No fee or profit may be paid to any recipient or contractor of an award. HUD will determine whether salary rates are reasonable and customary.

14.314 ASSISTED LIVING CONVERSION FOR ELIGIBLE MULTIFAMILY HOUSING PROJECTS

(ALCP)

FEDERAL AGENCY:

Office of Housing-Federal Housing Commissioner, Department of Housing and Urban Development

AUTHORIZATION:

Section 202b of the Housing Act of 1959, as amended and the Consolidated Appropriations Act, 2010 (Public Law 111-117).

OBJECTIVES:

To preserve the current elderly housing stock by converting units with a grant into Assisted Living Facilities (ALFs) for the frail elderly, as defined in Section 232(B)(6) of the National Housing Act and 202(k). The program is expected to promote aging in place and prevent premature institutionalization of the target population.

TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

Assisted living facilities (ALFs) are designed to accommodate frail elderly persons and people with disabilities who can live independently but need assistance with activities of daily living (that is, assistance with eating, bathing, grooming, dressing and home management activities.) ALFs must provide support services such as personal care, transportation, meals, housekeeping, and

laundry. Typical funding will cover basic physical conversion of existing project units, as well as related common and services space. The ALCP provides funding for the physical costs of converting some or all of the units of an eligible development into an ALF, including unit configuration, common and services space and any necessary remodeling, consistent with HUD or the State's statute/regulations (whichever is more stringent). There must be sufficient community space to accommodate a central kitchen or dining facility, lounges, recreation and other multiple-areas available to all residents of the project, or office/staff spaces in the ALF. Funding for the supportive services must be provided by the owners, either directly or through a third party.

Applicant Eligibility:

Only private nonprofit owners of eligible multifamily assisted housing developments specified in Section 683(2)(B), (C), (D), (E), and (F) (Section 202 projects for the elderly, Rural Housing Section 515 projects receiving Section 8 rental assistance, projects receiving project-based rental assistance under Section 8, projects financed by a below-market interest rate loan or mortgage insured under Section 221(d)(3) of the Housing Act, or housing financed under Section 236 of the National Housing Act) that have been in occupancy for at least five years are eligible for funding. To be eligible, owners must meet the following criteria: (1) Must be in compliance with Loan Agreement, Capital Advance Agreement, Regulatory Agreement, Housing Assistance Payment Contract, Project Rental Assistance Contract, Rent Supplement or LMSA Contract, or any other HUD grant or contract document; (2) Must be in compliance with all fair housing and civil rights laws, statutes, regulations, and executive orders as enumerated in 24 CFR 5.105(a).

Beneficiary Eligibility:

Eligible residents who meet the admissions/discharge requirements as established for assisted living by State and local licensing, or HUD frailty requirements under 24 CFR 891.205 if more stringent. The residents must be able to live independently but may need assistance with activities of daily living (that is, assistance with eating, bathing, grooming, dressing and home management activities).

Credentials/Documentation:

The assisted living facility must be licensed and regulated by the State (or if there is no State law providing such licensing and regulation, by the municipality or other subdivision in which the facility is located). The application must include a firm commitment for the supportive services to be offered at the ALF as part of the application. The Notice of Funding Availability contains all the necessary information for applicants to apply for the grant. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Applicants must have contacted the State licensing agency for such a project to determine if the proposed project will meet state licensing requirements. A Supportive Service Plan (SSP) for the services and coordination of the supportive services which will be offered in the ALF must be developed and submitted to the appropriate State or local organization. Applicants must comply with all applicable statutory requirements and statutory requirements under Section 232(b)(6) prior to application submission. Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Applications are only accepted in response to the Notice of Funding Availability which is published in the Federal Register each fiscal year. Applicants responding to the NOFA should ensure that their application is complete before submitting it to HUD. Applications must be submitted in accordance with requirements of the NOFA. All applications received by the deadline will be screened for curable deficiencies. After the completeness review, HUD reviews the application to determine whether it meets the threshold requirements. Only those applications that meet all of the threshold

requirements will be eligible to receive an award. Applications submitted in response to the NOFA that are eligible, pass threshold and have a total score of 75 points (or more) are eligible for ranking and selection.

Award Procedure:

Applications are reviewed and selected for funding within the funding allocation of the geographical Hub area. At the end of the technical review, all applications will be either rated or technically rejected. If an application meets all program eligibility requirements after completion of the technical review, it will be rated according to the rating selection factors. The number of points that an application receives will depend on the extent to which the application is responsive to the information requested in the selection criteria. The maximum number of points an application may receive under this program is 102.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

A processing schedule is developed for each funding round. Applicants are provided with a decision by the end of the schedule, after approximately 4-6 months from processing start date.

Appeals:

From 1 to 15 days. An applicant will have fourteen (14) calendar days from the date of HUD's written notice to appeal a technical rejection. HUD will make a determination on an appeal before finalizing selection recommendations.

14.319 MULTIFAMILY ENERGY INNOVATION FUND

Multifamily Energy Innovation Fund

FEDERAL AGENCY:

Office of Housing-Federal Housing Commissioner, Department of Housing and Urban Development

AUTHORIZATION:

Consolidated Appropriations Act of 2010 , Public Law 111-117.

OBJECTIVES:

The primary purpose of the Program is to stimulate innovative approaches for increasing the energy efficiency of existing multifamily residential properties that can be replicated by others. HUD expects that outcomes of the Program will include:

- a. Reduced energy consumption in multifamily residential properties, with resulting savings for families, property owners, and in some cases the Federal government, and lower greenhouse gas emissions.
- b. Increased private investment to support energy efficiency in such properties.
- c. Green jobs in construction, property management, and technical analysis (e.g., energy audits, building commissioning), including job opportunities for low-income people.
- d. Acquisition and analysis of data on the costs, benefits, challenges, and opportunities associated with retrofitting such properties.
- e. Approaches for retrofitting such properties that can be scaled up, applied more widely and adopted by other parties.
- f. Approaches that propose solutions to the disparity among the parties when their financial or other interests are not the same, such as the difference in perspective when utilities are paid only by the ownership or only by the tenants, i.e., the so-called split incentives issue.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Awards will be made in each of two different categories, Financing Demonstrations and Applied Research Demonstrations.

--Financing Demonstrations are initiatives that demonstrate innovative methods for financing retrofits of multifamily properties that achieve the criteria described in this NOFA. Financing Demonstrations must offer a plan to achieve both of the following:

- a. Leverage additional capital; and
- b. Test new ways of funding retrofit improvements.

Examples of eligible financing demonstrations are:

- (1) energy retrofit financing vehicles providing investor equity;
- (2) loan loss reserves; interest rate reductions;

- (3) secondary financing; loan guarantees; secured and unsecured loans;
- (4) energy-related revolving loan programs;
- (5) on-bill utility repayment programs or other mechanisms; and
- (6) power purchase agreements, energy performance contracts, or similar financing structures.

--Applied Research Demonstrations are initiatives that demonstrate innovative and scalable methods of defining and implementing a solution to a longstanding barrier to multifamily residential retrofits that is not primarily financial in nature. The barrier could be behavioral, structural, regulatory, or related to availability of information or options. Applied Research Demonstrations must apply a proposed solution to an actual property or group of properties and be applicable to other similar properties. Examples of Applied Research are:
a. Solutions that provide more information on and greater owner and/or tenant control over energy use;
b. Solutions that convert properties from master metered/owner paid utilities to individually metered/tenant paid utilities that result in efficiencies and savings, or vice versa; and
c. Conservation practices and solutions that address the problem of split incentives by creating incentives for parties that promote investment strategies for energy improvements. --Financing Demonstrations are initiatives that demonstrate innovative methods for financing retrofits of multifamily properties that achieve the criteria described in this NOFA.

--Applied Research Demonstrations are initiatives that demonstrate innovative and scalable methods of defining and implementing a solution to a longstanding barrier to multifamily residential retrofits that is not primarily financial in nature. The barrier could be behavioral, structural, regulatory, or related to availability of information or options. Applied Research Demonstrations must apply a proposed solution to an actual property or group of properties and be applicable to other similar properties.

Applicant Eligibility:

This program is directed at the multifamily housing market, to catalyze innovations in the residential energy efficiency sector that have promise of replicability and to help create a standardized home energy efficient retrofit market.

Beneficiary Eligibility:

Must be related to eligible multifamily housing.

Credentials/Documentation:

In the application for funding from this Grant Program, Letters of Commitment are required to provide evidence of funds for matching and leverage. Owners must show evidence of control of subject properties and of managing or directing programs impacting a minimum of 1000 units of affordable housing when required for eligibility. Environmental certifications will be required for properties receiving grant money. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Electronic applications through Grants.gov

Award Procedure:

Applications will be rated and ranked in the category of financing demonstration or the category of applied research demonstration. The ratings factors are: Applicants Relevant Experience and Capacity, Soundness of Approach, Matching Funds and Leveraging above the Matching Funds Requirement, Low Income Housing Needs, Sustainable Solutions. Applicants are eligible to apply for and receive up to 2 bonus points related to work to support RC/EZ/ECs.

Deadlines:

Oct 14, 2011: see the Notice of Funding. see the Notice of Funding.

Range of Approval/Disapproval Time:

Not Applicable.

Appeals:

Not Applicable.

Renewals:

Not Applicable.

Formula and Matching Requirements:

This program has no statutory formula.

Matching Requirements: Participation in the Energy Innovation Program requires that a successful applicant (Grantee) has matching funds to complement grant funds. The level of funding that an applicant must demonstrate to be considered for participation is as follows:

a. Applicants for Financing Demonstrations must demonstrate that they have acquired matching funds of at least \$2 of private, non-governmental (other than federal, state, local, or tribal) capital for every \$1 requested, and will be required to bring additional matching funds of \$1 for every \$1 loaned at the project level.

b. Applicants for Applied Research Demonstrations must demonstrate that they have acquired matching funds of at least \$1 of private, non-governmental capital (other than federal, state, local, or tribal) for every \$1 requested.

This program does not have MOE requirements.

Length and Time Phasing of Assistance:

All awards will be made for a period of performance not to exceed 24 months commencing upon award execution. See the following for information on how assistance is awarded/released: HUD uses the Line of Credit Control System (LOCCS) to release the funds.

Reports:

1. All Grantees must report to HUD quarterly, within 30 days of the end of a calendar quarter (3/31, 6/30, 9/30, and 12/31), in formats approved by HUD. If there are fewer than 45 days remaining in the quarter in which the grant agreement documents are signed, then the first quarterly reports will be due 30 days after the second calendar quarter date subsequent to the award date.

Quarterly report requirements are as follows:

a. Report on the status of the milestones in the Work Plan, comparing the schedules for milestone completion and expenditures to actual activity.

b. Report on the dollar amount of funds expended to date, the amount of sub-awards made, and the amount of funds remaining. Provide information sufficient to demonstrate compliance with the requirement for a property owner to utilize \$1 of matching funds for every \$1 of financing borrowed from the Grantees revolving loan fund.

e. Report to address management questions. HUD is interested in understanding and reporting on the effects of the grant activities on the macro level. Therefore, the fourth quarterly report for each funding year shall be an annual report and shall include regular quarterly reporting described above plus the following additional information. The Grantee will report on:

(1) The number of units and the number of properties receiving energy retrofits.

(2) The energy consumption and costs prior to retrofit in properties receiving energy retrofits.

(3) Specific retrofit measures being applied.

2. Final report. The final report to HUD is due 60 days after the end of the project period. As part of the final report, the Grantee will provide all closeout documents requirement by HUD. The report will provide a final summary of program activities and outcomes including:

a. A review of actual outcomes compared to anticipated outcomes. The review should refer to the original problem statement, methodology, and replicability discussions provided in the application abstract and compare the outcomes of

the Program activity to the original expectations.

b. A discussion of lessons learned, including consideration of anticipated and unanticipated problems and solutions.

c. A discussion of the benefits that resulted from the Program activity.

Planning Grant

FEDERAL AGENCY:

Department of Housing and Urban Development

AUTHORIZATION:

The Department of Defense and Full-Year Continuing Appropriations Act, 2011, Executive Order The Department of Defense and Full-Year Continuing Appropriations Act, 2011 (Public Law 112-10, enacted April 15, 2011) (Appropriations Act), provided a total of \$100,000,000 to HUD for a Sustainable Communities Initiative to improve regional planning efforts that integrate housing and transportation decisions, and increase the capacity of communities to modernize land use and zoning plans. Of that total, \$70,000,000 is available for the Sustainable Communities Regional Planning Grant Program, and \$30,000,000 is available for the Challenge Planning Grant Program. , Public Law 112-10, Stat. 159, XII U.S.C 2240.

OBJECTIVES:

The Sustainable Communities Regional Planning Grant Program (Program) supports metropolitan and multijurisdictional planning efforts that integrate housing, land use, economic and workforce development, transportation, and infrastructure investments in a manner that empowers jurisdictions to consider the interdependent challenges of: (1) economic competitiveness and revitalization; (2) social equity, inclusion, and access to opportunity; (3) energy use and climate change; and (4) public health and environmental impact. The Program places a priority on investing in partnerships, including nontraditional partnerships (e.g., arts and culture, recreation, public health, food systems, regional planning agencies and public education entities) that translate the Livability Principles (Section I.C.1) into strategies that direct long-term development and reinvestment, demonstrate a commitment to addressing issues of regional significance, use data to set and monitor progress toward performance goals, and engage stakeholders and residents in meaningful decision-making roles.

Funding from this Program will support the development and implementation of Regional Plans for Sustainable Development (RPSD) that:

- a. Identify affordable housing, transportation, water infrastructure, economic development, land use planning, environmental conservation, energy system, open space, and other infrastructure priorities for the region;
- b. Clearly define a single, integrated plan for regional development that addresses potential population growth or decline over a minimum 20-year time frame, sets appropriate 3- to 5-year benchmark performance targets, and delineates strategies to meet established performance goals;
- c. Establish performance goals and measures that are, at a minimum, consistent with the Sustainability Partnerships Livability Principles;
- d. Use geo-coded data sets and other metrics in developing, implementing, monitoring, and assessing the performance goals of various reinvestment scenarios;
- e. Provide detailed plans, maps, policies, and implementation strategies to be adopted by all participating jurisdictions over time to meet planning goals;

f. Prioritize projects that facilitate the implementation of the regional plan and identify responsible implementing entities (public, nonprofit, or private) and funding sources;

g. Show how the proposed plan will establish consistency with HUD, Department of Transportation (DOT), and Environmental Protection Agency (EPA) programs and policies, such as Consolidated Plans, Analysis of Impediments to Fair Housing Choice, Long Range Transportation Plans, Indian Housing Plans, and Asset Management Plans, including strategies to modify existing plans, where appropriate; and

h. Engage residents and other stakeholders substantively and meaningfully in the development of the shared vision and its implementation early and throughout the process, including communities traditionally marginalized from such processes, while accommodating limited English speakers, persons with disabilities, and the elderly.

Although eligible applicants do not compete for awards, an award to a particular entity is not mandatory because requirements related to the scope of the project work, project cost, and other compliance measurements must be agreed to before funding is provided to the recipient. For non-ARRA funded projects, projects representing the greatest needs at schools and related facilities are prioritized as part of the process of obtaining Congressional appropriations of fund the projects. Funds must be appropriated before any project awards can be made, and a change in priorities may require Congressional consultation and, for some projects above a certain dollar amount, Congressional approval of the reprogramming of funding to a different project. For ARRA funded projects, a similar prioritization of projects representing greatest needs was implemented, resulting in the identification of projects eligible to receive ARRA funds,

followed by communication with prospective recipients of the available ARRA funds for the identified projects. For both ARRA funded and non-ARRA funded projects, the award of a self-determination contract is made in accordance with the procedures contained in 25 CFR Part 900 "Contracts under Indian Self-Determination and Education Assistance Act," and the award of a financial assistance grant amendment to the existing education grant from the Bureau of Indian Education to the Tribe or Tribal Organization is made in accordance with the Tribally Controlled Schools Act of 1988, as amended, 25 U.S.C. 2501 et seq. The requirements in 43 CFR Part 12, Subpart C "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments" apply to financial assistance awards. ARRA projects also are subject to additional requirements related to performance, funding, and compliance through implementation of ARRA in the areas of transparency and reporting, oversight, risk accountability, accelerated timeframes and other statutory objectives. Projects are prioritized before the funds are appropriated. Funds must be appropriated before the award can be made. The award is made in accordance with the procedures contained in 25 CFR Part 900 "Contracts under the Indian Self-Determination and Education Assistance Act," 43 CFR Part 12, Subpart C "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments," or the Tribally Controlled Schools Act of 1988, as amended, 25 U.S.C. 2501 et seq., as applicable.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Applications will be processed within 90 days for Self-Determination Contracts/Grants as provided under applicable procedures for other financial assistance awards.

Appeals:

An unsuccessful applicant may request an informal conference with the deciding official. Full appeal procedures are found in 25 CFR Part 900.

Renewals:

For non-ARRA funded projects, depending upon the size and complexity of the overall construction, improvement or repair project it may take several increments of funding assistance to complete the entire projects; often an initial award is issued as a new contract/grant amendment with second and subsequent funding increments issued as renewals to existing contracts/grants. ARRA funds are for one-time specific projects that must be started and completed expeditiously.

Formula and Matching Requirements:

This program has no statutory formula. Matching requirements are not applicable to this program. MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Funds remain available until expended in accordance with terms of the award. No ARRA funding will be awarded after September 30, 2010. See the following for information on how assistance is awarded/released: Information not available.

Reports:

Program reports are not applicable. Cash reports are not applicable. Narrative program progress reports are required for TCSA grants. Program progress reporting requirements will be negotiated with the Self-Determination contracts/grantee. ARRA funded projects have a separate set of online reporting requirements and data is entered by the recipient at FederalReporting.gov. Both the SF 425 and SF 271 require interim and final reports. Performance monitoring is not applicable.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit

conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133.

For all projects (ARRA and non-ARRA) financial records must be retained for 3 years from the date of submission of the Single Audit Report applicable to the project, procurement records must be retained for 3 years from the date of final payment. Range and Average of Financial Assistance:

Non-ARRA Replacement School Construction: The amount of financial assistance can range from approximately \$6 million to \$25 million depending on the size of the school, both grade level and student enrollment, the program requirements, and the location. For the higher amounts, funding may be incremental over 2, 3, or even 5 years. Because of the limited number of schools that have received funding in the last few years and the increasing costs for construction, there is no way to determine a true representative "average" of financial assistance for this non-ARRA program. Facilities Improvement and Repair: The amount of financial assistance can range significantly from a few thousand dollars to approximately \$7 million. There are several categories of projects that are included under Facilities Improvement and Repair, such as, Emergency, Roofing, Replacement/Repair, and Portable Classrooms. The average amount of financial assistance can vary depending on the category. ARRA funded projects range from less than \$10,000 MIR to over \$54,000,000 for replacement construction. An average amount is not calculable.

Fiscal Year 2010: Four replacement school projects - three in Arizona and one in North Dakota. Six facilities and improvement repair projects - two in North Dakota, two in Arizona, one in Mexico and one in South Dakota. Funds were also used to address environmental projects, AHERA requirements, minor repairs, emergency repairs, major repair/renovation projects and safety and health and other code deficiencies. CRITERIA FOR SELECTING PROPOSALS:

Replacement School Construction: Funds are appropriated based on the "Education Facilities Replacement Construction Priority List" as published in the Federal Register on March 24, 2004. Criteria emphasize providing safe, functional, code-compliant, economical and energy-efficient facilities that meet applicable accreditation standards and space guidelines. Facilities Improvement and Repair: Criteria to evaluate projects emphasize eliminating critical health and safety-related deficiencies and reducing the substantial backlog of needed improvement and repairs. Projects are prioritized on a Bureau-wide basis using a computerized formula that evaluates the seriousness of the deficiencies and the relative risks of those deficiencies to facility users. To be considered it is essential that deficiencies and projects for a Bureau funded school or dormitory to be identified in the automated inventory of Bureau facilities. In addition, there are limited funds provided under this program to address safety and health deficiencies on an immediate or interim basis as well as funds for emergency repairs under certain conditions, and for other purposes. Projects have had direct benefit to, among others, fire management, Predictive Services, meteorologists, fuels analysts, intelligence officers, fire behavior analysts, fire specialists, fire planners, resource managers and State and local government leaders. Specific accomplishments include user access to Western Regional Climate Center Remote Automated Weather System data archive through field-requested queries; lightning climatologies; comparisons of drought indices for fire management; operational 15-day fire danger forecasts; operations of an interagency regional modeling facility; model output statistics products; real-time drought assessment for rangelands; and quality-checked, complete Remote Automated Weather System weather data sets for the Fire Program Analysis effort. For the Joint Fire Science Program the implementation of the regional consortia projects and the smoke science plan. EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: The Parks, Trails and Natural Areas category includes the following funded and in progress projects. The Camp Success Preservation and Enhancement Project in White Pine County, Nevada, in existence since the 1940s, will provide continued use of the Camp and enhance the recreational and environmental education opportunities for youth and families in eastern Nevada. The existing outhouses will be removed and replaced with vault toilets. Shower facilities and ADA accessible outdoor living area near the lodge will upgrade and preserve this partnership facility. The Warm Springs Natural Area Project in Clark County, Nevada is regionally significant as it contains more than 20 perennial springs that form the

headquarters of the Muddy River. The site contains numerous landscapes including Mojave desert, riparian forest, mesquite woodlands, and alkali meadows through which 3.8 miles of the Muddy River wanders. These resources provide ideal habitat for a number of listed, threatened and sensitive species, including the endangered Moapa dace and the Southwestern Willow Flycatcher. The Doolittle Park Family Area Renovation Project in Clark County, Nevada will reinvigorate this older park space, encouraging sustainable living in the city's core. Heavy use in West Las Vegas, Nevada has resulted in deterioration of this family park. More modern playground equipment and relocation of playground equipment for ages two to five years old will provide a safer play area for children. Increasing tree canopy, improving the park entry point, and adding a senior citizens activity area will improve the family environment of this heavily utilized local park. Horseshoe pits, new BBQs, new sidewalks, new grass and irrigation system, a medium ramada, and new lighting, will complete the much needed renovations. USES AND USE RESTRICTIONS:

Grants support the operation of an approved State or Tribal Abandoned Mine Land (AML) reclamation program. Approved programs use grant funds for mine site reclamation projects on eligible lands, which are lands and waters mined or affected by coal mining processes that occurred prior to August 3, 1977 (as well as certain post-1977 and noncoal mining activities). Grants also support project administration. Grants may also include funding for AML-related activities including: abating emergency mining-related dangers to public health and safety; restoring water supply facilities impacted by coal mining; setting aside funds in a trust account to fund future acid mine drainage treatment; and developing a self-sustaining State subsidence insurance program. Approved programs which have completed coal mine reclamation in their state or on lands within their jurisdiction may use funds for other activities as authorized in SMCRA. Please contact the headquarters office more information.

Applicant Eligibility:

The program is restricted to States with (1) an approved coal mining regulatory program, (2) lands eligible for reclamation, and (3) active coal mining operations within their borders that are paying coal reclamation fees into the Abandoned Mine Reclamation Fund; and to federally-recognized Indian Tribes with (1) eligible lands, and (2) active mining operations paying fees into the Fund. 15.252 Abandoned Mine Land Reclamation (AMLR) Program

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: In 2009, the Office of Surface Mining (OSM) awarded a grant from its Watershed Cooperative Agreement Program (WCAP) to Trout Unlimited, a nonprofit IRS 501(c)(3) organization. The award was \$17,000. Funding from Pennsylvania's Growing Greener program was also committed to the project (\$148,528). Therefore, the total project cost is \$165,528. The project location is in Clinton County, Pennsylvania, in the South Fork of the Tangascootack River watershed. Trout Unlimited is proposing to rehabilitate and expand AMD treatment facility known as Site #1. The South Fork is a high priority watershed for the Pennsylvania Department of Environmental Protection (PADEP) and there are two other AMD passive treatment systems in the watershed). The South Fork (impaired) joins the North Fork (high quality trout fishery), and the Tangascootack flows into the West Branch of the Susquehanna River. The West Branch is undergoing major AMD cleanup effort by PADEP. The Site #1 acid mine discharge flows at an average of 56 gallons per minute, with a PH of 3.3 and a dissolved aluminum level of 25 mg/l. The existing passive treatment system is underperforming, and will be rehabilitated and enhanced using new technologies. Completion of the project will help restore the aquatic habitat and fishery of the South Fork. The project goal is to improve stream conditions to enable the reintroduction of a native Brook Trout population. The Clinton County Conservation District will help operate and maintain the completed system. Fiscal Year 2011: No Current Data Available Fiscal Year 2012: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

Section 404 of Public Law 95-87, State certification of eligibility is required. No opposition to the project from the State Abandoned Mine Land (AML) agency. All applicable Federal and State clearances and permits must be secured. The project should propose to use proven or innovative technology that has a high probability of success and produce tangible results, e.g., fishery restored, stream miles improved, educational and community benefits, pollutants removed from the streams. Funds must be used for the construction phase of a project and there must be demonstrated public support for the project. Also, there must be a plan to address any ongoing operation/maintenance considerations.

15.426 COASTAL IMPACT ASSISTANCE PROGRAM (CIAP)

(CIAP)

FEDERAL AGENCY:

The Bureau of Ocean Energy Management, Regulation, and Enforcement, Department of the Interior

AUTHORIZATION:

Outer Continental Shelf (OCS) Lands Act, as amended; 31 U.S.C. 6301-6305.

OBJECTIVES:

The intent of the program is to disburse funding to eligible producing states and coastal political subdivisions for the purpose of conservation, protection, or restoration of coastal areas including wetlands; mitigation of damage to fish, wildlife, or natural resources; planning assistance and the administrative costs of complying with these objectives; implementation of a federally-approved marine, coastal, or comprehensive conservation management plan; and mitigation of the impact of outer Continental Shelf activities through funding of onshore infrastructure projects and public service needs.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

Can only be used to directly benefit an authorized use to conserve, restore, enhance, and protect renewable natural resources. Funding cannot be used for projects that would not provide a direct benefit, including but not limited to, supporting litigation or to fund publicity or lobbying efforts for purposes of influencing or attempting to influence a member of the U.S. Congress or an agency of the Federal government.

Applicant Eligibility:

States eligible to receive funding are: Alabama, Alaska, California, Louisiana, Mississippi, and Texas and 67 coastal political subdivisions among the six states.

Beneficiary Eligibility:

The producing coastal states, their eligible coastal political subdivisions, and the general public will ultimately benefit from the program.

Credentials/Documentation:

Applicants must provide documentation that they have met state and local permitting requirements. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Prior to submitting any grant applications an eligible state must submit to MMS, for approval, a State Plan that provides detail on how a State and its Coastal Political Subdivisions (CPS) will use the CIAP funds and implement the state plan. To assist the States in developing a plan the MMS issued final Coastal Impact Assistance Program Guidelines, and published a Notice of Availability in the Federal Register, September 29, 2006. Coastal Political Subdivisions and State are required by the Act to work together to develop their Plan. The plan should contain prescribed components from Section 384 of the amended OCS Lands Act, which includes an implementation program representing both parties' interests. The State point of contact submits the Plan to the MMS for approval. The MMS will determine within 20 calendar days after receipt of a Plan or Plan amendment whether additional information is needed. If no deficiencies are identified and the required number of copies has been received, the Plan or amendment will be deemed complete. Once a Plan or amendment is determined complete, MMS will have 90 calendar days to notify the State in writing that the Plan or amendment is approved, disapproved, or remains under review (in which case the Plan or amendment is neither approved nor disapproved). If MMS fails to provide such written notice to the State, the Plan or amendment is deemed to be disapproved. If MMS notifies the State that the Plan or amendment remains under review, MMS will also provide the State with an estimate of the amount of additional time necessary to complete its review. If a Plan or amendment is disapproved, the State may revise and resubmit it. The MMS will then have 20 calendar days to determine completeness; once MMS determines that the revised Plan or amendment is complete, MMS will then have 90 calendar days to approve or disapprove the revised Plan or amendment. On April 16, 2007 MMS released the recipient allotment amounts that will be eligible to spend in 2007 and 2008. The States and CPSs will use this information to develop grant project applications with detailed descriptions of their individual projects, including detailed breakdowns of costs. The recipients will provide in each application the current status of Federal, State and local permits required for the project. A completed grant project application is to be submitted electronically through Grants.gov. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. This program is excluded from coverage under OMB Circular No. A-110. Specific projects submitted to the MMS for funding are subject to the Department of the Interior Regulations at 43 CFR Part 12, Subparts C and E, or any subsequent revisions. The OMB SF-424 application forms must be used for this program. Applications are submitted electronically through Grants.gov.

OBJECTIVES:

Title XVI of Public Law 102-575, as amended (Title XVI), directs the Secretary of Interior, acting through the Commissioner, to undertake a program to identify and investigate opportunities to reclaim and reuse wastewaters and naturally impaired ground and surface water in the 17 Western States and Hawaii. Title XVI also provides authority for the Secretary to provide up to the lesser of 25 percent of, or the Federal appropriations ceiling (typically \$20 million) for, the cost of planning, design, and construction of specific water recycling projects.

For ARRA funded projects and in addition to the program objectives above, the Section 3 of the ARRA states the following objectives: (1) To preserve and create jobs and promote economic recovery. (2) To assist those most impacted by the recession. (3) To provide investments needed to increase economic efficiency by spurring technological advances in science and health. (4) To invest in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits. (5) To stabilize State and local government budgets, in order to minimize and avoid reductions in essential services and counterproductive state and local tax increases.

TYPES OF ASSISTANCE:

Formula Grants (Cooperative Agreements)

USES AND USE RESTRICTIONS:

The Title XVI Program applies to reclamation, recycling, and reuse of municipal, industrial, domestic, and agricultural wastewater and to naturally impaired ground and surface waters. Through this program, Reclamation provides financial and technical assistance for appraisal and feasibility studies, research and demonstration projects, and full-scale construction of facilities to deliver and/or treat wastewater for reuse applications.

For purposes of the Title XVI Program, a water reuse project is a project (including the necessary facilities and features) that reclaims and reuses municipal, industrial, domestic, or agricultural wastewater and naturally impaired groundwater and/or surface waters. Consistent with State law, reclaimed water can be used, for a variety of purposes including, but not limited to, environmental restoration, fish and wildlife, groundwater recharge, municipal, domestic, industrial, agricultural, power generation, or recreation. Funds can be used for water treatment features where the improvement of the water quality is necessary to allow for reuse.

Reclamation has general authority to participate in planning, research and demonstration of water recycling projects. Specific project authority is required for Reclamation to participate in the construction of a project.

Applicant Eligibility:

Eligible recipients of Title XVI funding are identified under the 1902 Act and include a State, regional, or local authorities; Indian tribes or tribal organizations; or other entities such as a water conservation or conservancy district, wastewater district, rural water district, all located within the 17 Western States or Hawaii.

Beneficiary Eligibility:

Water users, including municipal, industrial, and agricultural, that benefit from the additional drought resistant water source created.

Credentials/Documentation:

To be eligible to receive funding for construction activities, a water reclamation and reuse project must be specifically authorized under Title XVI. Funds for construction activities associated with an individual project will not be disbursed until all Title XVI pre-construction requirements have been met for that project. These include: (1) a finding that the feasibility study meets the requirements of Title XVI; (2) complete compliance with the National Environmental Policy Act and other environmental clearances; (3) an approved determination of financial capability; and (4) an executed grant or cooperative agreement for financial assistance. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

To be eligible to receive funding for construction activities, a water reclamation and reuse project must be specifically authorized under Title XVI. Funds for construction activities associated with an individual project will not be disbursed until all Title XVI pre-construction requirements have been met for that project. These include: (1) a finding that the feasibility study meets the requirements of Title XVI; (2) complete compliance with the National Environmental Policy Act and other environmental clearances; (3) an approved determination of financial capability; and (4) an executed grant or cooperative agreement for financial assistance between Reclamation and the project sponsor.cooperative agreement for financial assistance. An environmental impact statement is required for this program. An environmental impact assessment is required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. This program is excluded from coverage under OMB Circular No. A-110. Discretionary funding opportunities will be posted on Grants.gov and will be subject to competitive funding process. Earmarks to specific projects are non-discretionary funding. The standard application forms furnished by the Federal agency and required by 43 CFR Part 12, Subparts C and F, must be used for this program. The required documents must be furnished to Reclamation prior to authorization for construction. Upon satisfactory completion of these documents, Reclamation may seek authorization for the project and initiate appropriation requests.

Reclamation has limited funding authority for this program, therefore requests for project construction authority may be delayed until a funding request can be made that is within the authorized limit.

Award Procedure:

Reclamation will work with the funded recipient to negotiate a grant or cooperative agreement.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Not Applicable.

Appeals:

Not Applicable.

Renewals:

Continuation of funding from one fiscal year to the next to complete a project is contingent on the final Federal appropriations.

Formula and Matching Requirements:

Statutory Formula: Title Title XVI, Public Law 102-575. Reclamation can pay up to 100 percent for appraisal level study costs, up to 50 percent for feasibility level study costs, and to 25 percent for research and demonstration projects unless specifically raised to 50 percent. Federal funding for Title XVI construction projects is limited to 25 percent of the total project or a specified maximum amount, whichever is less. The maximum amount varies by project. Generally, all projects authorized after 1996 have a ceiling of \$20 million or less; the specific details are available in the authorizing legislation. If a project conducted under the Title XVI Program includes planning, design, and construction, the Reclamation Wastewater and Groundwater Study and Facilities Act of 1992 (the Act) requires the sponsor to provide at least 75 percent of all the costs incurred, including Reclamation's administrative costs. In addition, the sponsor must pay all operation, maintenance and replacement (OM&R) costs of the project.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: Reclamation is participating with the City of Long Beach, CA to research seawater desalination, which will eventually make up a small portion of the Department's overall reliability portfolio (around ten percent). Currently, seawater desalination is not a cost-effective option for water supply reliability in Long Beach, primarily due to the high cost of energy needed for operations and several abrasive environmental impacts. At this time, the costs of desalination far outweigh the costs associated with importing water from northern California and the Colorado River. With advances in technology, the subsequent decrease in cost and environmental concerns associated with desalination, and the increasing cost of imported water, seawater desalination will become a more relevant asset in water resources management. Fiscal Year 2011: Reclamation has provided approximately \$18 million in Federal funding to the Albuquerque Metro Area Water Reclamation & Reuse project, which treats domestic and industrial waste water so that it can be used to irrigate public landscapes such as parks. This allows Albuquerque to avoid using valuable drinking water in these areas thus helping to ensure the long term sustainability of their aquifer. This project is expected to make approximately 23,660 acre-feet of water available each year upon completion. Fiscal Year 2012: In the Bay Area, the City of Redwood City's recycled water project will replace potable water with recycled water for landscape irrigation and other uses. Approximately \$1.1 million in Reclamation funding will be used by the City to convey recycled water to the Seaport area, making approximately 245 acre-feet of water each year available for other uses. The project is intended to improve reliability of the local water supply and to reduce the City's demand on imported water.

CRITERIA FOR SELECTING PROPOSALS:

Reclamation will place priority on funding projects that reduce existing water diversions or address specific water supply issues in a cost-effective manner, address environmental and water quality concerns, are economically justified,

and meet other program goals.

For ARRA funded projects:

The purposes of the Recovery Act are, among others, to quickly and prudently commence activities that preserve and create jobs and to promote economic recovery, and to invest in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits. To meet these purposes, Reclamation will allocate funds based on the criteria set forth in the Recovery Act and the accompanying conference report, and will target activities that quickly infuse money into the economy.

15.506 WATER DESALINATION RESEARCH AND DEVELOPMENT PROGRAM

Simon Act

FEDERAL AGENCY:

Bureau of Reclamation, Department of the Interior

AUTHORIZATION:

Water Desalination Act of 1996, Public Law 104-298, as amended.

OBJECTIVES:

The Water Desalination Act of 1996 is based on the fundamental need in the United States and world-wide for additional sources of high quality water.

There are three goals for the program: (1) augment the supply of usable water in the United States; (2) understand the environmental impacts of desalination and develop approaches to minimize these impacts relative to other water supply alternatives; (3) develop approaches to lower the financial costs of desalination so that it is an attractive option relative to other alternatives in locations where traditional sources of water are inadequate.

The two principal parts of the program are: (1) perform research on desalination technologies and related issues to advance the state of the art forward (research and studies), and (2) conduct development and demonstration activities to test technological advancements, confirm economics, and gain public acceptance (development projects).

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

To be used to support research and studies, demonstration and development projects and related activities, as described in the Act.

Applicant Eligibility:

Any responsible source, to include individuals, State and local entities, public nonprofit institutions/organizations, other public institutions/organizations, Federally recognized Indian Tribal Governments, small businesses, profit organizations, private nonprofit institutions/organizations, quasi-public nonprofit institutions/organizations, and other private institutions/organizations may submit a proposal which will be considered by Reclamation. Foreign entities, other than United States-Mexico binational research foundations and inter-university research programs established by the two countries, are not eligible for funding under the Act. Federal agencies are not eligible to apply.

Beneficiary Eligibility:

Individuals, State and local entities, public nonprofit institutions/organizations, other public institutions/organizations, Federally recognized Indian Tribal Governments, small businesses, profit organizations, private nonprofit institutions/organizations, quasi-public nonprofit institutions/organizations, other private institutions/organizations, and United States-Mexico binational research foundations and inter-university research programs established by the two countries.

Credentials/Documentation:

(1) A detailed written technical proposal including the current status of the technology supporting the proposed research, technical approach proposed to accomplish the work, a scope of work which separates the work into major tasks, applicability to local and/or national water problems, type of personnel participating in the research, type and location of facilities and equipment that will be utilized by the project applicant, experience in this type of research, the environmental impact of the research, an estimate of the costs and/or cost

savings (\$/1000 gal) and economic benefit of the technology, and other information that may be useful for proposal evaluation. (2) A detailed project cost proposal including a budget covering salaries and wages, fringe benefits, travel, equipment, supplies, subcontracts, indirect cost rates, funding sources and commitments, cost-sharing, and a breakdown of costs by task. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Environmental compliance for this program may be required depending on the scope of the specific project funded. This may result in the need for an environmental impact assessment or environmental impact statement prior to the commencement of project activities. An environmental impact statement is required for this program. An environmental impact assessment is required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. A full proposal solicitation package is issued annually by Reclamation. There will be an announcement for laboratory and pilot-scale research projects in FY10. Submission of full technical and cost proposals in accordance with the instructions stated in the announcement document is mandatory. Additionally, applicants must submit all applicable SF-424 forms and a DI-2010 form which will be included in the announcement document.

Award Procedure:

The number of awards, maximum funding amount per award, and areas of interest for which proposals will be considered, are determined on an annual basis and are dependent upon the annual appropriation from Congress. Proposals received in response to the annual solicitation are reviewed on the basis of a competitive, merit- review process, and are rated in accordance with evaluation criteria stated in the solicitation document. Reclamation will make awards for the highest rated proposals based on the amount of funding available each year. Reclamation reserves the right to make awards to maintain balance among the program objectives listed in the solicitation document.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Contact Reclamation for the range of time when proposals are approved or disapproved.

Appeals:

None. Final award decisions are not subject appeal; however, the Bureau of Reclamation will provide all applicants with information on why their proposals were not selected for award.

Renewals:

Continuation of funding for the Program from one fiscal year to the next is at the discretion of the Congress. Yearly solicitation is made for projects of 12 months duration or less (follow-on funding may be available for additional research studies, pilot-plant projects, or demonstration projects). No-cost extensions to awarded agreements are provided for unique projects that can justify additional time beyond the 12-month duration.

Formula and Matching Requirements:

This program has no statutory formula. Matching Requirements: The Federal share of the cost of a project or activity carried out under this Act shall not exceed 50 percent of the total cost of the project or activity. A Federal contribution in excess of 25 percent for a project carried out under this Act may not be made unless the Secretary of the Interior determines that the project is not feasible without such increased Federal contribution. Costs of operation, maintenance, repair, and rehabilitation of facilities funded under the authority of this Act shall be nonfederal responsibilities. In each fiscal year, up to \$1,000,000 may be awarded to institutions of higher education, including United States-Mexico binational research foundations and interuniversity research programs established by the two countries, for research grants or cooperative agreements without any

Once completed, those projects are expected to result over 720,000 acre-feet of conserved water each year.

Twenty-two projects were funded in Fiscal Year 2009. Seventeen of those are on-the-ground projects with a total expected water savings of approximately

74,000 acre-feet per year.

Thirty-seven projects were funded in Fiscal Year 2010. These projects are expected to result in more than 130,000 acre-feet of conserved water each year once construction has been completed. Fiscal Year 2011: No Current Data Available Fiscal Year 2012: No Current Data Available

RELATED PROGRAMS:

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: A number of projects will address the connection between water use and energy use. For example, the Laguna Madre Water District in Port Isabel, Texas will make improvements to its non-potable water system, including installation of an energy recovery turbine to create an expected 17,520 kilowatt-hours per year of electricity from wastewater flows.

Several projects will save energy through water conservation. For example, the Lower Colorado River Authority in Texas will automate 11 check gate structures, expected to result in 2,560 acre-feet of water savings annually. The Authority estimates that completion of the project will decrease pumping needs and reduce energy consumption by approximately 132,000 kilowatt-hours per year. Fiscal Year 2011: Other projects are expected to make contributions to environmental restoration by conserving water or making other improvements that benefit endangered or threatened species. For example, in California, the Los Molinos Mutual Water Company will undertake water management improvements with expected savings of approximately 3,000 acre-feet of water annually. The conserved water will remain in Mill Creek, a tributary of the Sacramento River, to benefit Chinook salmon and steelhead migration.

Examples of all projects funded to date are available at <http://www.usbr.gov/WaterSMART/market.html>. Fiscal Year 2012: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

All applications will be evaluated using criteria that give priority to projects that save the most water, facilitate transfers to new uses, address endangered species and other environmental issues, improve energy efficiency, conserve Reclamation project water, and exceed the minimum 50 percent non-Federal cost-share requirement.

For ARRA funded projects:

The purposes of the Recovery Act are, among others, to quickly and prudently commence activities that preserve and create jobs and to promote economic recovery, and to invest in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits. To meet these purposes, Reclamation will allocate funds based on the criteria set forth in the Recovery Act and the accompanying conference report, and will target activities that quickly infuse money into the economy.

Funding is allowed for work that will provide water to three specified desert terminal lakes in Nevada. An Environmental Impact Statement or Environmental Assessment may be required depending on the nature of the proposal and its impact on the environment. Compliance with National Historic Preservation Act and Endangered Species Act is also required. Summit and Walker Lakes Preapplication Coordination: Although it is not mandatory, Reclamation strongly encourages offerors to submit a pre-proposal to eliminate the possibility of submitting a full proposal that would not be considered for award. The pre-proposal should describe 1) how the proposal will provide water to the terminal lake, 2) the quantity of water anticipated to be provided, 3) the associated estimated cost, 4) potential environmental impacts, 5) state, local and other permits or approvals needed to implement the proposal. No additional solicitation is planned in FY11. An environmental impact statement is required for this program. An environmental impact assessment is required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. Funding is allowed for work that will provide water to three specified desert terminal lakes in Nevada. For Summit Lake, Reclamation will only accept proposals from the Summit Lake Paiute Tribe, since the lake is entirely within the reservation boundaries and any proposal affecting the lake would need the consent of the Tribe. For Walker Lake, Reclamation will accept applications after the applicant provides enough preapplication information to Reclamation to assure that the proposed work will provide water to Walker Lake, the associated cost is reasonable, and it is likely Reclamation can satisfy its federal Indian trust, endangered species, environmental, and other responsibilities. For Pyramid Lake, a Request for Proposals (RFP) is issued periodically by Reclamation. Discretionary funding opportunities will be posted on Grants.gov. Submission of a complete technical proposal and a project budget proposal in accordance with the instructions in the RFP is mandatory. In addition, applicants must submit all applicable SF424 forms, which are referenced in the RFP.

Award Procedure:

For Summit Lake and Walker Lake, proposals are evaluated using a merit-based review process. For Pyramid Lake, proposals received in response to the FOA are reviewed on the basis of a competitive, merit-based review process, and are rated in accordance with the evaluation criteria stated in the FOA. Reclamation will make awards to the highest rated proposals based on the amount of funding available each solicitation period. Reclamation reserves the right to prioritize projects based on availability of funds and to ensure balance among the program objectives listed in the FOA. Reclamation is not accepting unsolicited applications in FY11 because pending legislation would allocate all remaining funding.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Contact Reclamation for the range of time when proposals are approved or disapproved.

Appeals:

Reclamation will, however, provide all applicants with information on why their proposals were not selected.

Award Procedure:

Reclamation will solicit proposals and award funding through a Funding Opportunity Announcement (FOA) process. The FOA will request proposals from public and private sectors that would control salinity based on cost per ton. The proposals will be ranked based on their cost effectiveness for preventing salt from entering the Colorado River system. The ranking would consider risk factors that might affect the project's performance. Upon receipt of applications/proposals by the date identified in the announcement(s), the applications will be reviewed to determine if application/proposal(s) are consistent with requirements identified in the announcements. The application/proposal(s) are reviewed against identified criteria by a Federal technical team of experts, that may include representatives of states as advisors. All projects are replacing earthen ditches with a pipeline system. Fiscal Year 2011: Not Available. Fiscal Year 2012: Not Available.

CRITERIA FOR SELECTING PROPOSALS:

In 1984, the Salinity Control Act was amended to direct the Secretary of the Interior to give preference to units which reduce salinity at the least cost per unit of salinity reduction (or cost-effectiveness). Cost-effectiveness is defined as the Salinity Program's annual cost per ton of salt prevented from entering the Colorado River system. Conceptually, cost-effectiveness is analogous to determining the cost per mile to own and operate a car. That computation combines the annual expenses (loan payments, gas, maintenance, etc.) and divides by the miles traveled each year. The key to understanding this approach is to appreciate that the government evaluates all projects as if the money is borrowed from a loan institution and repaid in annual installments over the life of the project. This economic evaluation principle is required by the "Economic and Environmental Principles Guidelines for Water and Related Land Resources Implementation Studies", March 1983. This method lends consistency in the comparison of non-federally financed alternatives (which must borrow funds) to Federally financed projects. Each proposal will be evaluated by a technical review panel in accordance with the following criteria and corresponding percentage weights: (a) Technical merit - those passing will be evaluated further, (b) Cost effectiveness 70 percent of the annual cost for each ton of salt load reduction, expressed in dollars per ton, (c) Performance risk 30 percent of performance risk will evaluate the cost and effectiveness risks of the proposal. More detailed information will be included in each funding announcement or may be obtained from the Salinity Control Program contacts listed above.

For Recovery Act projects: The purposes are among others, to quickly and prudently commence activities that preserve and create jobs and to promote economic recovery, and to invest in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits. To meet these purposes, Reclamation will allocate funds based on the criteria set forth in the Recovery Act and the accompanying conference report, and will target activities that quickly infuse money into the economy.

15.507 Water 2025

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: The Southern San Joaquin Municipal Utility District will replace measuring devices with more accurate flow meters. The increased accuracy will reduce losses from inaccurate meters and allow better management of 3,600 acre-feet of water per year. The District will also be able to increase the accuracy of their water balance and water accounting and deliver more accurate delivery information to the farmer to assist in irrigation scheduling.

In the Lake Mead National Recreation Area, Reclamation and the National Park Service have entered into an agreement to cost-share the rehabilitation of obsolete irrigation systems and replacement of non-native vegetation at Cottonwood Cove and Echo Bay campgrounds. This project is expected to save more than 53 million gallons of water annually, reducing the park's consumptive water use by 70 percent.

With WCFSP funding, the East Bay Municipal Utility District will install and test approximately 100 fixed network acoustic leak detection technology loggers to detect leaks on pipeline and provide early detection of pipeline leaks before they become main failures. 15.517 Fish and Wildlife Coordination Act

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: One example of a funded project is the Comprehensive Habitat Restoration Assessment on the San Felipe Pueblo. The proposed project will collect information on the present channel topography through new hydrographic surveys, catalog floodplain features, many of which were once

part of the dynamic river channel, and collect data on the character of the existing vegetation communities. The planning efforts will identify historical channel, backwater, and overbank features to be restored to create habitat for various aquatic and riparian species, including the Rio Grande silvery minnow and the southwestern willow flycatcher the two endangered species of concern for the Program. Native and naturally regenerating willow and cottonwood habitat will be re-established. The final project design will be based on San Felipe management objectives and additional data. Through ongoing management planning, San Felipe has identified data gaps in baseline vegetation data, soil conductivity and salinity, and groundwater data. San Felipe proposes to acquire these data to aid in the development of final restoration plans and designs completed in the initial phase.

Another example is the Northern Bosque Floodplain Habitat Restoration Project. The proposed project will enhance a recently fenced-off, 670-acre floodplain and wetland demonstration site where invasive trees have already been removed. Of this acreage, 23.6 acres of floodplain, and 0.24 acres of perennial side channel adjacent to 0.27 miles of river will be restored to its historic state. The project includes six patches of dense cottonwood and willow at least 0.25 acres in size that will be potentially suitable breeding habitat for the southwestern willow flycatcher.

Southwestern Willow Flycatcher Habitat Restoration Project is also an example of a funded project. The proposed project will create approximately 10 acres of willow-dominated habitat and a 10-acre buffer of riparian vegetation characteristic of the MRG floodplain (hereafter referred to as bosque) in a 167-acre degraded riparian community (Figure 2). The proposed project will convert an area that is currently characterized by sparse vegetation/bare ground to a 10-acre willow swale surrounded by riparian shrub vegetation to provide a buffer to existing bosque vegetation (Figure 3). Although planned as a stand-alone project, the proposed project is in an area where future work may enhance the functionality of the willow swales by providing a supplemental water supply or re-establishing a hydrologic connection to the river through the construction of floodplain inundation channels. Fiscal Year 2011: Not Available. Fiscal Year 2012: Not Available.

CRITERIA FOR SELECTING PROPOSALS:

The Las Vegas Wash Coordination Committee has decided that the SNWA will be the lead agency for receiving funding for this program due to the high costs and types of environmental improvement and enhancement, and ability to maintain restoration projects. The Las Vegas Wash Program plays an important role in environmental and water resource issues in Southern Nevada. Historically, the Las Vegas was an ephemeral stream carrying storm flows from the Las Vegas Valley to Lake Mead and the Colorado River. Urban development over the past 60 years has resulted in the formation of the wetlands that helped remove nutrients from these wastewater flows. As the rate of discharges increased, erosion also increased, gradually destroying the existing natural treatment systems and wildlife habitat and creating a large delta in the Las Vegas Bay of Lake Mead. Accelerating erosion, declining water quality, and loss habitat are some of the more pressing issues. Proposals submitted will be reviewed and awarded based on priority fulfillment of the 44 action items identified in the Plan and the availability of funding appropriations.

RELATED PROGRAMS:

11.407 Interjurisdictional Fisheries Act of 1986; 15.608 Fish and Wildlife Management Assistance; 15.611 Wildlife Restoration

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: Colorado: The agency constructed a 400-foot floating recycled tire breakwater at McPhee Reservoir in Montezuma County, Colorado. The new breakwater increased and enhanced fishing and motorboat activities at McPhee Reservoir by providing for safe access and egress by motor boats at the marina boat ramp. The finished breakwater increased motor boat use at McPhee Reservoir by at least 30 percent.

Pennsylvania: The agency delivered an education program that assisted the Commission in protecting and managing aquatic resources and providing fishing opportunities. It accomplished this through resource and stewardship education (educator workshops), angler education, targeted public outreach, and hatchery/site interpretation. Fiscal Year 2011: (anticipated): Missouri: The agency will install drains in 35 fish rearing ponds at the Lost Valley warm water fish hatchery to alleviate water pressure and control groundwater under the polypropylene liners in the ponds. This will fix water pressure problems in all of the ponds at the fish hatchery.

Texas: The agency will construct a new two-lane boat ramp, parking lot,

courtesy dock, and lighting in Muenster, Texas. The new facility will provide the only public access to the lake for fishing and other recreational boating pursuits. This will be the first public boat ramp in Cooke County. Fiscal Year 2012: (anticipated): Alabama The agency will: (1) publish results of fish disease research; (2) determine the disease organisms associated with fish in each cooperating state and to advise of means and methods of controlling pathogens; (3) conduct training sessions about fish disease; (4) develop improved methods to detect and identify pathogens; (5) determine factors involved in transmission and pathogenesis of infectious diseases; (6) determine methods of detection, risk factors, and effects on sport fish from algal toxins; (7) evaluate drugs and chemicals as therapeutics for the purpose of increasing compounds approved for treatment of fish diseases; and (8) develop and evaluate vaccines for the control of fish diseases. The benefits of this project are to increase public and private fish hatchery production, quality, and reduce species mortality.

Minnesota: The agency will ensure that activities minimize the spread of diseases and invasive species by maintaining and operating a pathology lab, establishing disease testing protocols for DNR efforts, commercially imported and/or exported fish, captured feral brood stock for eggs and/or sale to commercial operations and doing surveillance of invasive and diseases in water sources used for rearing facilities and in water bodies used for rearing. They will produce and stock healthy fish to meet between 80-100% of the approved stocking and statewide program requests that support up to 25 million angler days annually. They will also maintain fish production facilities, including five coldwater, three year-round coldwater, 10 northern pike spawning areas, 45 muskellunge culture and rearing sites, 15 walleye spawning areas, and 400 fingerling-rearing areas within State and Federal water effluent and disease guidelines. The project should annually produce and stock all the fish needed to meet a variety of cold, cool, and warm water management and statewide program needs. It will implement the requirements needed to maintain genetic integrity, fish disease certifications, and commercial aquaculture as a part of a healthy statewide fisheries program.

CRITERIA FOR SELECTING PROPOSALS:

The State, the District of Columbia, Commonwealth, or territorial agency having lead responsibility for the management of their fish resources must submit the projects. The State, the District of Columbia, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

15.605 Sport Fish Restoration Program; 15.615 Cooperative Endangered Species Conservation Fund; 15.626 Hunter Education and Safety Program

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: Eight States are continuously working to provide hunter access on private lands. These programs are known by a variety of titles, but all are intended to provide State Walk-in Public Hunting on Private Lands. The States of Kansas, Montana, Nebraska, North Dakota, and South Dakota have on-going Wildlife Restoration grants to fund these private access-hunting programs. Nearly six million acres are open to public hunting through these Wildlife Restoration grants.

New Mexico: Desert bighorn sheep were down-listed to State threatened status in 2008, twenty-eight years after listing as a State-endangered species. The spring 2010 population estimate was 600 statewide with three metapopulations of 223, 220, and 125. This exceeded the requirements for delisting which was a minimum population of 500 statewide, with three populations or metapopulations of 100 animals or greater. Restoration efforts continue with the goal of delisting and the return of desert bighorn sheep to game animal status. Fiscal Year 2011: (anticipated): Alabama: The objective of this project is to maintain a statewide system of Wildlife Management Areas (WMA) by conducting routine maintenance, operational activities, habitat management programs, and population management/surveys, which enhance wildlife habitat and sustain stable wildlife populations for the public to use while participating in outdoor and wildlife related activities. These activities include maintenance of approximately 1,782 miles of roads and trails, managing hunts, maintenance of 111 buildings, management of timber (146,127 acres), water (1,781 acres), and herbaceous (12,792 acres) habitat, and stocking/relocating turkey and deer. This availability of public recreation lands provides a direct positive economic impact to local and regional areas from the individuals participating. Purchases of supplies, equipment, and services by these individuals support and enhance many local economies.

Alaska: The Objectives of this project includes: (1) To work with the wildlife conservation, hunting, trapping and shooting sports communities to identify trends in the composition, participation rate, and characteristics of the consumptive wildlife user base and develop insights on the implications of these trends on state wildlife agencies abilities to conserve and manage wildlife resources; and (2) To facilitate the development of mutually agreed upon national comprehensive strategies to positively influence these trends. The expectation is that these strategies will be supported and implemented primarily by the State wildlife agencies, with support from the hunting, trapping and shooting sports communities. Fiscal Year 2012: (anticipated): Illinois: The agency will inventory migrant and wintering populations of ducks, geese, swans, and American coots at selected sites in the Illinois and central Mississippi River Valleys during fall and early winter and summarize these data for parties of interest. They will also investigate the ecology of migratory mallards in the Illinois River valley for conservation planning and habitat management. This information will help establish waterfowl hunting seasons and better management of the species.

Kansas: The agency will provide and increase access to hunting on private lands through their "Walk-In Hunting Access. This will include providing access to approximately 1,125,000 acres and managing wildlife populations at levels consistent with habitat conditions and other hunting factors. The benefits include increased hunting opportunities for deer, turkey, pheasant, quail, ducks, and other small game. This will also reduce hunting pressure on public lands and provide improved quality hunting experiences throughout the State.

CRITERIA FOR SELECTING PROPOSALS:

The State, Commonwealth, or territorial agency having lead responsibility for the management of their wildlife resources must submit the projects. The State, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: In FY10, 49 States and 4 Territories were awarded grants through the Cooperative Endangered Species Conservation Fund. There were 356 grants awarded averaging \$183,680. Projects funded include the acquisition of the Flamingo Waterway Scrub Tract in Florida. This \$1,687,531 HCP Land Acquisition grant will enable the acquisition of 40 acres in Charlotte County. This land purchase directly links 500 acres of existing conservation lands in three, now separate, tracts managed by the County for Florida scrub. Also funded was a \$330,000 Habitat Conservation Planning Assistance grants for Washingtons Aquatic Resources HCP. The State Department of Natural Resources is entering the final year of a planning process to develop a multi-species, programmatic Habitat Conservation Plan. The HCP will ensure that authorized activities on 2.6 million acres of state-owned aquatic lands in marine, estuarine, and freshwater environments promote sustainable ecosystems, minimize cumulative impacts, and increase protection, conservation, and recovery efforts for 30 species of fish and wildlife.

A \$1,025,000 Recovery Land Acquisition grant will enable the Arizona Game and Fish Department to acquire the approximately 925-acre Triangle Bar Ranch in Pinal County, Arizona. The tract is located at the confluence of the San Pedro River and Aravaipa Creek and its acquisition will primarily benefit the southwestern willow flycatcher and loach minnow. Fiscal Year 2011: In fiscal years 2011 and 2012, we expect to award an estimated 945 grants to fund similar projects that benefit threatened and endangered species on non-Federal lands through this competitive grant program. Fiscal Year 2012: In fiscal years 2011 and 2012, we expect to award an estimated 945 grants to fund similar projects that benefit threatened and endangered species on non-Federal lands through this competitive grant program.

CRITERIA FOR SELECTING PROPOSALS:

Proposals for grant funding must be submitted by the State fish and wildlife agency. The State must have an approved cooperative agreement with the Secretary of the Interior which provides for sharing responsibilities for endangered species, prior to receiving Cooperative Endangered Species Conservation Fund (section 6 of the Endangered Species Act) funds. Individual project proposals must compete with other State submissions for funding. For additional information please visit <http://www.fws.gov/endangered/grants/index.html>.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: Louisiana Delta Wetlands Conservation II, Concordia and Ouachita parishes, Louisiana - This project represents a continuation of long-term efforts to protect and enhance important wetland habitats in the Lower Mississippi Alluvial Valley. The valleys wetland habitats support a rich diversity of wildlife species. Forested and emergent wetlands, riparian lands and associated uplands in the region provide migration and wintering habitat for millions of migratory birds. Partners in this project will protect and enhance 1,083 acres of wetlands on public and private lands in several parishes. Grant and match funds will help protect in perpetuity 2,966 acres of wetlands and uplands on private lands. Upon completion, enhancement and protection activities will provide foraging, nesting or roosting habitat for a number of wetland-dependent migratory birds. Fiscal Year 2011: North Dakota Northern Prairie Project, 11 northwestern North Dakota counties - This project is the continuation of an ongoing initiative to protect, restore, and enhance wetland/grassland communities using a landscape level approach to planning. Among the overall habitat objectives for the North Dakota Northern Prairie Project are to protect 2.8 million acres of wetlands and associated uplands; restore 831,100 acres of wetland and associated upland habitat; and enhance 4.3 million acres of wetland and associated upland habitat. The activities in this grant project will use the latest Geographic Information Systems information and technology to target and prioritize project sites toward the highest density wetland, waterfowl and occurrence areas in the project area. This information has allowed managers to make informed decisions by identifying optimal locations for grassland easements and acquisitions, leases, grazing systems, wetland restoration and protection, and nesting structures. Other indirect benefits of this project will be achieved through habitat improvement agreements with landowners. Fiscal Year 2012: FY2012 projects have not yet been selected.

CRITERIA FOR SELECTING PROPOSALS:

15.605 Sport Fish Restoration Program; 15.608 Fish and Wildlife Management Assistance; 15.611 Wildlife Restoration; 15.615 Cooperative Endangered Species Conservation Fund

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: District of Columbia The agency developed an awareness program on the importance of backyard habitats; how citizens can develop them and how these improved sites can help provide needed habitat for wildlife (especially birds and small mammals) while enhancing peoples' properties and environments. Participants will increase their knowledge and understanding of local wildlife ecology. Conservation landscaping can reduce the use of fertilizers, pesticides, water, and reduce maintenance while enhancing wildlife habitat. The goal of developing 200 active backyard habitat sites will increase wildlife habitat for urban species, increase citizen awareness and knowledge of the importance of habitat and how they can take action to help provide it, and likely reduce the amount of fertilizer and pesticides (nonpoint source pollution) used on District lands. Other workshop participants who choose not to develop a habitat will still increase their knowledge of local wildlife species, their habitat needs, and ecological roles, and how people can help improve their local environment for wildlife.

Louisiana The agency estimated the number of shorebirds moving through key Louisiana Refuges and wildlife management areas during fall migration. The information collected was to establish shorebird populations on key public areas in Louisiana. In addition, this information helped in understanding shorebird populations nationwide. Fiscal Year 2011: New Mexico The agency will design a wildlife education center that utilizes existing landscape attributes to enhance educational opportunities and provide minimal impact to the surrounding habitat. This will allow help in educating the public about conservation.

South Carolina The agency will develop a visitation and recreation program for Jocassee Gorges appropriate to the resource and acceptable impact and develop an education program, which utilizes Jocassee Gorges (33,000 acres of property) for outdoor instruction and illustration of Blue Ridge Escarpment natural history. These efforts will aid in the management of the ecological integrity of Jocassee Gorges and educate the public, while the public can become advocates of protecting the natural resources. Fiscal Year 2012: (anticipated): District of Columbia The agency will develop awareness in District of Columbia citizens of the importance of backyard habitats; how citizens can develop them and how these improved sites can help provide needed habitat for wildlife (especially birds and small mammals) while enhancing peoples' properties and environments. Participants will increase their knowledge and understanding of local wildlife ecology. Conservation landscaping can reduce the use of fertilizers, pesticides, water, and reduce maintenance while enhancing wildlife habitat. Other workshop participants who choose not to develop a habitat will increase their knowledge of local wildlife species, their habitat needs, and ecological roles, to help improve their local environment for wildlife.

Illinois The agency will partner with the City of Chicago to purchase 102 acres at Hegewisch marsh. The City of Chicago will own the site. A conservation easement in the form of a Land and Water Reserve will be granted to the Illinois Nature Preserves Commission. This will provide optimum nesting habitat for the State-listed little blue heron, yellow-headed blackbird,

piebilled grebe and common moorhen along with migrating waterfowl, shorebirds and neo-tropical migrants.

CRITERIA FOR SELECTING PROPOSALS:

The State, the District of Columbia, Commonwealth, or territorial agency having lead responsibility for the management of their wildlife resources must submit the projects. The State, the District of Columbia, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

15.605 Sport Fish Restoration Program; 15.608 Fish and Wildlife Management Assistance; 15.611 Wildlife Restoration; 15.615 Cooperative Endangered Species Conservation Fund; 15.634 State Wildlife Grants

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: The agency funded the acquisition of a perpetual conservation easement over approximately 2,900 acres for the protection of Greater sage-grouse habitat in Rio Blanco County. The grant included a

management plan that includes management for sage grouse, elk and deer habitat, and that allowed ongoing ranching activities to take place. Acquisition of the perpetual conservation easement provided permanent protection for important Greater Sage grouse populations, which have a high risk of extirpation. The management plan for the conservation easement guided ongoing management activities on the property, to the benefit of the Greater Sage grouse.

Montana (Fort Peck Assiniboine and Sioux Tribes) The tribe established a Tribal Wildlife Refuge and Management Area on the Manning Lake Wetlands Complex on Ft. Peck Reservation, Montana. They hired a full-time Project Coordinator to work with partners and oversee development and implementation of a protection and management plan for the area. They gained protection of habitat around the Manning Lake Wetlands through purchases and/or leases with landowners. Fiscal Year 2011: The agency will continue funding three positions to staff and administer the Kansas Department of Wildlife and Parks' Playa Lakes Habitat Incentive Programs (PLHIP). The positions will include one Program Coordinator and two Project Coordinators to manage and administer the program. The PLHIP staff will use funds to restore, protect, or enhance 5,000 acres of upland, 500 acres of wetland, and 200 miles of stream/riparian habitat to benefit targeted at-risk species including lesser prairie chicken, black-tailed prairie dog, ferruginous hawk, northern pintail, American avocet, black tern, Cassins sparrow, whooping crane, green toad, flathead chub, Arkansas darter, and Topeka shiner. These efforts will be concentrated in two conservation regions based on Kansas's Comprehensive Wildlife Conservation Strategy.

Maine (Passamaquoddy Tribe) The tribe will (1) acquire baseline information on Canada lynx, snowshoe hare, and other rare and endangered forest carnivores on Passamaquoddy tribal lands in Maine; (2) assess the past, present, and future effects of forest management on Canada lynx and snowshoe hare and other forest carnivores; and (3) use Canada lynx and snowshoe hare as umbrella species to manage for early successional habitat on tribal lands and pine marten as an umbrella species for mid- to late-successional habitats on tribal lands. Fiscal Year 2012: Utah The State will protect Tier I and Tier II species of greatest conservation need in Cache, Juab, and Sanpete counties through acquisition of conservation easements including: Green Canyon CE, Phase 1-A (Cache County) - 434 acres for Bonneville cutthroat trout and sharp-tailed grouse; Crawford CE, Sanpete County - 75 acres for Columbia spotted frog and southern leatherside chub; Graham CE, Sanpete County - 20 acres for Columbia spotted frog and southern leatherside chub; Turpin CE, Sanpete County - 100 acres for Columbia spotted frog and southern leatherside chub; and Mills valley CE, Juab County - 110 acres for least chub

North Dakota (Spirit Lake Tribe) The tribe will determine the amount of terrestrial wildlife habitat that has been lost on tribal and allotted lands due to the rising of Devil's Lake and the resultant flooding. This information will be used to develop a habitat mitigation plan. A habitat assessment using the Habitat Evaluation Procedure (HEP) method will be conducted on important wildlife habitats located on tribal and allotted lands. This will identify areas that are in need of protection and/or restoration. A land use plan will also be developed that will identify areas that are in need of conservation that may otherwise be at risk of development.

15.605 Sport Fish Restoration Program; 15.608 Fish and Wildlife Management Assistance; 15.611 Wildlife Restoration; 15.615 Cooperative Endangered Species Conservation Fund

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: Colorado: The State searched for suitable habitat from Hotchkiss to Bowie to determine site occupancy of Yellow-billed cuckoos and confirm that the species is breeding in the North Fork of the Gunnison River Valley. Confirmation of presence of a breeding population of Western yellow-billed cuckoos in the western Colorado would be an important first step in efforts to establish a conservation plan for the species in western Colorado. Without confirmation of the species' presence, there is little reason to expend the resources to develop a conservation plan.

Washington: The State monitored the herring spawning to estimate populations in Puget Sound, in order to provide valuable management information for biologist to protect the fish species. Fiscal Year 2011: Georgia: The agency will acquire 1,144 acres to become part of the Altamaha River Wildlife Management Area to protect wildlife habitat and provide outdoor recreational opportunities to the public.

Indiana: The agency will raise Allegheny woodrats, a State-endangered species, in captivity and begin releasing them in a suitable habitat in an attempt to augment and restore their population, thereby aiding the recovery of the species. Fiscal Year 2012: (anticipated): Northern Mariana Islands: The agency will monitor the Rota fruit bat population and forest bird populations. These species of concern (including forest birds and fruit bats) will benefit through increased knowledge of their biology and populations.

Texas: The agency will provide technical assistance to citizens, land managers, and communities to preserve habitat and urban wildlife and provide for cost effective public use. They will also assist homeowners, community leaders, and educators with urban habitat management and enhancement (wildscaping) through seminars and demonstrations of proven wildlife management. The agency will utilize volunteer programs to multiply staff investment. The project will provide better management of urban streams and wetlands and increase the amount of landscaping with native plants by homeowners, corporations, and other land managers. It will also enhance space management that provides for

habitat for urban wildlife.

CRITERIA FOR SELECTING PROPOSALS:

The State, the District of Columbia, Commonwealth, or territorial agency having lead responsibility for the management of their wildlife resources must submit the projects. The State, the District of Columbia, Commonwealth, or territorial agency selects those projects submitted for funding under the program. 15.636 ALASKA SUBSISTENCE MANAGEMENT

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Alaska National Interest Lands Conservation Act (ANILCA) of 1980, Title VIII, Public Law 96-487, 16 U.S.C. 3101-3233, Section 809. Fish and Wildlife Coordination Act (16 U.S.C. 661 to 666).

The Fisheries Resource Monitoring Program (Monitoring Program) funds approximately 80 studies annually to provide information on stock status and trends, harvests, and traditional ecological knowledge to manage and regulate Federal subsistence fisheries. The Partners for Fisheries Monitoring Program (Partners Program) strengthens Alaska Native and rural involvement in subsistence fisheries management and research. The program provides funds directly to Alaska Native and rural organizations to hire fishery biologists, social scientists, and educators to implement fisheries monitoring projects and rural internship programs. The Liaison and Staff Support Grant to the State of Alaska is directed specifically to the Alaska Department of Fish and Game. The grant defrays salary and travel expenses that occur in support of the coordination between State and Federal subsistence fish and wildlife programs.

Award Procedure:

For the Monitoring Program, an inter-agency technical review committee evaluates proposals, and, for those selected for further consideration, subsequently the full investigation plans. The committee develops a draft monitoring program from the highest priority projects, based on their technical review and available funds. The draft monitoring plan is reviewed by ten regional advisory councils and the public. An inter-agency staff committee reviews all recommendations, and provides recommendations. The Federal Subsistence Board selects projects for the Monitoring Plan taking into account all recommendations and comments. Funding of the Monitoring Plan is administered by the Office of Subsistence Management (OSM).

For the Partners Program, an internal review is conducted to evaluate proposals and make recommendations for funding. The evaluations are based on the criteria outlined in the request for federal assistance. The proposals are ranked and the OSM Assistant Regional Director selects proposals that best support the program within available funding. Once a Monitoring Program project or Partners Program position is selected for funding, a funding instrument, i.e., notice of award, between Fish and Wildlife Service and the recipient is drafted by the OSM. The award is processed by OSM through the contracting office and sent to the recipient for signature. The award is considered executed when signed copies of the agreement are received from the recipient and the contracting office has obligated funds to the agreement. The awards are administered by OSM. For the Liaison and Staff Support Grant, the Alaska Department of Fish and Game is the only non-Federal entity with management authority over fish and wildlife resources. This grant agreement is not open to competition outside the Alaska Department of Fish and Game.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

The Liaison and Staff Support Grant to the State of Alaska was directed specifically to the Alaska Department of Fish and Game. The grant defrayed salary and travel expenses that occur in support of the coordination between State and Federal subsistence fish and wildlife programs. Fiscal Year 2011: Will provide funding for 20 cooperative agreements under the Fisheries Resource and Partners Monitoring Programs, and, the annual award to the Alaska Department of Fish and Game for the Liaison and Staff Support Grant. Fiscal Year 2012: Will provide funding for numerous cooperative agreements under the Fisheries Resource and Partners Monitoring Programs, and, the annual award to the Alaska Department of Fish and Game for the Liaison and Staff Support Grant.

REGULATIONS, GUIDELINES, AND LITERATURE:

Cooperative agreements/project grants will be administered in conformance with the Fish and Wildlife Service Administrative Service Manual and 43 CFR 12; 2 CFR 215.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: The Fisheries Resource Monitoring Program funds the Unalakleet River Chinook Salmon Assessment project (#10-102). Funding for this project is used to operate a resistance-board weir installed on the Unalakleet River. The weir is used as a platform to count migration Chinook and chum salmon from June 14 to July 31. Local fishery technicians hired by the Native Village of Unalakleet (NVU) operate the project along with Alaska Department of Fish and Game Commercial Fisheries Division (ADF&G-CFD) biologists and technicians. The weir contains a fish passage gate where daily salmon passage is determined by visually enumerating fish as they passage through the gate. Daily and cumulative passage numbers are recorded in field logs and reported each morning to ADF&G-CFD staff in Nome for in season fishery management decisions. The age, sex, and length data is collected from Chinook salmon by periodically sampling fish with a live trap and holding box incorporated into the weir gate. Findings from the weir are made available in the form of annual project reports published in ADF&Gs Fishery Data Series. Total annual escapement estimates are used to update brood-year tables annually. The long-term project goal is to develop drainage-wide Chinook salmon escapement goals based on recruits per spawner models. This project runs from April 2010 through March 2015. Fiscal Year 2011: Will provide funding for 20 cooperative agreements under the Fisheries Resource and Partners Monitoring Programs, and, the annual award to the Alaska Department of Fish and Game for the Liaison and Staff Support Grant. Fiscal Year 2012: Will provide funding for numerous cooperative agreements under the Fisheries Resource and Partners Monitoring Programs, and, the annual award to the Alaska Department of Fish and Game for the Liaison and Staff Support Grant.

CRITERIA FOR SELECTING PROPOSALS:

For the Monitoring Program, each proposal is evaluated using the following four criteria: (1) Strategic Priorities: Studies must be responsive to identified issues and information needs. All projects must have a direct association to a Federal subsistence fishery, and either the subsistence fishery or fish stocks in question must occur in waters within or adjacent to Federal public lands; (2) Technical and Scientific Merit: Technical quality of the study design must meet accepted standards for information and collection, compilation, analysis, and reporting. Studies must have clear objectives, appropriate sampling design, correct analytical procedures, and specified progress and final reports; (3) Investigators Ability and Resources: Investigators and their organizations should have demonstrated technical and administrative expertise to complete prior studies, or have co-investigators or appropriate partnerships with other organizations to meet all requirements of the study; (4) Partnership-Capacity Building: Studies must include appropriate partners and contribute to building capacities of rural organizations, local communities, and residents to participate in fisheries resource management. Investigators and their organizations should be able to demonstrate the ability to maintain effective local relationships and a commitment to capacity building. For the Partners Program, each proposal is evaluated using the following equally weighted criteria: (1) Each project must have direct linkage to Monitoring Program projects; (2) Ability to successfully implement program identified under section IV, ii, Content and Form of Application, Describe the Program; (3) Strategic priority and past performance of the Monitoring Program projects identified in the proposal; (4) Letters of support from tribal and rural organizations, government agencies, project investigators, and schools/ universities; (5) Annual and total cost of the proposal, including use of in-kind or matching contributions that either decrease cost or expand support for implementing the Partners Program; (6) Past performance on implementing Monitoring Program projects; (7) Past performance on current or past agreements with the Office of Subsistence Management; (7) Previous experience in mentoring, training, and supervising

personnel; and (8) Past and current accounting practices to ensure deliverables and accountability.

Each of these items carries a "Go/No-Go" impact: direct linkage of a Monitoring Program project, enrollment in CCR; affirming in writing in your application that you have enrolled in CCR; providing your DUNS Number; submission of completed SF-424, SF-424A, and SF-424B package; and submission of approved Indirect Cost Negotiation Agreement if requesting reimbursement for indirect costs. For the Liaison and Staff Support Grant, the Alaska Department of Fish and Game is the only non-federal entity with management authority over fish and wildlife resources. This grant agreement is not open to competition outside the Alaska Department of Fish and Game.

Regional emphasis will be on the North Slope of Alaska and the Bering Straits region due to increased emphasis on endangered species conservation as it relates to the subsistence harvest. Fiscal Year 2012: Plans include trying to recruit a replacement regional organization to represent Southeast Alaska, to bring the number of active regions up to 11, and adding representation to an additional 16 rural villages. Upon establishing a replacement organization, emphasis will be on establishing new outreach pathways and integrating them into the Statewide Council system.

15.608 Fish and Wildlife Management Assistance

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: The work and objectives outlined for FY10 were continued specifically by providing travel, lodging and other associated expenses for elected representatives from the regional management bodies to attend all meetings of the Statewide Council and a separate representative to attend technical committee meetings associated with the Council. The regions will be taking up endangered species and seasonal regulatory issues with their area villages and making recommendations to the Statewide Council. Fiscal Year 2011: This program provided funding to 11 regional management bodies to facilitate and administer area sub-programs to involve subsistence hunters of migratory birds in the management and regulation of migratory birds. The funding meets three primary objectives: 1) Ensure an effective and meaningful role for indigenous inhabitants in the conservation of migratory birds; 2) Facilitate submission of migratory bird management proposals where spring migratory bird harvest is a customary and traditional practice; and 3) Facilitate the review of submitted migratory bird management proposals through meetings of the regional management bodies. Fiscal Year 2012: Emphasis will be placed on replacing the regional management body that served Southeast Alaska to facilitate re-establishing that sub-program to involve subsistence hunters of migratory birds in the management and regulation of migratory birds for that area. Completion of this task will enable submission and review of subsistence proposals from that region that have not been addressed in the past couple of years.

CRITERIA FOR SELECTING PROPOSALS:

You must be a regional partner organization of the council to be selected. Criteria included, but is not limited to, past performance, ability to provide administrative support, and ability to send an elected representative from the regional management body to meetings.

15.647 MIGRATORY BIRD CONSERVATION

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Fish and Wildlife Act of 1956, as amended, 16 U.S.C. 742a-754; Fish and Wildlife Coordination Act of 1958, 16 U.S.C.661-667(e); Fish and Wildlife Conservation Act, 16 U.S.C. 2901-2911; and Migratory Bird Treaty Act, 16 U.S.C. 709a.

OBJECTIVES:

To maintain and enhance populations and habitats of migratory bird species found in the Upper Midwest (IL, IN, IA, MI, MN, MO, OH, WI).

TYPES OF ASSISTANCE:

DIRECT PAYMENTS FOR A SPECIFIED USE; Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

Grants and payments may be used for the conservation of any bird species protected by the Migratory Bird Treaty Act and occurring in U.S. Fish and Wildlife Service (USFWS) Region 3 (Upper Midwest, including IL, IN, IA, MI, MN, MO, OH, and WI). Special emphasis will be placed on Birds of Management Concern in the Midwest (see http://www.fws.gov/midwest/MidwestBird/birds_of_concern.htm) as these species are experiencing known or suspected population declines, are recreationally important, or are causing biological or social conflicts. Implementing national, regional, and flyway bird conservation plans, including the Partners in Flight North American Landbird Conservation Plan (<http://www.partnersinflight.org>), U.S. Shorebird Conservation Plan (<http://shorebirdplan.fws.gov>), North American Waterbird Conservation Plan (<http://www.waterbirdconservation.org>), North American Waterfowl Management Plan (<http://www.fws.gov/birdhabitat/NAWMP/index.shtm>), and Mississippi Flyway bird management plans, is the USFWS's highest priority, and proposals related to the priorities identified in these plans and Bird Conservation Region and state-level bird conservation planning efforts will receive high funding consideration. The following activities are of interest to the USFWS: a) Population surveys and monitoring to determine the status, trends, distribution, and demography of bird species and groups of concern. Emphasis will be placed on landscape-level applications of standardized inventory and monitoring protocols as identified through the Midwest Coordinated Bird Monitoring Partnership (<http://midwestbirdmonitoring.ning.com>). Local-scale monitoring (e.g., local land management units) activities will generally not be a focus of this grant program, nor will support for long-term operational bird monitoring efforts. Rather, the program seeks to address coordination of monitoring efforts and

development and evaluation of new survey and monitoring techniques (both field and analytical); b) Conservation of focal species for which research, monitoring, and other conservation and management priorities have been identified. Examples of focal species include: Golden-winged Warbler, Cerulean Warbler, Henslows Sparrow, other Midwestern grassland birds, American Woodcock, Wilsons Phalarope, Upland Sandpiper, Marbled Godwit, Common Tern, King Rail, and Lesser Scaup (for further information on focal species, contact Steve Lewis, USFWS, steve_j_lewis@fws.gov); c) Strategic Conservation, wherein biological planning, landscape design, conservation delivery, and monitoring and evaluation are integrated in a way that generates the adaptive feedback loops that enable sound decisions and constantly improve our efficiency and effectiveness in saving birds (<http://www.fws.gov/midwest/science/SHC/FAQ.htm>). Strategic conservation involves applied research, including studies of bird habitat requirements, threats, limiting factors, and population responses to habitat conservation activities; monitoring (see above); and use of Geographic Information Systems, modeling, and similar tools to develop decision support tools that identify bird habitat focus areas and further bird conservation planning efforts. For further information, please contact the regional office.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2010: FWS made 14 awards to State and Tribal programs that fund projects that assist livestock producers in undertaking proactive, non-lethal activities to reduce the risk of livestock loss due to predation by wolves or to compensate livestock producers for livestock losses caused by wolves. Fiscal Year 2011: No new funding provided to date FY11. If new funding is made available, examples of projects eligible for funding include the purchase of livestock guarding dogs to reduce conflicts between wolves and livestock, the purchase of a portable electric fence to prevent conflicts, and support towards hiring range riders to monitor cattle to prevent conflicts between livestock and wolves. Fiscal Year 2012: No new funding requested in FY12. If new funding is made available, examples of projects eligible for funding include the purchase of livestock guarding dogs to reduce conflicts between wolves and livestock, the purchase of a portable electric fence to prevent conflicts, and support towards hiring range riders to monitor cattle to prevent conflicts between livestock and wolves.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2010: New Program to FWS. Fiscal Year 2011: (anticipated): Alaska The State will provide community profile maps for small communities in Southeast Alaska that have not had new maps in more than twenty years. The following twelve Southeast Alaska communities will be included in this project: Tenakee Springs, Pelican, Gustavus, Port Protection, Whale Pass, Naukati Bay, Hollis, Coffman Cove, Thorne Bay, Hyder, Metlakatla, and Port Alexander. The Division of Community and Regional Affairs (DCRA) community profile maps are based on rectified digital aerial photography, and display such mapping attributes as topography at two-foot contour intervals, property boundaries, utilities, public and private improvements, easements, and additional land use information. They are widely used as base maps for GIS applications, and have been used for hazard mitigation planning, community planning, flood mapping, and identification of land uses and environmentally sensitive areas. In partnership with Juneau Economic Development Council (JEDC), DCRA will provide for inter-agency coordination, mapping contractor selection, and oversight of the map development process. Completed maps will be comprehensive, highly accurate, and available for a wide variety of uses.

California State Conservancy The agency will eradicate invasive Spartina and hybrids on a total of up to 1,800 acres to prevent 69,402 acres of marsh and mudflats from being invaded and potentially covered by the infestation. The spread of invasive Spartina is perhaps the most serious danger (besides development) to ever threaten the marsh ecosystem of the San Francisco Estuary. The spread of hybridized Spartina, which occurs at a greater than exponential rate, threatens to eliminate most, if not all, of the nesting and foraging habitat for migratory birds that utilize the S.F. Estuary, the most significant U.S. Pacific Flyway stopover, by replacing the existing habitat with a monoculture of invasive Spartina. The U.S.Fish and Wildlife Service Recovery Plan addressing the San Francisco Baylands, ranks eradication of the exotic plant Spartina as a number one recovery action needed to prevent other listed species foreseeable slide towards extinction. Fiscal Year 2012: (anticipated): Alaska Mitigation actions for marine mammals, including polar bears, are required under the Marine Mammal Protection Act for nearshore and offshore oil and gas leases. In the Chukchi Sea, little is known about the movement patterns or ice habitat use of polar bears in oil and gas leasing areas.

Additional data on the status of this population, including vital rates, bear health and condition, and population size, are currently lacking. Management of this polar bear population is guided by the US-Russia Bilateral Agreement for the Conservation of polar bears, which establishes a joint commission to set harvest levels. This study will address information needs required to ensure successful mitigation and the development of a sound Environmental Assessment relative to oil and gas activities as well as to inform establishment of appropriate harvest levels at an international level. Between 2008 and 2010 the U.S. Fish and Wildlife Service has captured, measured, and sampled 137 polar bears in this region. This funding request would cover costs of a critically needed extension to continue this work and ensure adequate data for assessing polar bear movements and population health in relation to annual variation in available sea ice habitat. The results of this study will be used to aid in establishing polar bear harvest levels and mitigating potential effects of oil and gas offshore leases.

Alameda County Flood Control and Water Conservation District The agency will create, restore, or enhance habitats of sufficient size, function, and appropriate structure to: promote restoration of native special-status plants and animals that depend on South San Francisco Bay habitat for all or part of their life cycles; maintain current migratory bird species that utilize existing salt ponds and associated structures such as levees; and support increased abundance and diversity of native species in various South San Francisco Bay aquatic and terrestrial ecosystem components, including plants, invertebrates, fish, mammals, birds, reptiles, and amphibians. Achieving this objective requires the restoration of tidal wetlands and the enhancement of former salt ponds to provide improved habitat for migratory birds and waterfowl.

CRITERIA FOR SELECTING PROPOSALS:

Criteria for approving proposals are identified in the Coastal Impact Assistance Program Guidelines authorizing legislation and the annual program announcement found on Grants.gov.

15.669 COOPERATIVE LANDSCAPE CONSERVATION

Landscape Conservation Cooperatives (LCCs)

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Fish and Wildlife Conservation Act (16 U.S.C. 2901-2911; 94 Stat. 1322); Endangered Species Act of 1973 (16 U.S.C. 1531-1544, 87 Stat. 884); The National Wildlife Refuge System Improvement Act of 1997 (P.L. 105-57); The Fish and Wildlife Act of 1956 (16 U.S.C. 742a-742j, not including 742 d-1; Stat. 1119), as amended.

OBJECTIVES:

By leveraging resources and strategically targeting science to inform conservation decisions and actions, Landscape Conservation Cooperatives (LCCs) are being established to create a network of partners working in unison to ensure the sustainability of Americas land, water, wildlife and cultural resources. Facilitated by the Department of the Interior (DOI) as part of its collaborative, science-based response to climate change, each of the LCCs will operate within a specific landscape, covering the entire United States by dividing the landscape into 21 geographic areas. Defined based on ecological boundaries, the LCCs also include portions of Mexico and Canada. Partners will include federal, state, and local governments, tribes, universities, nongovernmental organizations, landowners, and other stakeholders. Collectively, LCCs will form a network of land, water, wildlife and cultural resource managers, scientists, and interested public and private organizations within the U.S. and across our international borders that share a common need for scientific information and interest in conservation. These landscape-scale, applied conservation science partnerships support and enhance on-the-ground conservation efforts by facilitating the production and dissemination of applied science products for resource management decisions.

The U.S. Fish and Wildlife Services Cooperative Landscape Conservation program will provide scientific and technical support and funding to LCC-prioritized biological planning, conservation design and adaptive management projects to include: research; inventory design and implementation; monitoring; goal and priority setting associated with efficient

and effective conservation; and development of implementation strategies; and projects supporting all other LCC organizational efforts, including planning, establishment, maintenance, and general business operations.
