

Section 6071, Public Law Deficit Reduction Act of 2005, Public Law 109-171.

OBJECTIVES:

The Money Follows the Person (MFP) Rebalancing Demonstration, authorized by section 6071 of the Deficit Reduction Act of 2005 (P.L. 109-171), was designed to assist States to balance their long-term care systems and help Medicaid enrollees transition from institutions to the community. Congress initially authorized up to \$1.75 billion in Federal funds through Fiscal Year (FFY) 2011. With the subsequent passage of the Patient Protection and Affordable Care Act (P.L. 111-148) in 2010, Section 2403 extended the

program through September 30, 2016. An additional \$2.25 billion in Federal funds was appropriated through FFY 2016. The MFP Demonstration supports State efforts to rebalance their long-term support system so that individuals have a choice of where they live and receive services. Transition individuals from institutions who want to live in the community. Promote a strategic approach to implement a system that provides person centered services and a quality management strategy that ensures the provision of, and improvement of such services in both home and community-based settings and institutions. The demonstration provides for enhanced Federal Medical Assistance Percentage (FMAP) for 12 months for qualified home and community-based services for each person transitioned from an institution to the community during the demonstration period. Eligibility for transition is dependent upon residence in a qualified institution for more than 90 consecutive days. However, days that an individual was residing in the institution for the sole purpose of receiving short-term rehabilitation services that are reimbursed under Medicare are excluded and will not be counted toward the 90-day requirement. The State must continue to provide community-based services after the 12-month period for as long as the person needs community services and is Medicaid eligible. Demonstration grants will be awarded to States through March 31, 2016. CMS will accept one proposal from each State interested in participating in the demonstration program. The State Medicaid Agency must be the lead applicant. States must propose a demonstration period of no less than two consecutive fiscal years but no greater than five years. The State will indicate in its application the targeted group(s) and number of individuals it intends to transition during the demonstration period. The number of demonstration projects approved by CMS depends largely on the scope (i.e., proposed enrollment and breadth of services) and quality of the proposed projects. Under the demonstration, the State must propose a system of Medicaid home and community-based care that will be sustained after the demonstration period and is deemed qualified by the Secretary. Specifically, the program must be conducted in conjunction with a "qualified HCBS program" which is a program that is in operation (or approved) in the State for such individuals in a manner that assures continuity of Medicaid coverage of services in the qualified HCBS program for eligible individuals. States may also propose to enhance the services they will provide during the demonstration period to achieve greater success with transition. States will be required to participate in a national qualitative and quantitative evaluation conducted by CMS. Data collected on a national level will help evaluate the core objectives of the statute.

OBJECTIVES:

To foster research and prevention, education, and control activities related to heart and vascular diseases and to develop young scientist investigators in these areas. Small Business Innovation Research (SBIR) program: To increase private sector commercialization of innovations derived from Federal research and development; to increase small business participation in Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. Small Business Technology Transfer (STTR) program: To stimulate and foster scientific and technological innovation through cooperative research and development carried out between small business concerns and research institutions; to foster technology transfer between small business concerns and research institutions; to increase private sector commercialization of innovations derived from Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grants may support salaries, equipment, supplies, travel, and patient hospitalization as required to perform the research effort. Restrictions or limitations are imposed against the use of funds for entertainment, foreign travel, general-purpose equipment, alterations and renovations, and other items not regularly required for the performance of research. Individual Predoctoral and Postdoctoral National Research Service Awards (NRSAs) are made directly to individuals for research training in specified biomedical shortage areas. Institutional NRSA awards may be made to eligible institutions to enable them to appoint individuals selected by the institution. Certain service and payback provisions may apply to postdoctoral individuals upon termination of the award or termination of the appointment. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of research initiated in Phase I that is likely to result in commercial products or processes. Only Phase I awardees are eligible to apply for Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. These awards are made to small businesses working in collaboration with academic institutions. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of Phase II application. Fast-Track is an option whereby Phase I and Phase II SBIR or STTR projects are submitted and reviewed concurrently with the aim of reducing or eliminating the funding gap between Phase I and Phase II. While the intent of the STIR/STTR programs is commercialization (Phase III), no SBIR/STTR funds are allowed for commercialization activities such as patents; market and sales; market research; business development/product development/market plans; legal fees, travel and other costs including labor relating to license agreements and partnerships.

Applicant Eligibility:

Any nonprofit organization engaged in biomedical research and institutions or companies organized for profit may apply for almost any kind of grant. Only domestic, non-profit, private or public institutions may apply for NRSA Institutional Research Training Grants. An individual may apply for an NRSA or, in some cases, for a research grant if adequate facilities to perform the research are available. SBIR grants can be awarded only to United States small business concerns (entities that are independently owned and operated for profit, or owned by another small business that itself is independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500 employees including affiliates). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. or its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. SBIR projects must be performed at least 67% by the applicant small business in Phase I and at least 50% of the Project in Phase II. STTR grants can be awarded only to United States small business concerns (entities that are independently owned and operated for profit and have no more than 500 employees) that formally collaborate with a university or other non-profit research institution in cooperative research and development. The principle investigator may be employed with the small business concern or collaborating non-profit research institution as long as s/he has a formal appointment with or commitment to the applicant small business concern. At least 40% of the project is to be performed by the small business concern and at least 30% by the non-profit research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions.

Beneficiary Eligibility:

Any nonprofit or for-profit organization, company or institution engaged in biomedical research. Only domestic for-profit small business firms may apply for SBIR and STTR programs.

Phase II grants are for the continuation of the research initiated in Phase I and which are likely to result in commercial products or processes. Only Phase I awardees are eligible to apply for Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. These awards are made to small businesses working in collaboration with academic institutions. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application. Fast-Track is an option whereby Phase I and Phase II SBIR or STTR projects are submitted and reviewed concurrently with the aim of reducing or eliminating the funding gap between Phase I and Phase II. While the intent of the SBIR/STTR programs is commercialization (Phase III), no SBIR/STTR funds are allowed for commercialization activities such as patents; market and sales; market research; business development/product development/market plans; legal fees, travel and other costs including labor relating to license agreements and partnerships.

Applicant Eligibility:

Any nonprofit organization engaged in biomedical research and institutions (or companies) organized for profit may apply for grants, with the exception of NRSAs. An individual may apply for a NRSA or, in some cases, may qualify for a research grant if adequate facilities in which to perform the research are available. SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, or owned by another small business that itself is independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500 employees including affiliates). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. SBIR projects must be performed at least 67% by the applicant small business in Phase I and at least 50% of the project in Phase II. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Beneficiary Eligibility:

Any nonprofit or for-profit organization, company or institution engaged in biomedical research. Only domestic for-profit small business firms may apply

for SBIR and STTR programs.

Credentials/Documentation:

Applicants for individual National Research Service Awards must be citizens of the United States or have been admitted for permanent residency; must hold a doctoral degree (M.D., Ph.D, D.D.S., D.O., D.V.M., Sc.D., D.Eng., or equivalent domestic or foreign degree); and must designate a desire for training in one of the health or health-related areas specified by the National Institutes of Health. Each applicant must be sponsored by an accredited public or private nonprofit institution engaged in such training. For-profit organizations' costs are determined in accordance with Subpart 31.2 of the Federal Acquisition Regulations. For other grantees, costs will be determined in accordance with HHS Regulations 45 CFR, Part 74, Subpart Q. For SBIR and STTR grants, applicant organization (small business concern) must present a research plan that has potential for commercialization and furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. SBIR and STTR applicants must use the SF424 Research and Related (R&R) application for electronic submission through Grants.gov. Electronic submission of SNAP Progress Reports (eSNAP) apply for non-competing continuations (e.g., second year of Phase II). OMB Circular No. A-87 applies to this program.

93.846 ARTHRITIS, MUSCULOSKELETAL AND SKIN DISEASES RESEARCH

FEDERAL AGENCY:

National Institutes of Health, Department of Health and Human Services

AUTHORIZATION:

Public Health Service Act, Section 301, 437, 487, Public Law 78-410, 42 U.S.C 241.

OBJECTIVES:

To support research relevant to arthritis, musculoskeletal and skin diseases, the National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS) supports research training and basic and clinical investigations including epidemiology and clinical trials in the areas of skin and rheumatic diseases and musculoskeletal diseases. The Division of Skin and Rheumatic Diseases promotes and supports basic, epidemiological, and clinical studies of skin and rheumatic and related diseases. Studies range from determining the underlying basis and mechanisms of disease (including large genetic studies), to translational and clinical research aimed at the diagnosis, treatment, prediction, and/or prevention of disease. The skin program supports research in normal and diseased skin including keratinocyte biology and wound healing, and disorders such as psoriasis, atopic dermatitis and other chronic inflammatory skin disorders; the vesiculobullous diseases such as pemphigus, bullous pemphigoid, and epidermolysis bullosa; acne, alopecia areata, vitiligo, and skin neoplasia. The rheumatic disease program supports research in the systemic autoimmune diseases and arthritides, including systemic lupus erythematosus (SLE), systemic scleroderma, autoimmune myositis, rheumatoid arthritis, juvenile idiopathic arthritis, spondyloarthropathies, vasculitis, gout, Sjogren's syndrome, and fibromyalgia syndrome. In addition, the Division supports studies on the extracellular matrix, including research on Marfan syndrome, keloid formation, and pseudoxanthoma elasticum. The Division also supports biopsychosocial research related to rheumatic, musculoskeletal, or skin diseases. Topics include behavioral interventions, pain mechanisms, neuroendocrine and neuroimmune mechanisms, behavioral and social research, and epidemiology. The Division of Musculoskeletal Diseases supports studies of the skeleton and associated connective tissues. Broad areas of interest include skeletal development, metabolism, mechanical properties, and responses to injury. Among these diseases and skeletal disorders are osteoporosis; osteogenesis imperfecta; Paget's disease of bone; vitamin D refractory diseases; and rickets and osteochondrodysplasias. Other areas of interest include treatment of acute and chronic injuries, including carpal tunnel syndrome, repetitive stress injury, low back pain and clinical and epidemiological studies of osteoarthritis. The Division supports development of

new technologies with the potential to improve treatment of skeletal disorders and facilitate the repair of trauma in the normal skeleton. These include drugs and nutritional interventions, joint replacement, bone and cartilage transplantation, biomarkers and gene therapy. In addition, bioengineering, sports medicine and musculoskeletal fitness are areas of special research emphasis. This Division also encourages and supports research on skeletal muscle, its diseases and disorders, and its central role in human physiology and exercise. Topics include the molecular structure of muscle and the molecular mechanisms that produce force and motion. Muscle biophysics, cell biology, muscle biology, muscle disorders and therapies, musculoskeletal development, tissue reengineering, and regenerative medicine are encompassed in this area as well. The Division also supports research into the biology of cartilage, tendons, ligaments, menisci, and intervertebral discs, including pre-clinical studies on injury and disease conditions affecting these tissues. NIAMS participates in the Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs. The SBIR program is intended to increase private sector commercialization of innovations derived from Federal research and development; to increase small business participation in Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. The STTR program is intended to stimulate and foster scientific and technological innovation through cooperative research and development carried out between small business concerns and research institutions; to foster technology transfer between small business concerns and research institutions; to increase private sector commercialization of innovations derived from Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Research Grants provide funds for salaries, equipment, supplies, travel, and other expenses associated with scientific investigation relevant to program objectives. Individual National Research Service Awards (NRSAs) are made to individuals for research training in specified biomedical shortage areas. In addition, grants may be made to institutions to enable them to make NRSAs to individuals selected by them. Each individual who receives a NRSA is obligated upon termination of the award to comply with certain service and payback provisions. Small Business Innovation Research Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I that are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application.

Applicant Eligibility:

Research Grants: Individuals and public and private institutions, both nonprofit and for-profit, who propose to establish, expand, and improve research activities in health sciences and related fields. Reports:

No reports are required.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit

conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. Records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO). In accordance with 45 Code of Federal Regulations, Part 74.26, for-profit (commercial) organizations are subject to audit requirements for a non-Federal audit if, during its fiscal year, it expended \$500,000 or more under HHS awards and at least one award is a HHS grant or subgrant. The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement: 1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or 2. an audit that meets the requirements of OMB Circular No. A-133. In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit (commercial) organizations.

Records:

Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants. In accordance with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents.

This right also includes timely and reasonable access to a recipients personnel for the purpose of interview and discussion related to such documents. The rights of access are not limited to the required retention period, but shall last as long as records are retained.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Project Grants provide funds for salaries, equipment, supplies, travel, and other expenses associated with scientific investigation relevant to program objectives. NRSAs are made directly to individuals for research training in specified biomedical shortage areas, or, to institutions to enable them to make NRSAs to individuals selected by them. Each individual who receives a NRSA is obligated upon termination of the award to comply with certain service and payback provisions. SBIR Phase I grants (of approximately 6-months duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I and that are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of the Phase II application.

Applicant Eligibility:

Project Grants: Universities, colleges, medical, dental and nursing schools, schools of public health, laboratories, hospitals, State and local health departments, other public or private institutions, both non-profit and for-profit, and individuals who propose to establish, expand, and improve research activities in health sciences and related fields. NRSAs: Support is provided for academic and research training only, in health and health-related areas that are periodically specified by the National Institutes of Health. To be eligible, predoctoral awardees must have completed the baccalaureate degree and postdoctoral awardees must have a professional or scientific degree (M.D., Ph.D., D.D.S., D.O., D.V.M., Sc.D., D.Eng., or equivalent domestic or foreign degree). Individuals must be nominated and sponsored by a public or nonprofit private institution having staff and facilities appropriate to the proposed research training program. All awardees must be citizens or have been admitted to the United States for permanent residence. Nonprofit domestic organizations may apply for the Institutional NRSA. SBIR and STTR grants can be awarded only to domestic small businesses that meet the following criteria: 1) Is independently owned and operated, is not dominant in the field of operation in which it is proposing, has a place of business in the United States and operates primarily within the United States or makes a significant contribution to the US economy, and is organized for profit; 2) Is (a) at least 51% owned and controlled by one or more individuals who are citizens of, or permanent resident aliens in, the United States, or (b) for SBIR only, it must be a for-profit business concern that is at least 51% owned and controlled by another for-profit business concern that is at least 51% owned and controlled by one or more individuals who are citizens of, or permanent resident aliens in, the United States. 3) Has, including its affiliates, an average number of employees for the preceding 12 months not exceeding 500, and meets the other regulatory requirements found in 13 C.F.R. Part 121. Business concerns are generally considered to be affiliates of one another when either directly or indirectly, (a) one concern controls or has the power to control the other; or (b) a third-party/parties controls or has the power to control both. STTR grants which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Beneficiary Eligibility:

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. OMB Circular No. A-110 applies to this program. Project Grants: Applications for Federal assistance must be submitted electronically through Grants.gov (<http://www.grants.gov>) using the SF424 Research and Related (R&R) forms and the SF424 (R&R) Application Guide. Applications may not be submitted in paper format. A registration process through Grants.gov is necessary before submission and applicants are highly encouraged to start the process at least four weeks prior to the grant submission date. Two steps are required for on time submission: (1) The application must be successfully received by Grants.gov no later than 5:00 p.m. local time (of the applicant institution/organization) on the submission/receipt date. (2) Applicants must complete a verification step in the eRA Commons within two business days of notification from NIH. Note: Since email can be unreliable, it is the responsibility of the applicant to periodically check on their application status in the Commons. The standard application forms, as furnished by PHS and required by 45 CFR Part 92, must be used for this program by those applicants that are State or local units of government. SBIR and STTR Grant Solicitations and SBIR Contract Solicitation may be obtained electronically through the NIH's "Small Business Funding Opportunities" home page at www.nih.gov/grants/funding/sbir.htm on the World Wide Web. The Solicitations include submission procedures, review considerations, and grant application or contract proposal forms.

Award Procedure:

Research Grant and Training Program applications are reviewed initially for scientific merit by an appropriate review panel, composed of scientific authorities, and by the National Diabetes and Digestive and Kidney Diseases Advisory Council composed of leaders in medical science, education, and public affairs. Approved applications will compete on a merit basis for available funds. The successful applicant is sent a Notice of Grant Award. All accepted SBIR/STTR applications are evaluated for scientific and technical

merit by an appropriate scientific peer review panel and by a national advisory council or board. All applications receiving a priority score compete for available SBIR/STTR set-aside funds on the basis of scientific and technical merit and commercial potential of the proposed research, program relevance, and program balance among the areas of research.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Project Grants: From 6 to 9 months. National Research Service Awards: From 6 to 9 months. SBIR/STTR applications: About 7-1/2 months.

Appeals:

A principal investigator (P.I.) may question the substantive or procedural aspects of the review of his/her application by communicating with the staff of the Institute. A description of the NIH Peer Review Appeal procedures is available on the NIH home page
<http://grants.nih.gov/grants/guide/notice-files/not97-232.html>.

Renewals:

Project Grants: Renewals are determined by competitive application and review. Extensions considered upon request. Individual NRSAs: Awards may be made for 1, 2, or 3 years. No individual may receive NIH fellowship support at the postdoctoral level for more than 3 years.

Formula and Matching Requirements:

This program has no statutory formula. Matching requirements are not applicable to this program. MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Project Grants: Awards are usually made for a 12-month period with recommendation of up to 4 years of additional support. SBIR: Normally, Phase I awards are for 6 months; normally, Phase II awards are for 2 years. STTR: Normally, Phase I awards are for 1 year; normally, Phase II awards are for 2 years. See the following for information on how assistance is awarded/released: The Notice of Award (NoA) is the legal document issued to notify the grantee that an award has been made and that funds may be requested from the designated HHS payment system or office. An NoA is issued for the initial budget period. If subsequent budget periods are also approved, the NoA will include a reference to those budgetary commitments. Funding for subsequent budget periods are generally provided in annual increments following the annual assessment of progress. This funding is also contingent on the availability of funds. The NoA includes all applicable terms of award either by reference or specific statements. It provides contact information for the assigned program officer and grants management specialist. The grantee accepts an NIH award and its associated terms and conditions by drawing or requesting funds from the Payment Management System, or upon the endorsement of a check from the US Treasury for foreign awardees.

Reports:

Project Grants: Expenditures and other financial records, including documents supporting accounting records and substantive charges to each grant, must be retained for 3 years from the day on which the grantee submits the last expenditure report for the report period. NRSAs: Documentation of expenditures and other fiscal records must be kept readily available for examination by authorized Government personnel and must be retained for 3 years from the day on which the grantee submits the last expenditure report for the report period. Reports are required after termination of NRSAs to ascertain compliance with service and payback provisions. Cash reports are not applicable. Annual and terminal progress reports, annual reports of inventions, and annual certification with respect to research involving human subjects are required. Reports of expenditures are required. NRSAs: Reports are required after termination of NRSAs to ascertain compliance with service and payback provisions. Performance monitoring is not applicable.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit

conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. Records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO). In accordance with 45 Code of Federal Regulations, Part 74.26, for-profit (commercial) organizations are subject to audit requirements for a non-Federal audit if, during its fiscal year, it expended \$500,000 or more under HHS awards and at least one award is a HHS grant or subgrant. The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement: 1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or 2. an audit that meets the requirements of OMB Circular No. A-133. In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit (commercial) organizations.

Records:

Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants. In accordance with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents. This right also includes timely and reasonable access to a recipients personnel for the purpose of interview and discussion related to such documents. The rights of access are not limited to the required retention period, but shall last as long as records are retained.

PROJECT GRANTS

Uses and Use Restrictions (070):

Research grants may be used to provide salaries, equipment, supplies, travel and other expenses for research. Each individual who receives a NRSA may be obligated upon termination of the award to comply with service and payback provisions. Career Development Awards such as the Independent Scientist Awards (K02) provide support for newly independent scientists with health related degrees who can demonstrate the need for a period of intensive research focus as a means of enhancing their research careers and facilitating their ability to obtain major NIH research awards. Mentored Clinical Research Scientist Development Awards (K08) provide support for clinically trained health professionals who need an additional period of sponsored research experience as a way to gain expertise in a research area new to the candidate or in an area that would demonstrably enhance the candidate's scientific career. The Mentored Research Scientist Development Award (K01) is used to promote diversity in neuroscience research support, an intensive, supervised research career development experience for underrepresented, disabled or disadvantaged career neuroscientists. The Mentored Patient-Oriented Research Career Development Award (K23) provide support for a period of supervised study and research for clinically trained professionals who have the potential to develop into productive clinical investigators. SBIR Phase I grants (of approximately 6-months to 2 years in duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research efforts initiated in Phase I that are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1 to 3 years in duration) are to determine the scientific, technical, and commercial merit and feasibility of proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of Phase II application. Grant funds may be expended only for the purpose stated in the application and award document. The NINDS participates in the NIH SBIR/STTR "fast track" initiative.

Applicant Eligibility:

Research Grants: Any public, private, nonprofit, or for-profit institution is eligible to apply. For-profit institutions are not eligible for Institutional National Research Service Awards but are eligible for Individual NRSAs. All proposals are reviewed for scientific merit, for evaluation of the qualifications of the investigators, for adequacy of the research environment, and for significance of the problem. Approved proposals compete for available funds. All Career Development Program awardees, with the exception of awardees of the Pathway to Independence Award, must be citizens or have been admitted to the United States for permanent residence. Candidates must be nominated for the program by a nonfederal public or private nonprofit institution located in the United States, its possessions or territories. To be eligible, postdoctoral NRSA trainees or fellows must have a professional or scientific degree (M.D., Ph.D., D.D.S., D.O., D.V.M., Sc.D., D. Eng., or equivalent domestic or foreign degree). SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the entire research must be performed in the United States. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business

concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Beneficiary Eligibility:

Health professionals, graduate students, health professional students, scientists, and researchers.

Credentials/Documentation:

Research grants are awarded to an institution in the name of an individual investigator. Persons qualified to carry out research related to the extramural programs described above may apply for funds to support their investigations. Mentored Career Program training must be conducted under the direction of a competent sponsor. National Research Service Awards: Individual NRSA Fellowships for postdoctoral training: the candidate's academic record, research experience, citizenship, institutional sponsorship, and the proposed area and plan of training must be included in the application. Institutional Training Grants for predoctoral and postdoctoral training: The applicant institution must show the objectives, methodology and resources for the research training program; the qualifications and experience of directing staff; the criteria to be used in selecting individuals for stipend support; and a detailed budget and justification for the amount of grant funds requested. For-profit organizations' costs are determined in accordance with Subpart 31.2 of the Federal Acquisition Regulations. For other grantees, costs will be determined in accordance with HHS Regulations 45 CFR, Part 74 and 92, Subpart Q. For SBIR and STTR grants, the applicant organization (small business concern) must present in a research plan an idea that has potential for commercialization and furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. Grant forms PHS 6246-1 and PHS 6246-2 are used to apply for SBIR Phase I and Phase II, respectively. Grant forms PHS 6246-3 and PHS 6246-4 are used to apply for STTR Phase I and Phase II, respectively. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Research grant applications that request \$500,000 or more in direct costs in any yearly budget period will not be accepted unless the NINDS has agreed to accept the application prior to submission (see <http://grants.nih.gov/grants/guide/notice-files/NOT-OD-02-004.html>). Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. NIH has transitioned to the SF424 family of forms and electronic submission through Grants.gov for most research programs and funding mechanisms. All applications must be submitted in response to a specific funding opportunity announcement (FOA). The FOA will specify which forms should be used for submission.

Award Procedure:

Research Grant and Training Program applications are reviewed initially by technical panels, composed of scientific authorities, and by the National Advisory Neurological Disorders and Stroke Council composed of 18 leaders in medical science, education, and public affairs. Approved applications will compete on a merit basis for available funds. Formal award notices are transmitted to the grantee or awardee. All accepted SBIR/STTR applications are evaluated for scientific and technical merit by an appropriate scientific peer review panel and by a national advisory council or board. All applications receiving a priority score compete for available SBIR/STTR set-aside funds on the basis of scientific and technical merit and commercial potential of the proposed research, program relevance, and program balance among the areas of research.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Research grants: Approximately 6 to 9 months. Career program: From 7 to 8

months. SBIR/STTR applications: About 7-1/2 months. Institutional Training Grants: From 6 to 12 months.

Appeals:

A principal investigator (P.I.) may question the substantive or procedural aspects of the review of his/her application by communicating with the staff of the Institute, and subsequently, the P.I. and applicant institution may appeal to the NINDS appeals officer. A description of the NIH Peer Review Appeal procedures is available on the NIH home page <http://grants.nih.gov/grants/guide/notice-files/NOT-OD-11-064.html>.

A Financial Status Report must be submitted within 90 days after the close of each budget period for which an award has been issued. No expenditure reports are required. No performance monitoring is required.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. Records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO). In accordance with 45 Code of Federal Regulations, Part 74.26, for-profit (commercial) organizations are subject to audit requirements for a non-Federal audit if, during its fiscal year, it expended \$500,000 or more under HHS awards and at least one award is a HHS grant or subgrant. The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement:

1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or
2. an audit that meets the requirements of OMB Circular No. A-133.

In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit (commercial) organizations.

Records:

Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants. In accordance with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents. This right also includes timely and reasonable access to a recipients personnel for the purpose of interview and discussion related to such documents. The rights of access are not limited to the required retention period, but shall last as long as records are retained.

93.855 ALLERGY, IMMUNOLOGY AND TRANSPLANTATION RESEARCH

FEDERAL AGENCY:

National Institutes of Health, Department of Health and Human Services

AUTHORIZATION:

Public Health Service Act, Title IV, Section 301; Small Business Research and Development Enhancement Act of 1992, 42 U.S.C 241.

OBJECTIVES:

To assist public and private nonprofit institutions and individuals to establish, expand, and improve biomedical research and research training in allergic and immunologic diseases and related areas to assist public, private, and commercial institutions to conduct developmental research; to produce and test

research materials; and to provide research services as required by the agency for research progress in allergic and immunologic diseases. NIAID's Allergy, Immunology and Transplantation Research concerns the immune system as it functions in the maintenance of health and as it malfunctions in the production of diseases. Because of this dual focus, the program encompasses both basic research and clinical research. Small Business Innovation Research (SBIR) program expands and improves private sector participation in biomedical research. The SBIR Program intends to increase and facilitate private sector commercialization of innovations derived from Federal research and development; to increase small business participation in Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. The Small Business Technology Transfer (STTR) program stimulates and fosters scientific and technological innovation through cooperative research and development carried out between small business concerns and research institutions; to foster technology transfer between small business concerns and research institutions; to increase private sector commercialization of innovations derived from Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. Research Career Development Awards support the development of scientists during the formative stages of their careers. Individual National Research Service Awards (NRSAs) are made directly to approved applicants for research training in specified biomedical shortage areas. In addition, Institutional National Research Service Awards are made to enable institutions to select and make awards to individuals to receive training under the aegis of their institutional program.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Beginning with fiscal year 1998, the direct costs awarded in the first year to a research project grant resulting from a competing renewal application will be limited to no more than a 20 percent increase over the direct costs awarded in the last non-competing year of that grant. Research grants provide funds for salaries, equipment, supplies, and travel. They also afford the collateral benefits of enriching the training experience of research workers. Grantees are expected to be judicious in using these funds. The application for a research grant sets forth specific terms and conditions and requires the signatures of the principal investigator and an official authorized to sign for the institution. Scientists and institutions are under an obligation to expend grant funds prudently for the purposes stated in the application and award document. For Research Career Development Awards (RCDAs) the scientists must demonstrate an outstanding research potential for independent research in the sciences related to transplantation, immunology, allergies, and immunological diseases. For National Research Service Awards (NRSAs), each individual who receives NRSA support is obligated upon termination of the award to comply with certain service and payback provisions. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I and which are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of the Phase II application.

Applicant Eligibility:

Universities, colleges, hospitals, laboratories, and other public or private nonprofit domestic institutions, including State and local units of government, and individuals are eligible to make application for grant support of research by a named principal investigator or a research career development candidate. For-profit organizations are also eligible, with the exception of NRSA. Individual NRSA awardees must be nominated and sponsored by a public or nonprofit private institution having staff and facilities appropriate to the proposed research training program. All NRSA awardees must be citizens or have been admitted to the United States for permanent residence. To be

eligible, predoctoral candidates must have completed the baccalaureate degree, and postdoctoral awardees must have a professional or scientific degree (M.D., Ph.D., D.D.S., D.O., D.V.M., Sc.D., D.Eng., or equivalent domestic or foreign degree). SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is being proposed and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. or its possessions. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which researches proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Beneficiary Eligibility:

Any nonprofit or for-profit organization, company, or institution engaged in biomedical research.

Credentials/Documentation:

Research grant applicants must define the objectives, methodology, and facilities for the program, and must present the program director's competence and scientific interest. For SBIR and STTR grants, applicant organization (small business concern) must present in a research plan an idea that has potential for commercialization and furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. Grant forms PHS 6246-1 and PHS 6246-2 are used to apply for SBIR Phase I and Phase II, respectively. Grant forms PHS 6246-3 and PHS 6246-4 are used to apply for STTR Phase I and Phase II, respectively. Applicants for individual NRSA's must include their academic record, research experience, citizenship, institute sponsorship, and the proposed area and plan of training in their applications. The applicant for an institution must specify the objectives, methodology, and resources for the research training program, the qualifications experience of directing staff, the criteria to be used in selecting individuals for award, and a detailed budget justification for the amount of grant funds requested. For-profit organizations' costs are determined in accordance with Subpart 31.2 of the Federal Acquisition Regulations. For other grantees, costs will be determined by HHS Regulations 45 CFR, Part 74, Subpart Q. OMB Circular No. A-87 applies to this program.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: The NICHD, in collaboration with NIAID, NIDA, NIMH, NHLBI, NIDCD and NIH Office of AIDS Research funded research project grant applications for the Pediatric HIV/AIDS Cohort Study (PHACS) network, supported by the NICHD Pediatric, Adolescent, and Maternal AIDS (PAMA) Branch. This initiative was established in 2005 to address two critical pediatric HIV research questions:

What is the long-term safety of fetal and infant exposure to prophylactic antiretroviral chemotherapy?

What are the effects of perinatally acquired HIV infection in adolescents. The goals of this network are to:

Create a body of data to promote better understanding of effect of HIV on sexual maturation, pubertal development, and socialization of perinatally HIV-infected pre-adolescents and adolescents; Acquire more definitive information regarding long-term safety of antiretroviral agents when used

during pregnancy and in newborns; Ensure that a mechanism is in place to estimate the upper bounds of risk to children associated with the use of antiretrovirals by their HIV-infected pregnant mothers as recommended in the Public Health Service Guidelines to prevent perinatal HIV transmission; and Ensure that the follow-up of these populations continues.

The PHACS network consists of two protocols: the Adolescent Master Protocol (AMP); and the Surveillance Monitoring for ART Toxicities (SMARTT) Study. Both these protocols are structured to accommodate focused sub-studies in future years. Fiscal Year 2011: The NICHD will invest wisely in the strongest science, ensuring that our priorities fill critical knowledge gaps and exploit emerging opportunities, while addressing urgent public health needs. A planned NICHD initiative, utilizing the newest high-throughput genomic technologies, will leverage the research resources developed by the NIH Roadmap to support additional studies in developmental epigenetics. Epigenetic actions on gene expression may critically influence early development from before birth and at key stages throughout childhood, serving as a mediator between genetics and the environment. Thus epigenetic research will lead to a better understanding of birth defects, developmental disabilities, obesity, and other conditions.

To translate scientific knowledge into new and better treatments, the NICHD will continue to examine how medication during pregnancy and delivery affects the mother and the fetus. Researchers will examine why children respond differently than adults to certain drug therapies, and apply this knowledge to improve safety, efficacy, and dosage in children. Such studies will include cutting-edge research in pharmacogenomics, linking different pharmacological outcomes to genetic differences in individuals and laying the foundation for future research in personalized medicine.

NICHD will take strategic advantage of existing resources and infrastructure to ensure that scientific research improves health care. Scientists will assess the newest treatment approaches, but researchers will also evaluate the safety and efficacy of more established treatments for which safety and efficacy data are currently inadequate. The NICHD will invest in the development of new medical devices specifically for fragile infants in neonatal intensive care units, rather than relying on miniaturized versions of instruments designed for adults. NICHD researchers will work to identify the earliest developmental paths leading to obesity. We will address the understudied area of maternal obesity and its immediate and long-term impact on women and their children. Rehabilitation research priorities include better understanding of the immediate and long-term outcomes of critical care treatment of children and of autonomic dysreflexia, a grave and little-studied complication of spinal cord injury that often occurs unexpectedly.

The NICHD will continue efforts to promote women's and children's health around the globe, including studies to improve birth outcomes, to reduce maternal-fetal transmission of HIV, and to address interactions between iron deficiency and malaria.

Reinvigorating the U.S. biomedical research community will be essential in the next decade. NICHD will build on successful training and career development programs to recruit and mentor the next generation of scientists. The Institutes focus on developmental processes, in both the child and the adult, will continue to provide the basic scientific and clinical insights needed to improve care for a wide range of conditions affecting many populations. Fiscal Year 2012: Institute Mission - The NICHD mission is to ensure that every child is born healthy and wanted; that women suffer no harmful effects from reproductive processes; that all children can achieve their full potential for healthy and productive lives, free from disease or disability; and that medical rehabilitation can optimize the health, productivity, and independence of all people. Scientifically, the NICHD supports a broad research portfolio, uniquely focused on understanding human health and development from before birth until adulthood. The NICHD provides a home to targeted research in women's health and reproductive sciences research, pediatric research, the science of early childhood learning, demographic and behavioral research on child and family well-being and medical rehabilitation. Thus, NICHD research spans from that needed to understand the molecular substrates of early health to research needed to understand the health impacts of economic and demographic

changes on families.

Recent Progress - A central goal for the NICHD is to develop the basic knowledge needed to prevent diseases at the earliest possible stage. For example, NICHD-supported researchers pioneered a sophisticated technique with the potential to prevent a class of more than 40 hereditary disorders, known as mitochondrial diseases, from being passed from mother to child. Other researchers discovered how the prion protein causes cellular damage in mad cow disease and related neurological illnesses, and tested new ways to manipulate the protein to prevent such damage. With findings that have implications for treating such diseases as leukemia, researchers deciphered key developmental events governing whether the stem cells that produce red and white blood cells remain anchored to the bone marrow, or migrate into the circulatory system. The NICHD also co-funded researchers who developed an innovative treatment in a canine version of Duchenne muscular dystrophy, a paralyzing and ultimately fatal muscle disease. The treatment involves a molecular patch, comprised of DNA-like molecules, which is used to cover up mutant regions in a specific gene. Exciting new advances in the reproductive sciences also offer hope for parents. Researchers completed a critical first step in a procedure that would enable women with cancer to preserve their eggs so that they can choose to have children in the future.

Future Directions - The NICHD will invest wisely in the strongest science, ensuring that our priorities fill critical knowledge gaps and exploit emerging opportunities, while addressing urgent public health needs. A planned NICHD initiative, utilizing the newest high-throughput genomic technologies, will leverage the research resources developed by the NIH Roadmap to support additional studies in developmental epigenetics. Epigenetic actions on gene expression may critically influence early development from before birth and at key stages throughout childhood, serving as a mediator between genetics and the environment. Thus epigenetic research will lead to a better understanding of birth defects, developmental disabilities, obesity, and other conditions.

To translate scientific knowledge into new and better treatments, the NICHD will continue to examine how medication during pregnancy and delivery affects the mother and the fetus. Researchers will examine why children respond differently than adults to certain drug therapies, and apply this knowledge to improve safety, efficacy, and dosage in children. Such studies will include cutting-edge research in pharmacogenomics, linking different pharmacological outcomes to genetic differences in individuals and laying the foundation for future research in personalized medicine.

The NICHD will take strategic advantage of existing resources and infrastructure to ensure that scientific research improves health care. Scientists will assess the newest treatment approaches, but researchers will also evaluate the safety and efficacy of more established treatments for which safety and efficacy data are currently inadequate. The NICHD will invest in the development of new medical devices specifically for fragile infants in neonatal intensive care units, rather than relying on miniaturized versions of instruments designed for adults. NICHD researchers will work to identify the earliest developmental paths leading to obesity. We will address the understudied area of maternal obesity and its immediate and long-term impact on women and their children. Rehabilitation research priorities include better understanding of the immediate and long-term outcomes of critical care treatment of children and of autonomic dysreflexia, a grave and little-studied complication of spinal cord injury that often occurs unexpectedly.

The NICHD will continue efforts to promote women's and children's health around the globe, including studies to improve birth outcomes, to reduce maternal-fetal transmission of HIV, and to address interactions between iron deficiency and malaria.

Reinvigorating the U.S. biomedical research community will be essential in the next decade. The NICHD will build on successful training and career development programs to recruit and mentor the next generation of scientists. The Institutes focus on developmental processes, in both the child and the adult, will continue to provide the basic scientific and clinical insights needed to improve care for a wide range of conditions affecting many populations.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Research grants are intended to support the direct costs of a project in accordance with an approved budget, plus an appropriate amount for facilities and administrative costs. Grantees must agree to administer the grant in accordance with the regulations and policies governing the research grants program of the Public Health Service. National Research Service Awards (NRSA) (Individual) are made directly to approved applicants for research training in specified biomedical shortage areas. In addition, National Research Service Awards (Institutional) may be made to institutions to enable them to make NRSA to individuals selected by them. Each individual who receives a postdoctoral NRSA is obligated, upon termination of the award, to comply with certain service and payback provisions. Regulations are published in the Code of Federal Regulations and 42 CFR, Part 66. SBIR Phase I grants (of approximately 6 months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. SBIR Phase II grants are for the continuation of the research initiated in Phase I and that are likely to result in commercial products or processes. Only Phase I awardees are eligible to apply for Phase II support. STTR Phase I grants (normally of 1- year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application.

Applicant Eligibility:

Audits:

This program is excluded from coverage under OMB Circular No. A-133. In accordance with OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend \$500,000 or more in a year in Federal awards shall have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133, but records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO). In accordance with 45 Code of Federal Regulations, Part 74.26, for-profit (commercial) organizations are subject to audit requirements for a non-Federal audit if, during its fiscal year, it expended \$500,000 or more under HHS awards and at least one award is a HHS grant or subgrant. The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement: 1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or 2. an audit that meets the requirements of OMB Circular No. A-133. In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit (commercial) organizations.

Records:

Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a

period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants. In accordance with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents.

This right also includes timely and reasonable access to a recipients personnel for the purpose of interview and discussion related to such documents. The rights of access are not limited to the required retention period, but shall last as long as records are retained.

Bioengineering Research Grants (BRG) support basic bioengineering research whose outcomes are likely to advance health or health-related vision research. BRGs may propose to apply basic bioengineering design-directed or hypothesis-drive research to an important vision research area. Bioengineering Research Partnership grants support multidisciplinary research teams applying an integrative, systems approach to develop knowledge and/or methods to prevent, detect, diagnose, or treat diseases of the eye and visual system. NEI Translational Research Program on Therapy for Visual Disorders grants provide support to collaborative, multidisciplinary research focused on the development of novel therapies to restore or prevent the loss of function due to visual diseases and disorders. Small Business Innovation Research Phase I grants are awarded to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I that is likely to result in commercial products or processes. Only Phase I awardees are eligible to apply for Phase II support. Small Business Technology Transfer Research, Phase I grants are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application. National Research Service Awards (NRSA), both individual and institutional, support training in vision research. FEDERAL AGENCY:

National Institutes of Health, Department of Health and Human Services

AUTHORIZATION:

Public Health Service Act, Title IV, Part D, Subpart 2, Section 472-476; Public Health Service Act, Title III, Part A, Section 301.

OBJECTIVES:

To improve health information services by providing funds to train professional personnel; to conduct research in biomedical informatics, bioinformatics and related computer and information sciences; to facilitate management of electronic health science information; to plan, develop and test feasibility of advanced information tools; to prepare certain kinds of biomedical publications; to advance biocomputing and bioinformatics through participation in Federal initiatives relating to biomedical informatics, bioinformatics and biomedical computing; to stimulate and foster scientific and technological innovation through cooperative research development carried out between small business concerns and research institutions, through Small Business Research Innovation (SBIR) and Small Business Technology Transfer (STTR) grants.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

RESEARCH GRANT PROGRAMS: Research Grants are available for fundamental and applied research in biomedical informatics and bioinformatics. Areas of research interest include: representation, organization and retrieval of biomedical and biological knowledge, data and images; enhancement of human intellectual capacities through virtual reality, dynamic modeling, artificial intelligence, and machine learning; medical decision-making; linguistic analyses for natural language processing and understanding; informatics topics relevant to public health and informatics for disaster management. Research Project Grants (R01) are available for rigorous scientific research studies and experiments. NLMs latest offering, the Advanced Informatics for Health Grants (R01), aims to support exceptionally innovative informatics research that will have an unusually high impact on a problem in health or biomedical research. The specific focus may change from year to year. Exploratory/Developmental Grants (R21) support early, conceptual work and feasibility tests. Other research grants include Informatics Conference Grants

(R13) and a number of NIH-wide grant programs on high priority topics such as health literacy, behavioral research, health disparity, womens health, climate change, and detection of gene environment interactions for complex human diseases. Further information on research grants is available at <http://www.nlm.nih.gov/ep/Grants.html#research>.

TRAINING GRANT PROGRAMS: NLM's University Biomedical Informatics Research Training Programs (T15) promote the training of talented individuals who seek research careers in biomedical informatics, bioinformatics, clinical translational informatics, and public health informatics. A competition for these institution-based training grants is announced every five years.

University-based training support may be at the pre- or post-doctoral level. Training sites recruit and choose their trainees, and are expected to have well-established computer facilities, strong informatics research and education programs, experienced faculty and staff committed to research in the field of biomedical computing and/or biomedical informatics, and available courses or experience in computer science, information science, and cognitive sciences. Institutional training grants provide trainee stipends, tuition and fees, travel, and certain institutional support costs. Further information on training grants is available at <http://www.nlm.nih.gov/ep/Grants.html#training>.

CAREER DEVELOPMENT GRANT PROGRAMS: NLM offers an Independent Career Development award (K22) to help informatics trainees make the transition to a successful independent research career. NIH Pathway to Independence Career Development awards (K99/R00) are reserved for investigators who are making the transition to their first research positions. These grants can last up to five years. They include a mentored period, followed by an unmentored period, and provide both salary and a research fund. Research supplement awards are also offered to promote diversity in health-related informatics research, and to promote re-entry into informatics careers. Diversity and re-entry awards are issued as supplements to existing research grants funded by NLM. Further information on career development grants is available at <http://www.nlm.nih.gov/ep/Grants.html#career>.

RESOURCE GRANT PROGRAMS: NLM Applied Informatics Grants (G08) support implementation projects that bring useful, usable health information to those who need it. The specific focus may change from year to year. NLM offers Grants for Scholarly Works (G13) to support preparation of books in the history and philosophy of biomedicine, bioethics, and public policy areas of importance to health professionals and biomedical scientists. Typically, these programs issue one FOA per year. The purpose, restrictions, funding periods and award limits vary for these grant programs and are described in the FOAs. Further information on resource grants is available at <http://www.nlm.nih.gov/ep/Grants.html#resource>.

SMALL BUSINESS RESEARCH & DEVELOPMENT GRANT PROGRAMS: Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) grants are made to U.S. small businesses that seek to undertake informatics research and development leading to commercialization. The STTR program requires a small business applicant organization to formally collaborate with a research institution in Phase I and Phase II. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I and that are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application. Further information on SBIR/STTR grants is available at <http://www.nlm.nih.gov/ep/Grants.html#small>.

Applicant Eligibility:

Any individual(s) with the skills, knowledge, and resources necessary to carry out the proposed research as the project director/principal investigator (PD/PI) is invited to work with his/her organization to develop an application for support. Individuals from underrepresented racial and ethnic groups as well as individuals with disabilities are always encouraged to apply for NIH support. See Beneficiary Eligibility below for further details.

Beneficiary Eligibility:

Research Grants are available to public or private, domestic or foreign, for

profit or not-for-profit institutions or organizations with research capabilities in biomedical informatics, bioinformatics, computer sciences, information sciences and related disciplines. Training Grants may be made to nonfederal public and nonprofit private institutions. With the exception of NIH Pathway to Independence awards, trainees must be citizens or non-citizen nationals of the United States or have been lawfully admitted to the United States for permanent residence. Resource grants (Information Resource, Scholarly Works) are open to any U.S. public or private nonprofit institution or organization. SBIR and STTR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500 employees). To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

CRITERIA FOR SELECTING PROPOSALS:

The standard NIH review criteria, significance, investigator, innovation, approach, environment are used as the basis of merit review. Considerations for final award decisions include level of innovation, program priority, portfolio balance, and availability of funds. For NLM resource grants, review criteria include considerations as to relevance to program objectives; impact on the management and transmission of biomedical knowledge; institutional readiness and resources available to project; expertise of project director and key personnel; scientific or technical merit of project; sustainability of what is deployed, and appropriateness of budget. For Career awards, review criteria include issues pertaining to the suitability of the candidates and their career development plan, research plan, mentors/consultants/collaborators, as well as

the environment and institutional commitment to the candidates. For Training awards, review criteria include evidence of soundness in the areas of: Training Program and Environment, Training Program Principal Investigator(s), Preceptors and Mentors, Trainees, and Training Record. Comparative priorities on the above criteria are based on collective judgment of peer reviewers. The following criteria are used in considering the scientific and technical merit of SBIR/STTR Phase I grant applications: (1) The soundness and technical merit of the proposed approach; (2) the qualifications of the proposed principal investigator, supporting staff, and consultants; (3) the scientific, technical, or technological innovation of the proposed research; (4) the potential of the proposed research for commercial application; (5) the appropriateness of the budget requested; (6) the adequacy and suitability of the facilities and research environment; and (7) where applicable, the adequacy of assurances detailing the proposed means for (a) safeguarding human or animal subjects, and/or (b) protecting against or minimizing any adverse effect on the environment. Phase II grant applications are reviewed based upon the similar criteria, and on the degree to which the Phase I objectives were met and feasibility demonstrated. The Faculty Development Plan should include the provision of counselors and protected time for research and faculty development. Training may include: pedagogical skills, including teaching experience; program administration; grant writing; research methods and design; and preparation of articles suitable for publication in peer reviewed journals.

(3) Impact: Faculty Training in Providing Health Service - This includes the extent to which the Fellow is available to provide health services to rural or medically underserved populations.

(4) Resources/Capabilities: This includes the extent to which project personnel are qualified by training and/or experience to implement and carry out projects. This includes the capabilities of the applicant organization; and the quality and availability of facilities and personnel to fulfill the needs and requirements of the proposed project.

(5) Support Requested: This includes the extent to which the overall budget, including non-trainee expenses, is cost effective, reasonable, and consistent with the stated objectives and proposed activities. Expenditures are well justified and in-kind contributions are documented.

(6) Evaluative Measures: This includes the methodology that will be used to monitor and evaluate the project results. Evaluative measures must be able to assess to what extent the program objectives have been met.
