15.242 National Fire Plan - Rural Fire Assistance

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: (1) Long-term impacts of wildfire on fuel loads, vegetation composition, and potential fire behavior and management in sagebrush-dominated ecosystems. This project will quantify the long term influence of past fires (12-30 years) on fuel loads, vegetation composition, and subsequent wildfire behavior, effects, and management in the three dominant big sagebrush ecosystems of the Northern Great Basin and Columbia Plateau. (2) Programmatic Analysis of Fuel Treatments: from the landscape to the national level. This project will design and demonstrate a spatial planning system that generates cost effective fuel treatment (FT) programs at the landscape and national scales with regional extensions. We will demonstrate how FT programs can respond to changes in funding levels nationally and on a particular landscape. (3) Phase Dynamics of Wildland Fire Smoke Emissions and Their Secondary Organic Aerosols. This project is a detailed study examining the phase partitioning behavior of biomass burning emissions under scenarios applicable to both the laboratory and the field. Fiscal Year 2016: (1) Modeling long-term effects of fuel treatments on fuel loads and fire regimes in the Great Basin. The project will assess the efficacy of fuel management strategies at decadal time-scales by synthesizing existing data to develop inputs for a vegetation dynamics model, the Ecosystem Demography (ED) model. The purpose of using the process-based ED model is to provide alternative future scenarios of the sagebrush-steppe ecosystem of the Great Basin under changing climate and fire regimes. (2) Relations among cheatgrass-driven fire, climate, and sensitive-status birds across the Great Basin. This project will model current and future spatial interactions among cheatgrass cover and biomass, precipitation, and fire across the Great Basin and to model current and future cover of sagebrush and herbaceous vegetation. We further will examine how projected changes in fire regimes and fire and fuels treatments may affect habitat quality for and probability of occupancy of sensitive-status breeding birds. Additionally, we will use statistical change-point analyses⁹ to detect any abrupt, nonlinear temporal change thresholds in projected vegetation cover, habitat quality, and occupancy¹⁰. Detection of ecological thresholds, if they exist, may suggest fuels treatments and restoration actions that will decrease the probability of entering into or remaining within undesirable ecological states. (3) Do perennial bunchgrasses competitively exclude *Bromus tectorum* in post-fire rehabilitation? This project will examine the distribution of *tectorum* and perennial bunchgrasses across plot, site, and landscapes scales on locations with and without post-fire rehabilitation using spatial analysis of photoquadrats. The spatial analyses will allow us to address the following research questions: a) Does seeding *Poa secunda*, *elymoides*, and *crispatum* after a fire reduce the dispersion of *tectorum* at the plot or site scale? b) Is the spatial distribution of grass species consistent among sites across landscapes?. Fiscal Year 2017: Current data not available.

CRITERIA FOR SELECTING PROPOSALS:

Criteria used to select assistance proposals are based on their ability to reduce the risk of wildland fire to community values and to increase the capabilities of rural fire organizations, in the vicinity of Federal lands.

OBJECTIVES:

As an integral part of the Bureau of Land Managements (BLM) mission, BLM provides national leadership to promote conservation of fish, wildlife and plant conservation, which will help restore and protect lands containing noteworthy resource values for regionally significant species of management concern or wetland and riparian areas; restore and protect crucial habitat through vegetation treatments, installation of wildlife friendly fences, and creating fish passages or barriers to protect aquatic species. Restoration of wildlife habitat to restore and protect sage grouse, desert tortoise, and other upland habitats for priority species as well as instream and riparian habitat for migratory birds, endangered or special status aquatic species and other native and priority species. Increase on-the-ground project work to conserve, restore, and reduce the threats to sage-grouse and other sensitive species in high priority habitats. Continue consistent habitat monitoring across the range of the Greater Sage-Grouse and other landscape species using the Habitat Assessment Framework (HAF) and the land use plan habitat objectives for sage grouse and other priority species. Continue seed collections within priority species habitat and continue to develop genetically appropriate native and non-native plant material for use in habitat restoration. Continue to work with partners to prioritize and implement priority species conservation actions. The BLM manages these resources in cooperation with states, tribes, other federal agencies, and non-governmental organizations.

Projects that cooperatively support common goals and interests in managing, developing and protecting Federal, State, and private lands and water resources in an environmentally and economically sound manner. The BLM continues to partner with Trinity County Resource Conservation District on the Weaverville Community Forest Stewardship project, a typical example of a stewardship cooperative agreement. This project has treated over 1,000 acres of forest adjacent to the community of Weaverville, California. Project objectives have been to thin the forest in the wildland urban interface and improve forest resilience. Timber value from the thinning has been used to offset the thinning of precommercial trees as well as trail maintenance of local hiking and biking trails. One of the primary employers in Weaverville is a lumber mill which relies on timber supplied from project like this to continue

operation. Fiscal Year 2016: No Current Data Available. Fiscal Year 2017: No Current Data Available.

FORMULA GRANTS; PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grants support the operation of an approved State or Tribal Abandoned Mine Land (AML) reclamation program. Approved programs use grant funds for mine site reclamation projects on eligible lands, which are lands and waters mined or affected by coal mining processes that occurred prior to August 3,

1977 (as well as certain post-1977 and noncoal mining activities). Grants also support project administration. Grants may also include funding for AML-related activities including: abating emergency mining-related dangers to public health and safety; restoring water supply facilities impacted by coal mining; setting aside funds in a trust account to fund future acid mine drainage treatment; and developing a self-sustaining State subsidence insurance program.

Approved programs which have completed coal mine reclamation in their state or on lands within their jurisdiction may use funds for other activities as authorized in SMCRA. Please contact the headquarters office more information.

Applicant Eligibility:

The program is restricted to States with (1) an approved coal mining regulatory program, (2) lands eligible for reclamation, and (3) active coal mining operations within their borders that are paying coal reclamation fees into the Abandoned Mine Reclamation Fund; and to federally-recognized Indian Tribes with (1) eligible lands, and (2) active mining operations paying fees into the Fund. An eligible State or Tribe may submit a State reclamation plan to the Office of Surface Mining (OSM) for approval.

Beneficiary Eligibility:

Coal field citizens and the general public benefit from reduced exposure to safety and health risks from abandoned mine lands.

Credentials/Documentation:

A State or Tribal Indian reclamation plan must be approved by the Assistant Secretary for Land and Minerals Management. AML grants to approved projects must be approved by an authorized official of the appropriate OSM Regional or Field Office. 2 CFR 200, Subpart E - Cost Principles applies to this program.

Preapplication Coordination:

Environmental clearance actions for each individual reclamation project are completed as part of the recipient's request for OSM's approval of the Authorization to proceed, which is the point of federal action for that reclamation project. An environmental impact statement is required for this program. An environmental impact assessment is required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards applies to this program. The standard application SF 424, Application for Federal Assistance as required by 2 CFR Part 215.12 and 43 CFR Part 12, Subpart C, "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments," are required to apply for a grant. The forms may be obtained and the application is to be submitted through www.Grants.gov. Grant applications may also be submitted to the applicable OSM Regional/Field Office. Please contact the appropriate OSM Regional Office for assistance.

Award Procedure:

The Regional Office should act upon a grant application within 60 days of submittal of a complete application. If the application is not approved, the Regional Office must set forth in writing the reasons for disapproval and may propose modifications if appropriate. Subsequently, the applicant may submit the revised application or appropriate revised portions of the original application.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

Normally 60 days.

Appeals:

An applicant may appeal the OSM's decision not to approve a grant or to reduce or terminate a grant to the Director, OSM no later than 30 days after the disapproval action.

Renewals:

New grants may be awarded annually upon satisfactory performance by the State/Tribal AML Program.

Formula and Matching Requirements:

Statutory Formula: Public Law 95-87. Grants are 100 percent Federally funded. Grant funds are mandatory, are not subject to fiscal year appropriation limitations, and are calculated using a distribution formula. The distribution formula is based on annual reclamation fee collections and historical coal production. Source of funding is provided from the Abandoned Mine Reclamation Fund and from the General Fund of the Treasury.

Matching requirements are not applicable to this program. MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Grant periods are variable; however, funds for reclamation construction activities should be normally expended within three years after award. See the following for information on how assistance is awarded/released: Information not available.

15.252 Abandoned Mine Land Reclamation (AMLR) Program

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: In 2015, OSMRE awarded \$ 100,000 to Pathfinders Resource Conservation and Development, Inc. (Pathfinders) for the Memmalaar AML Reclamation Project. This project is an 11-acre AML site located in Mahaska County. Project partners include the Mahaska Soil and Water Conservation District and the Division of Soil Conservation. Pathfinders leveraged \$100,000 in OSMRE WCAP funding with \$ 236,986 in funding from project partners; Iowa Department of Agriculture and Land Stewardship, the Mahaska Soil and Water Conservation District, and Landowners. Pathfinders plans to implement earthmoving, neutralization, and seeding activities to eliminate the acid mine drainage originating from this site. Fiscal Year 2016: The Buckhannon River Watershed Association (BRWA), Swamp Run AMD passive treatment site located in Upshur County, WV is a fine example. This project involves the treatment of seepage leaving a West Virginia Department of Environmental Protection (WVDEP) AML project site. The treatment plan consists of collecting the seeps and conveying them into a large flushing limestone bed designed to neutralize the remaining acidity and flushing the precipitated metals. A settling pond will be placed to collect large particulates and debris that could clog the bed and a settling pond situated directly downstream of the flushing bed for final settling of precipitates prior to discharge. The goals of this project are the approximate removal of 9,950 pounds of acidity per year, 349 pounds of iron per year, and 1,282 pounds of aluminum per year. This project is a cooperative venture with WVDEP, West Virginia Universitys Water Resources Institute for funding and on-site help, OSMRE for funding and BRWA, Inc. for supplies and in-kind services (sampling, record-keeping, etc.). The provision of \$ 100,000 by OSMRE allowed for the leveraging of \$ 257,693, to provide the total of \$ 357,693 to execute the project. Fiscal Year 2017: Information not available.

CRITERIA FOR SELECTING PROPOSALS:

Section 404 of Public Law 95-87, State certification of eligibility is required. No opposition to the project from the State Abandoned Mine Land (AML) agency. All applicable Federal and State clearances and permits must be secured. The project should propose to use proven or innovative technology that has a high probability of success and produce tangible results, e.g., fishery restored, stream miles improved, educational and community benefits, pollutants removed from the streams. Funds must be used for the construction

phase of a project and there must be demonstrated public support for the project. Also, there must be a plan to address any ongoing operation/maintenance considerations.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: While OSMRE does not directly fund "projects" the funding provided supports non-profit, voluntary, community watershed associations whose projects engage their communities in identifying AMD problems as well as potential solutions and address related watershed/community projects.

In an effort to seek ways to reignite and engage economic redevelopment in Wyoming County, WV, OSMRE/VISTA working at the Rural Appalachian Improvement League, Inc. (RAIL), and RAIL President Dewey Houck, gathered state and community leaders in Mullens, WV to discuss the future of agricultural education, farming, and land use in the county. The main focus of discussion was on the use of Abandoned Mine Lands (AML) and developing youth leadership opportunities in southern West Virginia. The idea is to convert AML areas to mass-yielding high-tunnel farms, which would provide food for local schools, revenue for local residents and opportunities for young farmers, an idea that met with resounding community support. Event participants heard from Agricultural Commissioner Walt Helmick (the first WV Agricultural Commissioner to visit Wyoming County), and a panel of state officials and community leaders. Community leaders and officials shared resources, program, knowledge, and possibilities for funding with local community members to drive this new initiative. With 22% of Wyoming County residents living at or below the poverty line, a program that utilizes Abandoned Mine Lands as important resources in creating community benefits can create sustainable enterprise in the county. Fiscal Year 2016: OSMRE/VISTA, serving with Friends of Deckers Creek (FODC) (Morgantown, WV) completed multiple projects focused on acid mine drainage (AMD), remediation, and public interpretation. Most notably, the VISTA completed the Richard Mine Community Report on the largest single source of contamination within the Deckers Creek watershed and the last serious AMD discharge to remain untreated. The report compiled the history of the mine, AMD chemistry and local geology, potential treatment methods and costs, and potential economic benefits. The report was funded through an EPA Urban Small Waters grant and serves as an important outreach tool for FODC in raising awareness of issues surrounding AMD discharge from the Richard Mine.

OSMRE/VISTA serving with the Schuylkill Headwaters Association (Pennsylvania), is continually finding ways to introduce new career opportunities to low-income students by partnering with local organizations. One major partnership is with The Blue Mountain School District. Students from the middle and high school spent the day at the Silver Creek abandoned mine drainage (AMD) treatment system where they learned about the history of mining in the area, how AMD is formed, and how the Silver Creek system is working to clean the water. Fiscal Year 2017: Information not available.

CRITERIA FOR SELECTING PROPOSALS:

Each proposed watershed project must clearly enhance the sustainability of the watershed organization and must contribute directly to the remediation of acid

mine drainage. Candidates must be able to organize their work, work well with community groups and on their own, have an understanding of acid mine drainage remediation and the national Clean Streams program, and write well.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2015: No Data Conversion or Underground Mine Map Projects were funded in 2013, 2014, or 2015. Past accomplishments include the digital conversion of historical underground mine maps, active mining and reclamation data, and abandoned mine land project data to digital form. Business process enhancements were made to facilitate the creation of future digital geospatial data through state permitting and data translation procedures.

Select examples: In FY 2012, the Applied Science program funded the West Virginia University (Hopkinson) study Assessing Geomorphic Reclamation in Valley Fill Design for West Virginia, completed in FY 2015. The study obtained field data to calibrate conceptual geomorphic designs for West Virginia valley fills. Specific objectives were: obtaining and quantifying characteristics of mature landforms in West Virginia; establishing the baseline biological community associated with these landforms; and generating conceptual geomorphic valley fill designs for existing mines.

In 2012, the Applied Science program funded the Case Western Reserve University (Zeng) study Geotechnical Properties and Flow Behavior of Coal Refuse under Static and Impact Loading, completed in FY 2015. The study used laboratory tests, small-scale model tests, and centrifuge modeling in a comprehensive investigation of geotechnical properties and flow behavior of coal refuse under static and impact loading. Explicit design criteria for safety analysis of tailings dams and effective measures to improve stability were recommended. Fiscal Year 2016: Information not available. Bureau of Safety and Environmental Enforcement, Department of the Interior

AUTHORIZATION:

43 U.S.C. 1345 (e); 43 U.S.C. 1346 Section 20.

OBJECTIVES:

The Bureau of Safety and Environmental Enforcement (BSEE) program provides major economic and energy benefits on a national and local level to the taxpayers and states. The Agency oversees the exploration and development of oil, natural gas and other materials and renewable energy alternatives on the Nation's outer continental shelf. BSEE continues to look for better ways to serve the American people and to ensure that the nation receives the best oversight and regulation of National resource development now and into the future. The program not only supports decisions made within the Department of the Interior, but also provides coastal states and local governments with the information necessary to ensure that all stages of offshore energy and mineral activities are conducted in a manner to protect both the human and natural environments. The Outer Continental Shelf Lands Act (OCSLA) Sections 1347 and 1348 respectively mandate the development and enforcement of regulations that protect safety, health and the environment. OCSLA Section 1345 authorizes the use of cooperative agreements with affected States to meet the requirements of OCSLA, including sharing of information, joint utilization of available expertise, formation of joint monitoring arrangements to carry out applicable Federal and State laws, regulations, and stipulations relevant to outer continental shelf operations both onshore and offshore. The purposes of the Office of Offshore Regulatory Program (OORP) is to obtain the information needed to improve the knowledge, practices, and technologies used to promote operational safety and pollution prevention for offshore oil and gas activities and alternate energy projects.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2015: Operation and Maintenance of the Ocean Energy Safety Institute (OESI). To date, OESI has conducted six forums which include Risk, Data Collection, Research, Human Factors and Shallow Water Blowouts and SEMS Next Steps. These forums have created a forum for dialogue for shared learning and cooperative research among academia, government, industry and other non-governmental organizations, in ocean energy related technologies and activities that ensure safe and environmentally responsible ocean energy operations. OESI supported BSEE as they hosted the 2015 BSEE Domestic and International Standards Workshop in Houston, Texas on May 2015. OESI also will be supported BSEE by hosting a BAST Forum on November 12, 2015 in Houston, Texas. Their expertise assisted BSEE as we shared the BAST Determination draft process with industry stakeholders. Through the work of Director of Operations of OESI, there is now an established Advisory Committee in place. The first committee meeting took place in March 2015, at that meeting a Chair and Vice Chairperson was elected, a follow on meeting took place on October 23, 2015. The third meeting took place on January 26, 2016, to further assist in establishing future directions of the Safety Institute. On April 26, 2016, the quarterly AC committee meeting will take place. The Advisory Committee consists of stakeholders from the four representative groups oil and gas, which are academia, industry, federal agencies and Non-Governmental Organizations (NGOs). Recent members to join the committee are from Department of Energy, United States Coast Guard and (NGO) Resources for the Future. OESI is planning to conduct at least three forums during 2016, with the first occurring in the 18 May, 2016 time frame, 24 August, 2016 and November 30, 2016. These forums will take place in the Houston area. Fiscal Year 2016: Operation and Maintenance of the Ocean Energy Safety Institute (OESI). Fiscal Year 2017: No Current Data Available.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: Inland Empire Utilities Agency, in association with the Chino Basin Desalter Authority, received \$5,000,000 in Federal funding to expand the capacity of the existing Chino II Desalter plant through the construction and development of three supply wells and two primary raw water transmission lines, components of the Chino Desalter Project. The water produced by this project will replace water that would otherwise be imported from the Colorado River and/or Sacramento-San Joaquin Bay-Delta.

The Sweetwater Authority Water Reclamation Project in California received \$5,250,000 to expand the Richard A. Reynolds Groundwater Desalination Facility to provide a more secure, local water supply. This phase of the project will expand the Reynolds Facility from the current capacity of 3,600 acre-feet per year to a total capacity of 8,800 acre-feet of locally-produced desalinated groundwater annually. Water that is produced by the Reynolds Facility supplements potable water supplies, and directly offsets imported water from the Sacramento-San Joaquin Bay-Delta and Colorado River systems.

The Hi-Desert District Wastewater Collection and Reuse Facility in Yucca Valley, California, received \$4,000,000 for construction of a centralized wastewater treatment facility and collection system to eliminate septic systems within the District's service area. Upon completion, this project will result in the recharge of 1,949 acre-feet of recycled water annually to replace water that would otherwise be imported by the State Water Project from the Bay-Delta. Fiscal Year 2016: Information not available. Fiscal Year 2017: Information not available.

CRITERIA FOR SELECTING PROPOSALS:

Reclamation will place priority on funding projects that reduce existing water diversions or address specific water supply issues in a cost-effective manner, address environmental and water quality concerns, are economically justified, and meet other program goals.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: A number of projects will address the connection between water use and energy use. For example, The Three Sisters Irrigation District in Oregon will pipe 14,000 feet of open canal and install 4 micro-hydro turbines with a combined energy capacity of 200 kilowatts. The project is expected to result in annual water savings of 1,900 acre-feet.

Several projects will save energy through water conservation. For example, the North Side Pumping Company in Idaho will implement a modernization project that will eliminate 20.5 miles of open-ditch water delivery systems and close an outdated, century-old pumping plant. The project is expected to result in annual water saving of 9,150 acre-feet by reducing water currently lost to spills, evaporation, and seepage. The closure of the pumping plan will result in an overall annual reduction of approximately 522,000 kilowatt-hours of energy per year.

Other projects are expected to make contributions to environmental restoration by conserving water or making other improvements that benefit endangered or threatened species. For example, in Texas, the Cameron County Irrigation District will enclose 3,800 feet of open canal with pipe, replace an existing pump station with a new aerial crossing, and install a solar powered lift pump. The project is expected to result in annual water saving of 275 acre-feet annually, some of which will be allocated to the Lower Rio Grande Valley National Wildlife Refuge.

Examples of all projects funded to date are available at <http://www.usbr.gov/WaterSMART/weeg/>. Fiscal Year 2016: Information not available. Fiscal Year 2017: Information not available.

CRITERIA FOR SELECTING PROPOSALS:

Projects should seek to conserve and use water more efficiently, increase the use of renewable energy and improve energy efficiency, protect endangered and threatened species, facilitate water markets, or carry out other activities to address climate-related impacts on water or prevent any water-related crisis or conflict.

TYPES OF ASSISTANCE:

Project Grants (Cooperative Agreements or Contracts)

USES AND USE RESTRICTIONS:

Funding is directed to be used for terminal lakes and associated watersheds in the State of Nevada and California. For further information please contact the regional office.

Applicant Eligibility:

State and local public agencies, Indian tribes, nonprofit organizations, educational institutions, and individuals may submit a proposal which will be considered by Reclamation. Foreign entities and Federal agencies are not eligible to apply.

Beneficiary Eligibility:

State and local entities, public nonprofit institutions/organizations, other public institutions/organizations, Federally recognized Indian Tribal Governments, individuals, small businesses, profit organizations, private organizations, quasi-public nonprofit organizations, other private institutions/organization, general public, native American organizations, higher education institutions, irrigation districts, municipal water authorities, farmers/ranchers/agriculture producers, and land/property owners.

Credentials/Documentation:

(1) A detailed written technical proposal including background data regarding the applicant, technical approach proposed to accomplish the work, a scope of work that separates the work into major tasks, type of personnel implementing the proposal, experience in performing this type of work, benefits to be received by implementation of the project(s), environmental impact(s), timeline(s), the level of cooperation with other parties involved in the proposal, and other information that may be useful for proposal evaluation. (2) A detailed cost proposal by project including a budget covering labor categories, salaries and

wages with estimated hours, fringe benefits, travel, equipment, supplies, subcontracts, indirect cost rates, other funding sources and commitments, cost-sharing, value of in-kind contributions of good and services, and a narrative discussion. 2 CFR 200, Subpart E - Cost Principles applies to this program.

Preapplication Coordination:

Funding is allowed for work that will be for the benefit of at-risk terminal lakes and to carry out research, support, and conservation activities for associated fish, wildlife, plant, and habitat resources in Nevada and California. An environmental NEPA document may be required depending on the nature of the proposal and its impact on the environment. Compliance with National Historic Preservation Act and Endangered Species Act may also be required.

Pre-application Coordination: Although it is not mandatory, Reclamation strongly encourages offerors to submit a pre-proposal to eliminate the possibility of submitting a full proposal that would not be considered for award.

The pre-proposal should describe 1) how the proposal will provide benefits to a terminal lake or associated watershed, 2) the quantity of water anticipated to be provided if part of the proposal or benefit to the associated riparian and watershed resources, 3) the associated estimated cost, 4) potential environmental impacts, 5) state, local and other permits or approvals needed to implement the proposal. Pyramid Lake Pre-application Coordination: Initially pre-proposal solicitation announcement was issued by Reclamation; the initial solicitation occurred in FY05. No additional solicitation announcements have occurred.

This program is excluded from coverage under E.O. 12372. No additional solicitation is planned in FY14. An environmental impact statement is required for this program. An environmental impact assessment is required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards applies to this program. Funding is allowed for work for the benefit of at-risk terminal lakes and to carry out research, support, and conservation activities for associated fish, wildlife, plant, and habitat resources in Nevada and California. For Summit Lake, Reclamation will only accept proposals from the Summit Lake Paiute Tribe, since the lake is entirely within the reservation boundaries and any proposal affecting the lake would need the consent of the Tribe; the exception is if DTL funding is reprogrammed in another DTL grant for Summit Lake. For all other terminal lakes, Reclamation may accept applications after the applicant provides enough pre-application information to Reclamation to assure that the proposed work will be for the benefit of at-risk natural desert terminal lakes and associated riparian and watershed resources in Nevada and California or fund designated activities, the associated cost is reasonable, and it is likely Reclamation can satisfy its federal Indian trust, endangered species, environmental, and other responsibilities. Discretionary funding opportunities will be posted on Grants.gov. Submission of a complete technical proposal and a project budget proposal in accordance with the instructions in the FOA is mandatory. In addition, applicants must submit all applicable SF424 forms, which are referenced in the FOA. Reclamation does not anticipate accepting unsolicited applications in FY14.

Award Procedure:

Terminal Lakes Proposals will be evaluated using a merit-based review process. Some past Pyramid Lake proposals were also reviewed on the basis of a competitive, merit-based review process, and were rated in accordance with the evaluation criteria stated in the FOA. Reclamation made awards to the highest-rated proposals based on the amount of funding available at that time. Reclamation reserves the right to prioritize projects based on availability of funds and to ensure balance among the program objectives listed in the FOA.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Contact Reclamation for the range of time when proposals are approved or disapproved.

Appeals:

Reclamation will, however, provide all applicants with information on why their proposals were not selected.

Award Procedure:

Reclamation will solicit proposals and award funding through a Funding Opportunity Announcement (FOA) process. The FOA will request proposals from public and private sectors that would control salinity based on cost per ton. The proposals will be ranked based on their cost effectiveness for preventing salt from entering the Colorado River system. The ranking would consider risk factors that might affect the project's performance. Upon receipt of applications/proposals by the date identified in the announcement(s), the applications will be reviewed to determine if application/proposal(s) are consistent with requirements identified in the announcements. The application/proposal(s) are reviewed against identified criteria by a Federal technical team of experts, that may include representatives of states as advisors.

Fiscal Year 2015: No Current Data Available Fiscal Year 2016: No information available. Fiscal Year 2017: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

In 1984, the Salinity Control Act was amended to direct the Secretary of the Interior to give preference to units which reduce salinity at the least cost per unit of salinity reduction (or cost-effectiveness). Cost-effectiveness is defined as the Salinity Program's annual cost per ton of salt prevented from entering the Colorado River system. Conceptually, cost-effectiveness is analogous to determining the cost per mile to own and operate a car. That computation combines the annual expenses (loan payments, gas, maintenance, etc.) and divides by the miles traveled each year. The key to understanding this approach is to appreciate that the government evaluates all projects as if the money is borrowed from a loan institution and repaid in annual installments over the life of the project. This economic evaluation principle is required by the "Economic and Environmental Principles Guidelines for Water and Related Land Resources Implementation Studies", March 1983. This method lends consistency in the comparison of non-federally financed alternatives (which must borrow funds) to Federally financed projects. Each proposal will be evaluated by a application review committee in accordance with the following criteria and corresponding percentage weights: (a) Technical merit - those passing will be evaluated further, (b) Cost effectiveness 70 percent of the annual cost for each ton of salt load reduction, expressed in dollars per ton, (c) Performance risk 30 percent of performance risk will evaluate the cost and effectiveness risks of the proposal. More detailed information will be included in each funding announcement or may be obtained from the Salinity Control Program contacts listed above. For Recovery Act projects: The purposes are among others, to quickly and prudently commence activities that preserve and create jobs and to promote economic recovery, and to invest in transportation,

environmental protection, and other infrastructure that will provide long-term economic benefits. To meet these purposes, Reclamation will allocate funds based on the criteria set forth in the Recovery Act and the accompanying conference report, and will target activities that quickly infuse money into the economy.

Fiscal Year 2015: The examples of funded projects include agreements with the University of Texas San Antonio and the Institute of the Great Plains for cataloging and curation of Reclamation museum property; University of Northern Colorado for curation of two sets of human remains from Pueblo Reservoir; Colorado Historical Society for public education efforts; University of Nebraska State Museum for testing sites at Red Willow Reservoir; Kansas State University for cultural resource inventory, evaluation and excavation of sites at Red Willow Reservoir and other Reclamation lands; University of North Dakota for archaeological investigations at Reclamations Shadehill, Jamestown, and Heart Butte Reservoirs and McClusky Canal and producing electronic versions of cultural resource site records; University of Oklahoma for archaeological fieldwork and investigation of unanticipated discoveries; Sam Noble Oklahoma Museum of Natural History and Wichita State University for curation of Reclamation collections and NAGPRA remains; and archaeological fieldwork for unanticipated discoveries; and Wyoming Department of State Parks and Cultural Resources for analysis and development of a restoration plan for the smokestack at the Heart Mountain Relocation Center National Historic Landmark. Fiscal Year 2016: Information not available. Fiscal Year 2017: Information not available.

CRITERIA FOR SELECTING PROPOSALS:

Criteria used for selecting a recipient are based on a balanced and informed review of program needs and sources of information. For example, states have mandatory responsibilities to cooperate with Federal agencies to maintain statewide inventories of cultural resources, so states are sole sourced funds to maintain databases under the various National Historic Preservation Act sections requiring data sharing and cooperation. Indian tribes are often sole sourced because only they can identify properties of religious and cultural concern to tribal members. For other cultural resources activities, a technical proposal, budget proposal, and relevancy to program objectives are required. The specific evaluation criteria for each project will be included in the funding announcement posted on www.grants.gov.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: This program funds collaborative Drought Contingency Plans that will help provide water managers prepare in advance of a drought. For example, the Dolores Water Conservancy District in Colorado will develop a Drought Contingency plan in partnership with the Ute Mountain Ute Tribe Farm and Ranch Enterprise, and the Montezuma Valley Irrigation Company. The plan will include the areas served by the Bureau of Reclamation's Dolores Project, located in southwest Colorado, which provides irrigation water for approximately 36,600 acres of irrigated land, provides municipal and industrial water to the Ute Mountain Ute Tribe, the tribal community of Towaoc, several other towns and cities, and serves downstream fish and wildlife purposes. The Dolores Project suffered severe shortages (25%) from drought in 2013. The plan will include a comprehensive evaluation of mitigation and response actions to reduce water shortages and improve drought resiliency for water users through collaboration with local agricultural districts, tribal farmers, municipal and industrial users, non-governmental organizations, and Federal and state agencies

This program also funds Drought Resiliency Projects that help provide water managers with flexibility during periods of drought. For example, in Arizona, the City of Phoenix, will purchase components for a well as part of an Aquifer Storage and Recovery Well Restoration project at their Deer Valley Water Treatment plant. The City will construct a dual-purpose well that will directly inject under-utilized surface water supplies into the aquifer for later withdrawal during times of drought. The City, which services more than 1.5 million residents, is currently experiencing drought conditions. This project enables the City to maintain a supply of surplus water while offering operational flexibility during times of drought. The City estimates the groundwater recharge to be 2,400 gallons per minute, or approximately 3,874 acre-feet per year. Fiscal Year 2016: No information available. Fiscal Year 2017: No information available.

CRITERIA FOR SELECTING PROPOSALS:

Requests for assistance are approved on a case-by-case basis considering Congressional direction, funding availability, and the following criteria: benefits for health and safety; benefits for fish and wildlife; intensity of drought; impacts if a project is not funded; benefits of funding; availability of other water supplies; non-Federal cost-share contributions; and whether the proposed activity involves Reclamation project water.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: Cost-share cooperative agreements were awarded to a number of non-federal partners, such as states or counties, in an effort to facilitate planning and development of recreation and fish and wildlife facilities on various Bureau of Reclamation water project recreation areas. These projects were identified primarily through existing resource management plans (RMPs), budget availability, and in coordination with managing partners. Many of the projects funded promote active and health youth opportunities on public lands and waters through development and/or expansion of outdoor day-use and camping facilities, water access points to enjoy fisheries, etc. Provided below are just a few of the many examples of cost-share funded projects in Reclamation.

Kansas Parks and Wildlife has embraced a vision to promote opportunities for youth/young adults. A multi-year cost-share project is focused on the development of a kids fishing pond to connect educational and recreational opportunities with kids and public lands. This project area is adjacent to day-use facilities for outdoor education programs, as well as near camping facilities to accommodate family outings. Reclamation partners in Nebraska and South Dakota are improving access and opportunities through the addition of fishing docks and piers, with one project addition for a kids-specific fishing dock to improve access to an existing fishing pond. North and South Dakota managing partners are providing shade shelters for visitors and planting vegetation/trees to improve habitat. Partners in Colorado are providing potable water and addressing critical improvements to camping restrooms and facilities.

Partner agencies with Oklahoma have provided critical support and project work to reduce hazardous fuels through prescriptive vegetation treatments, thereby promoting healthy successional and resilient vegetation layers and minimizing threat from wildland fire to facilities/infrastructure, public visitors and adjoining landowners. Oklahoma and Reclamation partnerships have also engaged youth organizations to build and maintain non-motorized nature trails/bike trails to accommodate increasing demand for diverse recreational opportunities on public lands.

These projects represent some of GP Regions key accomplishments through the use of Title 28 Cost-Share dollars. These and all projects help meet Reclamation goals and objectives identified in resource management planning efforts, and are planned and implemented in cooperation with managing partners. Cost sharing many of these projects leverages federal funds, promotes shared stewardship responsibilities, advances the mission and goals of the agency, while promoting recreation opportunities and access to public lands. Local communities and partners benefit from the added investment in their local economies, and result in increased visitation and tourism dollars.

Fiscal years 2013 and 2014 continued efforts throughout New Mexico, Colorado, and Utah to improve facilities and opportunities for the recreating public. Accomplishments include (1) Colorado (Rifle Gap Reservoir) Completion of accessibility improvements and park maintenance facilities, installation of shade shelters, and construction of additional campsites to accommodate increasing numbers of visitors, (2) New Mexico (Navajo Reservoir) Continued upgrades to aging and inadequate water and wastewater systems and electrical systems upgrades at Cottonwood and Pine sites, installation of accessible fishing piers at Cottonwood Campground, installation of a temporary AIS inspection station, and completion of accessibility improvements at Texas Hole. (3) Utah Completion of planning efforts and start of Phase I recreation rehabilitation program (Steinaker Reservoir), and completion of the redesign and construction of the entrance at Jordanelle Reservoir State Park to alleviate traffic congestion on Highway 40. This included the construction of a new entrance station, widening of entry road, addition of a second traffic lane, installation of accessible parking and a hardened walkway between features. Recreation rehabilitation at Starvation Lake State Park was completed with the entry station relocated closer to the park boundary to better accommodate traffic. The new entry station area includes both manned and self-service pay stations, parking lot and vault toilet.

As a result of a potential turn-back many facilities became in disrepair at Grand Coulee North Dam Park. A new agreements has been signed in 2012 so, continual funds were utilized for O&M and repair public health and safety

structures such as shelter, building, and park facilities. Replace electrical systems and replace dilapidated wood and roof on structures. Howard Prairie Resort was a turn back from 3rd party concession operations. Managing Local partner faces major rehabilitation and repairs so additional cost share funding was used to design and replace the boat marina. Both agreements are on a 5 year plan to cost share to correct identified public health and safety issues. Old restroom with accessible model, accessible parking and access routes continued improvements to the water and wastewater systems at Pine, Sims, and Cottonwood recreation areas (Navajo Reservoir); construction of accessible fishing piers at Cottonwood Campground (San Juan River) improvements to the visitor center at Brantley Lake State Park, New Mexico (completed 2013); phase II rehabilitation of recreation facilities at Starvation Lake State Park in Utah, including expansion of Mountain View Campground to increase capacity to meet demand (completed 2013); activities to begin reconstruction of the entry area at Jordanelle Reservoir, Utah, including new entrance station, widening of road to add a second lane to accommodate traffic volume, accessible parking and hardened walkway between features (2013); There were continued cost-share arrangements with States of Colorado, New Mexico, and Utah to rehabilitate facilities and perform accessibility retrofits, including continued improvements to the water and wastewater systems at Pine, Sims, and Cottonwood recreation areas (Navajo Reservoir); construction of accessible fishing piers at Cottonwood Campground (San Juan River) improvements to the visitor center at Brantley Lake State Park, New Mexico (completed 2013); phase II rehabilitation of recreation facilities at Starvation Lake State Park in Utah, including expansion of Mountain View Campground to increase capacity to meet demand (completed 2013); activities to begin reconstruction of the entry area at Jordanelle Reservoir, Utah, including new entrance station, widening of road to add a second lane to accommodate traffic volume, accessible parking and hardened walkway between features (2013);. CRITERIA FOR SELECTING PROPOSALS:

The Las Vegas Wash Coordination Committee has decided that the SNWA will be the lead agency for receiving funding for this program due to the high costs and types of environmental improvement and enhancement, and ability to maintain restoration projects. The Las Vegas Wash Program plays an important role in environmental and water resource issues in Southern Nevada. Historically, the Las Vegas was an ephemeral stream carrying storm flows from the Las Vegas Valley to Lake Mead and the Colorado River. Urban development over the past 60 years has resulted in the formation of the wetlands that helped remove nutrients from these wastewater flows. As the rate of discharges increased, erosion also increased, gradually destroying the existing natural treatment systems and wildlife habitat and creating a large delta in the Las Vegas Bay of Lake Mead. Accelerating erosion, declining water quality, and loss habitat are some of the more pressing issues. Proposals submitted will be reviewed and awarded based on priority fulfillment of the 44 action items identified in the Plan and the availability of funding appropriations.

Fiscal Year 2015: Since Fiscal Year (FY) 2013, Applied Science Grants for the Desert and Southern Rockies LCCs combined more than \$2.1 million in Federal funding to enhance the management of natural and cultural resources that have a nexus to water resource management. For example, once completed, the funded projects are expected to develop decision support tools and methodologies to address the effects of climate change; develop a decision support tool for incorporating ecological flows into water management models

used for basin-wide water supply planning; develop new biological information about springs and seeps; develop a web-based tool to facilitate conservation planning and inform management decisions related to riparian and wetland species and climate change; develop a tool that can be used to predict the water volume in snowpack and soil moisture response to various forest treatments; and linking forest landscape management and climate change to the conservation of riparian habitat in the Grand Canyon. RELATED PROGRAMS:

15.507 Water 2025

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: Examples of projects funded in FY 2014 include:

Desert LCC: The Environmental Defense Fund (EDF) will use modeling tools and data from the 2014 Minute 319 pulse flow to develop an integrated system that will assist with future pulse flow release experimental determinations. The Minute 319 pulse flow is a temporary release of water to mimic natural spring floods in the Colorado River Delta to study how best to restore native riparian habitat. The new system will integrate data and models such as environmental conditions and designed pulse flow releases with targeted environmental variables to predict the environmental reaction to future pulse flow releases, thereby supporting adaptive management and planning in the future. By linking data and models together into an integrated system, EDF intends to reduce the time required to analyze scenarios and to provide data that would help guide the pulse flow design.

Southern Rockies LCCs: The Museum of Northern Arizona will leverage tools previously developed through its Springs Stewardship Initiative to help resource managers in the southwestern U.S. collect, analyze, report upon, monitor and archive the complex and inter-related information associated with springs and spring-dependent species in the region. Building upon those past efforts, the project will include compilation of existing springs-related information to make the information more readily available online and further development of interactive online maps and climate change risk assessment tools of springs-dependent sensitive plant and animal species. This project builds on an effort funded in FY 2013 to complete similar work for the Desert LCC. Fiscal Year 2016: Information not available. Fiscal Year 2017: Information not available.

CRITERIA FOR SELECTING PROPOSALS:

Specific evaluation criteria will be included in the funding announcements posted on www.grants.gov. All applications will be evaluated using criteria that give priority to a project's technical merit, the relevance to the LCC, dissemination of results to Reclamation and LCC partners, connections to Reclamation activities and exceed the minimum 50 percent non-Federal cost-share requirement.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2015: The primary objective of the Dixie Valley Ground Water Export Study is to determine how much water is available for export from Dixie Valley. The original plan of study included evaluating the feasibility of conveying the water to various points of use within Churchill County, Nevada. It was to be completed in three phases over a 5 year period, beginning in early 2009, concluding in 2014. The first phase included data collection/analysis to develop an understanding of the study areas hydrogeologic framework, ground-water flow, and water quality. The second phase was to include development of groundwater models for estimating hydrologic impacts and analyses of associated economic and environmental impacts. The third phase was contingent on Phase 2 results and would include pipeline design and cost estimating activities. Phase 1 is complete and reports of findings are either published or in publishing. The Phase 2 groundwater modeling is ongoing. The Phase 2 economic and environmental analyses, as well as the Phase 3 design and cost estimating work, will not be completed due to inadequate funds.

Two one-year extensions were requested and granted which postponed completion to January 25, 2016 and a third extension request is pending. The pending extension request is for 3 months and the project will be completed during April 2016. Fiscal Year 2016: No information available. Fiscal Year 2017: No information available.

11.407 Interjurisdictional Fisheries Act of 1986; 15.608 Fish and Wildlife Management Assistance; 15.611 Wildlife Restoration

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: All grant programs funded by the Sport Fish Restoration program leverage the Federal funds by requiring a minimum of a 25 percent cost share, with the exception of the Multistate Conservation Grant, which does not require a cost share. While the Sport Fish Restoration grant program began over 65 years ago, its core value is a cooperative partnership of Federal and State agencies, anglers, boaters, and industry that provides significant benefits to the public and our nations natural resources. Moreover, the program is central to the Services mission of working with others to conserve, protect, and enhance fish, wildlife, and plants and their habitats for continuing benefit of the American people.

The Sport Fish Restoration program provides a stable Federal funding source for State fish and wildlife agencies. Examples of the types of activities planned by State fish and wildlife agencies include:

The Texas Parks and Wildlife Department (TPWD) will use its aquatic education grant and program to recruit, train, and retain a Volunteer Network of at least 500 volunteers that teach the Angler Education Program and assist at school and community outreach events that will reach approximately 35,000 Texan anglers and potential anglers. TPWD provides resources for instructors and the general public, including a Tackle Loaner program.

The Kentucky Department of Fish and Wildlife Resources (KYDFW) is developing the Lake Cumberland Tailwater into one of the best trout fisheries in the South. They stock various strains of brown trout and evaluate stocking success and growth rate. Fall electrofishing sampling evaluates population levels. They stock about 20,000 rainbow trout per month into the Cumberland Tailwater from April through November. Recently, KYDFW purchased shoreline along the Tailwater to improve angler access to one of the best fishing areas. These Sport Fish Restoration efforts provide anglers from Kentucky and other States with quality trout fishing.

The South Carolina Department of Natural Resources produces and stocks 500,000 fingerling and catchable size rainbow, brown, and brook trout per year in cold water rivers, streams, lakes, and ponds across the state. As many as 50,000 trout anglers contribute approximately \$18 million to the states economy as a result of trout angling in South Carolina.

In Massachusetts, a fishing pier was needed in Oak Bluffs on Marthas Vineyard - a recreational fishing hotspot. The pier project was fully permitted, but required funding. At the same time, a new state salt water fishing permit was implemented that dedicated a minimum of 30% of each years proceeds to recreational fishing access. The Massachusetts Division of Marine Fisheries and the Massachusetts Office for Boating and Fishing Access partnered with the Services WSFR Region 5 (Northeast) Office to make the Oak Bluffs Recreational Fishing Pier a reality. A huge success, recreational anglers have already begun using the newly completed pier - even before the ribbon cutting ceremony. The Americans with Disabilities Act (ADA) compliant sport fishing pier extends 317 feet from the seawall into Nantucket Sound and includes a 60 foot long section parallel to the shoreline. Sport Fish Restoration monies allowed us to complete a greatly needed, handicapped accessible, recreational fishing access pier in one of the states top tourist destinations.

In Alaska, the Alaska Department of Fish and Game (ADF&G), uses Sport Fish Restoration funds to contribute to Chinook salmon research across the state including population assessments on rivers in Southeast Alaska. Chinook salmon management and research in Alaska focuses on spawning and juvenile abundance estimates. Spawning abundance has been estimated in several indicator stocks in Southeast Alaska since the early 1970s and estimates of juvenile abundance first began in the early 1990s. Combined, these programs produce estimates of marine survival, total harvest, harvest rate, and total run which facilitate abundance-based management as dictated through the Pacific Salmon Treaty.

Also in Alaska, the William Jack Hernandez Sport Fish Hatchery sits on three acres and replaces the ADF&Gs Elmendorf and Ft. Richardson hatcheries. At full capacity, it will increase historic stocking levels by 50 percent. All rearing tanks at this facility are located indoors. Hatchery programs include coho and Chinook salmon smolt, Chinook salmon catchables, rainbow trout catchables, Arctic char catchables, grayling and lake trout in addition to rainbow and Arctic char brood stock. Fish produced at this hatchery will be stocked in over 200 locations, contributing to a large number of fisheries throughout the state and annually provide approximately 400,000 angler days of fishing time for residents and visitors to the state.

Fiscal Year 2017: Program has not yet selected projects for funding. Program anticipates funding projects that increase sport fishing and boating opportunities through wise investment of excise tax dollars in sport fishery development, research, and management projects. Fiscal Year 2016: No information available. Fiscal Year 2017: No information available.

CRITERIA FOR SELECTING PROPOSALS:

The States, the District of Columbia, Commonwealths, or territorial agencies having lead responsibility for the management of their fish resources must submit the projects. If approved, projects must meet the basic criteria outlined in the regulations and the U.S. Fish and Wildlife Service Manual.

RELATED PROGRAMS:

15.605 Sport Fish Restoration Program; 15.631 Partners for Fish and Wildlife

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: Increased native fish population numbers and expanded range are priority activities for delisting threatened and endangered species and preventing additional species listing. Habitat degradation and fragmentation, and invasive species have been identified as leading causes for native fish population decline and range contraction. Impassable road crossing restricts native fish passage and excludes them from habitats upstream of the crossing. This project worked with the Dickinson County, KS, Public Works Department and successfully restored fish passage at 649 Paint Road where it intersects the Lyons Creek tributary, Dickinson County, KS. Evidence of fish passage objectives included spanning the creek with a structure that exceeded bank-full widths. Constructing channel spanning structures that exceed bank-full width were documented to facilitate fish passage.

The AIS Programs funding for the State and Interstate ANS Management Plan Grant Program funded a wide variety of projects to minimize the establishment, spread, and impacts of aquatic invasive species as outlined in the States approved management plans. Project examples included invasive mussel monitoring in several western states, watercraft inspection and decontamination projects in Nebraska and Wyoming, and the expansion of South Dakotas Least Wanted public awareness campaign. Similar types of projects will be funded in future years based on the objectives, strategies, and actions described in the ANSTF-approved plans. Fiscal Year 2016: Program has not yet selected projects for funding. Program anticipates funding projects that support the native aquatic species restoration and preservation through habitat restoration, science, and monitoring, and projects that reduce threats to their survival. Fiscal Year 2017: Program has not yet selected projects for funding. Program anticipates funding projects that support the native aquatic species restoration and preservation through habitat restoration, science, and monitoring, and projects that reduce threats to their survival.

RELATED PROGRAMS:

15.605 Sport Fish Restoration Program; 15.615 Cooperative Endangered Species Conservation Fund; 15.626 Hunter Education and Safety Program

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: Oregon has a Statewide Habitat Management grant that covers habitat restoration efforts in seven distinct Watershed Districts (Deschutes, John Day, Malheur, Klamath, Rogue, South Willamette, and Umpqua). Goals of the project are to: (1) Maintain, restore, or enhance wildlife habitat on public and private lands to optimize wildlife populations, while paying particular attention to listed species; (2) Evaluate, protect, or enhance existing habitat conditions or restore lost habitats on private and public lands; (3) Assist landowners by providing resources to restore and improve fish and wildlife habitat; and (4) Provide technical advice and assistance to local, State, and Federal agencies regarding land-use activities and proposed developments to promote conservation of fish and wildlife habitats.

The Alaska Department of Fish and Game (ADF&G) will be funding a project titled How do regenerating burns influence moose populations and harvest in Interior Alaska? Moose provide a considerable food resource to Alaskans and moose harvest also contributes to the economy of Alaska. The State of Alaska recognizes the importance of moose to its residents by including the species in laws designed to elevate harvest through intensive management. In accordance with this law, ADF&G developed plans to increase moose densities through habitat enhancement. However, no comprehensive plan exists for utilizing naturally-occurring burn scars to increase moose density and maximize harvest.

Indiana will develop the Willow Slough Shooting Range, replacing a shooting in Newton County using \$2 million of Section 4 Hunter Education funds. A modern range will enhance the safety of the range while accommodating the demand. Development of this range is expected to increase the number of hunters and recreational shooters using the facilities to 15,000 users per year. Safety, customer service, and accessibility enhancements will all contribute to customer satisfaction. Fiscal Year 2016: Idaho Department of Fish and Game (IDFG) is researching the population drivers of pronghorn in various habitat types including native shrub-steppe, altered shrub-steppe, and agricultural communities. This project will evaluate factors affecting pronghorn herds in eastern Idaho, and develop a reliable, cost-effective technique for monitoring status and trend of pronghorn herds in Idaho. Pronghorn will be captured, fitted with radio collars, have their body condition assessed, and be monitored with telemetry. Habitat quality, nutritional condition of vegetation, neonatal survival and cause specific mortality will be assessed. Monitoring methods will focus on the vital rates deemed most likely to influence populations. This information is necessary for conservation and management decisions, including hunting seasons, habitat improvement efforts, and technical assistance to public and private landowners.

Oregon has a Statewide Habitat Management grant that covers habitat restoration efforts in seven distinct Watershed Districts (Deschutes, John Day, Malheur, Klamath, Rogue, South Willamette, and Umpqua). The areas managed under this grant are designed to provide year-round habitat for wildlife species and to reduce and/or minimize agricultural damage and depredation to surrounding communities by wildlife. By coordinating with agencies and private landowners to implement and administer the proposed activities, the general public can benefit from healthier habitats for many species.

The Indiana Department of Natural Resources, in partnership with Hamilton County Parks and Recreation Department, recently completed construction of the Koteewi Park Archery Range. The facility includes beginner archery ranges with 10-25 yard targets, advanced archer ranges with up to 90 meter targets, practice shooter ranges, and a 3-D target shooting trail. The facility provides a safe environment to learn about archery, shooting sports, and bow hunting that serves the local, regional, and national communities. This range is one example of many ranges that have been constructed throughout the country with Wildlife Restoration funds.

The Arkansas Game and Fish Commission (AGFC) is renovating 11 Wildlife Management Areas to benefit waterfowl. In addition to replacing and upgrading pumps and pipeline for increased water management ability, AGFC is also establishing three new moist-soil units and expanding or renovating at least 20 more. More than 1,300 acres of waterfowl habitat will be created or improved and the ability to control water levels greatly enhanced on thousands of additional acres.

The Indiana Department of Natural Resources, in partnership with Hamilton County Parks and Recreation Department, recently completed construction of the Koteewi Park Archery Range for a cost of \$715,000. The project took 3 years to complete. The facility includes beginners archery ranges with 10-25 yard targets, advanced archer ranges with up to 90 meter targets, practice shooter ranges, and a 3-D target shooting trail. The facility provides a safe environment to learn about archery, shooting sports and bow hunting that serves the local as well as the regional and national community. This range is one example of many ranges been constructed in Region 3 with Wildlife Restoration funds. Fiscal Year 2017: The Program has not selected projects for funding. The Program anticipates funding projects to restore, conserve, manage and enhance wild birds and mammals and their habitats and to provide hunter development and safety programs.

CRITERIA FOR SELECTING PROPOSALS:

The State, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

15.605 Sport Fish Restoration Program

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: Transient Boater Facility, Owensboro, Kentucky - Although the need for additional transient boating facilities throughout the Ohio River Valley is great, infrastructure is especially needed between Louisville and Paducah to help serve traveling boaters navigating the Great Loop. The Kentucky Department of Fish and Wildlife Resources will help the City of Owensboro address this need by constructing 500 linear feet of ADA-accessible dock space for eligible users. This facility will also help to establish Owensboro as a destination port and help provide an economic lift to the City and its businesses. Federal Funds Requested: \$1,500,000; Non-Fed Match: \$3,252,542; Total: \$4,752,542

City Marina Dinghy Docks, City of Fort Pierce, Florida - The Florida Fish and Wildlife Conservation proposes to assist the City of Fort Pierce with design and construction of a dingy dock that would serve traveling boaters, providing access to supplies as well as other cultural and historic attractions in the City.

Despite a large publicly-owned marina and projected increase in the number of cruising boaters in the area, Ft. Pierce does not have any dinghy docks. The proposed dock will enable boaters traveling the Intracoastal Waterway to safely access all the various amenities the City has to offer.

Federal Funds Requested: \$190,688; Non-Fed Match: \$235,037; Total: \$425,725

Point Hudson Jetty Replacement, City of Port Townsend, Washington - The Washington State Department of Natural Resources Office of Recreation and Conservation proposes to assist the City of Port Townsend to construct a new breakwater at Point Hudson Marina. Proposed improvements will help the City maintain 51 transient slips which serve boaters traveling between Puget Sound and the Strait of Juan de Fuca. The existing 600-foot breakwater is in disrepair and does not adequately protect the public marina from the winds and waves of Port Townsend Bay. Federal Funds requested: \$1,500,000; Non-Federal match: \$1,461,313; Total: \$2,961,313. Fiscal Year 2016: Program has not yet selected projects for funding. Program anticipates funding projects that include: construction of tieup facilities for nontrailerable, recreational vessels of 26 feet or greater in length; development of amenities for eligible boaters, such as restrooms or other facilities; development of utilities or other services for eligible vessels. Fiscal Year 2017: Program has not yet selected projects for funding. Program anticipates funding projects that include: construction of tieup facilities for nontrailerable, recreational vessels of 26 feet or greater in length; development of amenities for eligible boaters, such as restrooms or other facilities; development of utilities or other services for eligible vessels.

CRITERIA FOR SELECTING PROPOSALS:

The designated State, the District of Columbia, Commonwealth, or territorial agency must submit proposals to participate in this program. The purpose of these projects must be consistent with the purpose and conditions of the Act. The criteria for selecting proposals are based upon the extent the proposed project: contributes to construction of tie-up facilities according to the State's, the District of Columbia's, Commonwealth's, or territory's approved plan; contributes to public/private partnerships; implements innovative approaches to increasing availability and use of tie-up facilities; includes private, local, or other State, District of Columbia, Commonwealth, or territorial funds in addition to the 25 percent match; is cost efficient; provides a significant link to prominent destination way points such as those near cultural or natural sites; provides access to recreational, historic, cultural, natural, or scenic opportunities of local, regional, or national significance; provides significant economic impacts to a community; and includes multistate efforts that result in coordinating location of tie-up facilities.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: Example of US Standard Grant project, Central Flyway Migration Corridor- This effort brings together an extensive list of partners to achieve diverse wetland conservation results at a landscape scale. The grantee will conserve 4,279 acres and enhance 840 acres of the conserved land. The project will permanently protect 382 acres of wetlands, much of which will be added to the Talmo Marsh Wildlife Management Area. Conducting 15 individual projects to restore and enhance wetland habitat conditions, the grantee will also plant new vegetation to support foraging birds during spring migration. Mallard, pintail, and White-Fronted Goose populations greatly depend on these habitats in the Rainwater Basin, as do shorebirds. Fiscal Year 2016: Example of US Standard Grant project, Lowcountry Protection II, South Carolina. The proposal is located in the Atlantic Coast Joint Ventures ACE Basin and South Lowcountry Waterfowl Focus Areas and significantly contributes to the goals of national and regional bird conservation plans. This phase will protect 3,779 acres including 646 acres of palustrine emergent wetlands, 88 acres of estuarine emergent wetlands, 949 acres of palustrine forested wetlands and 2,015 acres of associated forested uplands to benefit breeding, migrating and wintering birds in accordance with the recommendations of South Atlantic Migratory Bird Initiative. This proposal will complement a growing protected landscape where substantial federal investments including 19 standard NAWCA grants in the past ten years have created and expanded public ownership, restoration and management throughout the Lowcountry. Two separate acquisition tracts, consisting of 1,761 and 2,018 acres, are located within a two county area of south coastal South Carolina. The closest U.S. Fish and Wildlife Service (Service) facility is the Savannah River National Wildlife Refuge, located approximately 15 air miles from the southernmost tract. These tracts lie outside the approved boundary of the refuge. Non-Service ownership of the proposal tracts eliminates the need for increased staff for separate refuge units and reinforces local participation in the long-term acquisition planning/management of this region. Fiscal Year 2017: Program has not yet selected projects for funding. Program anticipates funding projects that protect and improve habitat for migratory birds and other wetland-associated species. More examples of NAWCA projects can be found at <http://www.fws.gov/birds/grants/north-american-wetland-conservation-act.php>.

CRITERIA FOR SELECTING PROPOSALS:

The Council selects proposals based on factors given in Section 5 of the North American Wetlands Conservation Act, results of site visits, available funds and other factors deemed important to meeting Act objectives.

Service Office to determine any Regionally specific deadlines.

Range of Approval/Disapproval Time:

Approximately 30 days.

Appeals:

Regional Directors will consider the differences of opinion about eligibility of proposals. Final determination rests with the Director of the U.S. Fish and Wildlife Service.

Renewals:

Grantees may renew projects on an annual basis if justifiable and if funds are available.

Formula and Matching Requirements:

Statutory Formula: Yes. States and insular areas are apportioned funds for Hunter Education - Section 4 (c) (traditional funds) and Hunter Education - Section 10 (enhanced funds). Each state receives an annual apportionment for Section 4 (c) and Section 10 funds based their population compared to the total U. S. population with no state receiving more than 3 percent or less than 1 percent. Insular areas receive 1/6 of 1 percent.

Revenues from manufacturers' excise taxes collected on pistols, revolvers, bows, arrows, archer accessories and arms and ammunition are deposited to the Wildlife Restoration Account. 1/2 of the excise taxes collected on pistols, revolvers, bows, arrows and archer accessories are used to fund Section 4 (c). After funding Section 4 (c), \$8 million is deducted from the Wildlife Restoration Account to fund Section 10.

The funds remaining in the Wildlife Restoration Account fund WSFR administration, the Multistate Conservation Grant Program and the Wildlife Restoration Program.

Section 4 (c) funds may be used for hunter education projects or wildlife restoration projects. If all Section 4 (c) funds apportioned in a fiscal year are obligated for hunter education projects, the Section 10 funds apportioned in the same fiscal year may be used for either hunter education or wildlife restoration projects. However, if all Section 4 (c) funds apportioned in the fiscal year are not obligated for hunter education projects, Section 10 funds must be used for hunter education.

Matching Requirements: Yes. Grant funds may be disbursed to States for up to 75 percent of the total cost of a project. Grant funds may be disbursed from 75 to 100 percent of the total project costs to the Commonwealths of Puerto Rico, Northern Mariana Islands and the territories of Guam, the U.S. Virgin Islands, and American Samoa. Each Regional Director decides on the specific Federal share between 75 and 100 percent based on what he or she decides is fair, just, and equitable.

MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Any funds not obligated within one year by a State, Commonwealth, or territorial fish and wildlife agency revert to the U.S. Fish and Wildlife Service and reapportioned to States, Commonwealths, and territories that obligated their Section 4(c) Hunter Education and Safety apportionment on eligible hunter education and safety activities. See the following for information on how assistance is awarded/released: Funds are disbursed to recipients as requested and in accordance with 2 CFR 200, Subpart E-Cost Principles, or as otherwise prescribed in program-specific legislation or special award terms. Program will include any special payment terms and conditions in the notice of award.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: The Idaho Department of Fish and Game Hunters Education, Bowhunters Education, and Trappers Education programs are designed to educate Idaho hunters and trappers about safe hunting and trapping practices, game management, hunting regulations, and to be responsible, ethical sportsmen and sportswomen. The total cost is \$2.5 M (\$1.8M Federal; \$630,000 non-Federal). This grant utilizes both Section 4 and Section 10 HE funds.

The North Carolina Wildlife Resources Division will partnership with public, private and homeschool organizations to implement the National Archery in Schools Program (NASP) curriculum to teach archery to students in grades four through twelve. All organizations will also work together to train teachers as certified archery instructors and instructor-trainers. Total cost \$108,777 (\$81,583 Federal; \$27,194 non-Federal).

The Georgia Wildlife Resources Division will fund their Range Enhancement and Hunter Development Program. There is a need to introduce youth people to the shooting sports through the School system in an attempt to reverse the decline in hunting license sales. To accomplish this, students and instructors need to be trained properly in the sport of archery to guarantee they participate in the NASP in a safe and ethical manner. Annual events held at various locations statewide will be expanded and additional personnel, equipment and supplies will be provided to support these events. Total cost \$310,000 (\$230,000 Federal; 80,000 non-Federal). Fiscal Year 2016: In Kentucky, educators and others were certified to teach archery and safety skills to students in grades 4 through 12. More than 550 schools conducted archery programs during regular school hours with 105,398 students. The National Archery in the Schools Program trained 555 new archery instructors in 64 Basic Archery Instructor training classes, including agency staff at three Kentucky Department of Fish and Wildlife conservation camps.

California Department of Fish & Wildlifes Advanced Hunting Clinics focus on the "how-tos" of hunting. The series includes sessions on how to hunt turkey, upland game, waterfowl, and big game. Topics covered in each clinic include type of firearm, ammunition, importance of sighting in the firearm, gauging distance, scouting, tracking, field dressing, shoot-don't shoot scenarios, hunter ethics, landowner-hunter relationships, conservation, and safety. The goal of this series of hunting clinics is to develop ethical, conservation-minded, successful hunters through education...taking the hunter a step beyond the basic hunter education course. Total costs: \$163,609 (\$122,70 Federal, \$40,902 State)

The Alaska Department of Fish and Game continues to expand hunter education, archery and shooting sports throughout Alaska and often in remote locations. Through these efforts, the National Archery in the Schools Program (NASP) has grown from 10 to 145 schools statewide. HIT staff traveled to the Pribilof Islands, located 4 hours by plane west of Anchorage in the Bering Sea near Russia, to successfully complete the furthest west Hunter Education class taught in North America. Total cost \$106,560 (\$79,920 Federal, \$26,640 non-Federal).

The South Carolina Department of Natural Resources (SCDNR) Shooting Sports Program aims to expand the National Archery in the Schools Program and the SC Scholastic Clay Target Sports by providing more opportunity for young sportsmen to participate in shooting sports. SCDNR staff train approximately 30 teachers a year, who will incorporate Junior Olympic Target Archery education into their curriculum and they continue to support and train young clay target shooters, with over 40 teams already formed. Total cost \$234,020 (\$175,515 Federal; \$58,505 non-Federal). Fiscal Year 2017: The Program has not yet selected projects for funding. The Program anticipates funding Section 10 Enhanced Hunter Educational projects and activities that are eligible each year.

CRITERIA FOR SELECTING PROPOSALS:

The State, Commonwealth, or territory agency having responsibility for the management of their resources must submit the projects. The State, Commonwealth's, or territory's wildlife resources must submit the projects. The State, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

15.605 Sport Fish Restoration Program; 15.611 Wildlife Restoration

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: AFWAs project titled, National Fish Habitat Action Plan Implementation and Promoting Strategic Fish Habitat Conservation through Regionally-coordinated Science and Collaboration continues to coordinate regional activities among various Fish Habitat Partnerships (FHP). The project is compiling biological and process-level information on fish habitats to meet FHP science needs and supplement the national fish habitat assessment; establish new or improved strategic goals, objectives, and priorities for conserving fish species and habitats; expand the scope of engaged partners; and, promote best management practices for implementing habitat conservation actions conservation outcomes produced collectively by Fishery Habitat Partnerships.

The American Sportfishing Association will continue the project, Boosting Fishing Participation by Boat Owners. The objectives are to determine how the boating and sportfishing communities can increase efforts to help recruit and retain anglers and to maximize days of participation and boost license sales. This will be accomplished by mining existing license and boat registration data for correlations between boat ownership and angling, including avidity, churn rates, barriers to participation and other issues identified by states and industry.

The National Shooting Sports Foundation (NSSF) continues their project titled, Hunting, Fishing, and Sport Shooting Recruitment and Retention: A Practitioner's Guide. The major objective of this project is to provide the fish and wildlife community with a single volume handbook of the most important and up-to-date recruitment and retention research and information. The proposed project proceeds from the understanding that a tremendous amount of new research, data, lessons, and best practices have been produced by the fish and wildlife community within the past several years. Fiscal Year 2016: The Western Association of Fish and Wildlife Agencies will begin a project titled, Crucial Habitat Assessment Tool (CHAT), providing GIS-based data, mapping and analytics for crucial habitats and species throughout the West. CHAT represents an unprecedented collaborative effort by 16 western states to create a cohesive, web-based mapping tool prioritizing important habitats for wildlife, including species of concern as well as species of economic and recreational importance. The CHAT program covers 58% of the U.S. land base, providing a significant benefit to the nations natural resources, with opportunities to increase that percentage to cover more or all of the United States, and potentially Canada.

The Max McGraw Wildlife Foundation will begin a project titled, Recruitment of Hispanic Hunters: Using a Case Studies approach to gain insights into Hispanic values toward wildlife, and motivations and participation in hunting. This project will use case study interviews of recently recruited Hispanic hunters to gain insight into their transition pathway from a non-hunter to a hunter. The case studies developed will examine key variables regarding processes within the Recruitment, Retention, and Reactivation (R3) model and values associated with wildlife and public trust. Development and adoption of successful hunter recruitment and retention programs under the R3 model depends on a detailed understanding of the model and how individuals specifically transition from a non-hunter to a consistent license-buying hunter. This case study approach will serve to inform specific recruitment efforts for Hispanics and also improve our understanding of how any demographic or minority may transition through the R3 model and ultimately what shapes their pathway into hunting. Six to nine states from across the U.S. will be selected based on available license data to ensure a range of geographic areas and percentage of Hispanic individuals per capita.

The Archery Trade Association (ATA) is beginning a project titled, Diversifying Outdoor Education: Translate Explore Bowhunting into Spanish to Reveal an Untapped Market. The ATA wants to provide state wildlife agencies with the educational program Explore Bowhunting in Spanish. Explore Bowhunting is a unit-based educational curriculum that teaches the basic skills of bowhunting. Translating and distributing this one program will allow state 28 agencies to begin to tap into a market that has been given little attention over the years. By supplying state wildlife agencies with Explore Bowhunting in Spanish, we can begin to open hunting opportunities to Hispanic communities and value this demographic as a viable recruitment effort. By removing, at least this one barrier, we can begin

to educate entire families on our hunting heritage. Fiscal Year 2017: The Program has not yet selected projects for funding. The Program anticipates funding projects that address species or habitat research activities, hunting and fishing recruitment and retention information collection, aquatic or hunter education activities, conservation planning, outreach and coordination.

CRITERIA FOR SELECTING PROPOSALS:

Projects will be reviewed and evaluated for scope, significance, feasibility, and cost effectiveness. In addition, projects must address one or more focus areas as described in the National Conservation Needs established annually by the Association of Fish and Wildlife Agencies (AFWA).

15.631 Partners for Fish and Wildlife

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: Colonial Waterbird Rookery Enhancement Gulf of Mexico, Texas

In an effort to reverse population declines, the Coastal Program is working with the National Audubon Society to enhance colonial waterbird rookeries. The Coastal Program conducted rookery surveys and provided management recommendations, which resulted in the enhancement of over 50 acres of habitat. The Coastal Program also assessed the nesting success of black skimmer and coordinated the annual Rookery Island Trash Cleanup. The National Audubon Society implemented the management recommendations, including installing nesting platforms, managing vegetation to increase ground nesting, controlling predators, and promoting public awareness of waterbird habitat

Hurricane Sandy Recovery Dorchester County, Maryland

In the fall of 2012, storm surges from Hurricane Sandy damaged coastal ecosystems along the Nanticoke River in Maryland. This allowed the expansion of non-native phragmites (*Phragmites australis* subsp. *australis*), which is an invasive, perennial grass that is a serious threat to the wetland plants and animals because it aggressively displaces native plants and provides minimal habitat or food for native wildlife. The Coastal Program, Maryland Department of Natural Resources, and the Delmarva Resource Conservation and Development Council partnered to restore 2,050 acres of degraded coastal marshes along the Nanticoke River by eradicating non-native phragmites using aerial spraying of pesticides. This restoration also protects 3,000 acres of adjacent salt marsh from the threat of phragmites. The Coastal Program planned and managed this coastal resiliency project - prioritizing restoration areas, acquiring funds through the Department of Interior's Hurricane Sandy Coastal Resiliency Grant, and coordinating outreach to the local community and nearly 100 landowners

Monarch Schoolyard Habitat Simi Valley, California

The Coastal Program worked with the Simi Valley Adventist Church School to enhance 1.3 acres of upland habitat in Ventura County, California. The project is located in Simi Valley, which is part of the Greater Los Angeles Area. Simi Valley is surrounded by the Simi Hills, which are an important wildlife corridor

between the Santa Monica Mountains to the Santa Susana Mountains.

Working with the Coastal Program, the students decided to provide habitat for a number of native species, including monarch butterfly, western fence lizard, Anna's hummingbird, sphinx moth, California fuchsia, white sage, and coyote bush. The Coastal Program worked with teachers and students to develop an enhancement plan and to plant the habitat. The Coastal Program also provided presentations to students on native habitats and wildlife. The students are maintaining the schoolyard habitat and monitoring wildlife use. Fiscal Year 2016: The Program has not yet selected projects to support. The Program anticipates funding projects that help protect and restore fish and wildlife habitats that benefit Federal trust species and declining species such as monarch butterflies. Fiscal Year 2017: The Program has not yet selected projects to support. The Program anticipates funding projects that help protect and restore fish and wildlife habitats that benefit Federal trust species.

CRITERIA FOR SELECTING PROPOSALS:

All projects must benefit Federal trust species and be cost effective. Project selection occurs at the field level. See the annual "Notice of Availability of Federal Assistance" in <http://grants.gov> for more details.

15.630 Coastal Program

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: Endangered Houston Toad Bastrop County, Texas
The endangered Houston toad is dependent upon a healthy understory with diverse ground cover a habitat feature that is now lacking as the Yaupon trees block canopy sunlight. This project mechanically thinned 45 acres of yaupon thickets, reintroduced fire via prescribed fire and implemented a strategic grazing plan, which now allows sunlight to reach the forest floor, allowing native grasses and forbs to rebound. Partners Program staff provided technical and financial assistance: project design and development, implementation, prescription of follow-up treatments, coordination with interagency partners and compliance with federal regulations.
Monarch Butterfly Conservation Initiative, Heltonville Elementary Outdoor Classroom Lawrence County, Indiana
Partners Program biologists coordinated and assisted 100 students and 20 staff to establish a two acre monarch waystation. The schoolyard habitat will host outdoor education classes to educate students on how monarchs and other insects help the natural environment. The Partners Program provided technical and project design assistance, native grass and forb seed and plugs, and educational signage for the site focusing on monarchs and other pollinators.
Leaf Beetles to Treat Purple Loosestrife Mercer County, West Virginia
Galerucella beetles are a proven safe and effective biocontrol that reproduces and feeds on the purple loosestrife (Lythrum salicaria) plant. The Fish and Wildlife Service and the West Virginia Department of Agriculture enhanced 10.9 acres of riparian wetland using a 10-year landowner agreement. The Partners Program provided funding to purchase 3,000 Galerucella beetles. The project benefits two known populations of Federally threatened Virginia

meadowsweet plant. Fiscal Year 2016: The Program has not yet selected projects to support. The Program anticipates funding projects that help protect and restore fish and wildlife habitats to benefit Federal trust species and declining species such as monarch butterflies. Fiscal Year 2017: The Program has not yet selected projects to support. The Program anticipates funding projects that help protect and restore fish and wildlife habitats that benefit Federal trust species.

CRITERIA FOR SELECTING PROPOSALS:

All projects must benefit Federal trust species, involve on-the-ground habitat restoration, and be cost-effective. Specific criteria for reviewing and ranking projects were established in the national Partners policy, at <http://www.fws.gov/policy/640fw1.html>. The program gives high priority to proposed projects that benefit the National Wildlife Refuge System, species at risk, conserve globally or nationally imperiled habitats; and reduce habitat fragmentation. RELATED PROGRAMS:

15.623 North American Wetlands Conservation Fund

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: Shorebird Conservation in Brazil and Delaware Bay Project partners will address key conservation knowledge gaps and empower proactive conservation planning and action by delineating critical wintering habitats for 8 shorebird species, mapping areas most threatened by shrimp farming, and translating all products into Portuguese to introduce the work to key Brazilian biologists and conservation policy specialists. The companion match-funded project restored 1.4 miles of Delaware Bay beach stopover habitat for the same populations of shorebirds wintering in Brazil. Benefitted species include willet, whimbrel, ruddy turnstone, red knot, sanderling and short-billed dowitcher.

Implementing Golden-cheeked Warbler Conservation Plan in Chiapas II Project partners will focus on reducing pressure on habitats for the golden-cheeked warbler due to illegal logging and deforestation in the Highlands of Chiapas. This region has one of the most abundant wintering populations of the species in Mexico. Using grant and match dollars, partners will involve local communities and governments in developing forest demonstration models for sustainable management practices, a regional strategy for reducing deforestation and an education program for teachers and children. Additionally, partners will study habitat use by the golden-cheeked warbler and provide recommendations to forest managers to benefit the species.

Saving Valles Centrales: Securing Grasslands Connectivity Grasslands provide important habitat for several species of neotropical migratory birds, such as Bairds sparrow, lark bunting and Spragues pipit. In Valles Centrales of Chihuahua, Mexico, grasslands are being converted to croplands at a high rate. This project will prevent further grassland loss by creating three private reserves of nearly 30,000 acres dedicated to sustainable cattle ranching. Fiscal Year 2016: Projects not yet selected. Program expects to fund 25-35 awards to support public-private partnerships carrying out projects in the United States, Canada, Latin America, and the Caribbean that promote the long-term conservation of Neotropical migratory birds and their habitats through: 1) Protection and management of neotropical migratory bird populations; 2) Maintenance, management, protection, and restoration of neotropical migratory bird habitat; 3) Research and monitoring; 4) Law enforcement; and 5) Community outreach and education. Award Procedure:

For the Monitoring Program, an inter-agency technical review committee evaluates proposals, and, for those selected for further consideration, subsequently the full investigation plans. The committee develops a draft monitoring program from the highest priority projects, based on their technical review and available funds. The draft monitoring plan is reviewed by ten regional advisory councils and the public. An inter-agency staff committee reviews all recommendations, and provides recommendations. The Federal Subsistence Board selects projects for the Monitoring Plan taking into account all recommendations and comments. Funding of the Monitoring Plan is administered by the Office of Subsistence Management (OSM).

For the Partners Program, an internal review is conducted to evaluate proposals and make recommendations for funding. The evaluations are based on the criteria outlined in the request for federal assistance. The proposals are ranked and the OSM Assistant Regional Director selects proposals that best support the program within available funding. Once a Monitoring Program project or Partners Program position is selected for funding, a funding instrument, i.e., notice of award, between Fish and Wildlife Service and the recipient is drafted by the OSM. The award is processed by OSM through the contracting office and sent to the recipient for signature. The award is considered executed when signed copies of the agreement are received from the recipient and the contracting office has obligated funds to the agreement. The awards are administered by OSM.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: Project 14-253 Customary Trade in the Upper Yukon River. This anthropological / ethnographic study is documenting the historic and contemporary practices of customary trade in upper Yukon River communities, with particular attention to understanding the nature and scope of customary trade and its role in a larger continuum of exchange practices. Fiscal Year 2016: Project 16-302 Salmon River of the Pitka Fork Weir. Funds under this award are utilized to operate a weir on the Salmon River of the Pitka Fork in the Kuskokwim River basin to index Chinook salmon (*Oncorhynchus tshawytsch*) escapement into the headwaters of the Kuskokwim River, upriver from McGrath. Fiscal Year 2017: Program has not yet selected projects for funding. Program anticipates funding projects that address identified issues and information needs, and that have a direct association to a Federal subsistence fishery.

CRITERIA FOR SELECTING PROPOSALS:

For the Monitoring Program, each proposal is evaluated using the following five criteria: (1) Strategic Priorities: Studies must be responsive to identified issues and information needs. All projects must have a direct association to a Federal subsistence fishery, and either the subsistence fishery or fish stocks in

question must occur in waters within or adjacent to Federal public lands; (2) Technical and Scientific Merit: Technical quality of the study design must meet accepted standards for information and collection, compilation, analysis, and reporting. Studies must have clear objectives, appropriate sampling design, correct analytical procedures, and specified progress and final reports; (3) Investigators Ability and Resources: Investigators and their organizations should have demonstrated technical and administrative expertise to complete prior studies, or have co-investigators or appropriate partnerships with other organizations to meet all requirements of the study; (4) Partnership-Capacity Building: Studies must include appropriate partners and contribute to building capacities of rural organizations, local communities, and residents to participate in fisheries resource management. Investigators and their organizations should be able to demonstrate the ability to maintain effective local relationships and a commitment to capacity building and; cost benefits. (5) Applicants cost/price proposal will be evaluated for reasonableness. For a price to be reasonable, it must represent a price to the government that a prudent person would pay when consideration is given to prices in the market. Normally, price reasonableness is established through adequate price completion, but may also be determined through cost and price analysis techniques.

For the Partners Program, each proposal is evaluated using the following equally weighted criteria: (1) Each project must have direct linkage to Monitoring Program projects; (2) Ability to successfully implement program identified under section IV, ii, Content and Form of Application, Describe the Program; (3) Strategic priority and past performance of the Monitoring Program projects identified in the proposal; (4) Letters of support from tribal and rural organizations, government agencies, project investigators, and schools/universities; (5) Annual and total cost of the proposal, including use of in-kind or matching contributions that either decrease cost or expand support for implementing the Partners Program; (6) Past performance on implementing Monitoring Program projects; (7) Past performance on current or past agreements with the Office of Subsistence Management; (7) Previous experience in mentoring, training, and supervising personnel; and (8) Past and current accounting practices to ensure deliverables and accountability.

Each of these items carries a "Go/No-Go" impact: direct linkage of a Monitoring Program project, enrollment in CCR; affirming in writing in your application that you have enrolled in CCR; providing your DUNS Number; submission of completed SF-424, SF-424A, and SF-424B package; and submission of approved Indirect Cost Negotiation Agreement if requesting reimbursement for indirect costs.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: Suquamish Tribe (\$200,000) - Sea Cucumber Restoration Pilot Project: This project is designed to create capacity within Puget Sound to restore sea cucumbers through a pilot hatchery propagation project and address additional goals identified by State and Tribal managers. Recent surveys indicate that sea cucumber populations in once highly productive areas in Central Puget Sound have not recovered from overharvest that occurred 20 years ago. In addition to hatchery propagation, managers identified the need for additional survey capacity and research to identify key life history parameters including rate growth and longevity. This program is designed to begin to address these key objectives. In addition, it will take the opportunity provided by reintroduction of sea cucumbers to assess the ecological services provided by these consumers of decaying organic material to benthic habitats.

Telida Village Council (\$200,000) - Monitoring Moose for Metals in the Upper Kuskokwim River Region: Telida Village Council is working with the U.S. Fish and Wildlife Service to begin monitoring Upper Kuskokwim River Region moose, the main food source, for metals to determine the extent of bioaccumulation of elements in the area moose. TVC has conducted three years of water quality testing in the Upper Kuskokwim River and are concerned about the elevated levels of metals such as arsenic, cadmium, and mercury in the water supply. It is important to see if the moose, a semiaquatic forager, which is consumed by most people in the region, is healthy enough to be eaten. TVC will work with the Alaska Department of Environmental Health and the Agency for Toxic Substances and Disease Registry to compare the monitoring results for metals against applicable state and federal food safety consumption standards. Afterwards, TVC will share the Report of Findings with the Alaska Department of Fish and Game and working together examine how the metals are possibly contributing to the low moose population dynamics.

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

Grants may be used for the conservation of any bird species protected by the Migratory Bird Treaty Act and occurring in U.S. Fish and Wildlife Service (USFWS) Region 3 (Upper Midwest, including IL, IN, IA, MI, MN, MO, OH, and WI). Special emphasis will be placed on Birds of Concern in the Midwest

(see <http://www.fws.gov/midwest/midwestbird/concern.html>) as these species are experiencing known or suspected population declines, are recreationally important, or are causing biological or social conflicts. Implementing national, regional, and flyway bird conservation plans, including the Partners in Flight North American Landbird Conservation Plan (<http://www.partnersinflight.org>), U.S. Shorebird Conservation Plan (<http://shorebirdplan.fws.gov>), North American Waterbird Conservation Plan (<http://www.waterbirdconservation.org>), North American Waterfowl Management Plan (<http://www.fws.gov/birdhabitat/NAWMP/index.shtml>), and Mississippi Flyway bird management plans, is the USFWS's highest priority, and proposals related to the priorities identified in these plans and Bird Conservation Region and state-level bird conservation planning efforts will receive high funding consideration. The following activities are also of high interest to the USFWS: a) Population surveys, monitoring, and assessments to determine the status, trends, distribution, demography, and responses to management of bird species and groups of concern. Emphasis will be placed on landscape-level applications of standardized inventory and monitoring protocols as identified through the Midwest Coordinated Bird Monitoring Partnership (<http://midwestbirdmonitoring.ning.com>). Local-scale bird monitoring (e.g., local land management units) will generally not be a focus of this grant program, nor will support for long-term operational bird monitoring efforts. Rather, the program seeks to address coordination of monitoring efforts and development and evaluation of new survey and monitoring techniques (both field and analytical); b) Conservation of focal species for which conservation plans and/or working groups have been developed and research, monitoring, and other priorities have been identified. Examples of focal species include: Golden-winged Warbler, Cerulean Warbler, Henslows Sparrow, Bobolink, other Midwestern grassland birds, American Woodcock, Wilsons Phalarope, Upland Sandpiper, Marbled Godwit, Common Tern, Black Tern, King Rail, and Lesser Scaup (for further information on focal species, see <http://www.fws.gov/midwest/midwestbird/concern.html>; and c) Strategic Conservation, wherein the USFWS and partners integrate biological planning, landscape design, conservation delivery, and monitoring and evaluation in a way that generates the adaptive feedback loops that enable sound decisions and constantly improve our efficiency and effectiveness in saving birds (<http://www.fws.gov/midwest/science/SHC/FAQ.htm>). Strategic conservation involves applied research, including studies of bird habitat requirements, threats, limiting factors, and population responses to habitat conservation activities; and use of Geographic Information Systems, modeling, and similar tools to identify bird habitat focus areas and further bird conservation planning efforts. 15%.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: A multi-faceted restoration project in New Bedford Harbor, MA, was completed to address injury to wetlands, migratory birds, anadromous fish and recreational lost use, from historical polychlorinated biphenyl (PCB) contamination. The U.S. Fish and Wildlife Service along with other natural resource co-Trustees provided more than \$3 million from the New Bedford Harbor Natural Resource Damage Assessment and Restoration (NRDAR) settlement to the Buzzards Bay Coalition to purchase and transform the former Acushnet Sawmill property into a restored natural area and environmental education center. As part of the effort, workers removed buildings and pavement from the former sawmill location and pulled out old cement seawalls and revetments that lined the Acushnet River. An antiquated fish ladder was removed and a more natural fishway was installed to restore passage for migratory fish, such as river herring. The Coalition planted native trees and shrubs along the rivers edge, restored a red maple swamp, and planted wildflower meadows. They constructed a canoe launch on the mill pond and created a mile-long trail that meanders through the woods and along the river. Lastly, local vocational students restored one of the mills historic buildings

thereby creating an environmental learning center. The restored property now provides many opportunities for passive recreation as well as habitat for fish, songbirds, waterfowl, and other wildlife species.

Several restoration projects have continued or were completed in FY15 to address injury to seabirds and coastal shoreline habitat impacted by chronic releases of oil from S.S Jacob Luckenbach, a ship that sank off the coast of San Francisco, CA in 1953. For example, a coastal dune habitat restoration project at Point Reyes National Seashore was completed in FY15. The project restored 20 acres of dunes by removing invasive vegetation to support threatened western snowy plover, endangered Tidestroms lupine, and beach layia. FY15 was also the 7th year of restoration projects and activities on 1.2 acres of nesting habitat for rhinoceros auklets, a seabird impacted by the oil spill, at A Nuevo Island, CA. Activities included performance monitoring to quantify breeding seabirds plus soil stability and plant community responses to habitat restoration. In addition, the Trustee Council funded adaptive management measures to maintain native vegetation for nesting habitat. The breeding population of rhinoceros auklets has increased each year since restoration was implemented in fall 2010.

Adverse impacts to migratory birds, anadromous fish, threatened and endangered species, and their habitats from historical industrial releases of hazardous substances into the lower Willamette River, Oregon, are being addressed through the pursuit of a Natural Resource Damage Assessment and Restoration claim and associated restoration projects. The hazardous substances released into the lower Willamette River, referred to as Portland Harbor, included polychlorinated biphenyls (PCBs), polycyclic aromatic hydrocarbons (PAHs), metals, pesticides (e.g., DDT), dioxins, and furans. In 2000, the Portland Harbor was declared a superfund site by the U.S. Environmental Protection Agency. In FY15, the natural resource trustees, including the U.S. Fish and Wildlife Service, worked extensively with Wildlands, Inc. on the planning and design of the 52-acre Alder Creek restoration project on the southern end of Sauvie Island in Portland, Oregon. Construction of this restoration project by Wildlands began in July 2014 and was completed in September 2015. The project involved reshaping the riverbanks; planting trees, shrubs, and grasses; creating shallow water habitat; and restoring beaches and wetlands. Eventually the Alder Creek site will provide habitat for salmon, Pacific lamprey, mink, bald eagle, osprey, and other native fish and wildlife. Wildlands intends to sell restoration credits from the project to potentially responsible parties to help them offset their liability for damages associated with contamination at the Portland Harbor Superfund site. Fiscal Year 2016: For the most part, we have not selected projects for funding. We anticipate funding projects to restore trust species and their habitats to compensate for injuries from hazardous material releases and oil spills. However, the natural resource trustees for one NRDAR case have already selected restoration projects to be started in FY16 and beyond. The Southeast Missouri NRDAR co-trustees, comprised of the U.S. Fish and Wildlife Service and the Missouri Department of Natural Resources, have recently released \$750,000 for projects to restore and protect riparian corridors, stream banks, and other habitats on private land in southeast Missouri in accordance with their Southeast Missouri Ozarks Regional Restoration Plan (SEMORRP). The selected projects will compensate for natural resources injured by the release of hazardous materials associated with the mining activities of the ASARCO, LLC. Injured natural resources include migratory songbirds and their supporting habitats, natural vegetative communities, aquatic biological communities as well as stream and river sediments.

The Trustees selected a partnership comprised of The Nature Conservancy, The Missouri Department of Conservation, and the Ozark Regional Land Trust to receive \$500,000 to implement a combination of restoration projects including riparian corridor livestock fence-outs, alternative livestock water supplies, reinforced stream crossings, streambank stabilization, and perpetual conservation easements in the Huzzah and Courtois Creek watersheds. The Trustees also selected the Soil and Water Conservation Program of the Missouri Department of Natural Resources to implement a combination of restoration projects to include riparian corridor livestock fence-outs and re-vegetation, alternative livestock water supplies, and other standard soil and water conservation district practices which benefit injured natural resources in the upper Big and Black River watersheds. Projects will be implemented on willing

private landowners property over the next few years. Fiscal Year 2017: We have not selected projects for funding. We anticipate funding projects to restore trust species and their habitats to compensate for injuries from hazardous material releases and oil spills.

OBJECTIVES:

The U.S. Fish and Wildlife Service (USFWS) uses a science-based, adaptive framework for setting and achieving broad-scale conservation objectives that strategically address the problems fish and wildlife will face in the future. This framework, called Strategic Habitat Conservation, is based on the principles of adaptive management and uses population and habitat data, ecological models, and focused monitoring and assessment efforts to develop and implement strategies that result in measurable fish and wildlife population outcomes. This process uses the best available scientific information to predict how fish and wildlife populations will respond to changes in the environment, thus enabling the USFWS to focus habitat conservation and other management activities where they will be most effective. In addition, the USFWS needs focused, applied science directed at high impact questions surrounding threats to fish and wildlife resources for which management and/or mitigation is required to maintain species at healthy, sustainable, desired levels. USFWS must base its decisions on the best science available, in order to defend its regulatory decisions, biological opinions and species conservation recommendations to land managers.

Funds provided under this program will not be used for: the purchase of firearms or ammunitions; buying of intelligence information or paying informants; gathering information by persons who conceal their true identity; law enforcement operations that prompt suspects to carry out illegal activities so they may be arrested (entrapment); or any activity that would circumvent sanctions, laws or regulations of either the U.S. or the country in which the activity would occur. Funds may not be used to provide material support or resources to individuals, entities, or organizations of countries that have been identified by the U.S. Department of State as state sponsors of terrorism. This program is administered in compliance with the Federal Grants and Cooperative Agreements Act of 1977, as amended. These funds may not be used towards training U.S. Federal Government personnel. RELATED PROGRAMS:

15.640 Wildlife Without Borders- Latin America and the Caribbean ; 15.641 Wildlife Without Borders-Mexico ; 15.651 Wildlife Without Borders-Africa Program

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: (1) Conserving the critically endangered Somuncura frog (*Pleurodema somuncurensis*) in Somuncura Plateau, in Argentina. This project will ensure the long term sustainability of the Somuncura frogs population. Specific objectives include: (1) Impeding access of trout at the headwaters of the stream; (2) Monitoring the extent and effect of chytrid fungus and Ranavirus; (3) Recovering and expanding available habitat; (4) analyzing impacts of illegal trade.

(2) Priming Immune Function of Endangered Panama Golden Frogs Prior to Reintroduction in Panama. This project will test a new method of mucosal vaccination against chytrid in the critically endangered Panama Golden Frog. Mucosal antibody responses to the vaccine will be tested against Bd with the ultimate goal of field trial reintroductions with this successful immune priming treatment.

(3) Building Capacity to Reintroduce Panamanian Golden Frogs Back into the Wild in Panama. This project will expand the amphibian holding capacity in Panama to breed and grow the existing collection of golden frogs. In addition, this project will build public support for the reintroduction into the wild. Fiscal Year 2016: Program anticipates funding projects that are similar in scope to FY 2015. Fiscal Year 2017: Program anticipates funding projects that are similar in scope to FY2016.

CRITERIA FOR SELECTING PROPOSALS:

To be considered for funding, proposals must specify a conservation action for an eligible species. The Division of International Conservation ranks proposals by scoring how well each addresses the program priority areas and the requested proposal elements. High priority, well-justified and feasible projects that address all of the requested proposal elements will receive higher scores. These scores are not the sole determining factor for final funding decisions. Other review criteria include considering the degree to which a project:

- Demonstrates the high degree of threat or extinction risk that the target species experiences;
- Addresses a conservation need of a species that is exceptional ecologically, evolutionarily, or in conservation (Note that it is the responsibility of the applicant to articulate what quality makes the species exceptional, but examples would include a species that strongly influences the ecological community in which it occurs, a species that is genetically distinct with few close relatives, a species that exhibits a distinctly unusual behavior, or a species whose conservation would catalyze the conservation of multiple species);
- Occurs in a region or conserves a taxon poorly represented in the Amphibians in Decline portfolio;
- Makes a significant and durable contribution to the survival of the species, or to the integrity of its habitat or an area with significant conservation value for the species;
- Addresses a conservation need identified by a specialist group or by a regional, national or global strategy;
- Applies the best scientific and technical information and methods available in support of project activities;
- Includes the participation of local partners in project activities, including meaningful involvement of government, community or civil society stakeholders;
- Is feasible and likely to be successfully implemented as stated;
- Advances the practice of conservation by being designed and implemented in a way that the successes and failures of activities can be credibly assessed and shared;
- Emphasizes conservation action rather than data collection; and
- Implements activities or provides benefits that have the potential to be sustaining beyond the period of performance of the grant, including training

that develops local capacity to implement or manage conservation projects.

The above considerations are not listed in any order of importance. All considerations listed do not necessarily apply to every proposal. Following review, applicants may be asked to revise the project scope and/or budget before a final funding decision can be made.

15.673 WILDLIFE WITHOUT BORDERS CRITICALLY ENDANGERED ANIMAL CONSERVATION FUND

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Endangered Species Act of 1973, as amended (16 U.S.C. 1531-43).

OBJECTIVES:

The goal of this grants program is to reduce threats to highly endangered wildlife in their natural habitat. Proposals should identify specific conservation actions that have a high likelihood of creating durable benefits, such as: Protection of at-risk populations; Veterinary/wildlife health interventions; Activities related to execution of species survival plans; Strengthening local capacity to conserve the target species; Actions addressing unsustainable exploitation; Efforts to mitigate or stop wildlife-human conflict; and Rehabilitation and rescue.

Project activities that emphasize data collection and status assessment should describe a direct link to management action, and explain how lack of information has been a key limiting factor for management action in the past. Proposals that do not identify how actions will reduce threats, or do not demonstrate a strong link between data collection and management action, have a lower likelihood of being selected. Proposed project work should occur within the species range, or, if work is to be conducted outside of the range, the proposal should show a clear relevance to its conservation.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

Species eligible for funding are those that face a very high risk of extinction in the immediate future. Species should meet the criteria to be listed as Critically Endangered or Endangered on the International Union for the Conservation of Nature (IUCN) Red List. Species listed as Data Deficient on the IUCN Red List are also eligible if the applicant can provide information that suggests a similar urgency for conservation action. Species listed as Extinct in Wild are eligible if the applicant is proposing a reintroduction attempt. The following species are NOT eligible for funding: Species with natural habitat range located primarily within the United States, territories of the United States, Canada, and the high income economies of Europe; Species that are eligible for funding under one of the Multinational Species Conservation Fund programs, including: Asian elephant, African elephant, rhinoceros (all species), tiger (all subspecies), gorilla, chimpanzee, bonobo, orangutan, gibbons (all species) and marine turtles (all species); and Amphibian species that are eligible for funding through the Wildlife Without Borders - Amphibians in Decline program, including frogs, toads, salamanders, newts, and caecilians. Proposed project work should occur within the species range, or, if work is to be conducted outside of the range, the proposal should show a clear relevance to its conservation.

Funds provided under this program will not be used for: the purchase of firearms or ammunitions; buying of intelligence information or paying informants; gathering information by persons who conceal their true identity; law enforcement operations that prompt suspects to carry out illegal activities so they may be arrested (entrapment); or any activity that would circumvent sanctions, laws or regulations of either the U.S. or the country in which the activity would occur. EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: (1) Saint Lucia Racer Project: Saving the Rarest Known Snake. This project will prevent the extinction of the Saint Lucia racer and restore its place in the coastal ecosystems of Saint Lucia. Priority actions in the new Saint Lucia Racer Conservation Action Plan will be implemented to increase the world population to at least 500 individuals by 2025; as few as 18 currently remain. Specific objectives include: (1) The population of racers on Maria Major is maintained at the islands carrying capacity; (2) Preparations are made for reintroducing Saint Lucia racers to at least two more sites (one offshore island and one mainland site); and (3) The species recovery program is robustly underpinned with legislation, enforcement and public support, including measures to prevent poaching.

(2) Combating the illegal trade and recovering the population of endangered Grey Crowned Cranes in Rwanda. This project seeks to double the population of Grey Crowned Cranes in Rwanda by 2018. There are only 300 500 wild Grey Crowned Cranes remaining in Rwanda. Specific objectives include: (1) Reducing the illegal trade of Grey Crowned Cranes in Rwanda by strengthening law enforcement capacity, registering all captive cranes and raising awareness of the status of the cranes and the legal repercussions of their ownership; (2) Improving livelihoods of local communities around Rugezi marshland to reduce poaching and contribute to the protection of the natural habitat; (3) Rehabilitate and reintroduce 40 captive Grey Crowned Cranes back to the wild.

(3) Intensifying anti-snaring efforts in the Luangwa Valley, Zambia, to reduce by-catch mortalities of African Wild Dogs. This project will conserve and increase the Luangwa Valley population of African wild dogs through increasing and improving anti-snaring patrols by community village scouts in game management areas and the national park. The project will also rescue snared and injured wild dogs. Fiscal Year 2016: Program anticipates funding projects that are similar in scope to FY2015. Fiscal Year 2017: Program anticipates funding projects that are similar in scope to FY2016.

CRITERIA FOR SELECTING PROPOSALS:

To be considered for funding, proposals must specify a conservation action for an eligible species, listed above in the Description of Funding Opportunity. The Division of International Conservation ranks proposals by scoring how well each addresses the program priority areas and the requested elements listed in the Application and Format section above. High priority, well-justified and feasible projects that address all of the requested proposal elements will receive higher scores. These scores are not the sole determining factor for final funding decisions. Other review criteria include considering the degree to which a project:

Demonstrates the qualification of the target species as experiencing a high degree of threat or extinction risk; Addresses a conservation need of a species that is exceptional ecologically, evolutionarily, or in conservation (Note that it is the responsibility of the applicant to articulate the exceptional quality of the

species, but examples would include a species that strongly influences the ecological community in which it occurs, that is genetically distinct with few close relatives, that exhibits a distinctly unusual behavior, or whose conservation would catalyze the conservation of multiple species);

Occurs in a region or conserves a taxon poorly represented in the CEACF portfolio;

Makes a significant and durable contribution to the survival of the species, or to the integrity of its habitat or an area with significant conservation value for the species;

Addresses a conservation need identified by a specialist group or by a regional, national or global strategy;

Applies the best scientific and technical information and methods available in support of project activities;

Includes the participation of local partners in project activities, including meaningful involvement of government, community or civil society stakeholders;

Is feasible and likely to be successfully implemented as stated;

Advances the practice of conservation by being designed and implemented in a way that the successes and failures of activities can be credibly assessed and shared;

Emphasizes conservation action rather than data collection; and

Implements activities or provides benefits that have the potential to be sustaining beyond the period of performance of the grant, including training that develops local capacity to implement or manage conservation projects.

These considerations are not listed in order of importance. All considerations listed do not necessarily apply to every proposal. The Division of International Conservation occasionally receives and funds proposals outside of the announced submission deadlines that are of such a critical nature (examples include projects resulting from a natural disaster, disease outbreak, other imminent threats or population crash, among others) that they warrant immediate consideration.

The FWS reviews Wildland Urban Interface community projects at a Regional level and makes funding recommendations through each Region's annual work plan process. Applications are reviewed to ensure applicants meet the eligibility requirements and have the necessary documentation/credentials. The workgroup then establishes each applicant's level of significance (LOS). Factors to be considered in this assessment include: The applicant's proximity to DOI managed lands and cooperation role for the Wildland/Urban Interface; how well the applicant's proposals would increase Service success for limiting damages from wildfire; Other local or regional criteria, disclosed in advance to grant applicants.

Favorable consideration will be directed to those applicants that are in compliance with environmental regulations; have promptly expended previous funds awarded; comply with monitoring and reporting requirements in a timely fashion; and, have consistently maintained cost-share commitments. The workgroup will also evaluate the applicant's relationship in supporting initiatives, direction plans such as National Cohesive Wildland Fire Management Strategy and its Implementation Plan, State fire plans, community wildfire protection plans or equivalent(s), and fire management plans. FWS staff will notify applicants of review results by either issuing a fully executed Award either electronically or through the mail, or by sending written notification to the applicant that the application will not be funded.

15.679 COMBATING WILDLIFE TRAFFICKING

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

National Strategy for Combating Wildlife Trafficking; Executive Order 13648; July 5, 2013; Implementation Plan of the National Strategy for Combating Wildlife Trafficking; February 11, 2014; Endangered Species Act of 1973, as amended (16 U.S.C. 1531-43).

OBJECTIVES:

On February 11, 2014, President Obama issued the National Strategy for Combating Wildlife Trafficking. Incorporating recommendations from the Advisory Council on Wildlife Trafficking, the Implementation Plan was released on February 11, 2015 to guide and direct the efforts of Federal agencies in executing the Strategy. The Presidents plan establishes three priorities:

- 1.) Strengthen Global Enforcement (both domestic and global),
- 2.) Reduce Demand for Illegally Traded Wildlife, and
- 3.) Expand International Cooperation and Commitment.

The Plan establishes 24 Implementation Plan Objectives for which the U.S. Fish and Wildlife Service (USFWS) is identified as a lead or participating agency.

Financial assistance will be provided for innovative projects that advance counter wildlife trafficking activities (wildlife defined to include terrestrial and aquatic species and timber) as outlined in the Next Steps of the National Strategies Implementation Plan.

Priority will be given to innovative projects that address one or more of the Implementation Plan Objectives and Next Steps detailed at:

<https://www.whitehouse.gov/sites/default/files/docs/nationalstrategywildlifetrafficking.pdf>.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

Wildlife trafficking threatens a staggering array of terrestrial, freshwater, and marine species, including: elephants, rhinos, tigers, sharks, tuna, sea turtles, land tortoises, great apes, exotic birds, pangolins, sturgeon, coral, iguanas, chameleons, and tarantulas. Wildlife trafficking also includes trafficking of fisheries products and related threats to food supplies and food security. It is also well-established that wildlife trafficking is facilitated and exacerbated by illegal harvest of and trade in plants and trees, which destroys needed habitat

and opens access to previously remote populations of highly endangered wildlife, such as tigers.

Projects submitted for funding under this program must address the above cited species, both terrestrial and marine, and take a multifaceted approach in dealing with the problem of illegal wildlife trafficking as outlined in the Implementation Plans Objectives. Funds provided under this program will not be used for: the purchase of firearms or ammunition; buying of Intelligence information or paying informants; gathering information by persons who conceal their true identity; law enforcement operations that prompt suspects to carry out illegal activities so they may be arrested (entrapment); or any activity that would circumvent sanctions, laws or regulations of either the U.S. or the country in which the activity would occur. Funds may not be used to provide material support or resources to individuals, entities, or organizations of countries that have been identified by the U.S. Department of State as state sponsors of terrorism. These funds may not be used towards training U.S. Federal Government personnel. Program will fund projects that link directly to the National Strategy for Combating Wildlife Trafficking: Implementation Plan.

(<https://www.whitehouse.gov/sites/default/files/docs/nationalstrategywildlifetrafficking.pdf>). 100%.

Applicant Eligibility:

Applicants under this program can be: individuals; multi-national secretariats; foreign governments; US and foreign non-profits, non-governmental organizations, community and indigenous organizations; US and foreign public and private institutions of higher education; and U.S. and foreign for-profit organizations.

Applicants that submit proposals to other USFWSs International award programs are ineligible from submitting that same proposal to this program. If duplicate submissions are discovered those proposals will be disqualified.

Beneficiary Eligibility:

Non-domestic (outside of the United States) government agencies responsible for combating wildlife trafficking and any other U.S.- based or non-domestic public or private non-governmental organization or institution or individual with demonstrated experience in the activities proposed.

Applicant entities or their key project personnel identified in the SAM.gov Exclusions database as ineligible, prohibited/restricted or excluded from receiving Federal contracts, certain subcontracts, and certain Federal assistance and benefits will not be considered for Federal funding, as applicable to the funding being requested under this Federal program.

U.S. non-profit, non-governmental organizations with 501(c)(3) Internal Revenue Status must provide a copy of their Section 501(c)(3) status determination letter received from the Internal Revenue Service. 2 CFR 200, Subpart E - Cost Principles applies to this program.

problem(s) to be addressed by their project.

H.

I. Pre-applications should include the best available information on:

The wildlife species being trafficked

Routes and key transit points

Who is doing the harvesting, trafficking and/or consuming of illegal wildlife and wildlife products

How the proposed activities build upon or differ from past efforts.

J.

K. Letters of support from government agencies and other partners and curriculum vitae of key personnel do not count toward the four page limit, and may be included as support for the applicants capacity to implement proposed activities effectively and an indication of past history of coordinating with partners.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2015: Five CAP projects were concluded this year. Iowa completed a Fifty States Initiative project that developed a business plan to create a cooperative program to build and maintain statewide parcels and orthoimagery that tries to maximize investments made by both local and State government agencies, and develop incentives for further cooperation. Metadata training and outreach continued to be a significant outcome of the CAP. Through Alaskas Department of Transportation and Public Facilities and Floridas Miami-Dade County, training was provided on the internationally accepted geospatial metadata standards (ISO 19115). In addition, their materials were made available to all via the Internet. In a separate project, Miami-Dade County increased participation of the NSGIC GIS Inventory (gisinventory.net), with

over 250 metadata containing links to standards-compliant data or data services. This effort supports Federal Data.gov and Geoplatform.gov activities to expose available geospatial data. And finally, North Carolina initiated its return on investment study for State geospatial activities. For more information on projects, please see www.fgdc.gov/grants.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2015: Several states proposed to scan historic aerial photography, collections spanning most of the last century. The collections can make it possible to determine geophysical and environmental change through time within a temporal range that encapsulates much of the 20th century, most of which preceded the advent of satellite imagery. These aerial photographs provide important background information for land use planning, establishing environmental baselines against which to compare subsequent changes (historic shorelines), and archeological insights about potential existence of cultural modifications (such as burial mounds) or property delineations. These photographs are scanned as high resolution image files, geolocated, and along with metadata describing the images, are posted online and made available for download by the public. These files and data are invaluable to a wide sector of users originating from the fields of engineering, land use planning, academia, geology, decision making, and others.

A state plans to scan and digitize several hundred geology field notebooks that date back to 1855. Among observations about geological themes, information about socio-economic and cultural topics is available. Digitizing and making these unique artifacts available online reduces handling, preserves the valuable notebooks, and makes the information found therein widely available.

A state proposed to rescue valuable metallic mine core, which is succumbing to pyrite wasting disease due to storage in a high humidity area aggravated by the presence of sulfide-bearing minerals in the samples. This core is of particular importance because it represents the most recent metallic mineral mine that operated and closed successfully in the state. The core is unique and irreplaceable and is vital to geologists understanding of this ore body and others like it. Fiscal Year 2016: Information not available, because successful projects have not yet been selected. Fiscal Year 2017: No Current Data Available.

At the same time, the applicant is requested to observe certain simple preservation precepts with regard to the property. Should subsequent occurrences alter the historic qualities of the property, landmark status may be revoked and the plaque removed. Automatic listing of National Historic Landmark properties in the National Register of Historic Places affords a degree of Federal protection under Section 106 of the Historic Preservation Act of 1966, and fulfills one of the prerequisites for Federal assistance under the National Register grants- in-aid program (see 15.904). Certain landmarks are also made eligible for Federal tax benefits and protections and technical preservation assessment and assistance.

Applicant Eligibility:

Anyone may suggest that a property be considered for inclusion in an appropriate National Historic Landmark theme study, provided the property has

a high degree of historic integrity and potential national significance with relation to some broad facet of American history. The owner of the property may be an individual, government, or corporate body. Properties of only State or local significance do not qualify.

Beneficiary Eligibility:

If the property is already listed in the National Register, provide a brief resume of the historical facts that justify consideration of national significance. Properties nominated to, or already listed in, the National Register of Historic Places at a national level of significance by the State Historic Preservation Officer may be reviewed by the National Historic Landmarks Survey staff.

Award Procedure:

When the property has been investigated, findings, in the form of a thorough NHL nomination form, are presented to the National Park System Advisory Board which evaluates the property's national significance and high integrity and recommends a final action to the Secretary of the Interior. Owners of proposed landmarks are contacted prior to a landmark study, given an opportunity to comment on a final study, and then notified after designation of the landmark.

Deadlines:

15.914 NATIONAL REGISTER OF HISTORIC PLACES

(National Register)

FEDERAL AGENCY:

National Park Service, Department of the Interior

AUTHORIZATION:

National Historic Preservation Act of 1966, as amended, Public Law 89-665, 16 U.S.C. 470, 80 Stat. 915 et seq.; Executive Order 11593, May 13, 1971; Tax Reform Act of 1976, Public Law 94-455; Public Law 94-442; 90 Stat. 1519; Revenue Act of 1978; Public Law 95-600; National Historic Preservation Act Amendments of 1980; Public Law 96-515; Tax Treatment Extension Act of 1980; Public Law 96-541; Economic Recovery Tax Act of 1981, Public Law 97-340; Tax Reform Act of 1984, Public Law 98-369; Tax Reform Act of 1986, Public Law 99-514; National Historic Preservation Act Amendments of 1992, Public Law 102-575; Executive Order 13287, March 3, 2003.

OBJECTIVES:

To expand and maintain the National Register of Historic Places for planning, preservation, research, public education and tourism efforts; to make the information on districts, sites, buildings, structures and objects of historical, architectural, archeological, engineering and cultural significance more accessible to the public in order to increase and broaden the public's understanding of the information, foster a national preservation ethic, and to promote greater appreciation of America's heritage; to coordinate with Federal agencies, State and Tribal preservation offices, and the Advisory Council on Historic Preservation in the implementation of laws and policies pertaining to historic preservation; and to establish liaison with and give guidance to communities under Title I of the Housing and Community Development Act of 1974 (see 14.218).

TYPES OF ASSISTANCE:**ADVISORY SERVICES AND COUNSELING****USES AND USE RESTRICTIONS:**

Professional advice is provided in determining whether a property qualifies for inclusion in the National Register according to the Criteria for Evaluation contained in 36 CFR Part 60. Listing does not affect the range of actions an owner may take, as long as Federal funding, licensing or assistance is not involved and no governmental unit receives any authority or control over the property, including its use and disposition. However, if a Federal project might have an effect on a property listed or eligible for listing, the agency involved must provide the Advisory Council on Historic Preservation a reasonable opportunity to comment pursuant to 36 CFR Part 800. Registered properties also become eligible to receive grants from the Historic Preservation grant-in-aid program of the Department of the Interior (see 15.904), when funding is available, to receive home improvement loans from the Department of Housing and Urban Development under Title I of the National Housing Act as amended on October 18, 1974, or to participate in the community grant program provided by the Housing and Community Development Act of 1974. Major Federal tax advantages can be received on certain rehabilitation expenditures for "certified historic structures" and for charitable contributions for conservation purposes of partial interests in historic properties.

Applicant Eligibility:

Eligible applicants are the States and territories as defined in the National Historic Preservation Act, operating under programs administered by State Historic Preservation Officers appointed by the Governors (listed in Appendix IV of the Catalog); or the Tribal Preservation Officers; Federal agencies required to nominate and consider historic properties within their jurisdiction or as a result of the National Environmental Policy Act of 1969 and Executive Order 11593, and the National Historic Preservation Act operating under programs administered by representatives (listed in Appendix IV of the Catalog) appointed by the heads of the agencies; and, in States without approved State Historic Preservation Programs, persons and local governments. Applicants eligible for Federal Tax benefits include owners of individually listed properties and properties certified by the Secretary of Interior as being historic and in a district certified as historic.

Beneficiary Eligibility:

Public and private owners of historic properties listed in the National Register of Historic Places or of properties certified by the Secretary of Interior as being historic and in a district certified as historic.

Credentials/Documentation:

Nominations are submitted on standard nomination forms provided upon request to the State Historic Preservation Officers, Federal Preservation Officers, and Tribal Preservation Officers who must certify that each property

was properly nominated. Procedures for National Register nominations are found in 36 CFR Part 60. Request for determinations of eligibility must be adequately documented as described in Appendix A of 36 CFR Part 63. Requests for certification of historic properties must be documented as described in Section 36 CFR Part 67 and requests for certification of State and local statutes and districts must be documented as described in Section 36 CFR Part 67. To participate in the program, each State must have an approved review board, an approved State staff, and an accepted State historic preservation plan. This program is excluded from coverage under 2 CFR 200, Subpart E - Cost Principles.

Preapplication Coordination:

For National Register nominations the signature of the State Historic Preservation Officer on the nomination form certifies that the State review board has reviewed the nomination and that all applicable procedures, including notification to the property owner at least once during the nomination process, have been followed. The signature of the Federal Preservation Officer for Federal property or the Tribal Preservation Officer on Tribal lands on the nomination form certifies that the property has been nominated in compliance with the National Historic Preservation Act. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under 2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards. Anyone may prepare a National Register nomination. After the property is approved by the State Historic Preservation Officer, Tribal Preservation Officer, or Federal Preservation Officer, the nomination form or letter of request for a determination of eligibility should be forwarded to the Keeper of the National Register, National Park Service, Department of the Interior, 1849 C Street, NW, Mail Stop 2280, Washington, DC 20240. Nominations submitted for review are announced in the Federal Register to provide a period of comment. Documentation for certification for Federal tax benefits of historic buildings and structures, State and local statutes and districts should be forwarded to the appropriate State Historic Preservation Office, which sends it to the appropriate National Park Service Office.

Award Procedure:

The professional review staff of the National Register determines whether the properties meet the National Register criteria as contained in 36 CFR Part 60. Properties that meet the criteria are then officially listed in the National Register and become eligible for Federal tax benefits and Historic Preservation Fund grants when they are available.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

CRITERIA FOR SELECTING PROPOSALS:

Criteria for Evaluation: The following criteria are designed to guide the States and the Secretary of the Interior in evaluating potential entries (other than areas of the National Park System and National Historic Landmarks) to the National Register: The quality of significance in American history, architecture, archeology, engineering, and culture is present in districts, sites, building, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association, and; (A) that are associated with events that have made a significant contribution to the broad patterns of our history; or (B) that are associated with the lives of persons significant in our past; or (C) that embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or (D) that have yielded, or may be likely to yield, information important in prehistory or history.

Ordinarily cemeteries, birthplaces, or graves of historical figures, properties owned by religious institutions or used for religious purposes, structures that have been moved from their original locations, reconstructed historic buildings, properties primarily commemorative in nature, and properties that have achieved significance within the past 50 years shall not be considered eligible for the National Register. OBJECTIVES:

To provide financial assistance to the States and their political subdivisions for the preparation of Statewide Comprehensive Outdoor Recreation Plans (SCORPs) and acquisition and development of outdoor recreation areas and facilities for the general public, to meet current and future needs.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Land acquisition and development grants may be used for a wide range of outdoor recreation projects, such as picnic areas, inner city parks, campgrounds, tennis courts, boat launching ramps, bike trails, swimming pools, playing fields, and support facilities such as roads, water supply, etc. Facilities must be open to the general public and not limited to special groups. Every park or outdoor recreation area acquired or developed with assistance under this program must remain available and accessible for public outdoor recreation use forever.

Development of basic rather than elaborate facilities is favored. Operation and maintenance of facilities are not eligible expenses for funding. States only are also eligible to apply for grants to revise and update existing SCORPs; prepare new SCORPs; conduct statewide surveys, technical studies, data collection and analysis; and for other planning purposes that are clearly related to SCORP refinement and improvement.

Applicant Eligibility:

For planning grants, only the State agency formally designated by the Governor or State law as responsible for the preparation and maintenance of the SCORP is eligible to apply. (Treated as States for this purpose are the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands, and Guam.) For acquisition and development grants, the above designated agency may apply for assistance for itself, or on behalf of other State agencies or political subdivisions, such as cities, counties, and park districts. Additionally, Indian tribes that are organized to govern themselves and perform the functions of a general purpose unit of government qualify for assistance. Individuals, nonprofit organizations, and private organizations are not eligible.

Beneficiary Eligibility:

The general public. For planning grants, same as Applicant Eligibility.

Credentials/Documentation:

The State Liaison Officer (SLO), who is appointed by the Governor or designated in State legislation to administer the program in the State or Territory, must provide assurance that the project is consistent with the SCORP; i.e., that it meets high priority recreation needs shown in the action program portion of the Plan. The State must have a sufficient balance of LWCF funding and the required match available for the project. The sponsoring agency must permanently dedicate the project to public outdoor recreation and assume responsibility for its operation and maintenance. SCORPs must cite the State's legal authority to participate in the Land and Water Conservation Fund program. Eligibility of costs will be determined in accordance with OMB Circular A-102 (43 CFR Part 12, Subpart C), "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments" and OMB Circular A-87, Cost Principles for State, Local and Indian Tribal Governments. OMB Circular No. A-87 applies to this program. 2 CFR 200, Subpart E - Cost Principles applies to this program.

Preapplication Coordination:

The SLO has the prerogative for initial determination of project eligibility, priority need, and order of fund assistance within the State. All project proposals are submitted to the National Park Service by the SLO. Environmental impact information is required for this program; a screening form is used to determine whether an EA or EIS is necessary. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." If the State has selected the program for review, the applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires when applying for federal assistance. An environmental impact statement is required for this program. An environmental impact assessment is required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult

the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards applies to this program. States and Territories must have a current SCORP approved by NPS to be eligible to submit grant applications. Proposals selected by the State to forward to NPS must be accompanied by the standard federal application forms required by 43 CFR Part 12, Subpart C, "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments." Proposal budgets must comport with OMB Circulars A-87 and A-102. Basic environmental information or evaluation is required and will be assessed by the National Park Service to determine whether an environmental impact statement is needed. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." If the State has selected the program for review, the applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires when applying for federal assistance.

Award Procedure:

Proposals are reviewed by the NPS field office, where final action may be taken. All grants are made to the State lead agency and if applicable passed through to the project sponsor, whether State or local government.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

Approximately 30-60 days for acquisition and development projects; 60 days for planning projects.

Appeals:

State may appeal to the Secretary of the Interior.

Renewals:

Project agreements may be amended to change the scope, funding amount, or duration. Must be approved by the National Park Service.

Formula and Matching Requirements:

Statutory Formula: Each year, States and Territories receive an overall allocation of funds based on a statutory formula. Depending on the amount appropriated by Congress, a certain percentage (forty percent of appropriations of up to \$225 million, thirty percent of the next \$275 million, and twenty percent of any additional appropriation) is split equally among the 51 States (for this purpose American Samoa, the District of Columbia, Guam, the Northern Mariana Islands, Puerto Rico, and the Virgin Islands are treated as one State and split an apportionment). The remaining percentage is apportioned on the basis of need.

Matching Requirements: The Land and Water Conservation Fund Act requires that the share of federal funds not exceed 50 percent of the total project cost. Generally, match must be derived from State, local, or private sources, but under certain conditions all or part of the project sponsor's matching share may be from other Federal assistance programs, such as Community Development Block Grants, when such use is allowable under the other programs sponsoring legislation. Otherwise, no other Federal funds may be applied to the project cost, even if all matching requirements are met. MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Funds are available for obligation during the fiscal year in which they are appropriated and for the two following fiscal years. The assistance period for individual projects varies and may be extended but on average is three years. Complex projects may be broken down into stages, with one being initially approved and the remainder qualified for activation at a later date. Except for project preparation costs, all costs must be incurred within the project period to be eligible for reimbursement. Planning projects may not be phased. See the following for information on how assistance is awarded/released: On an average of three years.

Reports:

Program reports are not applicable. Cash reports are not applicable. All projects

are monitored for progress through consolidated performance reports, which should be at least annually. State inspection reports are submitted every 5 years on completed projects stating whether the properties acquired and/or developed with fund assistance are still being used in accordance with the agreement. For planning projects, end products are specified in the application for assistance. Financial reports are required with all billings which should be at least annually.
