**FEDERAL AGENCY:**

CENTERS FOR MEDICARE AND MEDICAID SERVICES, DEPARTMENT OF HEALTH AND HUMAN SERVICES

**AUTHORIZATION:**

Section 5302 of Public Law 109-171, the Deficit Reduction Act of 2005.

**OBJECTIVES:**

To provide services in a geographic service area that is, in whole or in part, a rural area that has received a site development grant under this Section.

**TYPES OF ASSISTANCE:**

Project Grants.

**USES AND USE RESTRICTIONS:**

All funds granted should be expended solely for carrying out the approved projects in accordance with Section 5302 of the Public Law 109-171. In the Deficit Reduction Act, a rural PACE provider site is defined as a PACE provider that has been approved to provide services in a geographic service area that is, in whole or in part, a rural area that has received a site development grant under this section. Thus, the statute definition of a rural area as defined in section 1886(d)(2)(D) of the Social Security Act states that a rural area would be a county that is not part of a Metropolitan Statistical Area (MSA)(as defined by the Office of Management and Budget) as established for Medicare Inpatient PPS payments.

**Applicant Eligibility:**

This grant opportunity is open to (1) any PACE provider that demonstrates meeting the required definition as set out in the Social Security Act and; (2) is eligible to serve in a rural area as a rural PACE pilot site as defined in the Social Security Act. To meet the qualification of a PACE provider, an applicant must meet the definitions established in sections 1894(a)(3) or 1934(a)(3) of the Social Security Act. The Act defines a PACE provider as being a public or private, nonprofit entity organized for charitable purposes under 501(3)(c) of the Internal revenue code of 1986; and has entered into a PACE program agreement

with respect to its operation of a PACE program as defined in 1894(a)(2) and 1924(a)(2) of the Social Security Act. In addition to meeting the definitions of a PACE provider, the law also requires that each potential applicant meet the full statutory definition of a rural area.

**Beneficiary Eligibility:**

The medical, social and long-term care needs are met under this initiative and will benefit the elderly Medicaid beneficiaries who reside in rural areas.

**Credentials/Documentation:**

The new Rural PACE Provider Grant Program will provide funds to support the coordination of comprehensive care for some of the most vulnerable Medicare and Medicaid beneficiaries living in rural areas within thirteen states across the country. Each site received \$500,000 to establish a PACE program in their area. CMS awarded the maximum number of grants authorized by the DRA to expand patient-based care to a greater number of people with Medicare and Medicaid who live in rural areas.

**93.767 STATE CHILDREN'S INSURANCE PROGRAM**

(CHIP; SCHIP)

**FEDERAL AGENCY:**

CENTERS FOR MEDICARE AND MEDICAID SERVICES, DEPARTMENT OF HEALTH AND HUMAN SERVICES

**AUTHORIZATION:**

Balanced Budget Act of 1997, Title XXI, Subtitle J, Section 4901, Public Law 105-33; Public Law 105-100 and Medicare, Medicaid and SCHIP Balanced Budget Refinement Act of 1999 Public Law 106-113, Section 702; Medicare, Medicaid, and SCHIP Benefits Improvement Act of 2000, Title VIII, Section 801, 802, and 803, Public Law 106-554, Public Law 108-74, Public Law 108-127, Public Law 109-171 and Public Law 109-482 and Public Law 110-28.

**OBJECTIVES:**

To provide funds to States to enable them to initiate and expand child health assistance to uninsured, low-income children. Assistance should be provided primarily by two methods: (1) obtain health insurance coverage that meets the requirements in Section 2103 relating to the amount, duration, and scope of benefits; or (2) expand eligibility for children under the State's Medicaid program.

**TYPES OF ASSISTANCE:**

Formula Grants.

**USES AND USE RESTRICTIONS:**

No State is eligible for payments for child health assistance for coverage provided prior to October 1, 1997. Standards used to determine eligibility may include those related to geographic areas to be served by the plan. Age, income and resources, residency, disability status (as long as the standard does not restrict eligibility), access to or coverage under other health coverage, and duration of eligibility are factors. Standards may not discriminate on the basis of diagnosis. Eligibility standards must not cover higher-income children without covering lower-income children, and must not deny eligibility based on a child having a preexisting medical condition. The State must ensure that only targeted low-income children are furnished child health assistance under the plan. Children found through screening to be eligible for Medicaid are to be enrolled in Medicaid. The insurance provided under the State plan does not substitute for coverage under group health plans. Coordination with other public and private programs providing creditable coverage for low-income children should occur. Child Health Assistance (other than Medicaid), must consist of any of the following: Benchmark coverage; benchmark equivalent coverage (which can be FEHBP-equivalent coverage); State employee coverage or coverage offered through the HMO with the largest insured commercial non-Medicaid enrollment in the State; existing comprehensive State-based coverage; or Secretary-approved coverage. A State child health plan must include a description of the amount (if any) of cost-sharing and must be in accordance with a public schedule. Cost-sharing may be varied in a way that does not favor higher-income children over lower-income children. No cost-sharing is permitted for well-baby and well-child care, including age-appropriate immunizations. Cost-sharing for children at 150 percent of poverty must be consistent with Medicaid; Cost-sharing for children at 150 percent of poverty and above must be based on an income-related sliding scale. The aggregate for all children in a family cannot exceed 5 percent of the family's income. The State child health plan may not impose pre-existing condition exclusions for covered benefits. States that provide for benefits through a group health plan or group health insurance coverage may permit pre-existing condition exclusions as allowed under the applicable Section of the Employee Retirement Income Security Act (ERISA) and the Health Insurance Portability and Accountability Act (HIPAA). Funds provided to a State under this Title may only be used to carry out the purposes of this Title. Health insurance coverage provided may include coverage of abortion only if necessary to save the life of the mother or if the pregnancy is the result of an act of rape or incest. States may spend up to 10 percent of their total SCHIP expenditures (Federal and State) on non-benefit activities, including: outreach conducted to identify and enroll eligible children in SCHIP; administration costs; health services initiatives; and other child health assistance. These expenditures are matched at the enhanced SCHIP matching rate and counted against both the 10 percent limit and the allotment. Monetary amounts provided by the Federal government or services assisted or subsidized to any significant extent by the Federal government, may not be included in determining the amount of nonfederal contributions required for State matching purposes.

**Applicant Eligibility:**

All States and Territories may apply.

**Beneficiary Eligibility:**

Targeted low-income children will benefit. These children are defined (for the purposes of Title XXI) as children who have been determined eligible by the State for child health assistance under their State plan; are low-income children; or are children whose family income exceeds the Medicaid applicable income level but does not exceed 50 percentage points above the Medicaid applicable

income level; and are not found to be eligible for medical assistance under Title XIX or covered under a group health plan or under health insurance coverage. This term does not include a child that is a member of a family that is eligible for health benefits coverage under a State health benefits plan on the basis of a family member's employment with a public agency in the State.

**Credentials/Documentation:**

States and Territories must submit and have approved by the Secretary of DHHS, a State Child Health Plan. Individuals must meet State requirements.

**Preapplication Coordination:**

States are encouraged to work with DHHS in the development of their Title XXI plans. Central and regional office staff from the Centers for Medicare and Medicaid Services (CMS) and the Health Resources Services Administration (HRSA), as well as other DHHS components are available to furnish guidance and technical assistance to a State in preparing their plans. This program is excluded from coverage under E.O. 12372.

**Application Procedure:**

Title XXI plans and amendments are submitted by the State Governor, or designee, to the CMS Center for Medicaid and State Operations; Families and Children Health Program Group (CMSO/FCHPG). The Title XXI plan should be a stand alone document that fully addresses each relevant Section of the statutory requirements.

**Award Procedure:**

The CMS Administrator exercises delegated authority to approve Title XXI plans and amendments. Letters of approval will be signed by the CMS Administrator.

**Deadlines:**

Under the Law, a State must have an approved State Plan for a fiscal year in order to receive an allotment that year.

**Range of Approval/Disapproval Time:**

Section 2106 of the Law, specifies that a State plan is considered approved unless the Secretary notifies the State in writing, within 90 days after receipt of the plan, that the plan is disapproved (and the reasons for disapproval) or that specific additional information is needed. Informal clarification and discussion between the State and the DHHS review team is permitted and encouraged during the review period. This does not stop the "90-day clock." The 90-day review period may be stopped by formal written requests for additional information and clarification. The 90-day review period may be stopped as many times as necessary to obtain completed information necessary to disapprove or approve the plan. The 90-day period will resume when the finalized additional information is received by CMS.

**Appeals:**

If a State wishes to appeal a disapproval, it may petition for a reconsideration of this decision within 60 days after the date of receipt of the disapproval letter, by submitting a written request for reconsideration to the project officer and the regional office. States also have the option to submit a new application following the disapproval, starting a new 90-day review clock.

**Renewals:**

An approved State child health plan shall continue in effect unless the State amends that plan or the Secretary finds substantial noncompliance of the plan in accordance with the requirements of Title XXI.

**Formula and Matching Requirements:**

Section 2105(b), Title XXI, provides for an "enhanced Federal Matching Assistance Percentage (FMAP)" for child health assistance provided under Title XXI that is equal to the current FMAP for the fiscal year in the Medicaid Title XIX program, increased by 30 percent of the difference between 100 and the current FMAP for that fiscal year. The enhanced FMAP may not exceed 85 percent. The formula for determining the final allotment includes: determining the number of States with approved State Plans as of the end of the fiscal year. In order for a State to receive a final allotment for a fiscal year, CMS must approve the SCHIP State Plan for that State by the end of the fiscal year. Only States with approved State Plans by the end of the fiscal year will be included in the final allotment calculation. States' final allotments will be determined in accordance with the statutory formula that is based on two factors: (1) Number of children (those potentially eligible for SCHIP), and (2) the State cost factor. These factors will be multiplied to yield a final allotment product for each State. Once the final allotment product has been determined for all the States with approved SCHIP plans, the products for each State will be added to determine a national total. Each State's product will be divided by this national total to determine a State specific percentage of the national total available amount for allotment that each State would be eligible to receive. The State specific percentage is then multiplied by the national total amount available for allotment, resulting in the final allotment for each State.

**Length and Time Phasing of Assistance:**

Enrolled children receive medical services as necessary. Federal funds are obligated to the States by issuing Title XXI grant awards. To ensure that all of the appropriated funds are available to States, CMS will issue grant awards to all States with Title XXI State plans approved by the end of the fiscal year equaling the national amount available for allotment to the 50 States, the District of Columbia, and the Commonwealths and Territories for that fiscal year. Grant awards must be issued by the time the CMS/HHS accounting system closes with

respect to that fiscal year.

**Reports:**

Section 2108 of the Law specifies that States must develop annual reports assessing the operation of their State Plan for each fiscal year, including the progress made in reducing the number of uncovered low-income children and report to the Secretary by January 1, of the following year the results of the assessment. By March 31, 2000, each State with a child health plan must submit to the Secretary an evaluation that includes an assessment of the effectiveness of the State Plan in increasing the number of children with creditable health coverage, in increasing the availability of affordable quality individual and family health insurance for children, and in coordinating recommendations for improving the program under this Title. By December 31, 2001, the Secretary must submit to Congress and make available to the public, a report based on the evaluations submitted by the States recommendations and conclusions.

**Audits:**

A State child health plan under Title XXI must include an assurance that the State will afford the Secretary access to any records or information relating to the plan for the purposes of review or audit.

**Records:**

A State child health plan must include an assurance that the State will collect the data, maintain the records, and furnish the report to the Secretary at the times and in standardized format (as the Secretary requires), in order to enable the Secretary to monitor State program administration and compliance and to evaluate and compare the effectiveness of State Plans under this Title.

**Account Identification:**

**Obligations:**

(Grants) FY 07 \$5,940,730,000; FY 08 est \$6,640,000,000; and FY 09 est \$5,315,000,000.

**Range and Average of Financial Assistance:**

The range is from: \$5,753,333 (\$577,500 for the smallest territory) to \$790,789,213 for the States. In the third year following the State allotment fiscal year, under a "redistribution process" CMS will determine the amounts of the unused fiscal year allotments from States that have not expended all of their allotment for that fiscal year and will redistribute the amounts to States that have fully expended the amount of their allotments for that fiscal year.

## 93.768 MEDICAID INFRASTRUCTURE GRANTS TO SUPPORT THE COMPETITIVE EMPLOYMENT OF PEOPLE WITH DISABILITIES

(Ticket To Work Infrastructure Grants)

**FEDERAL AGENCY:**

CENTERS FOR MEDICARE AND MEDICAID SERVICES, DEPARTMENT OF HEALTH AND HUMAN SERVICES

**AUTHORIZATION:**

Ticket to Work and Work Incentives Improvement Act of 1999, Section 203, Public Law 106-170.

**OBJECTIVES:**

To support State efforts to enhance employment options for people with disabilities by building Medicaid infrastructure. Funding may be used to develop a Medicaid buy-in, increase availability of Personal Assistance Services, or for State-to-State technical assistance. In addition, States may use funding to develop a comprehensive approach to bridge Medicaid services with other key supports and programs used by employed people with disabilities.

**TYPES OF ASSISTANCE:**

Project Grants.

**USES AND USE RESTRICTIONS:**

While the proposals submitted by the States may vary, States participating in this grant program will use the funds to remove the barriers to employment of persons with disabilities, by creating health systems change through the Medicaid program. The development or enhancement of certain core Medicaid components in each State would enable people with disabilities not only to work, but to sustain adequate health coverage if they find they need to relocate to another State for employment purposes. An adequate personal assistance services benefit and a Medicaid buy-in for employed people with disabilities are significant components of the Ticket to Work and Work Incentives Improvement Act. The infrastructure grants program provides money to the States to develop these core elements. In addition, States may use funding to develop a comprehensive approach to bridge Medicaid services with other key supports and programs used by employed people with disabilities. Funds may not be used for the direct provision of services to people with disabilities except on a one-time, last resort, emergency basis for the purpose of sustaining the individual's competitive employment.

**Applicant Eligibility:**

Either of the following may apply: (a) the single state medicaid agency; or (b) any other agency or instrumentality of a state(as determined under State law) in partnership, agreement and active participation with the single state medicaid agency, the State Legislature, or the office of the Governor.

**Beneficiary Eligibility:**

There are two groups of potentially eligible beneficiaries, as defined by the Ticket to Work and Work Incentives Improvement Act of 1999. The first group consists of persons with disabilities between the ages of 16 and 65 years old, employed, and who meet income, asset, and resource standards established by the State. The second group of potential beneficiaries consists of persons between the ages of 16 and 65 years old, employed, and who cease to be eligible for Medical Assistance because of medical improvements determined at the time of a regularly scheduled disability review, but who also continue to have a severe medically determinable impairment.

**Credentials/Documentation:**

Federal funds must go to a designated State Medicaid Agency or its partner agencies or instrumentality's. Individuals must meet State requirements. Administrative cost will be determined in accordance with OMB Circular No. A-87, "Cost Principles for State and Local Governments."

**Preapplication Coordination:**

No preapplications are required. This program is excluded from coverage under E.O. 12372.

**Application Procedure:**

The standard application form SF-424 and related forms, as furnished by CMS, must be used for this program. Application forms are submitted to the Acquisition and Grants Group, CMS, C2-21-15 Central Building, 7500 Security Boulevard, Baltimore, MD 21244-1850. This program is subject to the provisions of OMB Circular No. A-102.

**Award Procedure:**

Official notice of approved applications is made through the issuance of a grant award.

**Deadlines:**

Established when program announcements are published in the Federal Register or transmitted to States.

**Range of Approval/Disapproval Time:**

The range is from 100 to 150 days.

**Appeals:**

There are no formal appeals procedures. If an application is disapproved, the reasons for disapproval will be fully stated.

**Renewals:**

Extensions and continuations of projects are available if formally applied for and approved. If a grant application is recommended for approval for 2 or more years, the awardee must annually submit a formal request for continuation accompanied by a progress report that will be evaluated prior to a recommendation of continuation.

**Formula and Matching Requirements:**

No State or local matching funds are required for the infrastructure grants.

**Length and Time Phasing of Assistance:**

CMS announced the first round of infrastructure grant awards in October 2000. This grant program is authorized for 11 years beginning in fiscal year 2001.

**Reports:**

Progress and expenditure reports are required on all projects.

**Audits:**

All fiscal transactions identifiable to Federal financial assistance are subject to audit by the DHHS audit agency.

**Records:**

Proper accounting records, identifiable by project number and including all receipts and expenditures, must be maintained for 3 years. Subsequent to audit, they must be maintained until all questions are resolved.

**Account Identification:**

75-0516-0-1-551.

**Obligations:**

(Grants) FY 07 \$37,074,935; FY 08 \$40,200,000; and FY 09 est \$45,500,000.

**Range and Average of Financial Assistance:**

\$500,000 to \$2,750,000; \$500,000.

**PROGRAM ACCOMPLISHMENTS:**

Through FY 2007, a total of 50 entities (49 States and the District of Columbia) have been approved for funding from the Infrastructure Grant Program section 203 since its inception. There are 33 States with Medicaid buy-ins and one additional State has a plan amendment under review. As of September 30, 2006, there were just over 78,402 workers receiving Medicaid benefits under the buy-in options. A total of 26 States and the District of Columbia have applied for and will receive continuation grant awards in FY 2007. Nine States received new competitive grant awards in FY 2006. In addition, five States, South Carolina, Missouri, Iowa, Indiana and Arkansas will continue to carry out employment goals for the working disabled population by spending previous grant awards in FY 2007 through a no-cost extension of funding. Of the \$42.8 million (FY 2007) that has been appropriated for the upcoming grant year, \$34.7 million was granted to the States. The reason for the large discrepancy in the FY 2007 appropriation, and the funding amount is that States are enrolling fewer participants in Medicaid buy-in programs than Congress originally anticipated. Higher levels of funding are legislatively related to the yearly amount of Medicaid buy-in service costs expended by a State.

**REGULATIONS, GUIDELINES, AND LITERATURE:**

Project Grants.

**USES AND USE RESTRICTIONS:**

These demonstration grants will enable States to assist working individuals by providing the necessary benefits and services required for people to manage the progression of their conditions and remain employed. Federal funds paid to the States under this demonstration must be used to supplement, but not supplant, State funds expended for workers with potentially severe disabilities at the time the demonstration project is approved.

If a grant application is recommended for approval for 2 or more years, the awardee must annually submit a formal request for continuation accompanied by a progress report that will be evaluated prior to a recommendation of continuation.

**Formula and Matching Requirements:**

Funding will be distributed to the demonstration States as quarterly payments equal to the Federal medical assistance percentage of the expenditures of the States on medical assistance provided to workers with potentially severe disabilities at the normal service match rate. Administrative expenses will be paid with 100 percent demonstration funding.

**Length and Time Phasing of Assistance:**

While there are no restrictions precluding States from proposing demonstrations that operate for less than the total length of the demonstration, scoring preference will be given to States that propose to participate for the duration of the demonstration. Funding for the demonstration is available from fiscal year 2001 through fiscal year 2006. If any Federal funding remains available after 2006, payments may be made to the States until funding is depleted or through fiscal year 2009.

States implementing demonstration grant programs will provide Medicaid-equivalent services to targeted populations of working individuals with disabilities. The demonstration projects will be used to evaluate the impact of providing Medicaid benefits to a working person with a potentially severe disability. The State demonstration projects cover individuals with all types of disabilities including HIV/AIDS, and

various mental illnesses. In FY 2006, a total of almost \$73 million was obligated for the section 204 program.

**OBJECTIVES:**

To provide hospital insurance protection for covered services to persons age 65 or above, to certain disabled persons and to individuals with chronic renal disease.

**TYPES OF ASSISTANCE:**

Direct Payments for Specified Use.

**USES AND USE RESTRICTIONS:**

Hospital insurance benefits are paid to participating and emergency hospitals, skilled nursing facilities, home health agencies, and hospice agencies to cover the prospective payment amount or reasonable cost of medically necessary services furnished to individuals entitled under this program.

**Applicant Eligibility:**

Persons age 65 or over and certain disabled persons are eligible for hospital insurance protection. Nearly everyone who reached 65 before 1968 is eligible for hospital insurance, including people not eligible for cash Social Security benefits. A person reaching age 65 in 1968 or after, who is not eligible for cash benefits, needs some work credit to qualify for hospital insurance benefits. The amount of work credit needed depends on age. Hospital insurance (Medicare Part A) is also available to persons, age 65 or over, not otherwise eligible through payment of a monthly premium which is currently \$393. A reduced Part A premium of \$216 per month in 2006 is available to persons with 30 or more quarters paid into the social security system, as well as to their spouse, surviving spouse or divorced spouse. The reduction in Part A premium payments would also apply to the surviving spouse, or divorced spouse of an individual who had at least 30 quarters of coverage under the social security system. Federal employees began contributing toward Medicare hospital insurance coverage beginning January 1983. Employees who worked prior to 1983 and who were employed during January 1983 can receive credit toward establishing Medicare eligibility, if necessary, for prior non-contributory quarters of Federal employment. State and local government employees not already in Social Security-covered positions and hired on or after April 1, 1986 also contribute toward Medicare hospital insurance coverage. Although States may request agreements to cover individuals employed prior to April 1, 1986, no credit is given toward establishing Medicare entitlement for prior employment. Persons under age 65, who have been entitled for at least 24 months to Social Security disability benefits, or for 29 consecutive months to railroad retirement benefits based on disability, are eligible for hospital insurance benefits.

**Beneficiary Eligibility:**

Persons age 65 or over and qualified disabled persons.

If the coverage of disabled individuals under age 65 was not through a large group health plan (LGHP), that is, a plan that covers employees of at least one employer that normally employs at least 100 employees, no family member other than a spouse qualifies for a special enrollment period. An SEP enrollment may occur during any month the individual is covered under the GHP based on current employment or, during the eight month period that begins the first month after employment or GHP coverage ends, whichever occurs first. Months of coverage under the GHP based on current employment are excluded from the calculation of the premium surcharge. Individuals may also enroll during the General Enrollment Period (FGEP) that takes place January through March of each year. SMI Part B coverage begins July 1 of the year individuals enroll. **PROGRAM ACCOMPLISHMENTS:**

Section 6201 of the Deficit Reduction Act of 2005 (DRA, Public Law 109-171) provides for \$2 billion dollars in additional federal payments under Hurricane Katrina related multi-state section 1115 demonstrations. The legislation indicated specific categories of expenditures for which these funds may be used. Initially, following enactment of the DRA, based on States' FY 2006 estimates of the DRA defined expenditure categories (from States with approved multi-state Hurricane Katrina demonstrations), we provided grant awards totaling \$1.5 billion to 32 States. Although DRA provided for a total of \$2 billion for Katrina relief, we initially held back \$500 million with the intent of obtaining updated State estimates which would inform a subsequent disposition of such funds. Based on updated estimates, CMS determined that for 11 states their initial allocation (of the \$1.5 billion) was not sufficient for their projected FY 2006 expenditures. We issued those states an additional \$363,912,798 in grant authority in late September for total FY 2006 obligations of \$1,863,912,798. The resulting unobligated carryover into FY 2007 was \$136,087,202. Delayed state payment processing of Katrina-related relief provider claims through the fourth quarter of FY 2006 necessitates the issuance of additional grant authority to states for FY 2007. CMS plans to recover an estimated \$450 million from the approximately \$1.9 billion originally obligated in FY 2006 by reconciling each state's FY 2006 grants with actual expenditures reported on the states' cumulative expenditures reports through the 4th quarter FY 2006. CMS will use the \$450 million in estimated prior period recoveries and the FY 2006 unobligated carryover to provide FY 2007 grant authority to the states, as needed for payment of FY 2006 dates of service which are being paid in FY 2007. By reconciling each state's FY 2007 grants with actual expenditures through the 1st quarter FY 2007, we will be able to determine the further disposition of any remaining DRA funds.

## 93.789 ALTERNATIVES TO PSYCHIATRIC RESIDENTIAL TREATMENT FACILITIES FOR CHILDREN

(Demonstration Projects Regarding Home and Community-Based Alternatives to Psychiatric Residential Treatment Facilities for Children)

### FEDERAL AGENCY:

CENTERS FOR MEDICARE AND MEDICAID SERVICES, DEPARTMENT OF HEALTH AND HUMAN SERVICES

### AUTHORIZATION:

Section 6063, Deficit Reduction Act of 2005, Public Law 109-171.

### OBJECTIVES:

Over the last decade, Psychiatric Residential Treatment Facilities (PRTFs) have become the primary provider for youth with serious emotional disturbances requiring an institutional level of care. However, since they are not recognized as hospitals, nursing facilities or intermediate care facilities for the mentally retarded, many States have been unable to use the 1915(c) waiver authority to provide home and community-based alternatives to care, which would keep the youth in their homes and with their families. Section 6063 of the Deficit Reduction Act of 2005 addresses this issue by providing up to \$217 million to up to 10 States to develop demonstration programs that provide home and community-based services to youth as alternatives to PRTFs. CMS anticipates awarding each successful applicant between \$21.7 and \$50 million. The PRTF Demonstration is authorized for up to 5 years. Payments may not be made to States after fiscal year 2011. CMS will review and approve each State's Implementation Plan prior to allowing States to access funds for Federal reimbursement of services under this grant. Section 6063 also provides \$1 million for a National Demonstration Evaluation.

### TYPES OF ASSISTANCE:

Project Grants.

### USES AND USE RESTRICTIONS:

**Budget Neutrality:** In conducting these demonstration projects, The Secretary of Health and Human Services shall ensure that the aggregate payments made by the Secretary under title XIX of the Social Security Act (42 U.S.C. 1396 et seq.) do not exceed the amount which the Secretary estimates would have been paid under the title, if the demonstration projects under Section 6063 had not been implemented. Any funding allocated for the Federal match for home and community-based services provided under the demonstration for the first year of this grant that remain unspent will be carried over to the next year of the Grant. **Indirect Costs:** The provisions of the OMB Circular A-87 govern reimbursement of indirect costs under this solicitation. A copy of OMB Circular A-87 is available online at: <http://www.whitehouse.gov/omb/circulars/a087/a087.html>.

### Applicant Eligibility:

Any single State Medicaid Agency, State Mental Health Agency, or instrumentality of the State may apply for this Demonstration Grant. Only one application can be submitted for a given State. By "State" we refer to the definition provided under 45 CFR 74.2 as "any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or any agency or instrumentality of a State exclusive of local governments." By "territory or possession" we mean Guam, the U.S. Virgin Islands, American Samoa, and the Commonwealth of the Northern Mariana Islands.

### Beneficiary Eligibility:

The level of care for Medicaid eligible individuals for this demonstration at a minimum must be under the age of 21 and require the need for a PRTF as defined in the State's Medicaid State Plan. For the purposes of this demonstration, youth are defined as "any child, adolescent or young adult under the age of 21". States shall ensure that each participant under the demonstration meets this level of care criterion to participate in the demonstration. Further, States may elect to add additional criteria to carve out or target a specific sub-

population to receive home and community-based services under this demonstration. As a part of the application process, States shall submit a copy of the level of care assessment used to assess eligibility for participation in this demonstration. PRTFs are defined as any non-hospital facility with a provider agreement with a State Medicaid Agency to provide the inpatient services benefit to Medicaid-eligible individuals under the age of 21 (CFR 42.441.150 - 441.182). The facility must be accredited by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO) or any other accrediting organization with comparable standards recognized by the State. Additionally PRTFs must comply with Conditions of Participation on the use of restraint and seclusion (CFR 483.350 - 483.376).

**Credentials/Documentation:**

Each application for this Demonstration Grant must include a letter of endorsement from the Director of the Mental Health Authority and the State Medicaid Director, if the applicant is not the single State Medicaid Agency/State Agency.

**Preapplication Coordination:**

Applicants are encouraged to submit a non-binding Notice of Intent to Apply. Notices of Intent to Apply are not required and their submission or failure to submit a notice has no bearing on the scoring of proposals received. But receipt of such notices enables CMS to better plan for the application review process. This program is excluded from coverage under E.O. 12372.

**Application Procedure:**

Applicants must submit their applications electronically through <http://www.grants.gov>. Please note when submitting your application electronically, you are required, additionally, to mail a signed SF 424 to Nicole Nicholson, Centers for Medicare & Medicaid Services, Office of Operations Management, Acquisition and Grants Group, C2-21-15 Central Building, 7500 Security Boulevard, Baltimore, MD 21244-1850. The mailed SF 424 form may be received at the Centers for Medicare & Medicaid Services within 2 business days of the application closing date.

**Award Procedure:**

How the Merit of Applications Will Be Determined: CMS will employ a multiphase review process to determine the applications that will be reviewed and the merit of the applications that are reviewed. The multiphase review process includes the following: "Applications will be screened by Federal staff to determine eligibility for further review using the criteria detailed in the "Eligibility Information" section of the solicitation. Applications that are received late or fail to meet the eligibility requirements as detailed in the "Applicant Eligibility" section of this solicitation will not be reviewed." Applications will be objectively reviewed by a panel of experts, the exact number and composition of which will be determined by CMS at its discretion, but may include private sector subject matter experts, beneficiaries of Medicaid supports, and Federal and Applicant policy staff. The review panels will utilize the objective criteria described in the "Application Review Criteria Information" section of the solicitation to establish an overall numeric score for each application. The results of the objective review of applications will be used to advise the approving CMS official. Additionally, CMS staff will make final recommendations to the approving official after ranking applications using the scores and comments from the review panel and weighing other factors as described below. Factors Other than Merit that May be Used in Selecting Applications for Award: CMS may assure reasonable balance among the grants to be awarded in terms of key factors such as geographic distribution and broad target group representation. CMS may redistribute grant funds (as detailed in the "Award Information" section of the solicitation) based upon the number and quality of applications received. (e.g., to adjust the minimum or maximum awards permitted or adjust the aggregate amount of Federal funds allotted to a particular category of grants).

**Deadlines:**

For information on how to get started with Grants.gov, please visit [http://www.grants.gov/applicants/get\\_registered.jsp](http://www.grants.gov/applicants/get_registered.jsp). ## **93.791 MONEY FOLLOWS THE PERSON REBALANCING DEMONSTRATION**

(Money Follows the Person Demonstration)

**FEDERAL AGENCY:**

CENTERS FOR MEDICARE AND MEDICAID SERVICES, DEPARTMENT OF HEALTH AND HUMAN SERVICES

**AUTHORIZATION:**

Section 6071, Public Law Deficit Reduction Act of 2005, Public Law 109-171.

**OBJECTIVES:**

For more than a decade, States have been asking for the tools to modernize their Medicaid programs. With the enactment of the Deficit Reduction Act (DRA) of 2005, States now have new options to rebalance their long-term support programs to allow their Medicaid programs to be more sustainable while helping individuals achieve independence. The Money Follows the Person (MFP) Rebalancing Demonstration (MFP Demo), created by section 6071 of the Deficit Reduction Act of 2005 (P.L. 109-171), supports State efforts to "rebalance" their long-term support systems by offering \$1.75 billion over 5 years in competitive grants to States. Specifically, the demonstration will support State efforts to: "Rebalance their long-term support system so that individuals have a choice of where they live and receive services." Transition individuals from institutions who want to live in the community. Promote a strategic approach to implement a system that provides person centered services and a quality management strategy that ensures the provision of, and improvement of such services in both home and community-based settings and institutions. The demonstration provides for enhanced federal medical assistance percentage (FMAP) for 12 months for qualified home and community-based services for each person transitioned from an institution to the community during the demonstration period. Eligibility for transition is dependent upon residence in a qualified institution. The State may establish the minimum timeframe for residence between 6 months and two years as required by Section 6071(b)(2)(A) of the DRA. The State must continue to provide community-based services after the 12 month period for as long as the person needs community services and is Medicaid eligible. Demonstration grants will be awarded to States from January 1, 2007 through September 30, 2011. CMS will accept one proposal from each State interested in participating in the demonstration program. The Single State Medicaid Agency must be the lead applicant. States must propose a demonstration period of no less than two consecutive fiscal years but no greater than five years. The State will indicate in its application the targeted group(s) and number of individuals it intends to transition. In making awards, CMS will give preference to States if they include multiple target groups including older individuals, and if they propose to deliver self-directed services. The number of demonstration projects approved by CMS depends largely on the scope (i.e., proposed enrollment and breadth of services) and quality of the proposed projects. Under the demonstration project, the State must propose a system of Medicaid home and community-based care that will be sustained after the demonstration period and is deemed qualified by the Secretary. Specifically, the program must be conducted in conjunction with a "qualified HCBS program" which is a program that is in operation (or approved) in the State for such individuals in a manner that assures continuity of Medicaid coverage of services in the qualified HCBS program for eligible individuals. States may also propose to enhance the services they will provide during the demonstration period to achieve greater success with transition. States will be required to participate in a national qualitative and quantitative evaluation conducted by CMS. Data collected on a national level will help evaluate the core objectives of the statute that are listed below.

**TYPES OF ASSISTANCE:**

Project Grants.

**USES AND USE RESTRICTIONS:**

Indirect Costs: The provisions of the OMB Circular A-87 govern reimbursement of indirect costs under this solicitation. A copy of OMB Circular A-87 is available online at: <http://www.whitehouse.gov/omb/circulars/a087/a087.html>.

**Applicant Eligibility:**

Applicants must be any single State Medicaid Agency, State Mental Health

Agency, or instrumentality of the State may apply for this Demonstration Grant. Only one application can be submitted for a given State. By "State" we refer to the definition provided under 45 CFR 74.2 as "any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or any agency or instrumentality of a State exclusive of local governments." By "territory or possession" we mean Guam, the U. S. Virgin Islands, American Samoa, and the Commonwealth of the Northern Mariana Islands.

**Beneficiary Eligibility:**

As defined in Section 6071(b)(2) of the DRA, the term "eligible individual" means, with respect to an MFP demonstration project of a State, an individual in the State who, immediately before beginning participation in the MFP demonstration project: (i) resides (and has resided, for a period of not less than 6 months or for such longer minimum period, not to exceed 2 years, as may be specified by the State) in an inpatient facility; (ii) is receiving Medicaid benefits for inpatient services furnished by such inpatient facility; and (iii) with respect to whom a determination has been made that, but for the provision of home and community-based long-term care services, the individual would continue to require the level of care provided in an inpatient facility and, in any case in which the State applies a more stringent level of care standard as a result of implementing the State plan option permitted under section 1915 (i) of the Social Security Act, the individual must continue to require at least the level of care which had resulted in admission to the institution.

**Credentials/Documentation:**

Applications can only be submitted by the single State Medicaid agency. A cover letter must accompany the application. The cover letter must be signed by the State Medicaid Director, and must indicate the title of the project, the principal contact person, the amount of funding requested, and the names of the major partners actively collaborating in the project.

**Preapplication Coordination:**

Applicants are encouraged to submit a non-binding Notice of Intent to Apply. Notices of Intent to Apply are not required and their submission or failure to submit a notice has no bearing on the scoring of proposals received. But receipt of such notices enables CMS to better plan for the application review process. This program is excluded from coverage under E.O. 12372.

**Application Procedure:**

Applicants must submit their applications electronically through <http://www.grants.gov>. Please note when submitting your application electronically, you are required, additionally, to mail a signed SF 424 to Nicole Nicholson, Centers for Medicare and Medicaid Services, Office of Operations Management, Acquisition and Grants Group, C2-21-15 Central Building, 7500 Security Boulevard, Baltimore, MD 21244-1850. The mailed SF 424 form may be received at the Centers for Medicare and Medicaid Services within 2 business days of the application closing date.

**Award Procedure:**

An independent review of all applications will be conducted by a panel of experts including members of the disability community, advocates, providers and staff from State and Federal agencies including CMS. The review panel will assess each application to determine the merits of the proposal and the extent to which it furthers the purposes of the demonstration program. The panel will evaluate each application for further review by CMS. CMS reserves the right to request that States revise or otherwise modify certain sections of their proposals based on the recommendations of the panel and the budget. A low score in one or two areas, even if offset by high scores in other areas, may result in a rejection of the proposal. Final approval of demonstration projects will be made by the Administrator of CMS after consideration of the comments and recommendations of the review panelists, program office recommendations, and the availability of funds. CMS reserves the right to approve or deny any or all proposals for funding. CMS seeks to achieve reasonable balance among the grants to be awarded in a particular category in terms of key factors such as geographic distribution and broad target group representation. CMS may redistribute grant funds (as detailed in the "Award Information" section of this solicitation) based upon the number and quality of applications received. (e.g., to adjust the minimum or maximum awards permitted or adjust the aggregate amount of Federal funds allotted to a particular category of grants).

**Deadlines:**

The deadline for applications is November 1, 2009, (11:59pm Eastern Standard Time).

**Range of Approval/Disapproval Time:**

Successful applicants will receive a Financial Assistance Award (FAA) signed and dated by the CMS Grants Management Officer. The FAA is the document authorizing the grant award and will be sent through the U.S. Postal Service to the applicant organization as listed on its SF 424. Any communication between CMS and applicants prior to issuance of the FAA is not an authorization to begin performance of a project. Unsuccessful applicants will be notified by letter, sent through the U.S. Postal Service to the applicant organization as listed on its SF 424, after December 1, 2009.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

**AUTHORIZATION:**

Public Health Service Act, Title VII, Section 751(a)(1), as amended; Health Professions Education Partnerships Act of 1998, Public Law 105-392.

**OBJECTIVES:**

The Basic/Core Area Health Education Centers (BAHEC) Program and Model State Supported Area Health Education Centers (MAHEC) Program goals are to assist schools to improve the distribution, diversity, supply, and quality of health personnel in the health services delivery system, and to attract and retain health

personnel in underserved areas. The AHEC Program awardees link the academic resources of medical schools and participating health professions schools with local educational and clinical sites, and thereby establish a network of community-based training sites to provide educational services to health professions students, faculty-preceptors and health care providers in underserved areas, and ultimately, to improve the delivery of health care in an underserved region or in an entire state. Emphasis is placed on community-based training of health professions students, primary care-oriented medical residents, local providers, and also 9-12 grade students. The BAHEC program assists schools in the initial planning, development and implementation of community-based Area Health Education Centers (AHECs) which assist schools and organize the training of at least three health professions disciplines at training-service delivery sites in rural and underserved areas, of a region or an entire state. Schools which complete Basic AHEC Program development, then compete for Model AHEC Program awards in partnership with affiliated (contracted) AHEC Centers to maintain and enhance/expand training programs and training sites responsive to local, State and Federal needs and priorities. The BAHEC and MAHEC programs embrace the goal of increasing the number of health professions graduates who ultimately practice in underserved areas. Both AHEC programs carry out health careers recruitment and enhancement activities to attract high school students from underserved areas into health careers.

Small Business Innovation Research (SBIR) program: To increase private sector commercialization of innovations derived from Federal research and development; to increase small business participation in Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. Small Business Technology Transfer (STTR) program: To stimulate and foster scientific and technological innovation through cooperative research and development carried out between small business concerns and research institutions; to foster technology transfer between small business concerns and research institutions; to increase private sector commercialization of innovations derived from Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation.

**TYPES OF ASSISTANCE:**

Project Grants (Cooperative Agreements).

**USES AND USE RESTRICTIONS:**

Grants may support salaries, equipment, supplies, travel, and patient hospitalization as required to perform the research effort. Restrictions or limitations are imposed against the use of funds for entertainment, foreign travel, general-purpose equipment, alterations and renovations, and other items not regularly required for the performance of research. Individual Predoctoral and Postdoctoral National Research Service Awards (NRSA) are made directly to individuals for research training in specified biomedical shortage areas. Institutional NRSA awards may be made to eligible institutions to enable them to appoint individuals selected by the institution. Certain service and paycheck provisions may apply to postdoctoral individuals upon termination of the award or termination of the appointment. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of research initiated in Phase I that is likely to result in commercial products or processes. Only Phase I awardees are eligible to apply for Phase II support. Some Phase II awardees may be eligible to apply for funds to continue research for up to three years beyond the original Phase II award. Eligible projects involve assessment and improvement of drugs or devices or propose to conduct preclinical studies of drugs or devices that ultimately require: 1) clinical evaluation and/or 2) approval of a Federal regulatory agency. The product being developed must be one for which Federal regulatory approval (e.g., FDA) is a required step toward commercialization. Prospective applicants are strongly encouraged to contact NIH staff to determine eligibility. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of Phase II application.

**Applicant Eligibility:**

To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. Any nonprofit organization engaged in biomedical research and institutions or companies organized for profit may apply for almost any kind of grant. Only domestic, non-profit, private or public institutions may apply for NRSA Institutional Research Training Grants. An individual may apply for an NRSA or, in some cases, for a research grant if adequate facilities to perform the research are available. SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is being proposed, and have no more

than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. or its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees) that formally collaborate with a university or other non-profit research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions.

**Beneficiary Eligibility:**

Research project grants and cooperative agreements, training and career development grants, and SBIR and STTR grants.

**Credentials/Documentation:**

Individual NRSAs and Institutional NRSA trainees must be citizens of the United States or have been admitted for permanent residency; must hold a doctoral degree (M.D., Ph.D., D.D.S., D.O., D.V.M., Sc.D., D.Eng., or equivalent domestic or foreign degree); and must possess a desire for training in one of the health or health-related areas specified by the National Institutes of Health. Each applicant must be sponsored by an accredited public or private nonprofit institution engaged in such training. Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments. For-profit organization costs are determined in accordance with Subpart 31.2 of the Federal Acquisition Regulations. For other grantees, costs will be determined in accordance with DHHS Regulations 45 CFR, Part 74, Subpart Q. For SBIR and STTR grants, the applicant organization (small business concern) must present, in a research plan, an idea that has potential for commercialization and must furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. The grant application form SF424 (R&R) is used to apply for all SBIR and STTR grants.

**RELATED PROGRAMS:**

93.837, Cardiovascular Diseases Research; 93.839, Blood Diseases and Resources Research; 93.233, National Center on Sleep Disorders Research.

**EXAMPLES OF FUNDED PROJECTS:**

(1) An individual research grant to investigate basic mechanisms of primary pulmonary hypertension, a lethal disease that causes progressive obstruction of small pulmonary arteries. This grant has established a national registry of familial primary pulmonary hypertension that is providing the framework for linkage analysis and the molecular search for basic mechanisms of this disease. (2) A multi-project grant dealing with cellular and molecular mechanisms underlying acute and chronic asthma. The focus of this program is on the mechanisms causing asthma in humans. The work includes laboratory projects, animal research, and human studies. The work includes laboratory projects and animal research concentrated on the cellular pathways of the asthmatic inflammatory process, focused on the mast cell, a critical cell type in asthma. (3) A Specialized Center of Clinically Oriented Research (SCCOR) grant in Translational Research in Acute Lung Injury. This grant consists of several projects that combine basic and clinical research with the goal of improving the outcome of patients with Acute Lung Injury. The investigators are studying novel mechanisms and treatments for this syndrome. The grant includes a clinical trial of Activated Protein C, to inhibit coagulation and inflammation, a study to identify the role of transforming growth factor B1 as a mechanism underlying the disease and a novel study of genetic factors that might increase susceptibility in patients with severe pneumonia and acute lung injury. The program includes genetic, proteomic, and molecular biological approaches in addition to the clinical trial. (4) An individual National Research Service Award to study the effect of the interruptions in breathing during sleep caused by sleep apnea. The investigator will study the expression of genes in response to intermittent hypoxia and sustained hypoxia, which cause pulmonary vasoconstriction and systemic vasodilation. The research training and coursework received under the award will provide a foundation of skills the investigator will use to study the deleterious effect of intermittent hypoxia on the cardiopulmonary system. (5) A Small Business Technology Transfer Program for development of a Thermal HydroSeal (THS) system that will allow surgeons to seal air leaks that arise on the raw lung surface exposed during a lobectomy. Surgical resections, are common procedures in lung cancer patients. Postoperative air leakage at the parenchymal surfaces following lung resections, is a frequent complication which can result in extended hospital stays. The development of this device will be useful to pulmonary physicians, providing them with an effective system to seal air leaks, which should improve patient recovery and reduce hospital stays.

**EXAMPLES OF FUNDED PROJECTS:**

(1) An individual research grant using a novel systems biology approach to study the genetic basis of stroke risk in sickle cell disease. The investigators validated in a clinical setting a new type of statistical analysis method for genetic association studies based on Bayesian networks. (2) A multi-project grant to study cell adhesion mechanisms in vascular disease and thrombosis. The program is designed to advance understanding of molecular mechanisms of vascular disease and to promote development of new diagnostic, therapeutic, and preventive strategies through the collaborative efforts of scientists focused on the unifying theme of cell adhesion. Studies will span analysis of biochemistry, fine structure at atomic level detail, ex-vivo studies to analyze the effects of blood flow on adhesion and signaling, hematopoiesis, and analysis of genetically modified mice. (3) A grant for a Specialized Center of Clinically Oriented Research (SCCOR) in Transfusion Medicine and Biology. The focus is to increase our understanding of the biologic and immunologic aspects of transfusion medicine. The studies in this multi-project grant address the management of the blood supply, immunologic responses to blood components or marrow derived cells, and cellular therapy. (4) A Comprehensive Sickle Cell Center Grant that integrates clinical, translational and basic research, thereby fostering multidisciplinary collaborations directed toward the goal of finding effective therapy and ultimately a cure for sickle cell disease. (5) An Individual National Research Service Award to use in utero gene delivery to target highly proliferative hematopoietic stem cells in the fetal liver of a murine model of beta thalassemia. The fellow will train under the guidance of an accomplished mentor and will develop research skills in the important area of in utero gene transfer strategies for transduction of hematopoietic stem cells and treatment of genetic disorders of the hematopoietic system that cause ongoing morbidity and mortality in children. (6) A Small Business Innovative Research Grant to develop a rapid, accurate, cost-effective screening test to detect a broad array of bacterial contaminants in stored human red blood cells. #### **TYPES OF ASSISTANCE:**

Project Grants.

#### **USES AND USE RESTRICTIONS:**

Project Grants provide funds for salaries, equipment, supplies, travel, and other expenses associated with scientific investigation relevant to program objectives. NRSA's are made directly to individuals for research training in specified biomedical shortage areas, or, to institutions to enable them to make NRSA's to individuals selected by them. Each individual who receives a NRSA is obligated upon termination of the award to comply with certain service and payback provisions. SBIR Phase I grants (of approximately 6-months duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I and that are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. The NINDS also participates in the Academic Research Enhancement Award (AREA) Program, which is intended to provide research support to institutions currently having little National Institutes of Health (NIH) support.

**TYPES OF ASSISTANCE:**

Project Grants.

**USES AND USE RESTRICTIONS:**

Research grants may be used to provide salaries, equipment, supplies, travel and other expenses for research. The grantee institution is obliged to expend grant funds prudently for the purposes stated in the application and award document. National Research Service Awards (NRSAs) are made directly to individuals for research training in specified biomedical shortage areas, or to institutions, to enable them to make NRSAs to individuals selected by them. Each individual who receives a NRSA is obligated upon termination of the award to comply with service and payback provisions. Career Development Awards such as the Independent Scientist Awards provide support for newly independent scientists with health related degrees who can demonstrate the need for a period of intensive research focus as a means of enhancing their research careers. Mentored Clinical Research Scientist Development Awards provide support for clinically trained health professionals who need an additional period of sponsored research experience as a way to gain expertise in a research area new to the candidate or in an area that would demonstrably enhance the candidate's scientific career. The Mentored Research Scientist Development Award are of three types: Re-Entry into the Neurological Sciences (RENS) which are made to women and men who have been out of neuroscience research for at least 3 years to give them an opportunity to re-establish their skills as independent

neuroscientists, the Career Development Award to promote diversity in neuroscience research support, an intensive, supervised research career development experience for underrepresented career neuroscientists, and Mentored Research Scientist Development Awards in Translational Research to support new investigators to build a program of translational research in neurological disorders. The Mentored Patient-Oriented Research Career Development Award provide support for a period of supervised study and research for clinically trained professionals who have the potential to develop into productive clinical investigators. The Mid-career Investigator Award in Patient-Oriented Research provide support for clinicians to allow them protected time to devote to patient-oriented research and to act as mentors for beginning clinical investigators. The Collaborative Neurological Sciences Award is to develop and promote competitive neurological science research programs at predominantly minority institutions through collaborations with grantees from research intensive institutions who have NIH grant support to conduct neurological science research. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research efforts initiated in Phase I that are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of Phase II application. Grant funds may be expended only for the purpose stated in the application and award document. The NINDS participates in the NIH SBIR/STTR "fast track" initiative.

#### **Applicant Eligibility:**

Research Grants: Any public, private, nonprofit, or for-profit institution is eligible to apply. For-profit institutions are not eligible for Institutional National Research Service Awards but are eligible for Individual NRSA. All proposals are reviewed for scientific merit, for evaluation of the qualifications of the investigators, for adequacy of the research environment, and for significance of the problem. Approved proposals compete for available funds. All Career Development Program awardees, with the exception of awardees of the Pathway to Independence Award, must be citizens or have been admitted to the United States for permanent residence. Candidates must be nominated for the program by a nonfederal public or private nonprofit institution located in the United States, its possessions or territories. Awardees for RENS must have been accepted by a sponsoring institution, had previous training and experience in neurological science, an interruption in their careers for a period of at least three years and not more than 8 years, and be citizens or non-citizen nationals of the United States. Awardees for the Collaborative Neurological Sciences Award must be from a predominantly minority institution and must have a doctoral degree in a basic or clinical science area. To be eligible, postdoctoral NRSA trainees or fellows must have a professional or scientific degree (M.D., Ph.D., D.D.S., D.O., D.V.M., Sc.D., D. Eng., or equivalent domestic or foreign degree). SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the entire research must be performed in the United States. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

#### **Beneficiary Eligibility:**

Health professionals, graduate students, health professional students, scientists, and researchers.

#### **Credentials/Documentation:**

Research grants are awarded to an institution in the name of an individual investigator. Persons qualified to carry out research related to the extramural programs described above may apply for funds to support their investigations. Mentored Career Program training must be conducted under the direction of a competent sponsor. National Research Service Awards: Individual NRSA Fellowships for postdoctoral training: the candidate's academic record, research experience, citizenship, institutional sponsorship, and the proposed area and plan of training must be included in the application. Institutional Training Grants for predoctoral and postdoctoral training: The applicant institution must

show the objectives, methodology and resources for the research training program; the qualifications and experience of directing staff; the criteria to be used in selecting individuals for stipend support; and a detailed budget and justification for the amount of grant funds requested. Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments. For-profit organizations' costs are determined in accordance with Subpart 31.2 of the Federal Acquisition Regulations. For other grantees, costs will be determined in accordance with HHS Regulations 45 CFR, Part 74 and 92, Subpart Q. For SBIR and STTR grants, the applicant organization (small business concern) must present in a research plan an idea that has potential for commercialization and furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. Grant forms PHS 6246-1 and PHS 6246-2 are used to apply for SBIR Phase I and Phase II, respectively. Grant forms PHS 6246-3 and PHS 6246-4 are used to apply for STTR Phase I and Phase II, respectively.

#### **Preaapplication Coordination:**

Research grant applications exceeding \$500,000 direct costs in any yearly budget period will not be accepted unless the NINDS has agreed to accept the application prior to submission (see <http://grants.nih.gov/grants/guide/notice-files/NOT-OD-02-004.html>). This program is excluded from coverage under E.O. 12372.

#### **Application Procedure:**

NIH is in the process of transitioning to the SF424 family of forms and electronic submission through Grants.gov by research program or funding mechanism. See <http://era.nih.gov/ElectronicReceipt/> for a list of grant mechanisms that have already transitioned to electronic submission. For applications to be submitted electronically, see <http://era.nih.gov/ElectronicReceipt/>. The change from paper submission to electronic applications for grant programs currently targeted to transition after May 2007, including Career Development (K), Fellowship (F), Training & Development (T&D) and complex mechanisms (P, U) will be delayed. See <http://grants1.nih.gov/grants/forms.htm> to determine the appropriate paper application package (PHS 398 or PHS 416) to be used.

#### **Award Procedure:**

Research Grant and Training Program applications are reviewed initially by technical panels, composed of scientific authorities, and by the National Advisory Neurological Disorders and Stroke Council composed of 18 leaders in medical science, education, and public affairs. Approved applications will compete on a merit basis for available funds. Formal award notices are transmitted to the grantee or awardee. All accepted SBIR/STTR applications are evaluated for scientific and technical merit by an appropriate scientific peer review panel and by a national advisory council or board. All applications receiving a priority score compete for available SBIR/STTR set-aside funds on the basis of scientific and technical merit and commercial potential of the proposed research, program relevance, and program balance among the areas of research.

#### **Deadlines:**

All new research grant and career program applications, plus all (new, competing continuation, supplemental or revised) program project and center grant applications deadline dates can be found at <http://grants1.nih.gov/grants/funding/submissionschedule.htm>.

#### **Range of Approval/Disapproval Time:**

Research grants: Approximately 6 to 9 months. Career program: From 6 to 9 months. SBIR/STTR applications: About 7-1/2 months. Institutional Training Grants: From 6 to 12 months.

#### **Appeals:**

A principal investigator (P.I.) may question the substantive or procedural aspects of the review of his/her application by communicating with the staff of the Institute, and subsequently, the P.I. and applicant institution may appeal to the NINDS appeals officer. A description of the NIH Peer Review Appeal procedures is available on the NIH home page <http://grants.nih.gov/grants/guide/notice-files/not97-232.html>.

**EXAMPLES OF FUNDED PROJECTS:**

Grants support research on neurological disorders such as: (1) Cerebral palsy; (2) disorders of aging including Parkinson's, Huntington's, and Alzheimer's diseases and the dementias; (3) muscular, neuromuscular and demyelinating disorders; (4) neuroendocrine studies; neural aspect of learning and behavior; (5) nervous system tumors, and infectious diseases of the central nervous system. Recently funded applications include studies designed to result in advances for a group of useful glycosidases, as well as mechanistic information for the activator protein that is required for lysosomal degradation of GM2, a glycosphingolipid involved in Tay-Sachs disease. Another study focuses on mechanisms of

synapse assembly, specifically the role of membrane associated quanylate kinases in the clustering and targeting of ion channels and receptors at the synapse. One example of the long range goal of a successful competing renewal application is to provide a better understanding of the mechanisms of movement of intracellular organelles along microtubules. Such movement plays a role in the process of fast axonal transport in nerve cells. The specific aims of another funded application are to assess environmental and genetic factors as determinants of hand preference, to determine whether measures of developmental stability can explain individual differences in phenotypic expressions of hand preference and to determine whether handedness is predictive of compromised immunological functioning and/or reproductive biology. A new project is aimed at addressing a series of fundamental issues regarding the mechanisms underlying the spread of synaptic modifications in neural networks. Another series of studies will take advantage of newly developed behavioral procedures and selective ibotenic acid lesions to compare the effects of lesioning hippocampus, subiculum, entorhinal cortex, and perirhinal cortex on learning and memory. Included in this effort are multi-disciplinary clinical research centers on Parkinson's disease, stroke, head and spinal cord injury, epilepsy, and demyelinating disorders, as well as program projects and a large number of individual grants. In head and spinal cord injury research studies, particular emphasis is given to the biomedical events and metabolism following injuries, with a view toward both salvaging damaged tissue and also creating conditions in which regeneration of injured nerve cells can take place. The clinical research program sponsors clinical trials to evaluate various therapeutic approaches to head and spinal cord injury, epilepsy, multiple sclerosis and other neurologic and neuromuscular disorders. The effects of systemic cancer on the central nervous system are studied, as part of the brain and spinal cord tumor research effort.

**CRITERIA FOR SELECTING PROPOSALS:**

The major elements in evaluating proposals include assessments of: (1) the scientific merit and general significance of the proposed study and its objectives; (2) the technical adequacy of the experimental design and approach; (3) the competency of the proposed investigator or group to successfully pursue the project; (4) the adequacy of the available and proposed facilities and resources; (5) the necessity of the budget components requested in relation to the proposed project; and (6) the relevance and importance to announced program objectives. The following criteria will be used in considering the scientific and technical merit of SBIR/STTR Phase I grant applications: (1) the soundness and technical merit of the proposed approach; (2) the qualifications of the proposed principal investigator, supporting staff, and consultants; (3) the technological innovation of the proposed research; (4) the potential of the proposed research for commercial application; (5) the appropriateness of the budget requested; (6) the adequacy and suitability of the facilities and research environment; and (7) where applicable, the adequacy of assurances detailing the proposed means for (a) safeguarding human or animal subjects, and/or (b) protecting against or minimizing any adverse effect on the environment. Phase II grant applications will be reviewed based upon the following criteria: (1) the degree to which the Phase I objectives were met and feasibility demonstrated; (2) the scientific and technical merit of the proposed approach for achieving the Phase II objectives; (3) the qualifications of the proposed principal investigator, supporting staff, and consultants; (4) the technological innovation, originality, or societal importance of the proposed research; (5) the potential of the proposed research for commercial application; (6) the reasonableness of the budget requested for the work proposed; (7) the adequacy and suitability of the facilities and research environment; and (8) where applicable, the adequacy of assurances detailing the proposed means for (a) safeguarding human or animal subjects, and/or (b) protecting against or minimizing any adverse effect on the environment.

**93.855 ALLERGY, IMMUNOLOGY AND TRANSPLANTATION RESEARCH**

**FEDERAL AGENCY:**

NATIONAL INSTITUTES OF HEALTH, DEPARTMENT OF HEALTH AND HUMAN SERVICES

**AUTHORIZATION:**

Public Health Service Act, Title IV, Section 301, as amended, Public Law 78-410; Small Business Research and Development Enhancement Act of 1992, Public Law 102-564, 42 U.S.C. 241.

**OBJECTIVES:**

To assist public and private nonprofit institutions and individuals to establish, expand, and improve biomedical research and research training in allergic and immunologic diseases and related areas to assist public, private, and commercial institutions to conduct developmental research; to produce and test research materials; and to provide research services as required by the agency for research progress in allergic and immunologic diseases. NIAID's Allergy, Immunology and Transplantation Research concerns the immune system as it functions in the maintenance of health and as it malfunctions in the production of diseases. Because of this dual focus, the program encompasses both basic research and clinical research. Small Business Innovation Research (SBIR) program expands

and improves private sector participation in biomedical research. The SBIR Program intends to increase and facilitate private sector commercialization of innovations derived from Federal research and development; to increase small business participation in Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. The Small Business Technology Transfer (STTR) program stimulates and fosters scientific and technological innovation through cooperative research and development carried out between small business concerns and research institutions; to foster technology transfer between small business concerns and research institutions; to increase private sector commercialization of innovations derived from Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. Research Career Development Awards support the development of scientists during the formative stages of their careers. Individual National Research Service Awards (NRSAs) are made directly to approved applicants for research training in specified biomedical shortage areas. In addition, Institutional National Research Service Awards are made to enable institutions to select and make awards to individuals to receive training under the aegis of their institutional program.

#### **TYPES OF ASSISTANCE:**

Project Grants.

#### **USES AND USE RESTRICTIONS:**

Beginning with fiscal year 1998, the direct costs awarded in the first year to a research project grant resulting from a competing renewal application will be limited to no more than a 20 percent increase over the direct costs awarded in the last non-competing year of that grant. Research grants provide funds for salaries, equipment, supplies, and travel. They also afford the collateral benefits of enriching the training experience of research workers. Grantees are expected to be judicious in using these funds. The application for a research grant sets forth specific terms and conditions and requires the signatures of the principal investigator and an official authorized to sign for the institution. Scientists and institutions are under an obligation to expend grant funds prudently for the purposes stated in the application and award document. For Research Career Development Awards (RCDAs) the scientists must demonstrate an outstanding research potential for independent research in the sciences related to transplantation, immunology, allergies, and immunological diseases. For National Research Service Awards (NRSAs), each individual who receives NRSA support is obligated upon termination of the award to comply with certain service and payback provisions. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I and which are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of the Phase II application.

#### **Applicant Eligibility:**

Universities, colleges, hospitals, laboratories, and other public or private nonprofit domestic institutions, including State and local units of government, and individuals are eligible to make application for grant support of research by a named principal investigator or a research career development candidate. For-profit organizations are also eligible, with the exception of NRSA. Individual NRSA awardees must be nominated and sponsored by a public or nonprofit private institution having staff and facilities appropriate to the proposed research training program. All NRSA awardees must be citizens or have been admitted to the United States for permanent residence. To be eligible, predoctoral candidates must have completed the baccalaureate degree, and postdoctoral awardees must have a professional or scientific degree (M.D., Ph.D., D.D.S., D.O., D.V.M., Sc.D., D.Eng., or equivalent domestic or foreign degree). SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is being proposed and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. or its possessions. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which researches proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

#### **Beneficiary Eligibility:**

Any nonprofit or for-profit organization, company, or institution engaged in biomedical research.

#### **Credentials/Documentation:**

Research grant applicants must define the objectives, methodology, and facilities for the program, and must present the program director's competence and scientific interest. For SBIR and STTR grants, applicant organization (small business concern) must present in a research plan an idea that has potential for commercialization and furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. Grant forms PHS 6246-1 and PHS 6246-2 are used to apply for SBIR Phase I and Phase II, respectively. Grant forms PHS 6246-3 and PHS 6246-4 are used to apply for STTR Phase I and Phase II, respectively. Applicants for individual NRSAs must include their academic record, research experience, citizenship, institute sponsorship, and the proposed area and plan of training in their applications. The applicant for an institution must specify the objectives, methodology, and resources for the research training program, the qualifications experience of directing staff, the criteria to be used in selecting individuals for award, and a detailed budget justification for the amount of grant funds requested. Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments. For-profit organizations' costs are determined in accordance with Subpart 31.2 of the Federal Acquisition Regulations. For other grantees, costs will be determined by HHS Regulations 45 CFR, Part 74, Subpart Q.

Public Health Service Act, Title IV, Section 301, as amended, Public Law 78-410; Small Business Research and Development Enhancement Act of 1992, Public Law 102-564.

**OBJECTIVES:**

To support research related to Microbiology and Infectious Diseases with the broad aim of improving health by controlling disease caused by infectious or parasitic agents. Projects range from studies of microbial physiology and antigenic structure to collaborative trials of experimental drugs and vaccines. Also supported are studies on the mechanisms of resistance to antibiotics as well as research dealing with epidemiological observations in hospitalized patients or community populations. The objectives of the program are to assist public and private nonprofit institutions and individuals to establish, expand and improve biomedical research and research training in infectious diseases and related areas; to assist public, private and commercial institutions to conduct developmental research; to produce and test research materials; and to provide research services as required by the agency for programs in infectious diseases; and to make grants or award contracts to public and nonprofit private entities to expand, remodel, renovate, or alter existing research facilities or construct new facilities. Small Business Innovation Research (SBIR) program expands and improves private sector participation in biomedical research. The SBIR Program intends to increase and facilitate private sector commercialization of innovations derived from Federal research and development; to increase small business participation in Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. The Small Business Technology Transfer (STTR) program stimulates and fosters scientific and technological innovation through cooperative research and development carried out between small business concerns and research institutions; to foster technology transfer between small business concerns and research institutions; to increase private sector commercialization of innovations derived from Federal research and development; and to foster and encourage participation of socially and

economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. Research Career Development Awards support the development of scientists during the formative stages of their careers. Individual National Research Service Awards (NRSAs) are made directly to approved applicants for research training in specified biomedical shortage areas. In addition, Institutional National Research Service Awards are made to enable institutions to select and make awards to individuals to receive training under the aegis of their institutional program.

**EXAMPLES OF FUNDED PROJECTS:**

(1) Areas of molecular microbiology include: basic research, biochemistry, physiology, and genetics of bacteria and fungi; the synthesis of new antimicrobial agents through organic chemistry; and the discovery of new antibiotics from natural sources. Areas of high relevance are: mechanisms of resistance to microbial agents, either of plasmid or chromosomal origin; and the manipulation of recombinant DNA molecules to better ascertain the molecular basis of pathogenicity and to create new substances of biological and medicinal utility. (2) In the area of bacteriology and mycology, research is conducted on a wide variety of problems involved directly or indirectly with diseases of man caused by bacteria and related agents. Studies to further the knowledge of the organisms involved include: investigations on the biology and physiology of bacteria; their morphology; and on antigenic structure and composition, toxins and endotoxins. More specific disease-related research includes studies on pathogenesis, immunopathology, host defense mechanisms, diagnostic procedures, therapeutic measures, animal models and the epidemiology of disease. Support is also provided for several specific disease program areas such as sexually transmitted diseases, hospital associated infections, and streptococcal diseases and sequelae. Research is also conducted in the area of mycobacteriology which includes two major diseases: tuberculosis and leprosy. This program also supports studies or bacterial diarrhea, bacterial vaccines, and antimicrobial agents. (3) Studies on viruses and diseases of importance to human health are also supported. Research in general virology encompasses the

biology of viruses and the immunopathogenesis of viral diseases. Studies that will significantly advance the knowledge of viral structure, replication, genetics, immunology, and interaction between virus and host are encouraged, as well as research on mechanisms of viral persistence and latency that underlie problems of chronic and recurring viral diseases and studies of viral pathogenesis and host's responses to viral infections or to vaccines. Several areas of particular interest include: viral hepatitis, influenza, viral diarrhea, antiviral substances, viral vaccines and Reye's Syndrome. (4) Research in parasitology includes projects designed to obtain a clearer understanding of host-parasite and vector-parasite relationships, with the ultimate goal of applying this basic information to the control of parasitic diseases through such procedures as chemoprophylaxis, chemotherapy, and vector control. Research projects cover the entire field of parasitology and medical entomology. Emphasis has been directed toward studies on the immunology of parasitic infections and the biological regulation of vectors. (5) Studies are also being conducted on Acquired Immune Deficiency Syndrome, and include basic, applied, preclinical and clinical research on HTLV-III/LAV and related retroviruses for eventual control of HTLV-III/LAV infections. This includes research on the epidemiological, clinical, immunological, and urological aspects of this disease as well as the prevention and treatment of the major opportunistic infections associated with AIDS.

**OBJECTIVES:**

To conduct and support laboratory research, clinical trials, and studies with people that explore health processes. NICHD researchers examine growth and development, biologic and reproductive functions, behavior patterns, and population dynamics to protect and maintain the health of all people. To examine the impact of disabilities, diseases, and defects on the lives of individuals. With this information, the NICHD hopes to restore, increase, and maximize the capabilities of people affected by disease and injury. To sponsor training programs for scientists, doctors, and researchers to ensure that NICHD research can continue. By training these professionals in the latest research

methods and technologies, the NICHD will be able to conduct its research and make health research progress until all children, adults, families, and populations enjoy good health.

**TYPES OF ASSISTANCE:**

Project Grants.

**USES AND USE RESTRICTIONS:**

Grantee agrees to administer the grant in accordance with the regulations and policies governing the research grant programs of the Public Health Service as stated in the terms and conditions on the application for the grant. National Research Service Awards: Awarded to individuals for full-time research training in specified behavioral and biomedical shortage areas. Awardees may utilize some of their time in academic and clinical duties if such work is closely related to their research training. Awards may be made to institutions to enable them to make NRS awards to individuals selected by them. Each individual awardee is obligated upon termination of the award to comply with certain service and payback provisions. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I and which are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1- year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application.

**Applicant Eligibility:**

Universities, colleges, medical, dental and nursing schools, schools of public health, laboratories, hospitals, State and local health departments, other public or private institutions, both nonprofit and for-profit, and individuals. Applicants must be citizens of the United States or be admitted to the United States for permanent residency; they also must be nominated and sponsored by a public or private institution having staff and facilities suitable to the proposed research training. Domestic nonprofit organizations may apply for the institutional NRS grant. SBIR: SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. or its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

**USES AND USE RESTRICTIONS:**

Research grants are intended to support the direct costs of a project in accordance with an approved budget, plus an appropriate amount for indirect costs. Grantees must agree to administer the grant in accordance with the regulations and policies governing the research grants program of the Public Health Service. National Research Service Awards (NRSA) (Individual) are made directly to approved applicants for research training in specified biomedical shortage areas. In addition, National Research Service Awards (Institutional) may be made to institutions to enable them to make NRSA to individuals selected by them. Each individual who receives a NRSA is obligated, upon termination of the award, to comply with certain service and payback provisions. Regulations are published in the Code of Federal

Regulations and 42 CFR, Part 66. SBIR Phase I grants (of approximately 6 months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. SBIR Phase II grants are for the continuation of the research initiated in Phase I and that are likely to result in commercial products or processes. Only Phase I awardees are eligible to apply for Phase II support. STTR Phase I grants (normally of 1- year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application.

**Applicant Eligibility:**

Grants: Universities, colleges, medical, dental and nursing schools, schools of public health, laboratories, hospitals, State and local health departments, other public or private institutions (both for-profit and nonprofit), and individuals. National Research Service Award: Individual NRSAs may be made for postdoctoral training to applicants who hold a professional or scientific degree (M.D., Ph.D., D.D.S., D.O., D.V.M., Sc.D., D.Eng., or equivalent domestic or foreign degree). Institutional NRSAs may be made for both predoctoral and postdoctoral research training. Predoctoral awardees must have a baccalaureate degree. Applicants must be citizens of the United States or admitted for permanent residency. Individual NRSA awardees must be nominated and sponsored by a public or private nonprofit institution having staff and facilities suitable to the proposed research training. Nonprofit domestic organizations may apply for the Institutional NRSA. SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. or its possessions. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application that exceeds \$50,000 in direct costs must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. If the direct cost of a grant approved by a scientific review group does not exceed \$50,000, it may be funded without approval by a national advisory council.

**Beneficiary Eligibility:**

Any nonprofit or for-profit organization, company, or institution engaged in biomedical research.

**Credentials/Documentation:**

The grants application submission process is currently in transition from a paper-based to an electronic format. A current transition-to-electronic-submission timeline for all grant mechanisms in the National Institutes of Health (NIH) Extramural Research Program timeline can be obtained here: <http://era.nih.gov/ElectronicReceipt/files/>. NIH recently published a Notice to the NIH Guide to Contracts and Grants announcing a change to the transition schedule for the remaining grant programs still requiring the submission of paper applications. The URL to the Notice is: <http://grants.nih.gov/grants/guide/notice-files/NOT-OD-07-038.html>.

**Preapplication Coordination:**

None. This program is excluded from coverage under E.O. 12372.

**Application Procedure:**

For grant programs still requiring submission of paper applications, the standard application forms, as furnished by the Public Health Service (PHS) and required by 45 CFR Part 92 for State and local governments, must be used. Consultation from institute staff is available for all grant programs. Applicants are encouraged to visit the Internet Web sites of the 27 institutes and centers at the NIH to obtain contact information for program staff. Applicants for multi-project awards are strongly encouraged to consult program staff before applying. Applicants may obtain forms and instructions for application preparation and submission at the following Internet Web site: <http://grants.nih.gov/grants/forms.htm> When completed these applications should be submitted to the Center for Scientific Review, National Institutes of Health, Bethesda, MD. Applications are reviewed for scientific merit, evaluation of applicant qualifications, adequacy of the research environment, and significance of the proposed problem to be studied. The application form and instructions for the preparation and submission of applications to the National Research Service Awards Research Training Grants and Fellowships (NRSA) Program, PHS Form 416-1, can be obtained from the following URL (<http://grants.nih.gov/grants/funding/416/phs416.htm>). Prior to making formal application to the NRSA programs, individual NRSA applicants must be nominated and sponsored by a Federal, public or nonprofit institution having staff and facilities appropriate to the proposed research training program.

Information concerning current areas of science being supported by those institutes participating in the NRSA Program at the NIH is available on the individual institute Web sites. A complete list of institutes at NIH is available at: <http://www.nih.gov/icd>. In addition, information about each institute's NRSA research topics and information about the NRSA Program can be obtained from the Division of Extramural Outreach and Information Resources, (see address above). The NRSA program is subject to the provisions of 45 CFR Part 92 for State and local governments and OMB Circular No. A-110 for nonprofit organizations. The annual NIH Small Business Innovation Research (SBIR)-Small Business Technology Transfer (STTR) Omnibus Solicitation and SBIR-STTR Contract Solicitation may be obtained electronically by accessing the following URL: <http://grants1.nih.gov/grants/funding/sbir.htm>. The solicitations include application preparation and submission guidelines and instructions, information about review considerations, and Internet hyperlinks to the SBIR-STTR application and/or contract proposal forms. Applications to NIH's SBIR-STTR Programs must be submitted electronically through the U.S. Federal Government's Internet Web site, Grants.gov: [www.grants.gov](http://www.grants.gov). Submission of SBIR-STTR applications through Grants.gov requires pre-registration, which typically takes 2-4 weeks to complete. Information about registration to submit applications through Grants.gov can be found at: <http://era.nih.gov/ElectronicReceipt/preparing.htm>. Applicants are encouraged to read and refer to the extensive information on electronic submission of grant applications on the NIH Electronic Submission of Grants Applications Internet Web site at: <http://era.nih.gov/ElectronicReceipt>.

**Award Procedure:**

Grants and Institutional NRSAs: Each application receives an initial scientific review by non-NIH scientists and a secondary review by the National Advisory Council on Aging. Individual NRSAs do not receive a secondary review by the National Advisory Council on Aging. Awards are issued by the NIA to the grantee institution. All accepted SBIR/STTR applications are evaluated for scientific and technical merit by an appropriate scientific peer review panel and by a national advisory council or board. All applications receiving a priority score compete for available SBIR/STTR set-aside funds on the basis of scientific and technical merit and commercial potential of the proposed research, program relevance, and program balance among the areas of research.

Project Grants.

**USES AND USE RESTRICTIONS:**

Research grants and cooperative agreements provide funds for salaries, consultant costs, equipment, supplies, travel, patient costs, alterations and renovations, other expenses, and consortium/contractual costs. The scientists and institutions are under an obligation to expend grant funds prudently for the purposes as stated in the application and award document. The Conference Cooperative Agreement supports scientific meetings and workshops in high priority research areas to encourage exchange of information among scientists. The Center Core Grant is intended to enhance an institution's environment and capability to conduct vision research, to facilitate collaborative studies of the visual system and its disorders, and to attract scientists of diverse disciplines to research on the visual system. Career development awards include the Mentored Clinical Scientist Development Award, Mentored Patient-Oriented Research Career Development Award, Institutional Clinical Scientist Development Program, and the Mid-career Investigator Award in Patient-Oriented Research.

The Clinical Study Planning Grant is designed to support the development of an applied clinical research plan. NEI Research Grants for Secondary Data Analysis provide limited support for meritorious research projects that involve secondary analysis of research data generated from clinical trials, population research and other applied clinical vision research projects supported by the Institute. Bioengineering Research Grants (BRG) support basic bioengineering research whose outcomes are likely to advance health or health-related vision research. BRGs may propose to apply basic bioengineering design-directed or hypothesis-drive research to an important vision research area. Bioengineering Research Partnership grants support multidisciplinary research teams applying an integrative, systems approach to develop knowledge and/or methods to prevent, detect, diagnose, or treat diseases of the eye and visual system. NEI Translational Research Program on Therapy for Visual Disorders grants provide support to collaborative, multidisciplinary research focused on the development of novel therapies to restore or prevent the loss of function due to visual diseases and disorders. Small Business Innovation Research Phase I grants are awarded to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I that is likely to result in commercial products or processes. Only Phase I awardees are eligible to apply for Phase II support. Small Business Technology Transfer Research, Phase I grants are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application. National Research Service Awards (NRSAs), both individual and institutional, support training in vision research. Some individuals who receive an NRSA may be obligated upon termination of the award to comply with certain service and payback provisions. #### TYPES OF ASSISTANCE:

Project Grants.

#### USES AND USE RESTRICTIONS:

RESEARCH GRANT PROGRAMS: Research Grants are available for fundamental and applied research in biomedical informatics and bioinformatics. Areas of research interest include: representation, organization and retrieval of biomedical and biological knowledge, data and images; enhancement of human intellectual capacities through virtual reality, dynamic modeling, artificial intelligence, and machine learning; medical decision-making; linguistic analyses for natural language processing and understanding; informatics topics relevant to public health and informatics for disaster management. Research Project Grants (R01) are available for rigorous scientific research studies and experiments. Small Project Grants (R03) provide short-term awards answer specific, targeted research questions, gather preliminary data, show proof of concept. Exploratory/Developmental Grants (R21) support early, conceptual work and feasibility tests. Other research grants include Informatics Conference Grants, and Innovations in Biomedical Computational Science and Technology (BISTI) Grants, and a number of NIH-wide grant programs on high priority topics such as health literacy. Further information on research grants is available at <http://www.nlm.nih.gov/ep/Grants.html#research>. TRAINING PROGRAMS AND FELLOWSHIPS: To assure an adequate national pool of informatics researchers and health information specialists, training is offered through formal training programs and individual fellowships. University Biomedical Informatics Research Training Programs promote the career training of talented persons who seek research careers in biomedical informatics, bioinformatics, and public health informatics. A competition for these institution-based training grants is announced every five years. University-based training support may be at the pre- or post-doctoral level. Training sites recruit and choose their trainees, and are expected to have well established computer facilities, strong informatics research and education programs, experienced faculty and staff committed to research in

the field of biomedical computing and/or bioinformatics, and available courses or experience in computer science, information science, and cognitive sciences. Institutional training grants provide trainee stipends, tuition and fees, travel, and certain institutional support costs. NLM also offers individual Informationist Fellowships for cross-training of information specialists to work in scientific and biomedical contexts. Stipends are based on published predoctoral stipend levels that are updated each year. Further information on training grants and fellowships grants is available at <http://www.nlm.nih.gov/ep/Grants.html#training>. CAREER DEVELOPMENT PROGRAMS: NLM offers an early career development award to help informatics trainees make the transition to a successful independent research career. NIH Pathway to Independence Career Development awards are for investigators who are making the transition to their first research positions. These grants can last up to 5 years. They include a mentored period, followed by an unmentored period, and provide both salary and a research fund. Research supplement awards are also offered to promote diversity in health-related informatics research, and to promote re-entry into informatics careers. Diversity and re-entry awards are issued as supplements to existing research grants funded by NLM. NLM also participates in the NIH Loan Repayment Award (LRP) program. The LRP awards are available to those who qualify and will commit to two years of clinical informatics research. Further information on career development grants is available at <http://www.nlm.nih.gov/ep/Grants.html#career>.

RESOURCE GRANT PROGRAMS: Resource grants support the development and deployment of knowledge management tools, resources, and services that address identified, unmet needs for a broad audience. Two types of resource grants are available: Knowledge Management & Applied Informatics grants and Planning Grants for Integrated Advanced Information Management Systems (IAIMS). In addition, NLM offers Grants for Scholarly Works to support preparation of books in the history and philosophy of biomedicine, bioethics, and public policy areas of importance to health professionals and biomedical scientists. The purpose, restrictions, funding periods and award limits vary for these grant programs. Knowledge management and IAIMS Planning grants provide support for direct costs only. Knowledge grants provide \$150,000 per year for up to 3 years. Awards for IAIMS planning are limited to \$150,000 per year for 1 or 2 years. Scholarly Works grants are limited to \$50,000 annually for one, two or three years. Further information on resource grants is available at <http://www.nlm.nih.gov/ep/Grants.html#resource>. SMALL BUSINESS RESEARCH & DEVELOPMENT PROGRAMS: Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) grants are made to U.S. small businesses that seek to undertake informatics research and development leading to commercialization. The STTR program requires a small business applicant organization to formally collaborate with a research institution in Phase I and Phase II. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I and that are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application. Further information on SBIR/STTR grants is available at <http://www.nlm.nih.gov/ep/Grants.html#small>.

#### Applicant Eligibility:

Any individual(s) with the skills, knowledge, and resources necessary to carry out the proposed research as the project director/principal investigator (PD/PI) is invited to work with his/her organization to develop an application for support. Individuals from underrepresented racial and ethnic groups as well as individuals with disabilities are always encouraged to apply for NIH support. See Beneficiary Eligibility below for further details.

#### Beneficiary Eligibility:

Research Grants are available to public or private, domestic or foreign, for profit or not-for-profit institutions or organizations with research capabilities in biomedical informatics, bioinformatics, computer sciences, information sciences and related disciplines. Training Grants may be made to nonfederal public and nonprofit private institutions. Fellowships may be awarded to individuals at the pre-doctoral level. With the exception of NIH Pathway to Independence awards, trainees or fellows must be citizens or non-citizen nationals of the United States or have been lawfully admitted to the United States for permanent residence. Resource grants (IAIMS, Knowledge Management, Scholarly Works) are open to any U.S. public or private nonprofit health-related institution or organization. For Scholarly Works grants, an appropriate public or private nonprofit institution of higher education may apply in behalf of the principal investigator on the project, or an individual unaffiliated with an academic organization may apply directly. SBIR and STTR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500

employees). To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

**Credentials/Documentation:**

Cost allowability will be determined in accordance with OMB Circular A-87 for State, Local, and Indian Tribal Governments, OMB Circular A-21 for Educational Institutions and for For-profit organizations, costs will be determined in accordance with 48 CFR Subpart 31.2 Federal Acquisition Regulation (FAR). Nonprofit institutions cost principles are outlined under OMB Circular A-122 and for Hospitals, 45 CFR Part 74, Appendix E. These cost principles are codified under 45 CFR 74.27 and 92.22. Uniform Administrative Requirements for Grants and Other Agreements with Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations are outlined in OMB Circular A-110. Documentation providing NIH grants policy and guidance can be found at <http://grants.nih.gov/grants/policy/policy.htm>. The Division of Extramural Programs, NLM provides program specific grant information at <http://www.nlm.nih.gov/ep>.

**Preapplication Coordination:**

Not applicable. This program is excluded from coverage under E.O. 12372.

**Application Procedure:**

NIH is in the process of moving to electronic submission of applications for all of its grant programs. Only electronic applications are accepted for all types of Research Grants, SBIR and STTR grants, and Resource Grants. Electronic grant submission of the SF424 (R&R) form is via <http://www.grants.gov>. For instructions on submitting grants electronically, see <http://era.nih.gov/ElectronicReceipt/>. A timeline of transitions to electronic submission for each grant program is available at <http://www.nlm.nih.gov/ep/Deadlines.html>. For all other grant programs, a paper form is submitted to the Center for Scientific Review, National Institutes of Health, Bethesda, MD 20892. Form PHS-398 is used for NIH Pathway to Independence Grants and Biomedical Resource Grants. Forms and instructions for PHS-398 can be downloaded at <http://grants1.nih.gov/grants/funding/phs398/phs398.html>. For Informationist Fellowships, submit Form PHS-416-1, with forms and instructions downloadable at <http://grants1.nih.gov/grants/funding/416/phs416.htm>. These programs are subject to the provisions of 45 CFR, Part 92 for State and local governments and OMB Circular No. A-110 for nonprofit organizations. Updates on NLM application deadlines and links to available forms can also be found at <http://www.nlm.nih.gov/ep/>.

**Award Procedure:**

Applications are evaluated for merit by a committee of scientific experts and for program relevance by the Board of Regents (BOR) of the National Library of Medicine (NLM). If favorably recommended, the application is considered for funding. An award notice is prepared when it is determined that a grant is to be paid. This notice is sent to the grantee with a letter from the program officer when special provisions are necessary. All accepted SBIR/STTR applications are evaluated for scientific and technical merit by an appropriate scientific peer review panel and by a national advisory council or board. All applications receiving a priority score compete for available SBIR/STTR set-aside funds on the basis of scientific and technical merit and commercial potential of the proposed research, program relevance, and program balance among the areas of research.

**Deadlines:**

Each program has 3 application deadlines per year, which vary by grant program and whether the application is new or revised. Special Requests for Applications (RFAs) or newly established Program Announcements (PAs) issued annually may have other limited deadline dates. For an up-to-date list of deadlines, see <http://www.nlm.nih.gov/ep/Deadlines.html>.

**Range of Approval/Disapproval Time:**

From 9-10 months after the application deadline.

**Appeals:**

NIH policy allows a principal investigator (PI) to appeal the outcome of a review if procedural errors or factual errors entered into the review of the application. A description of the NIH Peer Review Appeal procedures is available at <http://grants.nih.gov/grants/guide/notice-files/not97-232.html>. However, differences of scientific opinion that often occur between investigators and reviewers may not be contested through these procedures. In addition, communications from investigators consisting of additional information that was not available to the reviewers are not considered to be appeals.

**Renewals:**

Competing renewal applications follow same review procedures and deadlines as new applications; dates for submission are at <http://www.nlm.nih.gov/ep/Deadlines.html>. NIH also permits the resubmission of an application that has been revised following merit review. Deadlines for resubmissions are listed with other deadlines.

**Formula and Matching Requirements:**

There are no statutory formula or matching requirements for NLM grants.

**Length and Time Phasing of Assistance:**

The length of a grant award varies by the type of grant. R01 research grants generally last three or four years. Resource grants, Small Pilot and

Exploratory/Developmental grants, Fellowships and NIH Pathway to Independence awards have defined maximum periods that are provided in the funding opportunity announcement.

**Reports:**

Annual grant progress reports and Financial Status Reports must be submitted as required. At the end of a grant, the awardee must file a final progress report, final Financial Status Report and final statement of invention.

**Audits:**

In accordance with the provisions of OMB Circular No. A-133, States, local governments, and nonprofit organizations that expend \$500,000 or more in a year in Federal awards shall have a single or program-specific audit conducted for that year. In accordance with 45 CFR 74 Subpart C Section 74.26(d) for-profit organizations that expend more than \$500,000 in DHHS awards in a year shall have an audit of the DHHS awards in accordance with the "Government Auditing Standards" (Yellow Book) or an audit that meets the requirements of OMB Circular A-133. Award recipients that do not meet the \$500,000 threshold are exempt from Federal audit requirements for that year, except as noted in Circular A-133. In addition, grants and cooperative agreements are subject to review or audit by appropriate officials of the Federal (funding) agency, pass-through entity and the Government Accountability Office (GAO). Foreign organizations must use the for-profit audit requirements for DHHS supported awards. The NIH/DHHS Loan Repayment Program (LRP) is not subject to Federal auditing requirements. For OMB policy statements on grants, see [http://www.whitehouse.gov/omb/grants/grants\\_docs.html](http://www.whitehouse.gov/omb/grants/grants_docs.html). Government Auditing Standards is available on the GAO Web site at <http://www.gao.gov/govaud/ybk01.htm>.

**Records:**

Financial and programmatic grant records must be retained for 3 years from the day on which the grantee submits the last (annual) Financial Status Report (FSR). Streamlined Noncompeting Application Process (SNAP) awardees beginning date for record retention purposes is the date of the FSR submission for the entire competitive segment of the grant.

#### **CRITERIA FOR SELECTING PROPOSALS:**

The standard NIH review criteria, significance, approach, innovation, investigator, environment are used as the basis of merit review. For NLM resource grants, these include considerations as to relevance to program objectives; impact on the management and transmission of biomedical knowledge; institutional readiness and resources available to project; expertise of project director and key personnel; scientific or technical merit of project; sustainability of what is deployed, and appropriateness of budget. Comparative priorities on the above criteria are based on collective judgment of peer reviewers. The following criteria are used in considering the scientific and technical merit of SBIR/STTR Phase I grant applications: (1) The soundness and technical merit of the proposed approach; (2) the qualifications of the proposed principal investigator, supporting staff, and consultants; (3) the scientific, technical, or technological innovation of the proposed research; (4) the potential of the proposed research for commercial application; (5) the appropriateness of the budget requested; (6) the adequacy and suitability of the facilities and research environment; and (7) where applicable, the adequacy of assurances detailing the proposed means for (a) safeguarding human or animal subjects, and/or (b) protecting against or minimizing any adverse effect on the environment. Phase II grant applications are reviewed based upon the similar criteria, and on the degree to which the Phase I objectives were met and feasibility demonstrated General Services Administration Office of Governmentwide Policy Office of Acquisition Policy Regulatory and Federal Assistance Publication Division (MVA).

**Formula and Matching Requirements:**

All States, the Commonwealth of Puerto Rico, the District of Columbia, and U.S. territories are eligible to receive Title II grants. All Title II grants are determined by formula. The grant amount is determined by multiplying the amount appropriated for Title II, less any set-asides, by the distribution factor determined for the State or territory. This distribution factor is comprised of two components that are added together. The first component, the State Distribution Factor, is determined by dividing the estimated number of living AIDS cases for the State or territory by the estimated number of living AIDS cases for all States and territories and multiplying the result by .75. The second component, the Non-EMA Distribution Factor, is determined by dividing the estimated living AIDS cases in the State or territory but outside of EMAs within that State or territory by the sum of all estimated living AIDS cases within States or territories but outside EMAs/TGAs within States or territories and multiplying the result by .20 plus .5 of State or territory share of HIV/AIDS cases from states with no EMAs/TGAs. There is no minimum grant amount of \$50,000 for U.S. territories. To achieve this minimum grant amount, funds are redistributed from other States and territories in proportion to their distribution factors. In addition, States and territories receive the greater of the formula amount, considering the minimum grant amount, or an amount equal to a set statutory percentage of the amount the State or territory received in fiscal year 1996. To achieve this minimum grant amount, funds are redistributed from other States in proportion to their distribution factors. The proportion of the funds allocated within a State or territory to provide services to infants, children and women must be at least equal to the proportion of infants, children and women with AIDS in the State or territory to the population of individuals with AIDS in the State or territory. Matching funds are required from States with more than one percent of the total U.S. AIDS cases reported to the CDC during the previous 2 years.

**Length and Time Phasing of Assistance:**

A final progress report and expenditure report are due 120 days after budget period end date.

**Audits:**

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Nonprofit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. **EXAMPLES OF FUNDED PROJECTS:**

Prevention with HIV Infected Persons seen in Primary Care Settings: This initiative was designed to address the need for interventions targeting HIV-positive individuals in clinical care, to prevent transmission to uninfected individuals and to prevent re-infection among people who are already infected with the virus. The Special Projects of National Significance (SPNS) program awarded grants to one evaluation center and 15 demonstration sites. The evaluation center provides leadership in the design and evaluation of interventions that will have maximum impact on the theory, practice and policy of HIV prevention in primary health care settings. The 15 clinical demonstration sites were funded to implement and evaluate prevention interventions with HIV-infected individuals seen in primary care settings. The questions to be investigated include, among others: (1) Are provider-driven interventions in clinical settings effective?; (2) What specific models are most effective with different target populations (e.g. men of color who have sex with other men, heterosexual women, rural drug users, etc.)? An Evaluation of Innovative Methods for Integrating Buprenorphine Opioid Abuse Treatment in HIV Primary Care: Based on new legislation and the availability of buprenorphine treatment, the Buprenorphine Initiative was designed to determine the effectiveness of integrating buprenorphine opioid abuse treatment into HIV primary care settings. This initiative began in September 2004 and is comprised of 10 demonstration sites coordinated by a technical assistance/evaluation center. The initiative is directed towards persons with HIV in the primary care setting who also have substance abuse issues. As a demonstration project, this initiative seeks to determine the feasibility and/or effectiveness of integrating buprenorphine opioid abuse treatment into HIV primary care settings. The ultimate goal is to improve the health of HIV substance abusers.

**CRITERIA FOR SELECTING PROPOSALS:**

Evaluation criteria vary and are based on the grant initiative. However, evaluation criteria generally include some or all of the following: Factor 1: Adequacy of demonstrated knowledge of the local HIV service delivery system and the adequacy of the justification of need for the proposed model within the community and target population to be served by the project. Factor 2: Extent of the feasibility and clarity of the description, appropriateness, innovative quality, and potential for evaluation, replication, and dissemination of the proposed model. Factor 3: Comprehensiveness of the program plan as described in clearly stated goals, time-limited and measurable objectives for each goal, activities directly related to each objective, and a timeline that shows the schedule of activities and production of materials that corresponds to milestones stated in the objectives and program evaluation. Factor 4: Thoroughness, feasibility and appropriateness of the project's evaluation design from a methodological and statistical perspective. Factor 5: Extent to which the applicant demonstrates past involvement with disseminating information about HIV service delivery by describing dissemination activities to date (e.g., presenting and publishing findings through reports and papers, training, or technical assistance). **93.938 COOPERATIVE AGREEMENTS TO SUPPORT COMPREHENSIVE SCHOOL HEALTH PROGRAMS TO PREVENT THE SPREAD OF HIV AND OTHER IMPORTANT HEALTH PROBLEMS**

(SHEPSA)

**FEDERAL AGENCY:**

CENTERS FOR DISEASE CONTROL AND PREVENTION, DEPARTMENT OF HEALTH AND HUMAN SERVICES

**AUTHORIZATION:**

Public Health Service Act, Section 301(a) and 311 (b) (c), as amended; 42 U.S.C. 241 (a), as amended; 42 U.S.C. 243 (b).

**OBJECTIVES:**

To improve the health and well-being of youth and prepare them to be healthy adults.

**TYPES OF ASSISTANCE:**

Project Grants (Cooperative Agreements).

**USES AND USE RESTRICTIONS:**

Cooperative Agreement funds may be used to support personnel, purchase equipment, supplies, services, and travel directly related to the program activities

and consistent with the scope of this program. Cooperative agreement funds are used to help schools prevent sexual risk behaviors that result in HIV infection, especially among youth who are at highest risk. For example, cooperative agreement recipients implement and integrate effective policies and educational strategies to reduce risk behaviors that lead to HIV infection among youth; implement strategies to reduce disparities among sub-populations of youth disproportionately affected by HIV infection and other health problems related to sexual risk behaviors; evaluate the implementation and effectiveness of strategies to reduce risks for HIV infection among youth in schools for the purposes of programmatic improvement and long-range planning. CDC believes that the specific scope and content of HIV education programs in schools should be locally determined and should be consistent with parental and community values. CDC supports local decision-making by providing sound scientific information to grantees who work directly with schools, communities, and parents. Funds may be expended for written materials, pictorials, audiovisuals, questionnaires or survey instruments, and educational group sessions related to HIV education for youth, school, and college populations if approved in accordance with the document "Content of AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions in Centers for Disease Control Assistance Programs." Cooperative agreement funds are also used to build state education and state health agency partnership and capacity to implement and coordinate school health programs across agencies and within schools. The expected outcome of this effort is to help schools reduce chronic disease risk factors, including tobacco use, poor nutrition, and physical inactivity. For example, cooperative agreement recipients implement and integrate effective policies, environmental changes, and educational strategies to reduce unhealthy behaviors; leverage resources to avoid duplication at the state and local levels; evaluate school health capacity-building efforts while implementing effective strategies to reduce priority health risks. Funds may not be used to conduct research projects, provide direct delivery of patient care or treatment services, and purchase or disseminate condoms. Although public health may have an assurance role in clinical testing and screening, funds are not to be used to provide clinical testing or screening services. Funds may not be used for purchasing computer equipment, office equipment or furnishing, renting or leasing office space, or to support construction or renovation unless specifically approved.

The Cardiovascular Health Program (CVH): The New York Healthy Heart Program has partnered with its Dairy Council to educate the public about the benefits of drinking low-fat milk. The campaign increased the sale of milk by five percent and the sale of low fat milk by 15 percent. It has also assessed more than 600 businesses concerning a heart healthy worksite. Based on this assessment over 300 worksites have implement changes to make it easier for their employees to be heart healthy during the workday: workday: offering low-

fat food choices in vending machines, being smoke-free, smoke-free, providing physical activity breaks during the workday, making stairwells safe, and safe, and encouraging employees to be physically active. The North Carolina CVH Carolina CVH Program provided the Strike Out Stroke program that targets hypertension targets hypertension in African Americans in partnership with the North the North Carolina Association of Pharmacies and through local health departments. The Missouri CVH Program partners with the State Diabetes State Diabetes Control Program (DCPC) and Federal qualified health centers to improve to improve outcome measures related to Diabetes and CVD. Arthritis. Alabama Arthritis Program has effectively partnered with the Alabama Division of Senior Services to expand the use of an effective arthritis physical activity program. Senior Services has incorporated this program as a core activity at nutrition sites. Nutrition coordinators have been trained as program leaders. Using this systems approach, the Alabama Arthritis Program has tripled the number of people participating in the program. The Tennessee Arthritis Program has successfully partnered with the Tennessee Agricultural Extension Service to expand the reach of an evidence-based self management program, the Arthritis Foundation Self Help Course. More than 500 people have been reached through this partnership. REACH U.S.: The Breast and Cervical Cancer Coalition at the University of Alabama at Birmingham works to increase breast and cervical cancer screening rates for African American women throughout the state. In Choctaw County, African American women were much less likely to get a mammography screening compared with white women. In 8 years, the proportion of African American women who received mammography screenings increased from 29% to 61%, surpassing the rate for white women by 13%. In Dallas County, a lower mammography screening rate for African American women (30%) compared with white women (50%) was virtually eliminated during the same time. According to data from the eight counties that the Alabama REACH program focuses on, the gap in mammography screening rates between African American and white women decreased by 76% over the same 8-year period. The REACH Charleston and Georgetown Diabetes Coalition focuses on diabetes care and control for more than 12,000 African Americans with diabetes. As a result of the coalition's work, a 21% gap in annual blood sugar testing between African Americans and whites has been virtually eliminated. In addition, more African Americans in the target area are getting the recommended annual tests to monitor their cholesterol levels and kidney function and being referred for eye exams and blood pressure checkups. Lower-extremity amputations among African Americans with diabetes also have decreased sharply. For example, in Charleston County, the percentage of amputations among African American men with diabetes who were hospitalized decreased by nearly 54% in 7 years. In Georgetown County, the rate decreased 54% in 3 years. The REACH Latino Health Project developed culturally tailored interventions to reduce the diabetes burden in the Latino community. As a result, participants showed dramatic improvements in control of high blood sugar and high blood pressure, which are risk factors for diabetes-related complications. In the span of 3 years, blood sugar measures below 7.0 improved by 8.7%, systolic blood pressure below 130 mm Hg improved by 17.5%, and diastolic blood pressure below 80 mm Hg improved by 14.4%. In addition, the proportion of participants who were referred for eye exams improved 26.5%.

These gonorrhea screening and other outreach efforts resulted in the prevention of an estimated 97,300 new cases of gonorrhea. All project areas have established hospital based surveillance efforts for pelvic inflammatory disease (PID). Forty-four States have established at least one city or county STD program that offers comprehensive surveillance, diagnostic, testing, and treatment services for chlamydia. Outreach activities for chlamydia resulted in 50,700 interviews, 44,500 epidemiologically-linked patients treated and an estimated 53,700 additional cases of chlamydia prevented. A total of 65 applications were reviewed and funded in fiscal year 2007. A similar level of effort will continue in fiscal years 2008 and 2009.

#### **EXAMPLES OF FUNDED PROJECTS:**

Given the interdisciplinary nature of global health challenges, the FIC systematically seeks alliances with other Federal agencies, international organizations, development agencies, and non-government organizations. The AIDS International Training and Research Program (AITRP), led by FIC and in partnership with nine NIH institutes, supports research training that is critical to advancing the AIDS research agenda abroad. For example, with FIC support, investigators at the University of Nairobi and University of Washington have evaluated the rates of HIV transmission to infants through breastfeeding. In the new study, pregnant HIV-infected women joined groups that would either breastfeed or formula feed their infants. Among infants born to mothers in the breast-feeding group the risk of becoming HIV-infected increased by 76% in contrast to the formula fed group. Overall, 44 % of the HIV infections in infants born to mothers in the breastfeeding group were due to breast milk. This study clearly shows the need to prevent breast milk transmission and has major implications for development and deployment of public health interventions in resource-poor settings. Additional studies are now underway to address the related and complex social and economic implications on infant feeding. The International Cooperative Biodiversity Groups (ICBG) program is a unique effort, administered by the FIC, to integrate improvement of human health through drug discovery, incentives for ecological conservation, and new models of sustainable economic activity that focus on the environment, health, and equity. This program is based on the belief that the discovery and development of pharmaceutical and other useful agents from natural products can, under appropriate circumstances, promote sustained economic growth in developing countries while conserving the biological habitats from which these products are derived. The ICBG program is a partnership amongst nine Institutes and Centers of the National Institutes of Health (NIH), as well as the National Science Foundation (NSF) and the U.S. Department of Agriculture (USDA). Seven ICBGs are currently working in nine countries across Latin America, Africa and Asia, building research capacity in more than 16 different institutions and training hundreds of individuals. To date, over 5,000 species of plants, animals and microorganisms have been examined for biological activity in more than 22 different therapeutic areas. Numerous publications in chemistry, biodiversity

policy, conservation and ethnobiology have emerged from the funded ICBG groups. An example of such accomplishment includes efforts by researchers at Walter Reed Army Institute of Research to characterize a new mode of action for treatments against leishmaniasis and related parasitic diseases, and isolate promising lead compounds for this and other areas from traditional plant use in West Africa. Another example can be found in the stimulus and coordination of efforts for a new marine and terrestrial national park in Panama to protect 2600 square kilometers containing high biodiversity and many endemic species that will preserve the habitat for research projects like the ICBG, as well as other non-destructive activities. ICBG research and conservation initiatives are partially credited for this government's decision to establish Coiba National Park. In 2005, this park was designated a UNESCO World Heritage Site. FIC established an interagency, interdisciplinary research program in FY 2000 on ecology and infectious diseases. The first 12 projects supported by this interdisciplinary program will assess how large-scale man-made environmental events, such as habitat destruction, urban sprawl, water pollution, introduced species and agricultural intensification, all contribute to the emergence and spread of emerging infectious diseases in animals and humans. With FIC support, scientists at Case Western Reserve University and the Institute of Medical Research in Papua New Guinea have discovered a new mutation in a gene for the Duffy blood group that reduces susceptibility of red blood cells to malaria caused by *Plasmodium vivax* (P.vivax). This parasite must interact with the Duffy blood group factor on cells in order to infect them. Genetic epidemiologists have demonstrated that individuals with two copies of the mutant gene are resistant to P.vivax infection. Targeting the parasite's Duffy-binding protein and its interaction with the Duffy blood group may be a productive strategy for developing a vaccine for vivax malaria. The insights from this study not only suggest that it is feasible, but represent a conceptual model for addressing the more virulent malaria parasite, *Plasmodium falciparum*.

#### **CRITERIA FOR SELECTING PROPOSALS:**

All pertinent evaluation criteria are provided in the RFAs and PAS.

**PROGRAM ACCOMPLISHMENTS:**

In Indiana, PHHSBG funds were used to support the School Physical Activity and Nutrition Survey to obtain baseline data on nutrition and physical activity habits of children. In Illinois, PHHSBG funds are supporting a new program called HI TRACK to screen all newborns for congenital hearing loss before they leave the hospital. In Kansas, the Center for Health and Wellness in northeast Wichita used PHHSBG funds to provide 9,649 blood pressure checks and referred 1,328 people for follow-up. In New York, PHHSBG funds support the Childhood Lead Poisoning Program, which found 2,568 children to have elevated blood lead levels. In Iowa, PHHSBG funds helped develop Lighten Up Iowa to encourage people to adopt better nutrition and physical activity habits. In Texas, PHHSBG funds were used to establish a Hearne Community Garden in Robertson County to increase awareness of the importance of eating fruits and vegetables. In Wisconsin, PHHSBG funds are helping rural health departments develop multicounty environmental coalitions to eliminate food and water contamination, radon, asbestos, and other human health hazards. In Nebraska, only 22 (24%) of the 93 counties have a local health department. PHHSBG funds were used to develop a strategic plan to increase awareness of the benefits of a strong public health system. As a result, the state legislature allocated funding to establish district health departments to provide services to the 71 counties that did not have a health department. In Ohio, PHHSBG funds launched 21 cardiovascular health projects to increase the number of heart-healthy communities in areas of Ohio at high risk for heart disease. In California, PHHSBG funds helped to create The California Asthma Among School-Aged Children Project. In Florida, the PHHSBG funds the Pasco Community Intervention Program, which provides health screenings to migrant

farm workers of Mexican descent and promotes physical activity through programs such as Folklorico, an intergenerational dance program. In Minnesota, PHHSBG funds were used to develop teaching modules called the Core Essentials of Public Health: Applications for Public Health Nursing. CDC and PHHS Block Grantees worked cooperatively to develop the Grant Application and Reporting System (GARS). GARS is a dynamic accountability tool that formats basic PHHSBG information to identify the role that block grant dollars play in addressing health problems at state and local levels. GARS helps grantees establish health priorities and tie essential program activities to PHHSBG dollars that are spent on public health programs. The GARS applications and reports are submitted electronically to CDC via E-mail or a direct Internet connection.

**93.996 BIOTERRORISM TRAINING AND CURRICULUM DEVELOPMENT PROGRAM**

(BTCDP)

**FEDERAL AGENCY:**

HEALTH RESOURCES AND SERVICES ADMINISTRATION,  
DEPARTMENT OF HEALTH AND HUMAN SERVICES

**AUTHORIZATION:**

Public Health Security and Bioterrorism Preparedness and Response Act of 2002, Public Law 107-188, Section 105, Education of Health Care Personnel; Training Regarding Pediatric Issues, Section 319F(g) of the Public Health Service Act as re-designated by Section 104(a)(2) of this Act.

**OBJECTIVES:**

To develop a health care workforce with the knowledge, skills, abilities and core competencies to: (1) recognize indications of a terrorist event; (2) meet the acute care needs of patients, including pediatric and other vulnerable populations, in a safe and appropriate manner; (3) participate in a coordinated, multidisciplinary response to terrorist events and other public health emergencies, and include consideration of surge capacity issues; and (4) rapidly and effectively alert the public health system of such an event at the community, State, and national level. Emergency preparedness and response issues include other forms of terrorism (such as the use of chemical, explosive, incendiary or nuclear agents against civilian populations), natural disasters and catastrophic accidents. Effective responses to public health emergencies require close collaboration among all types of health professionals involved in patient care including allied health professionals, medical and dental specialists, nurses, pharmacists, mental health and other professionals, the public health system, and the emergency response system. To achieve such a collaborative environment, it will be necessary to implement new and enhanced models of undergraduate/graduate curricula and continuing education and training for health professionals. The Bioterrorism Training and Curriculum Development Program (BTCDP) consists of two discrete foci of activity: 1) Provision of Continuing Education for Practicing Providers (CE); and 2) Curriculum Development in Health Professions Schools (CD). Each of the categories above must have a distinct and separate application.

**TYPES OF ASSISTANCE:**

Project Grants (Cooperative Agreements)

**USES AND USE RESTRICTIONS:**

Applicants shall demonstrate linkages and relationships with entities such as the CDC Public Health Preparedness and Response for Bioterrorism Program awardees, the HRSA National Bioterrorism Hospital Preparedness Program awardees and others that provide emergency preparedness and response training. Proposals shall indicate that the training supported with these funds will not only focus on the discipline specific knowledge, skills abilities and competencies needed to recognize, treat and efficiently report instances of a terrorist event, but will also prepare the learners to participate in a multidisciplinary terrorist response reflecting a two-tiered approach. Each course of study shall include both discipline-appropriate clinically oriented material and team coordination to respond to terrorist events. These activities will outline the integrated professional roles and responsibilities inherent in a community response and will include participation in drills, exercises and/or simulations occurring in the state or regions. Proposals addressing the continuing education component of this program shall involve at least three disciplines and shall establish and maintain a programmatic advisory board with members including representatives of the CDC Public Health Preparedness and Response for Bioterrorism Program, the HRSA National Bioterrorism Hospital Preparedness Program, an academic health center, other health professions schools and both service providers and consumers from the area served by the program. Proposals addressing the curriculum development component of this program shall show that funds awarded will be utilized in conjunction with no less than three health care disciplines. Whereas one school, the applicant, will be held responsible for implementing the curriculum, training must be used by no less than three disciplines. Applicants shall demonstrate collaboration with the Department of Homeland Security (DHS) National Response Plan, December 2004.

Drills/exercises in which BTCDP awardees participate shall be compliant with the DHS National Incident Management System (NIMS).

No agency supervising volunteers shall request or receive compensation for services of the volunteers. Volunteers are not to be involved in and funds are not to be used for religious activities, labor or anti-labor organizations, lobbying, or partisan or non-partisan political activities. Grants may be used for staff salaries and fringe benefits, staff travel, equipment, and related expenses, and for volunteer out-of-pocket expenses, primarily for transportation. In addition, eligible agencies or organizations may, with a Notice of Grant Award from the Corporation for National and Community Service, receive technical assistance and materials to aid in establishing and operating non-Corporation funded RSVP projects using local funds.

As a guide to the level of local support expected, 10 percent of the total budget can be required for the first year, 20 percent for the second year, and 30 percent in any subsequent years. The level of local support negotiated may be higher or lower than these figures, as mutually agreed to by the Corporation for National and Community Service and the sponsor, and as justified by local conditions. Sponsors proposing to contribute local support of less than 30 percent of the total project budget for the third or succeeding years must provide the Corporation for National and Community Service with an acceptable written justification for the lower level of support.

The following exemplifies SCP service: An SCP volunteer provides supportive in-house services to a stroke victim who is confined to a wheelchair, suffers from depression and needs help in daily living. Prior to the arrival of the Senior Companion, the client received no visitors and refused to leave his apartment. Just two months after he arrived, the SCP volunteer convinced his client to venture out of his apartment. Now, the client goes out for meals, exercises and participates in social events at a nearby senior center. Another Senior Companion has provided respite care to the husband of an Alzheimer's patient for over six years. The Senior Companion provides reality orientations, music and games for the client. Senior Companions provide predominantly in-home services to frail adults, often the elderly. The following statistics suggest the scope of their activities. In fiscal year 1997, over 2,400 Senior Companions provided respite to 5,300 Alzheimer's care givers. They served over 5,000 visually impaired, 3,100 hearing impaired, 2,000 terminally ill and 3,000 clients with short-term disabilities. An additional 27,000 frail adults with chronic care disabilities threatening their ability to continue to live at home were served. Senior Companions also served at over 200 adult day care centers; they served at 380 nursing homes and convalescent hospitals.

## 96.001 SOCIAL SECURITY-DISABILITY INSURANCE

### FEDERAL AGENCY:

SOCIAL SECURITY ADMINISTRATION

### AUTHORIZATION:

Social Security Act of 1935, Title II, as amended; Public Laws 96-265; 97-123, and 97-35. 42 U.S.C. 401; 42 U.S.C. 402; 42 U.S.C. 416; 42 U.S.C. 420-425.

### OBJECTIVES:

To replace part of the earnings lost because of a physical or mental impairment, or a combination of impairments, severe enough to prevent a person from working.

### TYPES OF ASSISTANCE:

Direct Payments with Unrestricted Use; Direct Payments for Specified Use.

### USES AND USE RESTRICTIONS:

Monthly cash benefits are paid to entitled disabled persons and to entitled auxiliary beneficiaries throughout the period of disability generally after a 5-month waiting period. Costs of vocational rehabilitation also are paid for certain beneficiaries. There are no restrictions on the use of benefits received by beneficiaries, although the right to future benefits is not transferable or assignable. In general, State agencies make initial disability determinations for the Federal Government. The Federal Government gives the States funds, in advance or by way of reimbursement, for necessary costs in making disability determinations under 20 CFR 404 Subparts P and Q. Necessary costs are direct as well as indirect costs as defined in 41 CFR 1-15, subpart 1-15.7 of the Federal Procurement Regulations System for costs incurred before April 1, 1984; and 48 CFR 31, Subpart 31.6 of the Federal Acquisition Regulations System and Federal Management Circular A-74-4, as amended, or superseded for costs incurred after March 31, 1984.

### Applicant Eligibility:

A disabled worker is entitled to Social Security disability benefits if he or she has worked for a sufficient period of time under Social Security to be insured, has not attained "full-benefit retirement age" (66 years old for workers age 62 in 2005), has filed an application, and is under a disability as defined in the Social Security law. The law defines disability as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. The insured status requirements depend upon the age of the applicant and the date he or she became disabled. Coverage credits under the social security systems of certain foreign countries with which the U.S. has reciprocal agreements may be taken into account to meet the requirements. Certain family members of disabled workers are also entitled to benefits: (1) Unmarried children under age 18, or under age 19 for full-time students in elementary or secondary school; (2) unmarried adult offspring at any age if continuously disabled since before age 22; (3) wife or husband at any age if child in his or her care is receiving benefits on worker's Social Security record and is under age 16 or disabled; (4) spouse age 62 or over; and (5) divorced wives or husbands age 62 or over who were married to the worker for at least 10 years. (Benefits are also payable to auxiliaries, including certain disabled widow(er)s, disabled surviving divorced spouses, children under age 19 who are full-time students in an elementary or secondary school, and disabled children of the worker, after the worker dies. See 96.004 "Social Security-Survivors' Insurance".) For workers who are first entitled after 1985 for both (a) a pension based on non-covered employment; and (b) Social Security disability (or retirement) benefits, a less generous benefit formula applies. In addition, Social Security disability benefits are reduced (offset) by the amount that the sum of all disability benefits payable under Social Security and certain Federal, State, or local public disability and workers' compensation laws or plans exceeds the higher of 80 percent of the worker's average current earnings or the total Social Security benefit that would otherwise be payable on the disabled worker's record. The Social Security benefit for a spouse of a disabled worker is subject to a pension offset if the spouse receives a governmental pension based on his or her own work in non-covered employment. However, the offset does not apply if: (i) the person received or became eligible to receive the pension before December 1, 1982, and can meet requirements for Social Security auxiliaries' benefit as they existed in January 1977; or (ii) if the person received, or was eligible to receive, the pension before July 1, 1983, and the person was dependent on his or her spouse for at least one-half support at the time the spouse died, became disabled or became entitled to Social Security benefits. The amount of the public pension used for purposes of the offset against Social Security spouse's benefits is equal to two-thirds of the public pension. The Social Security benefit for the spouse of a disabled worker is also offset dollar for dollar by the amount of any Social Security benefit the spouse receives based on his or her own work. All benefits to spouses and children of disabled workers are subject to an earnings test unless those beneficiaries are full-benefit retirement age or older. Beginning with the year 2000, the retirement earnings test was eliminated beginning with the month in which the beneficiary reaches full-benefit retirement age (FRA). A person at and

above FRA will not have Social Security benefits reduced because of earnings. In the calendar year in which a beneficiary reaches FRA, benefits are reduced \$1 for every \$3 of earnings above the limit allowed by law, \$31,800 in 2005, but this reduction is applied only to months prior to attainment of FRA. For years before the year the beneficiary attains FRA, the reduction in benefits is \$1 for every \$2 of earnings over the annual exempt amount. Further, no benefit can be paid to an alien in the United States unless he or she is lawfully present in the United States. In addition, an alien cannot qualify for benefits if he or she never had a work-authorized Social Security Number (SSN) (effective for benefit applications based on SSNs issued after 2003).

### Beneficiary Eligibility:

Qualified disabled workers under full retirement age (FRA). Under the definition of disability in the Social Security Law, disability benefits are provided to a person who is unable to engage in any substantial gainful activity by reason of a medically determinable physical or mental impairment that has lasted or is expected to last at least 12 months, or to result in death. Disabled widow(er)s' benefits are covered under survivors insurance. Felony-related impairments and confinement-related impairments cannot be considered in determining whether an individual is under a disability if the individual has been convicted of a felony which was committed after October 19, 1980. Effective for claims finally adjudicated on or after March 29, 1996, (or for claims approved before then, with benefits payable beginning January 1, 1997) eligibility can no longer be based on drug addiction or alcoholism.

### Credentials/Documentation:

Proof of disability and possibly proof of age. If applying for benefits for family members, additional proofs of age, relationship to disabled worker, or full-time school attendance may be required.

### Preapplication Coordination:

None. This program is excluded from coverage under E.O. 12372.

### Application Procedure:

### Range and Average of Financial Assistance:

Monthly cash benefits for a worker disabled in 2005 range up to a maximum of \$2,099 based on the level of the worker's earnings and the age at which a worker becomes disabled. The corresponding maximum for such a worker with a family is \$3,148.60. As of December 31, 2004, the average benefit paid to a disabled worker alone was \$880 and the average amount payable to a disabled worker with eligible dependents was \$1,496. This takes into account stipulations set forth in Public Law 96-265 and Public Law 97-35. Under Public Law 97-123, the minimum amount is no longer applicable for workers who either become disabled or first met the insured status requirements after December 1981, and a lesser amount can be paid, depending on the worker's

average earnings.

**PROGRAM ACCOMPLISHMENTS:**

In fiscal year 2004, an average of 7,696,000 disabled workers and their dependents received monthly cash benefits. It is estimated that for fiscal year 2005, an average of 8,005,000 disabled workers and their dependents will receive monthly cash benefits. During fiscal year 2006, the average number receiving benefits is expected to increase to 8,302,000.

## 96.002 SOCIAL SECURITY-RETIREMENT INSURANCE

**FEDERAL AGENCY:**

SOCIAL SECURITY ADMINISTRATION

**AUTHORIZATION:**

Social Security Act of 1935, Title II, as amended; 42 U.S.C. 401-433; Public Law 104-208.

**OBJECTIVES:**

To replace part of the earnings lost due to retirement.

**TYPES OF ASSISTANCE:**

Direct Payments with Unrestricted Use.

**USES AND USE RESTRICTIONS:**

Monthly cash benefits are paid to eligible retired workers and their eligible auxiliaries. There are no restrictions on use of benefits by a beneficiary, although the right to future benefits is not transferable or assignable.

**Applicant Eligibility:**

Retired workers age 62 and over who have worked the required number of years under Social Security are eligible for monthly benefits. Coverage credits under the social security systems of certain foreign countries with which the U.S. has reciprocal agreements may be taken into account to meet the requirements. If an eligible worker age 62 or over receives benefits before full-benefit retirement age (FRA)(age 66 for workers age 62 in 2005), the individual's retirement benefit will be permanently reduced. Also, certain family members can receive benefits including: (1) A wife or husband age 62 or over; (2) a spouse at any age, if a child who is under age 16 or is disabled is in his or her care and is entitled to benefits based on the worker's record; (3) unmarried children under age 18 (or under age 19 for students in elementary or secondary school); (4) unmarried adult offspring at any age if disabled before age 22; and (5) divorced wives or husbands age 62 or over who were married to the worker for at least 10 years. Beginning January 1985, spouses ages 62 or over who have been divorced for at least 2 years (and married to the worker for at least 10 years) may become entitled to benefits regardless of whether the former spouse who is at least age 62 and fully insured has applied for benefits. Effective January 1991, the 2-year waiting period for payment of divorced spouse's benefits without regard to the former spouse's earnings was waived if the former spouse was entitled to benefits prior to the divorce. All benefits, other than benefits to disabled beneficiaries, and beneficiaries FRA and older, are subject to an earnings test. Beginning with the year 2000, the retirement earnings test was eliminated beginning with the month in which the beneficiary reaches FRA. A person at and above FRA will not have Social Security benefits reduced because of earnings. In the calendar year in which a beneficiary reaches FRA, benefits are reduced \$1 for every \$3 of earnings above the limit allowed by law, \$31,800 in 2005, but this reduction is applied only to months prior to attainment of FRA. For years before the year the beneficiary attains FRA, the reduction in benefits is \$1 for every \$2 of earnings over the annual exempt amount, \$11,640 in 2005.

For workers who are first eligible after 1985 for both (a) a pension based on non-covered employment; and (b) Social Security retirement (or disability) benefits, a different benefit formula applies which provides somewhat lower benefits.

The Social Security benefit for a spouse of a retired worker is subject to a pension offset if the spouse receives a governmental pension based on his or her own work in non-covered employment. However, the offset does not apply if: (i) the person has received or became eligible to receive the pension before December 1, 1982, and met eligibility requirements for Social Security auxiliaries' benefits as they existed in January 1977; or (ii) if the person receives, or is eligible to receive, the pension before July 1, 1983, and the person was dependent on his or her spouse for at least one-half support at the time the spouse died, became disabled or became entitled to Social Security benefits. The amount of the public pension used for purposes of the offset against Social Security spouse's benefits is equal to two-thirds of the public pension. The benefit for the spouse of a retired worker is also offset dollar for dollar by the amount of any Social Security benefit the spouse receives based on his or her own work. Effective for those who have reached age 62 since August 1981, a retired worker or spouse can receive benefits only for months in which he or she has attained at least age 62 for the entire month. No benefit can be paid to an alien in the United States unless he or she is lawfully present in the United States. In addition, an alien cannot qualify for benefits if he or she never had a work-authorized

Social Security Number (SSN) effective for benefit applications based on SSNs issued after 2003).

**Beneficiary Eligibility:**

Benefits are paid to retired workers age 62 and over who have worked the required number of years under Social Security, and to certain family members.

**Credentials/Documentation:**

Proof of age is required. If applying for benefits for auxiliaries, additional proofs of age, dependency, and relationship to the retired worker may be required. To receive benefits, auxiliaries must have a SSN.

**Appeals:**

**Range and Average of Financial Assistance:**

Monthly cash benefits for a worker retiring at full retirement age (FRA) in 2005 range up to \$1,939 and to a maximum of \$3,394.10 for a family of such a worker receiving benefits. ## 96.004 SOCIAL SECURITY-SURVIVORS INSURANCE

**FEDERAL AGENCY:**

SOCIAL SECURITY ADMINISTRATION

**AUTHORIZATION:**

Social Security Act of 1935, Title II, as amended; 42 U.S.C. 401-433.

**OBJECTIVES:**

To replace part of the earnings lost to dependents because of the worker's death.

**TYPES OF ASSISTANCE:**

Direct Payments with Unrestricted Use; Direct Payments for Specified Use.

**USES AND USE RESTRICTIONS:**

Monthly cash benefits are paid to eligible family members of deceased workers. There are no restrictions on the use of benefits, although the right to future benefits is not transferable or assignable. The Federal government gives the States funds, in advance or by way of reimbursement, for necessary costs in making disability determinations under 20 CFR part 404 subparts P and Q. Necessary costs are direct as well as indirect costs as defined in 41 CFR Part 1-15, Subpart 1-15.7 of the Federal Procurement Regulations System for costs incurred before April 1, 1984; and 48 CFR 31, Subpart 31.6 of the Federal Acquisition Regulations System and Federal Management Circular A-74-4 as amended or superseded for costs incurred after March 31, 1984.

**Applicant Eligibility:**

Benefits are payable only if the deceased was insured for survivors insurance protection. Coverage credits under the social security systems of certain foreign countries with which the U.S. has reciprocal agreements may be taken into account to meet the requirements. Survivors eligible for monthly cash benefits are the following: widows or widowers age 60 or over; surviving divorced spouses age 60 or over (married to the deceased worker for at least 10 years); disabled widows, widowers or surviving divorced spouses ages 50- 59; widows, widowers, or surviving divorced spouses at any age who have in their care a child under age 16 or disabled and entitled to benefits on the deceased worker's Social Security record; unmarried children under age 18, under age 19 and a full time student in elementary or secondary school; or age 18 or older and under a disability which began before age 22; and dependent parents age 62 and over. All survivors benefits, other than for beneficiaries at full retirement age (FRA) or older, are subject to an earnings test. Beginning with the year 2000, the retirement earnings test was eliminated beginning with the month in which the beneficiary reaches FRA. A person at and above FRA will not have Social Security benefits reduced because of earnings. In the calendar year in which a beneficiary reaches FRA, benefits are reduced \$1 for every \$3 of earnings above the limit allowed by law, \$31,080 in 2005, but this reduction is applied only to months prior to attainment of FRA. For years before the year the beneficiary attains FRA, the reduction in benefits is \$1 for every \$2 of earnings over the annual exempt amount, \$12,000 in 2005. Except for benefits to children and dependent parents, all survivors benefits are subject to a pension offset if the person is also receiving a governmental pension based on his or her own work in non-covered employment. However, the offset does not apply: (1) If the person receives, or is eligible to receive, the pension before December 1, 1982, and can meet the requirements for the Social Security auxiliary's benefit as they existed in January 1977; or (2) if the person receives, or is eligible to receive, the pension before July 1, 1983, and the person was dependent on his or her spouse for at least one-half support at the time the spouse died, became disabled or

became entitled to Social Security benefits. The amount of the public pension used for purposes of the offset against Social Security survivor's benefits is equal to two-thirds of the public pension. Benefits for widows/widowers and surviving divorced spouses are also offset dollar for dollar by any Social Security benefit the surviving spouse receives based on his or her own work. Under certain conditions, a lump-sum death payment of \$255 is payable to the widow or children of the deceased worker. Further, no benefit can be paid to an alien in the United States unless he is lawfully present in the United States. Also, an alien cannot qualify for benefits if he or she never had a work-authorized Social Security Number (SSN) (effective for benefit applications based on SSNs issued after 2003).

**Beneficiary Eligibility:**

Widows, widowers, and surviving divorced spouses age 60 or over are entitled as long as the worker met the insurance requirements. Widows, widowers, and surviving divorced spouses also qualify at any age if they have entitled children of the worker under age 16 or disabled children in their care; unmarried children: under age 18, under age 19 and a full-time student in elementary or secondary school or age 18 or older and under a disability which began before age 22; and dependent parents age 62 and over. To claim benefits as disabled widows, widowers, or surviving divorced spouses, individuals ages 50-59 must show that they have a disability that started no later than 7 years after the insured died or 7 years after certain other events. "Disability" currently has the same meaning for these entitlements as it does for workers who claim disability insurance (see 96.001). As in worker disability claims, there is also a 5-month waiting period after the disability began before benefits begin and entitlement to Medicare after 24 months of entitlement to benefits. Children of the worker claiming benefits because of disability are also subject to the definition of disability used for workers and must show that they have been disabled since before they reached age 22. There is no waiting period for these benefits.

## 96.006 SUPPLEMENTAL SECURITY INCOME

**FEDERAL AGENCY:**

SOCIAL SECURITY ADMINISTRATION

**AUTHORIZATION:**

Social Security Act of 1935, Title XVI, as amended; 42 U.S.C. 1381-1383f.

**OBJECTIVES:**

To ensure a minimum level of income to persons who have attained age 65 or are blind or disabled, and whose income and resources are below specified levels.

**TYPES OF ASSISTANCE:**

Direct Payments with Unrestricted Use; Direct Payments for Specified Use.

**USES AND USE RESTRICTIONS:**

Supplemental Security Income (SSI) payments are made to persons who have attained age 65 or who are blind or disabled and meet the means-tested and other requirements of the program. Generally, there are no restrictions on the use of benefits received by beneficiaries, although the right to future benefits is not transferable or assignable. The Federal government gives the States funds, in advance or by way of reimbursement, for necessary costs in making disability determinations under 20 CFR 404 subparts P and Q and part 416 subparts I and J. Necessary costs are direct as well as indirect costs as defined in 41 CFR 1-15, subpart 1-15.7 of the Federal Procurement Regulations System for costs incurred before April 1, 1984; and 48 CFR 31, Subpart 31.6 of the Federal Acquisition Regulations System and Federal Management Circular No. A-74-4 as amended or superseded for costs incurred after March 31, 1984.

**Applicant Eligibility:**

To be found disabled for SSI purposes: an individual age 18 or older must be unable to perform any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of at least 12 months; an individual under age 18 must have a medically determinable physical or mental impairment or combination of impairments that causes marked and severe functional limitations, and that can be expected to cause death or that has lasted or can be expected to last for a continuous period of at least 12 months. An individual under age 18 who files a new application for benefits and is engaging in substantial gainful activity will not be considered disabled. To be found blind for SSI purposes, an individual of any age must be "statutorily blind." This means central visual acuity of 20/200 or less in the better eye with use of a correcting lens. The eligibility of an individual who has attained age 65 or who is blind or disabled is determined on the basis of an assessment of the individual's monthly income and resources, citizenship or alien status, U.S. residency, and certain other eligibility requirements. In determining a month's income, the first \$20 of Social Security or other unearned income is not counted. An additional \$65 of earned income (\$85 if the person had no unearned income) received in a month plus one-half of the remainder above \$65 (or \$85) also is not counted. If, after these (and other) exclusions, an individual's countable income, effective January 2004, is less than \$564 per month (\$846 for a couple, both of whom are aged, blind or disabled) and

countable resources are less than \$2,000 (\$3,000 for a couple), the individual may be eligible for payments. The values of household goods, personal effects, an automobile, life insurance, and property needed for self support are, if within limits set out in regulations, excluded in determining value of resources. Burial spaces for an individual and immediate family and burial funds, up to \$1,500 each for an individual and spouse, are excluded from resources. The value of a home which serves as the principal place of residence is also excluded in resource valuation.

**Beneficiary Eligibility:**

Individuals who have attained age 65 or are blind or disabled, who continue to meet the income and resources tests, citizenship/qualified alien status, U.S. residence, and certain other requirements. Eligibility may continue for beneficiaries who engage in substantial gainful activity despite disabling physical or mental impairments.

**Credentials/Documentation:**

Proof of age, marital status, income and resources, establishment of blindness or disability, proof of residence in the U.S. and citizenship, or alien status is required.

**Award Procedure:**

The individual (and representative payee, if any,) will be notified by mail of award or denial.

**Deadlines:**

None. Benefits are not paid prior to the month following the month of application. However, an emergency advance payment may be available in the month of filing the application.

**Range of Approval/Disapproval Time:**

Not applicable.

**Appeals:**

Call toll free at 1 (800) 772-1213 or telephone or visit the local Social Security Office. The appeal process ranges from a case review or field office conference to a review by the Federal Courts. An appeal must be requested within 60 days of the date on which a written notice of SSA's initial determination is received by the applicant. The 60 days start the day after you receive the notice.

**Renewals:**

A redetermination of a person's benefit amount and continuing eligibility will be made on a scheduled basis at periodic intervals. Unscheduled redeterminations are made when changes in circumstances are reported. The length of time between scheduled redetermination varies depending on the likelihood that the beneficiary's situation may change in a way that affects payment amount or eligibility.

**Formula and Matching Requirements:**

This program has no statutory formula. Some mandatory State supplements are required by supplemental security income law to maintain former State recipients' December 1973 payment levels at pre-supplemental security income levels, increased by cost-of-living adjustments, where such payments were higher than the initial supplemental security income standards. States also have the option of paying supplements. The Social Security Administration will administer for a fee under agreements with States both mandatory and optional State supplements. States paying supplements are required by supplemental security income law to maintain either their State supplement expenditures or their payment levels when Federal standards are increased.

**Length and Time Phasing of Assistance:**

Benefits are paid monthly. Accrued benefits are paid in a lump sum unless they exceed a specified amount in which case they are paid in up to three installments at 6 month intervals. In the case of a disabled child, accrued payments over a certain amount must be retained in a dedicated account and used only for certain approved expenditures.

**Reports:**

Any change of address or any event affecting eligibility or benefit amount (such as an increase in resources or income or improvement of disabling condition) must be reported to the Social Security Administration when the event occurs.

**Audits:**

None.

During fiscal year 2005, the average number receiving payments is estimated to be 6,867,000 per month. A State applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review. States (including eligible territories and the District of Columbia) will be contacted by the Coast Guard. National nonprofit public service organizations interested in boating safety will be given public notice via the Federal Register on or about October 1, as well as by posting of funds availability via the Grants.gov website.

**Application Procedure:**

Application deadline and other information are contained in the application/program guidance.

**Award Procedure:**

Applications or plans are reviewed by DHS program and administrative staff. Any issues or concerns noted in the application will be negotiated with the successful applicant prior to the award being issued.

**Deadlines:**

Refer to announcement or application guidance for further information.

**Range of Approval/Disapproval Time:**

Refer to program guidance document.

**Appeals:**

Will be considered.

**Renewals:**

None.

**Formula and Matching Requirements:**

One-third of the funds available to the States shall be divided equally among eligible States; one-third shall be divided among eligible States based on the ratio of vessels numbered under approved State numbering systems; the remaining one-third shall be divided among eligible States based on the ratio of State funds spent for State boating safety programs in the previous fiscal year. The Federal share of funds expended on boating safety may not exceed 50 percent of total cost of a State program. Funds remain available for obligation by a State for 3 years following date of allocation. Not more than 5 percent of the appropriation may be allocated to national nonprofit public service organizations. There is no matching requirement for grants to nonprofit organizations.

**Length and Time Phasing of Assistance:**

Refer to program guidance. Awards are subject to the Cash Management Improvement Act for payment and/or reimbursement of expenditures.

**Reports:**

Grantees are required to submit quarterly financial and performance reports. Quarterly "Progress Reports" must include the progress of each sub-grant award. Reports are due 30 days after the end of each quarter: January 30, April 30, July 30, and October 30. Final financial and performance reports are due 90 days after the expiration or termination of grant award.

**Audits:**

In accordance with the provisions of OMB Circular A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Nonprofit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards (or receive property, or a combination of both, within the fiscal year) will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular A-133. These audits are due to the cognizant Federal agency, submitted through the Federal Audit Clearinghouse, not later than 9 months after the end of the grantees fiscal year.

**Records:**

Grant records shall be retained for a period of 3 years from the day the recipient submits its final expenditure report. If any litigation, claim, negotiation, audit, or other action involving the records has been started before the expiration of the 3-year period, the records must be retained until completion of the action and resolution of all issues which arise from it, or until the end of the regular 3-year period, whichever is later. Grant records include financial and program/progress reports, support documents, statistical records, and other documents that support the activity and/or expenditure of the recipient or sub-recipient under the award.

**97.013 STATE ACCESS TO THE OIL SPILL LIABILITY TRUST FUND****FEDERAL AGENCY:**

DEPARTMENT OF HOMELAND SECURITY

**AUTHORIZATION:**

Oil Pollution Act of 1990, Public Law 101-380, Section 1012(d)(1).

**OBJECTIVES:**

To encourage greater State participation in response to actual or threatened discharges of oil.

**TYPES OF ASSISTANCE:**

Project Grants (Cooperative Agreements).

**USES AND USE RESTRICTIONS:**

Funds are to be used for immediate removal action costs that are directly related to a specific incident which occurs after August 18, 1990. Removal costs must generally be incurred at the site or in support of site removal activities (e.g., salary costs for State officials actually engaged in the removal actions, transportation costs for transporting persons and materials to the site, costs of equipment usage and consumable, contract costs, and administrative costs for preparing reports and documenting actions which occurred at the site). Limited to \$250,000 per incident. Removal actions must be consistent with the National Contingency Plan (40 CFR 300) and must be approved by the cognizant Coast Guard or Environmental Protection Agency (EPA) Federal On-Scene Coordinator (FOSC). Remedial actions and restorations are ineligible.

**Applicant Eligibility:**

The Governor (or his or her designated State official) of any State including Puerto Rico, Guam, American Samoa, U.S. Virgin Islands, Northern Marianas, and any other U.S. territory or possession may apply for financial assistance.

**Beneficiary Eligibility:**

State Governors.

**Credentials/Documentation:**

Applicant must either be the Governor of a State or have on file at the NPFC a letter signed by the Governor designating the applicant to be a State official authorized to make a request. The application must establish: (1) the incident is eligible for immediate removal under the Clean Water Act, as amended by OPA 90, (2) the substance discharged or threatening discharge is oil, (3) the incident occurred after August 18, 1990, (4) the aggregate amount of the request is equal to or less than \$250,000, (5) the proposed removal actions are consistent with the NCP (including 40 CFR 300.305(c)'s requirement that a reasonable effort is made to have the discharger voluntarily and promptly perform removal actions), (6) the proposed level of response, proposed actions, and money requested are appropriate for the circumstances, and (7) the State has the means to complete the immediate removal. Detailed application requirements are included in publication entitled Technical Operating Procedures for State Access under Section 1012(d) of OPA 90 (NPFCINST 16451.1).

**Preapplication Coordination:**

This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

**Application Procedure:**

Application is initiated when the Governor or his or her designated State official contacts the cognizant Federal On-Scene Coordinator (FOSC) and requests State access to the Oil Spill Liability Trust Fund (OSLTF, or "the Fund") under 33 CFR 133. This initial request may be made verbally. If the FOSC agrees that the incident is eligible for State Access funding and that State access to the Fund is the best method for addressing the incident, the FOSC will seek obligation of the Fund from the National Pollution Funds Center (NPFC). Since the approval of a request establishes a Cooperative Agreement between the Coast Guard and the State, the provisions of 49 CFR 18 apply to the State Access process.

**Award Procedure:**

The National Pollution Funds Center will notify the State via telephone and hard

copy of the award approval and amount.

**Deadlines:**

None.

**Range of Approval/Disapproval Time:**

Due to the emergency nature of oil discharge incidents, an approval or disapproval decision will be made and communicated to the State as expeditiously as possible (considering the nature and scope of the incident and other operations) following receipt of the request.

**Appeals:**

None.

**Renewals:**

None.

**Formula and Matching Requirements:**

None.

**Length and Time Phasing of Assistance:**

None.

**Reports:**

The State must complete a source (of oil discharge) and responsibility party investigation and forward it to the Coast Guard National Pollution Funds Center (NPFC) and the FOSC as soon as possible. The NPFC and the FOSC must be informed within 48 hours following the completion of immediate removal efforts. An Incident Report, a detailed documentation of all eligible costs incurred during the immediate removal, and forms and certifications prescribed 49 CFR 18, 20, 29 and 90 are also required by the Coast Guard. All required forms, certifications, and other documentation are expected within 30 days following the completion of immediate removal efforts. Payment is not made until all materials are received and reviewed. The Coast Guard may deobligate the Fund for payment if all materials are not received within 90 days following the completion of immediate removal efforts. An amplifying Technical Operating Procedures publication (NPFCINST 16451.1) has been distributed to the States.

**Audits:**

In accordance with the provisions of OMB Circular A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Nonprofit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards (or receive property, or a combination of both, within the fiscal year) will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular A-133. These audits are due to the cognizant Federal agency, submitted through the Federal Audit Clearinghouse, not later than 9 months after the end of the grantees fiscal year.

**Records:**

Due to the need to recover removal costs from responsible parties and the possibility of protracted litigation that may be associated with specific oil discharge removal incidents, State records must be kept for 10 years following submission of the final documents to the Coast Guard, or until the completion of litigation for a specific case, whichever is longer.

**97.014 BRIDGE ALTERATION**

(Truman-Hobbs Act)

**FEDERAL AGENCY:**  
DEPARTMENT OF HOMELAND SECURITY

**AUTHORIZATION:**

Rivers and Harbors Appropriations Act of 1899, Section 18, 30 Stat. 1153, 33 U.S.C. 502; Bridge Act of 1906, Sections 4 and 5, 34 Stat. 85, 33 U.S.C. 494, 495; Act of June 21, 1940, as amended; Truman-Hobbs Act, 54 Stat. 497, 33 U.S.C. 511-523.

**OBJECTIVES:**

To accomplish alteration of obstructive bridges to render navigation through or under it reasonably free, easy, and unobstructed for the benefit of navigation. In accordance with the Coast Guard Authorization Act of 1996, permanent authority exists in 49 U.S.C. 104(e) to transfer funds from the Federal-Aid Highways discretionary bridge program to the Coast Guard to finance alteration of Truman-Hobbs obstructive highway bridges.

**TYPES OF ASSISTANCE:**

Direct Payments for Specified Use.

**USES AND USE RESTRICTIONS:**

Funds are reimbursed to bridge owner to cover payments of the Government's share for work performed in altering the obstructive bridge in accordance with the approved general plans and specifications. All changes to plans and specifications need prior approval of the Coast Guard before reimbursement of expenditure can be authorized. Costs of alteration attributable to the following are ineligible: (1) direct and special benefits which will accrue to the bridge owner as a result of the alteration, (2) the expectable savings in repair or maintenance costs, (3) requirements of traffic by railroad or highway or both, (4) increasing carrying capacity, (5) portion of the actual capital cost of the old bridge or such part of the old bridge as may be altered or changed or rebuilt as the used service life of the whole or a part, as the case may be, bears to the total estimated service life of the whole or such part: Provided, that the part of the cost of alteration of any bridge for both highway and railroad traffic, attributable to the requirements of traffic by highway, shall be borne by the proprietor of the highway. (6) Provided further, that in the event the alteration or relocation of any bridge may be desirable for the reason that the bridge unreasonably obstructs navigation, but also for some other reason, the Secretary may require equitable contribution from any interested person, firm, association, corporation, municipality, county, or State desiring such alteration or relocation for such other reason, as a condition precedent to the making of an order for such alteration or relocation. The United States shall bear the balance of the cost, including that part attributable to the necessities of navigation. Bridge alteration and relocation actions must comply with the provisions of the National Environmental Policy Act (NEPA) of 1969 (Public Law 91-190), as amended; the CEQ Regulations (40 CFR 1500-1508) which implements NEPA; Executive Order 11514, as amended, Protection and Enhancement of Environmental Quality; DOT Order 5610.1C, Procedures for Considering Environmental Impacts, and COMDTINST M16475.1C, NEPA Implementing Procedures.

**Applicant Eligibility:**

(1) Any State, county, municipality, or other political subdivision or any corporation, association, partnership, or individual owning or jointly owning any lawful bridge over navigable waters of the United States which is used and operated for the purpose of carrying railroad traffic, or both railroad and highway traffic, or (2) Any State, county, municipality, or other political subdivision owning or jointly owning any lawful bridge over the navigable waters of the United States which is used and operated for the purpose of carrying highway traffic.

**Beneficiary Eligibility:**

Navigation, maritime transportation interests, commercial and recreational boating public, marine traffic, ports, bridge owners, land transportation, and general local public.

**Credentials/Documentation:**

A bridge must be determined to unreasonably obstruct navigation. This determination is made by the Coast Guard after conducting an investigation and determining that the navigational benefits that would accrue as a result of altering the bridge equal or exceed the cost of alteration.

**Preapplication Coordination:**

An applicant should contact the Coast Guard District bridge staff or Headquarters bridge staff for information as to what is necessary to support his/her complaint that a bridge is unreasonably obstructive to navigation. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his/her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

**Application Procedure:**

A formal written complaint stating that a bridge is unreasonably obstructive is made to the appropriate Coast Guard District Commander who determines through informal discussions with the complainant, waterway users, other interested parties, whether or not a preliminary investigation is required. Impediments to highway or railway are not valid complaints. In some cases, based on the accident history of a bridge alone, a preliminary investigation may be initiated by the District Commander. Computing benefits is not a

responsibility of the complainant, it is a Coast Guard responsibility. Environmental considerations also do not enter into consideration for determining whether or not a bridge is unreasonably obstructive.

**Award Procedure:**

When preliminary investigation of the District Commander indicates sufficient benefits to navigation are not readily available to at least justify a detailed investigation, the District Commander informs the complainant that there is no sufficient evidence to warrant further investigation and closes the case. However, when the preliminary investigation indicates that the bridge may be unreasonably obstructive, the District Commander undertakes a detailed investigation with the approval of the Commandant (G-OPT). The Coast Guard District holds a public hearing to determine the facts upon which a firm decision to alter or not alter is made. The detailed investigation is reviewed by the Commandant, if the navigational benefit equals to or is greater than the cost of the bridge alteration, then the bridge is declared unreasonably obstructive to navigation and therefore, becomes eligible for Federal funding under the Truman-Hobbs Act. For additional details refer to 33 CFR 116.

**Deadlines:**

None.

**Range of Approval/Disapproval Time:**

1. Within six months from the start of the preliminary investigation, if sufficient costs to navigation are not readily available to justify a detailed investigation, the case is closed out by the District Commander. 2. Extension of time beyond the six months may be allowed provided a quarterly progress report is forwarded to the Commandant. 3. Final investigation report including the benefit and cost ratio which becomes the basis for the determination to declare the bridge an unreasonable obstruction to navigation is completed within a 3-year period from the date of initial complaint.

**Appeals:**

Within 60 days of the District Commander's decision that the case is closed, an appeal must be submitted in writing to the U. S. Coast Guard Directorate of Operations Policy (G-OP), 2100 Second Street, SW., Washington, DC 20593-0001. Commandant will take action on the appeal within 90 days of the receipt of the appeal.

**Renewals:**

The case may be reopened at any time if changes in navigation occur or additional information is provided.

**Formula and Matching Requirements:**

The general statutory procedures which serve as the basis of determining the proportionate shares of the total cost of the project to be borne by the United States and by the bridge owner is described in the Act of June 21, 1940, as amended (Truman-Hobbs Act)(54 Stat. 497, 33 U.S.C. 516). The general procedure and statutory requirements are also listed in 33 CFR 116.30. In the event the alteration or relocation of any bridge may be desirable for reasons that the bridge unreasonably obstructs navigation, but also for some other reasons, equitable contribution from any interested person, firm, association, corporation, municipality, county, or State desiring such alteration or relocation as a condition precedent to making an order for alteration or relocation. The United States bears the balance of the cost including that part attributable to the necessities of navigation.

**Length and Time Phasing of Assistance:**

There is no restriction placed on the time period over which the payment of the total share of the United States is made except the time period should be reasonable. This time period is determined by the Commandant. After approving the general plans and specifications for the alteration of such bridge, the guarantee of the owner not to exceed the total project cost, the fixing of proportionate shares of the United States and the owner, out of the funds appropriated by Congress, reimbursement or payment to the bridge owner begins on such construction costs as the work progresses and upon receipt of the certification of completion.

**Reports:**

Monthly progress reports of design and construction. Monthly bills indicating payment has been made so that reimbursement can be made.

**Audits:**

DOT Audit is made at the completion of the alteration and final payment of the last bill and to ensure that funds have been applied to the project efficiently, economically, effectively and no overcharges have been made to the project. The audit procedure mandated for the program is the IG Act of 1978, as amended, and DOT Order No. 2900.

**Records:**

The bridge owner is required to maintain all financial records, bills and payments, in-house force account records, time and attendance, contract documents, final acceptance of the project, and receipt of all payments.

**Account Identification:**

70-0614-0-1-403.

**Obligations:**

**Range and Average of Financial Assistance:**

In previous fiscal years, when payments were issued, the range of financial

assistance was \$14,740,000 to \$42,800,000.

#### **PROGRAM ACCOMPLISHMENTS:**

The Coast Guard has completed 27 bridge alteration projects at a total cost of \$193 million to the Government. At present, 9 projects located in Georgia, Iowa, Louisiana, Illinois, Alabama, Massachusetts, South Carolina, and Pennsylvania are under design and construction. The majority of the above projects are railroad bridges with a small number of highway bridges.

#### **CRITERIA FOR SELECTING PROPOSALS:**

The selection criteria are primarily based on the benefit to navigation and the cost of alteration of the obstructive bridge. The following Criteria are used to determine if a bridge is obstructive under the Truman Hobbs Act: The District Commander receives complaints that a bridge is obstructive to navigation, or he can initiate an investigation because of numerous accidents. Through informal discussions with the complainant and other affected and or concerned parties, if sufficient information is available, the District Commander may formulate an opinion on whether or not the bridge in question is an unreasonable obstruction to navigation. If the District Commander determines that further investigation is not warranted, the District Commander informs the complainant there is not enough evidence to warrant an investigation and takes no further action. If the District Commander concludes that the bridge could be an unreasonable obstruction to navigation, the District Commander conducts a Preliminary Investigation, which involves: analyzing the existing bridge to determine if the navigational clearances are restrictive and to what extent; describing the waterway in the vicinity of the bridge (with charts of the area) for the record to establish, area and location of bridge in question, and any naturally occurring aspects of the environment which may impact navigation; collecting data on bridge openings to establish amount of use, accidents attributed to restrictive

navigational clearances and not pilot error, all costs associated with accidents as described above, and other costs associated with the need to alter for the benefit of navigation (i.e., the cost of double tripping); computing the navigation benefits; and recommending a course of action. A Preliminary Investigation Report is sent to the Commandant for review. If the Commandant determines that the bridge is not an unreasonable obstruction to navigation, the Commandant then notifies the District Commander that the bridge does not qualify for alteration under the Truman-Hobbs Act and no further action is required. The case may be reopened if changes in navigation occur. If the Commandant determines that the bridge may be an unreasonable obstruction to navigation, the Commandant then directs the District Commander to conduct a detailed investigation. The purpose of the investigation is to gather additional facts to determine if the bridge is indeed an unreasonable obstruction to navigation, what clearances are needed, and any other circumstances that need disclosing. The District Commander forwards a Detailed Investigation Report to the Commandant. The report contains detailed information and substantiated data collected during the investigation in support of the recommendation. The Commandant reviews the Detailed Investigation Report and conducts a Benefit/Cost Analysis. The Commandant then determines if the benefit to navigation which will result from the alteration is at least equal to the cost of making the bridge alterations. If the benefit does not at least equal the cost then the bridge can not be altered under the Truman-Hobbs Act. The Navigation Benefit is used to calculate the Benefit-to Cost Ratio (B/C). The B/C will be used to determine eligibility under the Truman-Hobbs Act and to justify for funding before Congress. The Navigational Benefits generally will be calculated in three categories, namely: (1) Vessels delays resulting from limited clearances of the bridge (or Transit Time Savings, resulting from a reduction in transit time and thus operating expenses in clearing the bridge zone); (2) Collision damage resulting from accidents caused by the limited clearance of the bridge (or Water Accident Reduction Savings, due to elimination/reduction of future damages to the bridge, fenders, and vessels); and (3) Certain other savings have been eliminated. Examples of these savings are elimination of a need for extrapilots, crew, and tugs; elimination of environmental delays such as tide, wind, currents darkness, visibility directly attributable to the limited clearance of the bridge itself; and increase in trips, because the restrictive bridge clearance that had heretofore prohibited the use of larger barge and/or tows. The Benefit-to-Cost Ratio is computed and is the indicator to determine if a bridge is an unreasonable obstruction to navigation alterable under the Truman-Hobbs Act. If the Commandant concludes that the bridge does not qualify for alteration under the Truman-Hobbs Act, the Commandant notifies the District Commander that the bridge does not qualify and no further action is required. However the case may be reopened with additional information if the Commandant determines that the bridge is an unreasonable obstruction to navigation, and qualifies for alteration under the Truman-Hobbs Act. The Commandant notifies the District Commander to inform the bridge owner of the required changes. The bridge owner is given 60 days to reply. When the reply is received or when the 60 days are up, the Commandant issues the order to alter. The District Commander prioritizes investigations of possible obstructive bridges based upon a variety of relevant factors. The factors taken into account are type of bridge, location of bridge, cross current, accident history of the bridge, traffic density, duration of channel blockage and time to reopen, severity of damage resulting from accidents, type and amount of cargo transiting through the bridge, risk of the bridge being hit and savings due to avoidance of collision risk, economic impact to navigation industry, possible environmental consequences that may result from an accident and benefits to navigation. Priorities are continuously reviewed and updated by bridge division at Headquarters. Inter-district priority for the alteration of bridges is established by Headquarters. Priority is based on the severity of impacts attributable to each bridge. Priorities are updated as new bridges come to the District Commander's attention and as new information becomes available that require changes in priorities.

## 97.022 FLOOD INSURANCE

### FEDERAL AGENCY:

DEPARTMENT OF HOMELAND SECURITY

### AUTHORIZATION:

National Flood Insurance Act of 1968, 42 U.S.C. 4001 et seq.

### OBJECTIVES:

To enable persons to purchase insurance against physical damage to or loss of buildings and/or contents therein caused by floods, mudslide (i.e., mudflow), or flood-related erosion, thereby reducing Federal disaster assistance payments, and to promote wise floodplain management practices in the Nation's flood-prone and mudflow-prone areas.

### TYPES OF ASSISTANCE:

Insurance.

### USES AND USE RESTRICTIONS:

Under the Emergency Program of the National Flood Insurance Program (NFIP),

property owners may buy flood insurance at a chargeable premium rate that is generally lower than a normal actuarial rate. Maximum amounts of such coverage available under the Emergency Program of the NFIP are: \$35,000 for a single-family home (higher limits are available in Hawaii, Alaska, Guam and the U.S. Virgin Islands), \$100,000 for all other residential structures, plus \$10,000 per dwelling unit for any contents; for nonresidential structures, an aggregate liability for any single structure of \$100,000 and for contents, \$100,000 per unit. Once a detailed flood insurance risk study has been completed and the community enters the Regular Program, additional coverage on existing properties may be purchased at actuarial rates. As of March 1, 1995, the maximum coverage available under the Regular Program is: \$250,000 for single-family residential structures; 250,000 times this number of condominium units for a residential condominium building, \$250,000 for all other residential structures; \$100,000 for contents per dwelling unit; \$500,000 for non-residential structures; \$500,000 for contents of non-residential structures. Effective October 1, 1983, coverage is no longer available for finished portions of basements with the exception of equipment necessary to make the building habitable, (e.g., furnaces). Properties built within identified special flood hazard areas after the effective date of the Flood Insurance Rate Map are eligible for flood insurance only at actuarial rates. Under the Flood Disaster Protection Act of 1973, effective March 2, 1974, flood insurance must be purchased as a condition of any form of Federal or federally-related financial assistance, including Federal grants, disaster assistance, and mortgage loans from federally regulated lending institutions and FHA, Farmers Home Administration, VA or guaranteed mortgages when the improved real property to which the transaction applies is located within identified special flood hazard areas where flood insurance is available. Communities having one or more identified special flood hazard areas must enter into the National Flood Insurance Program within 1 year of the official identification of their special flood hazard areas or be denied Federal financial assistance for acquisition or construction purposes within those areas. Federally regulated conventional sources (i.e., banks, savings and loan associations, or similar lending institutions) are permitted to make loans secured by improved real estate or Manufactured Housing located or to be located in the identified special flood hazard area of a nonparticipating community which has been formally identified as flood-prone for more than 1 year, but Federal disaster assistance for acquisition or construction purposes will not be available in the event of flood or flood-related property damage. The conventional lender is statutorily required to notify the borrower, before making a loan in such an area, whether Federal disaster assistance will be available to the property. The Coastal Barrier Improvement Act of 1990 amended the Coastal Barrier Resources Act of 1982 by greatly enlarging the acreage included in the designated coastal barrier resources system unit. The 1990 Act also added "otherwise protected areas." "Otherwise protected areas" are defined as an undeveloped coastal barrier within the boundaries of an area established under Federal, State, or local law, or held by a qualified organization, primarily for wildlife refuge, sanctuary, recreational or natural resource conservation purposes. The 1982 Act prohibits the sale of new flood insurance on or after October 1, 1983 for new construction or substantial improvements of structures located on any coastal barrier with the Coastal Barrier Resources System designated by this Act. The 1990 Act prohibits the sale of new flood insurance on or after November 16, 1990 for new construction or substantial improvements of structures located on any new coastal barrier within the Coastal Barrier Resources System designated or modified by this Act. It also prohibits the sale of new flood insurance on or after November 16, 1991 for new construction or substantial improvements of structures located in an otherwise protected area that are not used in a manner consistent with the purpose of the otherwise protected area. Subsequent pieces of legislation have added or deleted areas. Also, the Secretary of the Interior is authorized to make technical revisions and modifications to the boundaries of such units as may be necessary.

#### **Applicant Eligibility:**

Flood insurance can be made available in any community (a State or political subdivision thereof with authority to adopt and enforce floodplain management measures for the areas within its jurisdiction) that submits a properly completed application to FEMA including copies of enacted floodplain management measures consistent with the National Flood Insurance Program regulations.

#### **Beneficiary Eligibility:**

Residents, business, and property owners in applicant community, in which like States can insure municipal structures.

#### **Credentials/Documentation:**

Same as Applicant Eligibility. This program is excluded from coverage under OMB Circular No. A-87.

#### **Preapplication Coordination:**

None. This program is excluded from coverage under 44 CFR Part 13 and E.O. 12372.

#### **Application Procedure:**

Community officials must submit an NFIP eligibility application form, which is available from the FEMA, together with: copies of adopted floodplain management measures meeting the minimum standards of 44 CFR Section 60.3(a), 60.3(b), 60.3(c), 60.3(d), and/or 60.3(e), as appropriate for the type of flood hazards identified; a list of any incorporated communities within the

applicant's boundaries; and estimates of population and, by kind, of buildings situated in the known flood-prone areas of the community. Such Applications should be submitted to the Mitigation Directorate, FEMA, Washington, DC 20472. This program is excluded from coverage under OMB Circular No. A-110.

#### **Award Procedure:**

FEMA reviews the application and if complete, designates the community as participating. The community is informed of its admission, and notice is published in the Federal Register. Residents and property owners may then purchase flood insurance through any property insurance agent or broker.

#### **Deadlines:**

Communities with one or more identified special flood hazard areas must enter the program within 1 year after the identification of those areas or else prohibitions against Federally related financial assistance for acquisition or construction purposes in identified special flood hazard areas take force. Once the community does qualify, after the prescribed date, these prohibitions are removed. Adequate floodplain management measures must be in effect within 6 months of the date that the special flood hazard area is identified and within 6 months of the date flood water surface elevations are provided.

#### **Range of Approval/Disapproval Time:**

For complete applications, a maximum of 10 working days is allowed for review and notification.

#### **Appeals:**

Communities are allowed to appeal flood-prone identification and are also given an opportunity to appeal proposed flood elevation determinations for new construction and substantial improvement of existing structures in the special flood hazard areas. Notice of the proposed elevations is published in the Federal Register and is sent directly to the local governments. Following notification to the local government, the notice of proposed flood elevation determinations is published twice during a 10-day period in a prominent newspaper. The local community and its individual residents then have 90 days following the second newspaper notice to submit any scientific or technical data that tend to negate or contradict FEMA's findings. If a conflict in data exists and cannot be resolved at the community level, the community consolidates all individual appeals for review by FEMA. FEMA shall resolve the appeals by consultation with officials of the local government, or by submission of conflicting data to an independent scientific body, or by administrative hearings.

National Flood Insurance Act of 1968, as amended; 42 U.S.C. 4001 et seq.; Flood Disaster Protection Act of 1973, as amended. 42 U.S.C. 4002 et seq.

**OBJECTIVES:**

To ensure that communities participating in the National Flood Insurance Program (NFIP) are achieving flood loss reduction measures consistent with program direction. The CAP-SSSE is intended to identify, prevent and resolve floodplain management issues in participating communities before they develop into problems requiring enforcement action.

**TYPES OF ASSISTANCE:**

Project Grants.

**USES AND USE RESTRICTIONS:**

The CAP-SSSE is a product-oriented program directly related to the flood loss reduction objectives of the NFIP. Available CAP-SSSE funding is provided on a 75 percent maximum Federal and 25 percent minimum State cost-sharing basis. Both cash and in-kind resources must be specifically identified to designated activities. States estimate product completion as described in a mutually negotiated grant agreement.

**Applicant Eligibility:**

FEMA's ten Regional Offices will provide each State Governor's Office with the grant application package. The CAP-SSSE is administered through the Mitigation Division of each FEMA Regional Office. FEMA's Regional Offices will contact eligible States to negotiate a mutually acceptable grant agreement. Funding is made available when the grant agreement is negotiated and agreed upon. Continued participation in the CAP-SSSE is dependent upon completing activities described in the grant agreement. The SSSE is designed to utilize the floodplain management capabilities of individual States in a cost effective cooperative agreement with FEMA. A State's participation in the SSSE is voluntary and is contingent upon need and skill level capability.

**Beneficiary Eligibility:**

The direct beneficiary of the CAP-SSSE is the individual State receiving financial assistance. In addition, participating NFIP communities and local governments which receive flood plain management and flood loss reduction assistance provided by the State are also (indirect) beneficiaries as a consequence of the services they receive.

**Credentials/Documentation:**

A State's participation in the CAP-SSSE is voluntary and is contingent upon need and skill level capability as determined by FEMA. In addition, applicant states are required to provide any relevant documentation contained in the grant agreement. package provided by FEMA.

**Preapplication Coordination:**

Funding is provided on a 75 percent Federal, 25 percent State cost-sharing basis. Both cash and in-kind resources may meet the 25 percent cost-share.

**Length and Time Phasing of Assistance:**

Refer to program guidance. Awards are subject to the Cash Management Improvement Act for payment and/or reimbursement of expenditures.

**Reports:**

Grantees are required to submit quarterly financial and performance reports. Quarterly Progress Reports must include the progress of each sub-grant award. Reports are due 30 days after the end of each quarter: January 30, April 30, July 30, and October 30. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular A-133. These audits are due to the cognizant Federal agency, submitted through the Federal Audit Clearinghouse, not later than 9 months after the end of the grantees fiscal year.

**Records:**

Grant records shall be retained for a period of 3 years from the day the recipient submits its final expenditure report. ## 97.024 EMERGENCY FOOD AND SHELTER NATIONAL BOARD PROGRAM

(Emergency Food and Shelter)

**FEDERAL AGENCY:**

DEPARTMENT OF HOMELAND SECURITY

**AUTHORIZATION:**

Stewart B. McKinney Homeless Assistance Act of 1987, as amended, Title III, Sections 301-316, Public Law 100-77, as amended, 42 U.S.C. 11331-11346.

**OBJECTIVES:**

To supplement and expand ongoing efforts to provide shelter, food, and supportive services for needy families and individuals. To strengthen efforts to create more effective and innovative local programs by providing supplemental funding for them. To conduct minimum rehabilitation of existing mass shelter or mass feeding facilities, but only to the extent necessary to make facilities safe,

sanitary and bring them into compliance with local building codes.

**TYPES OF ASSISTANCE:**

Formula Grants.

**USES AND USE RESTRICTIONS:**

Food and related expenses (such as transporting food/food preparation and serving equipment); mass shelter; other shelter (such as hotels and motels); and rent/mortgage and/or utility assistance limited to one month; and limited repairs to feeding and sheltering facilities. Emergency Food and Shelter (EFS) National Board Program funds cannot be used for: rental security, deposits of any kind, cash payments of any kind, lobbying efforts, salaries (except as administrative allowance and limited to that total allowance of 2 percent of total award), purchases or improvements of an individual's private property, telephone costs, repairs to government-owned or profit-making facilities and any payments for services not incurred. For a complete listing on eligible and ineligible costs under this program, refer to the current Phase (fiscal year): Responsibilities and Requirements, issued by the Emergency Food and Shelter Program National Board.

**Applicant Eligibility:**

Since funds are initially distributed to jurisdictions based on either a National Board formula or recommendations from State Set-Aside Committees, there is no application process for jurisdictions. All jurisdictions are considered within the National Board formula and all jurisdictions in an individual State may be considered by the State Set-Aside Committee for either initial or additional (if the jurisdiction had previously been selected by the National Board) funding.

**Beneficiary Eligibility:**

The law directs that the Local Boards, which manage the program at the local level, shall "determine which private nonprofit organizations or public organizations of the local government in the individual locality shall receive grants to act as service providers." The range of local participant groups includes the affiliates of the National Board membership which consists of the American Red Cross, Catholic Charities, USA, United Jewish Communities, National Council of Churches of Christ in the USA, The Salvation Army and United Way of America, with a local government representative replacing FEMA. Also participating are thousands of independent nonprofits (such as Community Action Agencies and Food Banks and food pantries) which provide food and/or shelter services. Due to the broad category of people in need of such emergency services, the providers can include specialized groups such as domestic violence shelters, Native American organizations, organizations providing food or shelter to: AIDS patients, handicapped individuals, the elderly, homeless veterans, non-wards of the State teenage runaways, and many other groups with emergency food and shelter needs. As noted earlier, the decisions on selections are made through the consensus of the Local Board as they have assessed their community's most urgent needs. It is important that such agencies use these funds to supplement, not replace, their current efforts. This program is intended to supplement ongoing programs and allow them to extend and expand upon their existing services.

**Credentials/Documentation:**

The program employs a Local Recipient Organization Certification Form. This form certifies an applicant's status (i.e., that it is a nonprofit capable of delivering eligible services) that it will abide by the program guidelines (both on eligible spending and reporting requests), and comply with other fiscal and program rules so stipulated. Grant awards will be determined in accordance with OMB Circular Nos. A-102 and A-87 for State and local governments. Awards made to Institutions of Higher Education, Hospitals and Other Non-Profit Organizations will be required to follow the requirements of OMB Circular Nos. A-110 and A-21, and be audited under the standards of OMB Circular No. A-133.

**Preapplication Coordination:**

At the local level, following award notification, a Local Board is formed. That board then advertises the availability of the funds to local nonprofit agencies and governments. This program is excluded from coverage under E.O. 12372.

**Application Procedure:**

Application deadline and other information are contained in the application/program guidance.

**Award Procedure:**

Applications or plans are submitted to the National Board and reviewed by National Board program.

**Deadlines:**

Refer to announcement or application guidance for further information.

**Range of Approval/Disapproval Time:**

Refer to program guidance document.

**Appeals:**

Refer to program guidance for information on the appeal process. Those cases that cannot be handled locally should be referred to the National Board giving details on action that has been taken up to that point. Any allegations regarding fraud or the misuse of funds should be referred directly to the FEMA Office of Inspector General.

**Renewals:**

Not applicable. Each phase (fiscal year) is a new program.

**Formula and Matching Requirements:**

The National Board uses unemployment and poverty statistics as indicators of need. For Phase 26, fiscal year 2008, the following formula was used: (1) Jurisdictions, including balance of counties, with 13,000+ unemployed and a 3.5 percent rate of unemployment. (2) Jurisdictions, including balance of counties, with 300 to 12,999 unemployed and a 5.5 percent rate of unemployment. (3) Jurisdictions, including balance of counties, with 300 or more unemployed and an 11 percent rate of poverty.

**Length and Time Phasing of Assistance:**

Refer to program guidance. Awards are subject to the Cash Management Improvement Act for payment and/or reimbursement of expenditures.

**Reports:**

Local Boards are expected to monitor the expenditure of funds in their respective jurisdictions. It is for that reason that requests for second checks (all awards are divided into two payments) must be made by the Local Boards. Along with the request for the second payment, the National Board receives an interim report on eligible spending during that phase. A Final Report also must be filed by each LRO with its Local Board. The Local Board then compiles all the Final Reports within its jurisdiction and submits them (along with any requested documentation) to the National Board. Failure of an LRO to file a Final Report will result in its award being held in escrow the succeeding year.

**Audits:**

In accordance with the provisions of OMB Circular A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Nonprofit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards (or receive property, or a combination of both, within the fiscal year) will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular A-133. These audits are due to the cognizant Federal agency, submitted through the Federal Audit Clearinghouse, not later than 9 months after the end of the grantees fiscal year.

**Records:**

Boards are required to remain in operation until all program and audit requirements of the National Board have been satisfied. Grant records shall be retained for a period of 3 years from the day the recipient submits its final expenditure report. If any litigation, claim, negotiation, audit, or other action involving the records has been started before the expiration of the 3-year period, the records must be retained until completion of the action and resolution of all issues which arise from it, or until the end of the regular 3-year period, whichever is later. Grant records include financial and program/progress reports, support documents, statistical records, and other documents that support the activity and/or expenditure of the recipient or sub-recipient under the award.

**Account Identification:**

70-0707-0-1-605.

**Obligations:**

(Grants) FY 07 \$151,470,000; FY 08 est \$153,000,135; and FY 09 est \$100,000,000.

**Range and Average of Financial Assistance:**

Refer to program guidance.

**PROGRAM ACCOMPLISHMENTS:**

During the most recent phase for which final data is available (phase 24 or FY 06), over 12,000 social service agencies (both nonprofit and governmental) in more than 2,500 jurisdictions received nearly \$151,470 million. This resulted in the provision of more than 66,784,162 million additional meals and 4.1 million additional nights of shelter, payout of approximately 248,869 rent/mortgage and utility bills to keep people in their homes, as well as supplies and minimal repairs for shelters. Web training, called Webinars, was also conducted by program staff for local boards and agencies.

make one-month mortgage and rent payments to prevent evictions which kept families in their own homes and lightened the shelter population.

The remaining funds are distributed based on the number of NFIP policies, repetitive loss structures, and other such criteria as the Director may determine in furtherance of the disaster resistant community concept. FEMA may contribute up to 75 percent of the cost of eligible activities. The remaining percent must be met by matching requirements from State government or other nonfederal funding sources. **AUTHORIZATION:**

Water Resources Development Act of 1996, Section 215, Public Law 104-303.  
Dam Safety Act of 2006 (Public Law 109-460 December 2006).

**OBJECTIVES:**

To encourage the establishment and maintenance of effective State programs intended to ensure dam safety, to protect human life and property, and to improve State dam safety programs.

**TYPES OF ASSISTANCE:**

Project Grants.

**USES AND USE RESTRICTIONS:**

A primary goal of Public Law 104-303 is to encourage the establishment and maintenance of effective State dam safety programs and to provide financial assistance incentives to States that are moving toward improved safety of nonfederal dams in their States. Public Law 104-303 provides for the two-tiered assistance program described below. Primary Assistance: For a State to be eligible for primary assistance under the National Dam Safety Program, the State's dam safety program must be working toward State dam safety program that is authorized by State legislation to include substantially at a minimum the following criteria and budgeting requirements: 1) The authority to approve plans and specifications to construct, enlarge, modify, remove, and abandon dams; (2) the authority to perform periodic inspections during dam construction to ensure compliance with approved plans and specifications; 3) a requirement on completion of dam construction, State approval be given before operation of the dam; 4) the authority to require or perform the inspection at least once every 5 years of all dams and reservoirs that would pose a significant threat to human life and property in case of failure to the dams and reservoirs to determine the continued safety of and a procedure for more detailed and frequent safety inspections; and 5) a requirement that all inspections be performed under the supervision of a State-registered professional engineer with related experience in dam design and construction; 6) the authority to issue notices, when appropriate, to require owners of dams to perform necessary maintenance or remedial work, revise operating procedures, or take other actions, including breaching dams when necessary; 7) regulations for carrying out the legislation of the State described in this paragraph; 8) the provision for necessary funds to ensure timely repairs or other changes to or removal of a dam to protect human life and property, if the owner of the dam does not take the action described above, to take appropriate action as expeditiously as possible; 9) A system of emergency procedures to be used if a dam fails or if the failure of a dam is imminent; and 10) an identification of each dam the failure of which could be reasonably expected to endanger human life, the maximum area that could be flooded if the dam failed, and necessary public facilities that would be affected by the flooding. For a State to qualify for primary assistance, State appropriations must be budgeted to carry out the legislation of the State as described in this paragraph. Advanced Assistance: For a State to qualify for advanced assistance under Public Law 104-303, the State dam safety program must meet the criteria and budgeting requirements listed above for primary assistance. Also, the State must be working toward advanced requirements and standards established by the National Dam Safety Review Board (Board) and the Director of the Federal Emergency Management Agency (FEMA), with the assistance of established criteria such as the Model State Dam Safety Program, FEMA 316, April 1987, as amended. More advanced requirements and standards include but are not necessarily limited to the following: Legislation; Regulations; Permitting/Approval of Plans; Inspections; Enforcement Capabilities; Emergency Response; Program Staffing and Funding; Education and Training; and Public Relations Plans.

**Formula and Matching Requirements:**

For fiscal year 2007, the amount authorized to be appropriated for financial assistance for State dam safety programs is \$4,000,000. The maximum amount of allocation to a State may not exceed 50 percent of the reasonable cost of implementing the State dam safety program. The Director and the Board shall determine the amount allocated to States needing assistance. There are no matching requirements for this program. ## 97.046 FIRE MANAGEMENT ASSISTANCE GRANT

**FEDERAL AGENCY:**

DEPARTMENT OF HOMELAND SECURITY

**AUTHORIZATION:**

Robert T. Stafford Disaster Relief and Emergency Act, Section 420 of Public Law 93-288, as amended, 42 U.S.C.5187 as amended by the disaster Mitigation Act of 2000. On October 30, 2001, the Fire Management Assistance Grant Program replaced the Fire Suppression Assistance Program.

**OBJECTIVES:**

To provide grants to States, Indian tribal governments and local governments for the mitigation, management and control of any fire burning on publicly (nonfederal) or privately owned forest or grassland that threatens such destruction as would constitute a major disaster.

**TYPES OF ASSISTANCE:**

Project Grants; Provision of Specialized Services.

**USES AND USE RESTRICTIONS:**

Fire Management Assistance Grants are made in the form of cost-sharing grants for the mitigation, management, and control of any fire on publicly (nonfederal) or privately owned forestland or grassland that threatens such destruction as would constitute a major disaster. The Fire Management Assistance Grant Program, authorized by the Stafford Act and amended by the Disaster Mitigation Act of 2000, provides for the mitigation, management and control of fires that threaten such destruction as would constitute a major disaster.

**Applicant Eligibility:**

State governments and Indian tribal governments are eligible for fire management assistance grants. The State or Indian tribal government may be the Grantee. The Grantee is the government to which a grant is awarded, and is accountable for the use of funds provided.

**Beneficiary Eligibility:**

The State Government and/or Indian tribal government, acting as the Grantee, is

the government to which the grant is awarded and which is accountable for the use of the funds provided. Other State entities, Indian tribal governments and local governments are eligible to apply for subgrants.

**Credentials/Documentation:**

Costs will be determined in accordance with FEMA Regulations, 44 CFR Part 204. Federal funds will be awarded to subgrantees in accordance with State law and procedure and in compliance with 44 CFR Part 13 and 204. Grant awards will be determined in accordance with OMB Circulars No. A-87 and No. A-102 for State and local governments.

**Preapplication Coordination:**

A FEMA-State Agreement and/or Indian tribal Agreement for the Fire Management Assistance Grant Program (the agreement) is signed by the Governor/Indian tribal government and the Regional Administrator at the beginning of the calendar year or after a State's first fire management assistance grant declaration in a calendar year. The agreement is amended for subsequent approvals of assistance for the remainder of the year. This agreement outlines the level of fire management assistance to be provided for all fires declared during the calendar year, and contains the necessary terms and conditions for requesting and receiving assistance. This program is excluded from coverage under E.O. 12372.

**Application Procedure:**

The Governor, Governor's Authorized Representative, or Indian tribal government may request a fire management assistance declaration through the FEMA Regional Administrator. To expedite the request, the State or Indian tribal government may submit a telephone request to the Regional Administrator, promptly followed by a confirming message or letter. The Assistant Administrator of the Disaster Assistance Directorate, shall render a decision on the State's request and notify the Regional Administrator of this decision. This decision may be relayed by telephone, to be followed by a written determination.

**Award Procedure:**

None.

**Deadlines:**

Requests for fire management assistance declarations must be submitted while a fire is burning uncontrolled and threatens such destruction as would constitute a major disaster.

**Range of Approval/Disapproval Time:**

From 1 hour to 72 hours.

**Appeals:**

States have the recourse to two types of appeals under the Fire Management Assistance Grant Program. Under the first type of appeal, a Governor, Governor's Authorized Representative, or Indian tribal government may appeal a denial of its request for a fire management assistance declaration. The State/Indian tribal government should submit this one-time request for reconsideration in writing, with additional information, to the Assistant Administrator of the Disaster Assistance Directorate through the Regional Administrator. The appeal must be submitted within 30 days of the date of the letter denying the State's/Indian tribal government's request. The Assistant Administrator will render the final determination on this type of appeal within 90 days of receipt of the appeal or receipt of the additional information requested. The Assistant Administrator may extend the 30-day period provided that the Governor, the Governor's Authorized Representative, or Indian tribal government submits a written request for a time extension within the 30-day period. The Assistant Administrator will evaluate the need for an extension based on the reasons cited in the request and either approve or deny the request for an extension. Under the second type of appeal, an applicant or subgrantee may appeal any determination FEMA makes under an approved fire management assistance declaration through a two level appeal process. Appellants must file appeals within 60 days after receipt of a notice of the action that is being appealed. The Grantee will review and forward appeals from an applicant or subgrantee, with a written recommendation, to the Regional Administrator within 60 days of receipt. The Regional Administrator will render a determination on first appeals for fire management assistance grant-related decisions within 90 days following receipt of the appeal or requested additional information. In the event the Regional Administrator denies the appeal, the applicant may submit a second-level appeal to the Assistant Administrator of the Disaster Assistance Directorate. Within 90 days following receipt of a second appeal, the Assistant Administrator, will notify the grantee in writing of the disposition of the appeal or of the need for additional information. If the decision is to grant the appeal, the Regional Administrator will take appropriate implementing action. The decision of the Assistant Administrator at the second appeal level shall be the final administrative decision of FEMA.

**Renewals:**

None.

**Formula and Matching Requirements:**

Fire Management Assistance Grants may be available to States on a 75 percent Federal/25 percent nonfederal cost-sharing basis when we determine that the State's application demonstrates either of the following: total eligible costs for the declared fire meet or exceed the individual fire cost threshold or total costs of all declared and non-declared fires in a given calendar year meet the cumulative

fire cost threshold. The individual fire cost threshold for a State is the greater of \$100,000 or five percent x \$1.22 x state population. The cumulative fire cost threshold for a State is the greater of \$500,000 or three times the five percent x \$1.22 x State population. Both formulas are adjusted annually for inflation using the Consumer Price Index for All Urban Consumers published annually by the Department of Labor.

**Length and Time Phasing of Assistance:**

The time interval for which a declared fire occurs is the incident period. Generally costs must be incurred during the incident period to be considered eligible. Pre-positioning of resources may be approved for Federal funding up to a maximum of 21 days before a declared fire. Mobilization and demobilization also occur outside the incident period and are eligible for Federal funding. Temporary repair work must be completed within 30 days of the close of the incident period for the declared fire.

**Reports:**

Within 90 days of the Performance Period expiration date, the State must submit a Financial Status Report (FEMA Form 20-10) which reports all costs incurred within the incident period and all administrative costs incurred within the performance period. The performance period, defined on the SF-424, may be 9 months from the close of the incident period and may be extended for an additional 3 months by the Regional Administrator. During the performance period the Grantee will submit the subgrants, which document eligible costs; FEMA will review the eligibility of costs, and process, obligate, and close-out the grant.

**Audits:**

In accordance with the provisions of OMB Circular A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Nonprofit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards (or receive property, or a combination of both, within the fiscal year) will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular A-133. These audits are due to the cognizant Federal agency, submitted through the Federal Audit Clearinghouse, not later than 9 months after the end of the grantees fiscal year.

**Records:**

Grant records shall be retained for a period of 3 years from the day the recipient submits its final expenditure report. If any litigation, claim, negotiation, audit, or other action involving the records has been started before the expiration of the 3-year period, the records must be retained until completion of the action and resolution of all issues which arise from it, or until the end of the regular 3-year period, whichever is later. Grant records include financial and program/progress reports, support documents, statistical records, and other documents that support the activity and/or expenditure of the recipient or sub-recipient under the award.

(PDM)

**FEDERAL AGENCY:**

DEPARTMENT OF HOMELAND SECURITY

**AUTHORIZATION:**

Robert T. Stafford Disaster Relief and Emergency Assistance Act, Section 203, 42 U.S.C. 5121-5206, as amended by Section 102 of the Disaster Mitigation Act of 2000.

**OBJECTIVES:**

To provide States and communities with a much needed source of pre-disaster mitigation funding for cost-effective hazard mitigation activities that are part of a comprehensive mitigation program, and that reduce injuries, loss of life, and damage and destruction of property.

**TYPES OF ASSISTANCE:**

Project Grants.

**USES AND USE RESTRICTIONS:**

States are encouraged to use grants to implement a sustained pre-disaster hazard mitigation program to reduce risk to the population, the costs and disruption to individuals and businesses caused by severe property damage, and the ever-growing cost to all taxpayers of Federal disaster relief efforts. The program is similar to both the Flood Mitigation Assistance (FMA) Program and the Hazard Mitigation Grant Program (HMGP) in that there is an emphasis on "brick and mortar" mitigation projects and that State and local mitigation plans are required prior to approval of mitigation project grants. Allowable costs will be governed by 44 CFR Part 13, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments and OMB Circular A-87, Cost Principles for State, Local, and Indian Tribal Governments.

**Applicant Eligibility:**

Any State, including the District of Columbia, the U.S. Virgin Islands, the Commonwealth of Puerto Rico, Guam, American Samoa, the Trust Territories of the Pacific Islands, and the Mariana Islands, is eligible as well as Indian tribal governments.

**Beneficiary Eligibility:**

Grantee eligibility. State and Indian tribal governments are eligible to apply for assistance as a grantee under the PDM program. Sub-grantee eligibility. Local governments and Indian tribal governments are eligible to apply to the grantee for assistance as a sub-grantee under the PDM program. In order for floodprone communities to receive funds, applicants must be participating in the National Flood Insurance Program (if they have been mapped through the NFIP) and must be in good standing (not on probation or suspension).

**Credentials/Documentation:**

Grant awards will be determined in accordance with OMB Circulars No. A-102, Grants and Cooperative Agreements with State and Local Governments and A-87, Cost Principles for State, Local and Indian Tribal Governments.

**Preapplication Coordination:**

FEMA will allocate the PDM funds annually to each FEMA Region for distribution among the States. FEMA will notify eligible States of the expected funding amounts prior to the beginning of each fiscal year. Local governments should consult the official designated point of contact in their State for more information on the process the State requires to be followed in applying for assistance. This program is excluded from coverage under E.O. 12372.

**Application Procedure:**

Application deadline and other information are contained in the application/program guidance.

**Award Procedure:**

Applications or plans are reviewed by DHS program and administrative staff. Any issues or concerns noted in the application will be negotiated with the successful applicant prior to the award being issued.

**Deadlines:**

Refer to announcement or application guidance for further information.

**Range of Approval/Disapproval Time:**

Refer to program guidance document.

**Appeals:**

Not applicable.

**Renewals:**

Not applicable.

**Formula and Matching Requirements:**

FEMA will contribute up to 75 percent of the cost of activities approved for funding. At least 25 percent of the total eligible costs will be provided from a nonfederal source. Grants awarded to small and impoverished communities may receive a Federal cost share of up to 90 percent of the total cost to implement eligible PDM activities. FEMA has adopted the Environmental Protection Agency's definition for a Small and Impoverished Community, which must meet all of the following criteria: it must be a community of 3,000 or fewer individuals that is identified by the State as a rural community, and is not a remote area within the corporate boundaries of a larger city; it must be economically disadvantaged, with residents having an average per capita annual income not exceeding 80 percent of national per capita income, based on best available data; it must have a local unemployment rate that exceeds by one percentage point or more, the most recently reported, average yearly national unemployment rate; and it must meet any other factors identified in the State Plan in which the community is located. All contributions, cash and in-kind, are accepted as part of the nonfederal matching share. Except as allowed by Federal statute, no other Federal grant funds can be used as a match. The following documentation is required for matching contributions: record of source of donor,

dates, rates, amounts, and deposit slips (cash contributions only). Requirements for in-kind contributions can be found in OMB Circular A-102, Common Rule, 44 CFR 13.24.

**Length and Time Phasing of Assistance:**

Refer to program guidance. Awards are subject to the Cash Management Improvement Act for payment and/or reimbursement of expenditures.

**Reports:**

Grantees are required to submit quarterly financial and performance reports. Quarterly Progress Reports must include the progress of each sub-grant award. Reports are due 30 days after the end of each quarter: Jan. 30, April 30, July 30, and Oct. 30. Final financial and performance reports are due 90 days after the expiration or termination of grant award.

**Audits:**

In accordance with the provisions of OMB Circular A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Nonprofit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards (or receive property, or a combination of both, within the fiscal year) will have a single or a program-specific audit conducted for that year. Non-federal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular A-133. These audits are due to the cognizant Federal agency, submitted through the Federal Audit Clearinghouse, not later than 9 months after the end of the grantees fiscal year.

**FEDERAL AGENCY:**

DEPARTMENT OF HOMELAND SECURITY

**AUTHORIZATION:**

The Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), 42 U.S.C. 5121 - 5206; the Departments of Veterans Affairs, Housing and Urban Development, and Independent Agencies Appropriations Act, 2000, Public Law 106-74.

**OBJECTIVES:**

The purpose of the Emergency Operations Centers program is to supplement and assist State and local efforts to improve their capabilities to respond to emergencies or disasters including any that may be caused by terrorist attacks using conventional means or Weapons of Mass Destruction (WMD). The program provides grants to the States to encourage the development of Emergency Operations Centers (EOCs) that provide flexibility, sustainability, security, survivability and interoperability. Fully capable emergency operations facilities at the State and local levels are an essential element of a comprehensive national emergency management system and are necessary to ensure continuity of operations and continuity of government in major disasters caused by any hazard.

**TYPES OF ASSISTANCE:**

Project Grants.

**USES AND USE RESTRICTIONS:**

Emergency Operations Centers funds currently available will be awarded in two phases. A Phase 1 grant of \$50,000 to each State will be used for an initial assessment of the hazards, vulnerabilities, and resultant risk to existing EOCs. If a State has already completed a vulnerability assessment of its existing State EOC, it may apply to use the funds to conduct initial assessments of local EOCs. Phase 2 grants will be used to address the most immediate EOC deficiencies nationwide.

**Applicant Eligibility:**

States are eligible to apply for the assistance under this program. For purposes of this program and consistent with the Stafford Act, 42 U.S.C. 5122(4), "State" means any State of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands. Local governments may receive assistance as subgrantees to the States in which they are located. The term "local

**Beneficiary Eligibility:**

Funding under this program is ultimately to benefit States and local governments.

An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review. Some EOC projects including physical modifications to EOCs for secure communications equipment require environmental impact assessments.

**Application Procedure:**

Emergency Operations Centers is one of several program activities funded under the 2002 Supplemental Appropriations Act for Further Recovery From and Response To Terrorist Attacks on the United States, P.L. 107-206. States can use a single application to apply for assistance from several program activities, including the EOC Phase 1 grant. EOC Phase 2 grants will be applied for separately. Grant application guidance is provided to the point of contact designated by the State chief elected official. FEMA regional personnel will work directly with the States providing technical assistance, as required, as States develop their applications. Local governments apply to their States using procedures established by the States.

**Award Procedure:**

FEMA Regional Offices notify States when awards are approved. States notify local subgrantees of the amounts of their awards.

**Deadlines:**

All eligible applicants will be notified of target dates and any applicable deadlines by way of the guidance packages provided to the State points of contact.

**Range of Approval/Disapproval Time:**

Decisions will be made and States notified within 60 days from date application is received by the FEMA Regional Office.

**Appeals:**

None.

**Renewals:**

A new application is required for each Federal fiscal year.

**Formula and Matching Requirements:**

The funds for EOCs will be awarded in two phases. Each State will be allocated a \$50,000 Phase 1 grant, which is targeted for an initial assessment of the hazards, vulnerabilities, and resultant risk to an existing EOC. Phase 1 EOC activity will be 100 percent federally funded and will require no cost share. Phase 2 EOC grants will be awarded as project grants to address the most immediate EOC deficiencies nationwide. The Phase 2 EOC grants will require a 50 percent non-Federal cost share.

**Length and Time Phasing of Assistance:**

Grants are awarded for the total dollar amount, but the release of funds is on an as needed basis. The initial performance period for non-construction grants is ordinarily one year. Longer or shorter performance periods may be negotiated depending on needs of the grantees and national program management requirements. Performance periods for EOC Phase 2 grants will be negotiated based on the requirements of each project. States are required to initiate requests for funds as close as administratively feasible to the actual disbursements for program costs.

**Reports:**

Grantees are required to submit quarterly financial and performance reports. The progress of each subgrant award will be included in the grantee's quarterly reports as required by 44 CFR 13.40 and 44 CFR 13.41. Reports are due 30 days after the end of each quarter. **OBJECTIVES:**

To assist States and local governments in supporting actions that reduce or eliminate the long-term risk of flood damage to residential properties insured under the National Flood Insurance Program (NFIP) that meet the definition of

severe repetitive loss property, and to reduce losses to the National Flood Insurance Fund (NFIF) by funding projects that result in the greatest savings to the NFIF in the shortest time period.

**TYPES OF ASSISTANCE:**

Project Grants.

**USES AND USE RESTRICTIONS:**

States, Territories, local and Federally - recognized Indian tribal governments may apply for SRL funding to reduce or eliminate the long-term risk of flood damage to residential properties insured under the NFIP that meet severe repetitive loss property eligibility criteria. Eligible activities under this program include: acquisition and relocation of at-risk structures and the conversion of property to open space; elevation of existing structures to the Base Flood Elevation (BFE) or an ABFE Advisory Base Flood Elevation (ABFE) or higher (for the SRL program Mitigation Reconstruction is only permitted when traditional elevation cannot be implemented); minor physical localized flood control projects; and dry-flood proofing (historic properties only).

**Applicant Eligibility:**

State emergency management agencies or a similar office (i.e., the office that has primary emergency management or floodplain management responsibility) of the State; District of Columbia; U.S. Virgin Islands; the Commonwealth of Puerto Rico; American Samoa; Commonwealth of the Northern Mariana Islands; Guam; and Federally-recognized Indian tribal governments. Specific information on sub-applicant eligibility, and application procedures for Federally-recognized Indian tribal governments, is provided in the SRL program guidance.

**Beneficiary Eligibility:**

SRL properties are residential properties that are covered under an NFIP flood insurance policy and: (a) that have at least 4 NFIP claim payments (including building and contents) over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) for which at least two separate claims payments (building payments only) have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. For both scenarios (a) and (b), at least two of the referenced claims must have occurred within any ten-year period, and must be greater than 10 days apart.

**Preapplication Coordination:**

DHS FEMA will identify the location of severe repetitive loss properties and furnish that information to the relevant States, Territories, local governments, and Federally-recognized Indian tribal governments. FEMA will also notify owners of severe repetitive loss properties that may be eligible to receive SRL or other FEMA mitigation assistance; that their NFIP insurance premium rates may increase upon declining offers of SRL Program mitigation assistance only (such insurance consequences do not apply to other FEMA mitigation assistance programs); and, that they have the right to appeal such premium rate increases. Further, States, Territories, local governments, and Federally-recognized Indian tribal governments will, to the best extent practicable, consult with SRL property owners to select the most appropriate mitigation activity, prior to submitting SRL grant applications. In addition, Sub-applicants must have a FEMA approved local mitigation plan in accordance with 44 CFR Part 201, by the application deadline that, at a minimum, addresses flood hazards to be eligible to receive project grant funding under the SRL program. Establishment of this program through regulation is categorically excluded from the requirement of the preparation of an environmental assessment or an environmental impact statement in accordance with 44 CFR 10.8(d)(2)(ii). This NEPA category excludes the preparation, revision, and adoption of regulations where the rule regulates to actions that qualify for other NEPA categorical exclusions in 44 CFR 10.8(d)(2). Ten percent of the total funds made available in any fiscal year will be available to States, Territories, and Federally-recognized Indian tribal governments that have at least one SRL property and that receive little or no allocation. NFIP severe repetitive loss property records are maintained and updated monthly by the FEMA Bureau and Statistical Agent. NFIP severe repetitive loss property records are protected by the Privacy Act, and are only made available to the States, Territories, local governments, and Indian tribal governments eligible to apply for SRL grants. DHS FEMA may contribute up to 75 percent of the eligible costs of activities that target SRL properties.
