TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Uses will be in the following federal program areas: The Coastal Services Center's (CSC) goal is to build leadership skills and capabilities to meet the changing needs within the coastal community. The Coastal Services Center jointly manages the Regional Ocean Partnerships (ROP) funding program with the NOAA, National Ocean Service, Office of Ocean and Coastal Resource Management Program. This grant program advances effective coastal and ocean management through regional ocean governance, including the goals for national ocean policy and comprehensive ocean planning set out in the presidents Final Recommendations of Interagency Ocean Policy Task Force, July 19, 2010. The ROPFP program supported two categories of activities: 1) implementation of a spectrum of regional ocean partnership priorities, with a focus on marine planning activities and 2) support for development and operations for Regional Ocean Partnerships (ROP). CSC manages the Gulf of Mexico Alliance grant program to engage in cooperative agreements with entities from Gulf of Mexico States to implement Action Blueprint Steps identified in the Gulf of Mexico Alliance Governors Action Plan. These projects contribute to the beneficial public outcomes associated with the five priority issues including water quality for healthy beaches and shellfish beds; wetland and coastal conservation and restoration; environmental education; identification and characterization of Gulf habitats; and nutrient reduction as well as Coastal Community Resiliency, a priority issue elevated by the Alliance since release of the Plan. The CSC Pacific Services Center (PSC), located in Honolulu, provides competitive grants through the Bay Watershed Education and Training (B-WET) Hawaii program to foster the development of innovative science programs, partnerships and products throughout the State of Hawaii, as well as support environmental education efforts that align with national and state education standards. B-WET Hawaii projects focus on providing meaningful outdoor experiences for students and professional development opportunities for teachers that target understanding earth system sciences, hazards, community resilience, and climate change. PSC manages the Coastal Resilience Networks grant program to implement activities that enhance resilience of coastal communities to natural hazard and climate risks through a regional or national network. Coastal Resilience Networks (CRest) proposals

must leverage, enhance, or create a system in which one or more coastal hazard issues can be addressed through partnerships to improve coordination and collaboration throughout the region. Partnerships must include multiple institutions, disciplines, and sectors at the local, state, and federal levels.

Extension requests will be considered by the federal program office only if the recipient has submitted all required performance reports. At least sixty days prior to the end of the award, recipients must discuss with their federal program officer expected reprogramming and extensions requests. After preliminary negotiation on proposed projects and extensions, formal written reprogramming and extension requests should be received by the federal program office 45 days prior to the end date of the award. The federal program office will not recommend approval for any retroactive extension request (received after the end date of the award). Recipients should make every effort to submit one extension request for all projects needing an extension (when possible, multiple extension requests should be avoided). With sufficient justification, the federal program office will recommend approval of a six-month extension for the first extension request. First time or cumulative extension requests for more than six months but less than 12 months, will need more compelling justification as to why the project was not completed on time or could not be completed within the first six-month extension. Although the federal program office discourages extensions of more than 12 months, the federal program office will recommend approval in cases where the funds are already obligated. Renewal of an award to increase funding or extend the period of performance is at the total discretion of the Department.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2011: The Center for Sponsored Coastal Ocean Research (CSCOR) mission is to lead the development of predictive, multi-disciplinary, regional ecosystem-scale research to support sound coastal management decisions. CSCOR is currently funding over 65 competitively awarded ongoing extramural research funding commitments to over external 44 marine science institutions. This cutting-edge research has already and will in the future benefit the management of U.S. coastal resources and increase our understanding of the coastal ocean. Projects are underway to unravel the ecology and oceanography of harmful algal blooms (HAB) and help coastal states manage HAB associated health and economic risks; detecting and assessing the extent of the hypoxic area in the Northern Gulf of Mexico and other regions; understand the effects of human impacts on coral reef ecosystems in Micronesia; the ecological effects of sea level rise; understanding the connectivity among mesophotic coral ecosystems off the Florida coast; ecosystem goal-setting in coastal waters and reefs of south Florida and the species/ecosystem effects of ocean acidification. Fiscal Year 2012: Resource managers will have access to important data to help them make informed decisions.

Strengthen resource managers scientific capacity and knowledge through activities such as providing technical advice on proposals and projects and responding rapidly to specific research questions.

Offer timely technical expertise to advise resource managers and assist them in addressing critical management issues. Fiscal Year 2013: Using mathematical models based firmly in results from monitoring and assessment, work to predict trajectories likely to be taken by various ecosystems under scenarios of global climate change and management regimes. This allows identification of future potentially threatened species and components of the ecosystem, as well

as possible outcomes of various management/conservation actions.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2011: Elkhorn Slough Tidal Marsh Restoration: Building Resilience with the Beneficial Reuse of Sediment, CA. This project will restore approximately 21 acres of salt marsh with placement of material being dredged from another project. Raising the elevation of this area will provide increased sustainability for the marsh and may also benefit several endangered species.

Riverside Ranch Restoration Project, Eureka, CA. Restoration of 356 acres of estuarine juvenile rearing habitat in the Salt River delta on the Riverside Ranch will require lowering levees, two tidal breaches, slough channel creation, construction of a setback levee, the filling of drainage ditches, and revegetation. The project will aid in the efforts to recover federally listed Coho (threatened), Chinook (threatened), and Steelhead (threatened) stocks in the Salt River watershed as well as provide habitat for tidewater goby (federally endangered), green sturgeon and Dungeness crab larval stages.

Little Oyster Creek Sanctuary on the Lower Neuse River in Pamlico Sound, Pamlico County, NC. Approximately 10 acres of oyster reef will be created using Ultra Balls and Reef Pyramids as the substrate for oyster spat settlement. This technique has not been used previously in this area. The results will be compared to the biological and economic benefits of traditional limestone mounds.

Skokomish Estuary Restoration Phase III Mason County, WA. The project will restore 330 acres of tidal/palustrine marsh complex by re-establishing historic hydrologic connectivity of a large freshwater wetland to the estuary of the Skokomish River in lower Hood Canal. Appropriately sized culverts, restoration of diverted channels and bridges will be used to achieve this goal. This will improve the native vegetation and habitat for endangered trout and other species.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

14.008 TRANSFORMATION INITIATIVE: CHOICE NEIGHBORHOODS DEMONSTRATION SMALL RESEARCH GRANT PROGRAM

FEDERAL AGENCY:

Office of Policy Development and Research, Department of Housing and Urban Development

AUTHORIZATION:

Consolidated and Further Continuing Appropriations Act, 2012, This program is approved by HUDs authority and administered under the Transformation Initiative (TI) account. , Public Law 112-55.

OBJECTIVES:

The purpose of this effort is to develop and implement small scale research projects that build upon the larger Choice Neighborhood Demonstration research project. The goal of this research program is to fund research related to Choice Neighborhoods that complements the work already being funded by HUD through the Choice baseline research project (C-CHI-01127/TO001). Since the Choice baseline research project will focus on implementation grants in Boston, Chicago, and New Orleans, applicants are encouraged to identify

research projects in other Choice Neighborhood implementation or planning grant sites. Research projects in Boston, Chicago, and New Orleans will be eligible but the applicant must demonstrate how the proposed research would complement research already planned through the Choice baseline research project.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Eligible costs include, but are not limited to, the researchers salary; assistants to work on the project; protected release time for researchers who demonstrate the need for a period of intensive research; computer software; purchase of data; transcription services, and compensation for interviews. 1. Funding will only be provided to applicants who meet the standards for eligible applicants. 2. Grant funds awarded under this program may not be used to pay for computer hardware and/or meals. 3. Funds will not be used to pay for activities outside of the scope of the NOFA.

4. Fee or profit will not be paid for work done under this program.
5. Applicants must comply with the Delinquent Federal Debt Requirement.
6. Honorariums cannot be charged against awards under this program.
7. Entities or individuals already involved in HUD-funded Choice Neighborhoods research under Tasks Order C-CH-01127/T001 cannot directly be funded.
8. Travel expenses are not an eligible cost, in order to encourage applications from researchers located in the vicinity of the Choice Neighborhoods sites. Applicants may fund travel from other sources of funding.

Applicant Eligibility:

Since one purpose of this NOFA is to broaden the community of researchers working on Choice Neighborhoods, HUD will not directly fund entities or individuals already involved in HUD-funded Choice Neighborhoods research under Task Order C-CHI-01127/T0001.

Beneficiary Eligibility:

The goal of this research program is to fund research related to Choice Neighborhoods that complements the work already being funded by HUD through the Choice baseline research project (C-CHI-01127/T0001). Since the Choice baseline research project will focus on implementation grants in Boston, Chicago, and New Orleans, applicants are encouraged to identify research projects in other Choice Neighborhood implementation or planning grant sites. Research projects in Boston, Chicago, and New Orleans will be eligible but the applicant must demonstrate how the proposed research would complement research already planned through the Choice baseline research project. 4 There are some substantial challenges in evaluating a program like Choice Neighborhoods. First, it is difficult to establish a convincing counterfactual of what would have happened to the neighborhood and its residents in the absence of the Choice Neighborhoods intervention. Second, because Choice Neighborhoods combines a variety of services and investments related to housing, education, public safety, job training, etc. it is difficult to explain why a particular approach does or doesn't work. Third, neighborhoods are dynamic; the people and businesses that participate in, or rely upon, a neighborhood are constantly changing. The Choice Neighborhoods investment may have benefits that accrue to individuals, businesses, or other entities not captured in the Choice baseline research project, which focuses on the neighborhood and the individuals living there at baseline. Applicants are encouraged to identify research that will overcome these challenges and provide clear evidence of the impact of Choice Neighborhoods. HUD is using this NOFA rather than a contract (or task order under the existing BPA) for two reasons:

1. To solicit research ideas that are related to Choice Neighborhoods, but that are not already apparent to HUD, and
2. To broaden the community of researchers working on Choice Neighborhoods. Proposals should identify research questions that will help to demonstrate the impacts of Choice Neighborhoods or to help improve the program.

Credentials/Documentation:

No Credentials or documentation are required. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

HUD reserves the right to reduce the amount of funding requested in order to fund as many highly ranked applications as possible. Additionally, if funds remain after funding the highest ranked applications, HUD may fund part of the next highest-ranking application. If an applicant turns down the award offer, HUD will make an offer to the next highest-ranking application.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

HUD does not intend to fund research that would be duplicative of work being funded through the Choice baseline research project, so applicants are advised to review HUDs RFQ R-CHI-01091, published on February 22, 2011. Specifically, see Section G Attachment 1 Initial Task Order. This is available by email from Paul.A.Joice@hud.gov.

Specific activities that can be carried out with

Community Development Block Grant (CDBG) funds include acquisition of real property; relocation; clearance and demolition; rehabilitation of residential and nonresidential structures; provision of public facilities and improvements, such as water and sewer facilities (which require reviews by the State single point of contact or a Regional Planning Agency in accordance with Executive Order 12372), streets, and neighborhood centers. Recipients may provide assistance to microenterprises or other for-profit entities when the recipient determines that such assistance is appropriate to carry out an economic development project. Community-based development organizations may carry out neighborhood revitalization, community economic development, or energy conservation activities. Each CDBG eligible activity must meet one of three national objectives: benefit low- and moderate-income persons, aid in the prevention or elimination of slums or blight, or meet other community development needs having a particular urgency that the grantee is unable to finance on its own. Recipients may only carry out eligible activities as listed in 24 CFR 570.201-207 or the statute.

Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

Recipients submit a 5-year Consolidated Plan, an annual action plan, SF Form 424, and certifications to HUD. The Consolidated Plan and annual action plan cover four major formula-distribution HUD Community development programs, including CDBG. The annual action plan must include the local community development objectives and show the proposed use of the funds. If the grantee makes a complete submission within the established deadlines, the Department will make a grant award unless a determination is made by HUD that the grantee's performance is unsatisfactory. HUD will approve the submission generally within 45 days of receipt of the annual action plan and required certifications unless a determination has been made that the grantee has failed to carry out its CDBG program in a timely manner or has failed to conform to the requirements of the statute or other applicable laws. Under such circumstances, HUD may take appropriate actions, including a reduction in the amount of the original formula-allocated grant.

14.228 COMMUNITY DEVELOPMENT BLOCK GRANTS/STATE'S PROGRAM AND NON-ENTITLEMENT GRANTS IN HAWAII

State CDBG

FEDERAL AGENCY:

Office of Community Planning and Development, Department of Housing and Urban Development

AUTHORIZATION:

Housing and Community Development Act of 1974, Title I, Section 101-122, Public Law 93-383, 88 Stat. 633, 42 U.S.C 5301-5322.

OBJECTIVES:

The primary objective of this program is the development of viable urban communities by providing decent housing, a suitable living environment, and expanding economic opportunities, principally for persons of low- and moderate-income. Each activity funded must meet one of the program's National Objectives by: Benefiting low- and moderate-income families; aiding in the prevention or elimination of slums or blight; or meeting other community development needs having a particular urgency because existing conditions pose a serious and immediate threat to the health or welfare of the community where other financial resources are not available.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

Thirty percent of funds available for distribution under each annual appropriation for the Community Development Block Grant (CDBG) program is allocated among the States and Puerto Rico (which is considered to be a state for the State CDBG program) for use in areas which are not a metropolitan city or part of an urban county (nonentitlement areas). All States except Hawaii have elected to administer these CDBG funds for areas that do not receive CDBG entitlement grants (14.218). HUD awards the formula grants to these States under the CDBG/State Program. In Hawaii, HUD awards the state's share of these funds to three non-entitlement counties. States must distribute CDBG funds to units of general local government (counties, towns, etc.) in nonentitlement areas. States develop their own programs and funding priorities. Units of general local government then carry out community development activities funded by the State. Eligible activities are directed toward neighborhood revitalization, economic development, or provision of improved community facilities and services. Specific activities that can be carried out with block grant funds include: Acquisition, rehabilitation or construction of certain public works facilities and improvements, such as streets, water and sewer facilities, neighborhood centers, recreation facilities, and other public works; demolition and clearance; rehabilitation of public and private buildings including housing; code enforcement; relocation payments and assistance; economic development; planning activities; certain public services with some restrictions; and administrative expenses. The projected use of funds must be developed to ensure that all activities will meet one of the three national objectives described under "OBJECTIVES". Communities receiving CDBG funds from a state may select subgrantees to carry out approved projects. Such subgrantees may include: Neighborhood-based nonprofit organizations; local development corporations; Small Business Investment Companies; or other nonprofit organizations serving the development needs of nonentitlement areas. Grant recipients may provide assistance to for-profit entities when the recipient determines that the provision of such assistance is appropriate to carry out an economic development project. Communities are restricted from constructing or rehabilitating public facilities for the general conduct of government and from making housing allowances or other income maintenance-type payments.

Each State may use a limited portion of its grant, subject to a matching requirement, to administer the program. Each State may also use a limited portion of its grant, with no matching requirement, to provide technical assistance to local governments and nonprofit program recipients. At least seventy percent of the funds received must benefit low and moderate income persons.

Applicant Eligibility:

Forty-nine State governments and the Commonwealth of Puerto Rico receive funds from HUD under this program. The state of Hawaii does not participate and HUD allocates the state's share of funds to the three Hawaii non-entitled counties. Funds are allocated to each state based on a statutory formula. States must distribute the funds to units of general local government in nonentitlement areas.

Beneficiary Eligibility:

The principal beneficiaries of CDBG funds are low- and moderate- income persons. For non-metropolitan areas, low- and moderate- income is generally defined as 80 percent of the median income for non-metropolitan areas of the State or of the county, whichever is higher, adjusted for family size. For eligible localities in metropolitan areas, low- and moderate-income is generally defined as 80 percent of the median income for the metropolitan area, adjusted for family size.

Credentials/Documentation:

Grantees must certify that they will comply with program requirements specified in 24 CFR Part 91. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. An environmental impact assessment is required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. States must follow the fiscal requirements contained in 24 CFR 570.489. Each state and non-entitled Hawaii county must submit a Consolidated Plan, an annual action plan and certifications to HUD. The Consolidated Plan and annual action plan cover four major formula-distribution HUD community development programs, including CDBG. The annual action plan must contain the method by which the State will distribute its CDBG funds.

Award Procedure:

HUD will provide funds after the State or non-entitled Hawaii county submits its Consolidated Plan, annual action plan and Certifications.

Deadlines:

Nov 15, 2011 to Aug 16, 2012 Consolidated Plans may be submitted between November 15 and August 16 of each fiscal year in which the grantee will administer funds.

Range of Approval/Disapproval Time:

HUD will review plan submissions for completeness and consistency with the purposes of the Act, within 45 days of receipt from a grantee.

Appeals:

The procedure is described in regulations (24 CFR Part 570 Subpart I for states and 24 CFR Part 570 Subpart O for non-entitlement counties in Hawaii).

Renewals:

Not Applicable.

Formula and Matching Requirements:

Statutory Formula: Title 24, Chapter V, Part 570, Subpart A, Public Law 93-383.

Matching Requirements: For state administration of the program, after an initial allowance of \$100,000 with no match, states may take an additional allowance of up to 3% of the grant amount but must match such expenditures on a dollar for dollar basis. There is no matching requirement for the non-entitlement counties in Hawaii.

This program does not have MOE requirements.

Length and Time Phasing of Assistance:

Assistance is provided to States and non-entitlement counties in Hawaii on an

annual basis. Individual States may impose time limitations on the implementation of grants to recipients. Method of awarding/releasing assistance: by letter of credit.

14.314 ASSISTED LIVING CONVERSION FOR ELIGIBLE MULTIFAMILY HOUSING PROJECTS

(ALCP)

FEDERAL AGENCY:

Office of Housing-Federal Housing Commissioner, Department of Housing and Urban Development

AUTHORIZATION:

Section 202b of the Housing Act of 1959, as amended by the Section 202 Supportive Housing for the Elderly Act of 2010 (Public Law 111-372), 12 U.S.C 1701q-2.

OBJECTIVES:

To preserve the current elderly housing stock by converting units with a grant into Assisted Living Facilities (ALFs) or Service-Enriched Housing (SEH) for the frail elderly aging in place, as defined in Section 232(B)(6) of the National Housing Act and 202(k). The program is expected to promote aging in place and prevent premature institutionalization of the target population.

TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

Assisted living facilities (ALFs) are designed to accommodate frail elderly persons and people with disabilities who can live independently but need assistance with activities of daily living (that is, assistance with eating, bathing, grooming, dressing and home management activities.) ALFs must provide support services such as personal care, transportation, meals, housekeeping, and laundry. Service-Enriched Housing (SEH) is housing that is designed to accommodate frail elderly persons or elderly persons with service needs who are aging in place. Residents are able to live independently but need assistance with activities of daily living comparable to services typically provided in a licensed assisted living facility, such as healthcare-related services. These supportive services must be available through a licensed or certified third party service provider. Typical funding will cover basic physical conversion of existing project units, as well as related common and services space. The ALCP provides funding for the physical costs of converting some or all of the units of an eligible development into an ALF or SEH, including unit configuration, common and services space and any necessary remodeling, consistent with HUD or the State's statute/regulations (whichever is more stringent). There must be sufficient community space to accommodate a central kitchen or dining facility, lounges, recreation and other multiple-areas available to all residents of the project, or office/staff spaces in the ALF or SEH. Funding for the supportive services must be provided by the owners, either directly or through a third party.

Applicant Eligibility:

Only private nonprofit owners of eligible multifamily assisted housing developments specified in Section 683(2)(B), (C), (D), (E), and (F) (Section 202 projects for the elderly, Rural Housing Section 515 projects receiving Section 8 rental assistance, projects receiving project-based rental assistance under Section 8, projects financed by a below-market interest rate loan or mortgage insured under Section 221(d)(3) of the Housing Act, or housing financed under Section 236 of the National Housing Act) that have been in occupancy for at least five years are eligible for funding. To be eligible, owners must meet the following criteria: (1) Must be in compliance with Loan Agreement, Capital Advance Agreement, Regulatory Agreement, Housing Assistance Payment Contract, Project Rental Assistance Contract, Rent Supplement or LMSA Contract, or any other HUD grant or contract document; (2) Must be in compliance with all fair housing and civil rights laws, statutes, regulations, and executive orders as enumerated in 24 CFR 5.105(a).

Beneficiary Eligibility:

Eligible residents who meet the admissions/discharge requirements as established for assisted living by State and local licensing, or HUD frailty requirements under 24 CFR 891.205 if more stringent. The residents must be able to live independently but may need assistance with activities of daily living (that is, assistance with eating, bathing, grooming, dressing and home management activities).

Service-Enriched Housing is designed to accommodate elderly persons and people with disabilities with a functional limitation, meaning residents who are unable to perform at least one activity of daily living.

Credentials/Documentation:

Assisted Living Facilities must be licensed and regulated by the State (or if there is no State law providing such licensing and regulation, by the municipality or other subdivision in which the facility is located). For Service-Enriched Housing, supportive services must be available through a

licensed or certified third party service provider. For both ALF and SEH, the application must include a firm commitment for the supportive services to be offered at the ALF or SEH as part of the application. The Notice of Funding Availability contains all the necessary information for applicants to apply for the grant. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Applicants applying to convert to an ALF must have contacted the State licensing agency for such a project to determine if the proposed project will meet state licensing requirements. The Supportive Service Plan (SSP) is required for the ALF and SEH, the plan should include services and coordination of the supportive services which will be offered in the ALF or SEH must be developed and submitted to the appropriate State or local organization. Applicants must comply with all applicable statutory requirements and statutory requirements under Section 232(b)(6) prior to application submission. Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Applications are only accepted in response to the Notice of Funding Availability which is published in the Federal Register each fiscal year. Applicants responding to the NOFA should ensure that their application is complete before submitting it to HUD. Applications must be submitted in accordance with requirements of the NOFA. All applications received by the deadline will be screened for curable deficiencies. After the completeness review, HUD reviews the application to determine whether it meets the threshold requirements. Only those applications that meet all of the threshold requirements will be eligible to receive an award. Applications submitted in response to the NOFA that are eligible, pass threshold and have a total score of 75 points (or more) are eligible for ranking and selection.

Award Procedure:

Applications are reviewed and selected for funding within the funding allocation of the geographical Hub area. At the end of the technical review, all applications will be either rated or technically rejected. If an application meets all program eligibility requirements after completion of the technical review, it will be rated according to the rating selection factors. The number of points that an application receives will depend on the extent to which the application is responsive to the information requested in the selection criteria. The maximum number of points an application may receive under this program is 102.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

14.534 STRONG CITIES STRONG COMMUNITIES (SC2) NATIONAL RESOURCE NETWORK

FEDERAL AGENCY:

Office of Policy Development and Research, Department of Housing and Urban Development

AUTHORIZATION:

Consolidated and Further Continuing Appropriations Act, 2012: This program is approved by HUDs authority and administered under the Transformation Initiative (TI) account. , Public Law 112-55.

OBJECTIVES:

The purpose of the SC2 National Resource Network is to help strengthen local communities and spur economic growth. The SC2 Network will provide economically distressed communities with short-term technical assistance in basic operational areas as well as programmatic issues, dictated by local need. In addition, the SC2 Network will aggregate public and private resources to serve a wide range of governments and connect them through a peer-to-peer learning network.

The objectives of the programs are as follows:

Provide communities facing long-term economic challenges with easily accessible and comprehensive technical assistance that can help retool them for future economic growth;

Build capacity in distressed communities by connecting them with philanthropic organizations, non profits, public and private sector entities to facilitate long-term partnerships and economic investments;

Develop a set of best practices and policy recommendations that can be disseminated and shared across all communities facing similar economic challenges;

Improve the alignment of federal resources as well as strengthen federal and local partnerships.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Eligible costs include: salaries for program staff and technical experts, traveling expenses, expenses related to the eligible activities in the NOFA such as providing operational assessments, developing the clearinghouse and Peer to Peer network, tracking performance metrics, building Local Resource Networks, and evaluating the program. 1) Funding will only be provided to applicants who meet the standards for eligible applicants.

2) Funds will not be used to pay for activities outside the scope of the NOFA.

3) Grant funds awarded under this program may not be used to pay for computer hardware.

4) Honorariums cannot be charged against awards under this program.

5) An organization may not provide assistance to itself.

6) An organization may not provide assistance to another organization with which it contracts or sub-awards funds to carry out activities under this award.

7) No fee or profit may be paid to any recipient or contractor of an award under this NOFA.

8) Contractors providing technical assistance/capacity building services/products are not consultants and thus are not subject to the salary provisions applicable to consultants in the FY2012 General Section. HUD will determine whether the salary rates are reasonable and customary for the skill set provided and the area(s) being served.

Applicant Eligibility:

The grantee of the SC2 Network, will have five categories of eligible activities:

1. Structure Development: Develop the SC2 Network structure that would include a team of expert technical service providers (pro bono or paid) that represent the breadth of relevant expertise needed to address the long-term economic challenges of communities. This responsibility also includes developing a Peer-to-Peer network to share lessons learned and best practices.

2. Engagement: Develop the engagement strategy for how the network will assist economically-distressed cities. This responsibility also includes systematizing how cities are engaged, prioritizing the level of assistance for each city, and matching the level of assistance based on the needs of each city.

3. Capacity building: Increase the capacity of participating governments in the area of intervention, not just to provide a one-time service that they cannot replicate. This responsibility might also include establishing a Local Resource Network (LRN) for communities with potential private and philanthropic resources to sustain local capacity building over a longer term.

4. Evaluation: Carefully document and evaluate interventions to build a series of best practice strategies that can benefit places with similar challenges, and develop forums for sharing this knowledge.

5. Policy Recommendation: Identify for the SC2 Council how federal policy changes could help local governments better achieve their economic development visions, and other policies, systems, and practices that support holistic and sustainable economic development.

In addition to these five categories, the Administrator will also work with the

other three components of SC2 (described under I.A.1. SC2 Components), as well as the SC2 Council (described under I.A.2 Executive Order) to meet the broad goals and objectives of the initiative.

Beneficiary Eligibility:

The grantee must also have a demonstrated ability to obtain other community, private sector, and federal resources that can be combined with HUDs program resources to achieve program objectives. In general, an ideal Administrator will have most or all of the following characteristics:

Place-based: The selected applicant, buoyed by support of agencies and the philanthropic community, will have experience working in many distressed communities, and will be able to match these communities to relevant technical experts quickly and efficiently.

Resource-maximizing: The selected applicant will have a national scope and will be well-accustomed to the challenge of distributing scarce resources across communities with distinct needs. The ability to effectively evaluate requests for service will be paramount to using the SC2 Networks resources to their greatest potential.

Nimble, responsive, and service-oriented: The SC2 Network will be designed to provide very timely assistance that can thoroughly understand and adapt to needs on the ground. Therefore, the selected applicant will have, or can quickly pull together a deep team of technical experts, and, when necessary, develop partnerships between experts on issues that require multiple skill sets and excellent customer service skills.

Objective: In some cases, procedures or regulations may be a barrier to local capacity building. The selected applicant will facilitate local partnering and provide honest feedback to HUD and the other SC2 agencies for relieving burdens on local governments, while retaining accountability for results.

Sustainable: The selected Administrator will have the nonprofit management expertise required to make the SC2 Network financially sustainable, and as an outside entity, can attract philanthropic funding and leverage HUDs investment several times over.

(Appropriations Act), provided a total of \$100,000,000 to HUD for a Sustainable Communities Initiative to improve regional planning efforts that integrate housing and transportation decisions, and increase the capacity of communities to modernize land use and zoning plans. Of that total, \$70,000,000 was available for the Sustainable Communities Regional Planning Grant Program, and \$30,000,000 was available for the Challenge Planning Grant Program. , Public Law 112-10, Stat. 159, XII U.S.C 2240.

OBJECTIVES:

The Sustainable Communities Regional Planning Grant Program (Program) supports metropolitan and multijurisdictional planning efforts that integrate housing, land use, economic and workforce development, transportation, and infrastructure investments in a manner that empowers jurisdictions to consider the interdependent challenges of: (1) economic competitiveness and revitalization; (2) social equity, inclusion, and access to opportunity; (3) energy use and climate change; and (4) public health and environmental impact. The Program places a priority on investing in partnerships, including nontraditional partnerships (e.g., arts and culture, recreation, public health, food systems, regional planning agencies and public education entities) that translate the Livability Principles (Section I.C.1) into strategies that direct long-term development and reinvestment, demonstrate a commitment to addressing issues of regional significance, use data to set and monitor progress toward performance goals, and engage stakeholders and residents in meaningful decision-making roles.

Funding from this Program will support the development and implementation of Regional Plans for Sustainable Development (RPSD) that:

- a. Identify affordable housing, transportation, water infrastructure, economic development, land use planning, environmental conservation, energy systems, open space, and other infrastructure priorities for the region;
- b. Clearly define a single, integrated plan for regional development that addresses potential population growth or decline over a minimum 20-year time frame, sets appropriate 3- to 5-year benchmark performance targets, and delineates strategies to meet established performance goals;
- c. Establish performance goals and measures that are, at a minimum, consistent with the Sustainability Partnerships Livability Principles;
- d. Use geo-coded data sets and other metrics in developing, implementing, monitoring, and assessing the performance goals of various reinvestment scenarios;

14.704 COMMUNITY CHALLENGE PLANNING GRANTS AND THE DEPARTMENT OF TRANSPORTATION'S TIGER II PLANNING GRANTS

Community Challenge Planning Grant Program

FEDERAL AGENCY:

Office of Sustainable Housing and Community, Department of Housing and Urban Development

AUTHORIZATION:

Department of Defense and Full-Year Continuing Appropriations Act, 2011, Executive Order The Department of Defense and Full-Year Continuing Appropriations Act, 2011 (Public Law 112-10, approved April 15, 2011) (Appropriations Act), provided a total of \$100,000,000 to HUD for a Sustainable Communities Initiative to improve regional planning efforts that integrate housing and transportation decisions, and increase the capacity to improve land use and zoning. Of that total, \$70,000,000 was available for the Sustainable Communities Regional Planning Grant Program, and \$30,000,000 was available for the Community Challenge Planning Grant Program. , Title 12, Section 2240, Public Law 112-10, Stat. 158-159.

OBJECTIVES:

The Department of Housing and Urban Developments ("HUD") Community Challenge Planning Grant Program ("Program") fosters reform and reduces barriers to achieving affordable, economically vital, and sustainable communities. Such efforts may include amending or replacing local master plans, zoning codes, and building codes, either on a jurisdiction-wide basis or in a specific neighborhood, district, corridor, or sector to promote mixed-use development, affordable housing, the reuse of older buildings and structures for new purposes, and similar activities with the goal of promoting sustainability at the local or neighborhood level. This Program also supports the development of affordable housing through the development and adoption of inclusionary zoning ordinances and other activities to support plan implementation. The Community Challenge Planning Grant Program differs from HUDs Sustainable Communities Regional Planning Grant Program. While the latter program is designed to support regional planning efforts, the Community Challenge Planning Grant Program focuses on individual jurisdictions and more localized planning.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2011: The Parks, Trails and Natural Areas category includes the following funded and in progress projects. The Camp Success Preservation and Enhancement Project in White Pine County, Nevada, in existence since the 1940s, will provide continued use of the Camp and enhance the recreational and environmental education opportunities for youth and families in eastern Nevada. The existing outhouses will be removed and replaced with vault toilets. Shower facilities and ADA accessible outdoor living area near the lodge will upgrade and preserve this partnership facility. The land is owned by the U.S. Forest Service with the Camp itself being owned by White Pine County, Nevada. With the recent 20-year permit renewal by U.S. Forest Service the camp will continue to enhance the areas comprehensive economic development strategy while providing recreational and outdoor opportunities. The Warm Springs Natural Area Project in Clark County, Nevada is regionally significant as it contains more than 20 perennial springs that form the headquarters of the Muddy River. The site contains numerous landscapes including Mojave desert, riparian forest, mesquite woodlands, and alkali meadows through which 3.8 miles of the Muddy River wanders. These resources provide ideal habitat for a number of listed, threatened and sensitive species, including the endangered Moapa dace and the Southwestern Willow Flycatcher. The Doolittle Park Family Area Renovation Project in Clark County, Nevada will reinvigorate this older park space, encouraging sustainable living in the city's core. Heavy use in West Las Vegas, Nevada has resulted in deterioration of this family park. More modern playground equipment and relocation of playground equipment for ages two to five years old will provide a safer play area for children. Increasing tree canopy, improving the park entry point, and adding a senior citizens activity area will improve the family environment of this heavily utilized local park. Horseshoe pits, new BBQs, new sidewalks, new grass and irrigation system, a medium ramada, and new lighting, will complete the much needed renovations. Fiscal Year 2012: No current data available. Fiscal Year 2013: No current data available.

15.252 ABANDONED MINE LAND RECLAMATION (AMLR) PROGRAM**FEDERAL AGENCY:**

Office of Surface Mining, Department of the Interior

AUTHORIZATION:

Surface Mining Control and Reclamation Act of 1977, Public Law 95-87, 91 Stat. 445-532.

OBJECTIVES:

To protect the public, health, safety and general welfare, and restore land, water and environmental resources affected by coal and noncoal mining practices that occurred prior to August 3, 1977.

TYPES OF ASSISTANCE:

FORMULA GRANTS; PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grants support the operation of an approved State or Tribal Abandoned Mine Land (AML) reclamation program. Approved programs use grant funds for mine site reclamation projects on eligible lands, which are lands and waters mined or affected by coal mining processes that occurred prior to August 3, 1977 (as well as certain post-1977 and noncoal mining activities). Grants also support project administration. Grants may also include funding for

AML-related activities including: abating emergency mining-related dangers to public health and safety; restoring water supply facilities impacted by coal mining; setting aside funds in a trust account to fund future acid mine drainage treatment; and developing a self-sustaining State subsidence insurance program. Approved programs which have completed coal mine reclamation in their state or on lands within their jurisdiction may use funds for other activities as authorized in SMCRA. Please contact the headquarters office more information.

Applicant Eligibility:

The program is restricted to States with (1) an approved coal mining regulatory program, (2) lands eligible for reclamation, and (3) active coal mining operations within their borders that are paying coal reclamation fees into the Abandoned Mine Reclamation Fund; and to federally-recognized Indian Tribes with (1) eligible lands, and (2) active mining operations paying fees into the Fund. An eligible State or Tribe may submit a State reclamation plan to the Office of Surface Mining (OSM) for approval.

Beneficiary Eligibility:

Coal field citizens and the general public benefit from reduced exposure to safety and health risks from abandoned mine lands.

Credentials/Documentation:

A State or Tribal Indian reclamation plan must be approved by the Assistant Secretary for Land and Minerals Management. AML grants to approved projects must be approved by an authorized official of the appropriate OSM Regional or Field Office. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Environmental clearance actions for each individual reclamation project are completed as part of the recipient's request for OSM's approval of the Authorization to proceed, which is the point of federal action for that reclamation project. An environmental impact statement is required for this program. An environmental impact assessment is required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." The forms may be obtained and the application is to be submitted through www.Grants.gov. Grant applications may also be submitted to the applicable OSM Regional/Field Office. Please contact the appropriate OSM Regional Office for assistance.

Award Procedure:

The Regional Office should act upon a grant application within 60 days of submittal of a complete application. EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2011: In 2011, OSM awarded \$64,108 to Trout Unlimited, which represents 14% of the total project cost of \$456,108. The purpose of the project is to construct three passive treatment systems to treat a series of abandoned mine drainage (AMD) discharges that flow into Muddy Run, a tributary to the South Fork of Tangascootack Creek in Clinton County Pennsylvania. Work has been underway for over a decade to treat sources of AMD into South Fork of Tangascootack Creek. Three other treatment systems are already in operation in the watershed. The North Fork is a healthy stream supporting trout populations. With this project, the aquatic habitat of the South Fork of Tangascootack will be restored, allowing its removal from EPA's 303(d) list of impaired streams. Other funding partners are Pennsylvania's Growing Greener program (\$380,000) and Trout Unlimited (\$12,000). The Clinton County Conservation District will maintain the treatment systems. All applicable Federal and State clearances and permits must be secured. The project should propose to use proven or innovative technology that has a high probability of success and produce tangible results, e.g., fishery restored, stream miles improved, educational and community benefits, pollutants removed from the streams. Funds must be used for the construction phase of a project and there must be demonstrated public support for the project. 15.253 Not-for-Profit AMD Reclamation

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2011: Western Hardrock Watershed Team: OSM/VISTA member with the Coal Creek Watershed Coalition (CCWC) coordinated a stream bank restoration field day. The event was a collaborative effort among the CCWC, the Crested Butte Land Trust (CBLT), and the Natural Resource Conservation Service. The event consisted of installing multiple bioengineering practices to prevent continued erosion of Coal Creek. There was a large turnout as everyone learned how to install tree revetments, willow waddles, and plant willow sprouts. As highly visible area that is seen as people drive in and out of town, it was aesthetically important to the community to have this event.

OSM/VISTA member with the Gila Resources Information Project (GRIP), in Silver City, NM, hit the ground running. The OSM/VISTA lead the Silver City Watershed Keepers (SCWK) volunteer monitoring event during the first week of service. A OSM/VISTA alumnus started the water quality monitoring group in July of 2010 with the intent of bringing greater awareness to the community about issues affecting the San Vicente Creek and protecting the community's local resources. During February's monitoring event, ten volunteers took

samples at three sites along the San Vicente Creek. Water testing on San Vicente Creek only occurs once every seven years by the NM Environment Department and with the legacy of abandoned mines in the watershed it's more important to test the water more frequently. Community volunteers are the perfect way to meet this need. A Silver City Watershed Keeper (SCWK) volunteer, had this to say about the event: "I was very pleased to participate in the Silver City Watershed Keeper training and thankful for the VISTA volunteers who helped make that happen. It's our community to keep wholesome and the watershed keepers program provides citizens the means to help accomplish that."

Appalachian Coal Country Team

An OSM/VISTA member working with the Upper Tennessee River Roundtable (VA) secured a \$250,000 grant from the Virginia Department of Conservation and Recreation Water Quality Improvement Fund. The grant will be used to implement Abandoned Mine Land reclamation projects, high impact storm water management, and public rain barrel workshops. These projects will reduce sediment, phosphorus and nitrogen loads and improve riparian conditions and stream habitat in local waterways.

OSM/VISTA for the Northfork Watershed Project (WV), invited volunteers on water monitoring trips titled "Coke ovens!" The OSM/VISTA member and volunteers have taken to riding bikes along the 3-mile stretch of river that they monitor each month, stopping to conduct tests or examine the 100-year old coke ovens that embellish their ride. The ride also features a stop at a scenic waterfall in Douglas, a ghost town with only 6 inhabitants.

Another OSM/VISTA member and Pathfinders of Perry County (KY) collaborated with local foundations, schools, and corporations to create Pathfinders kids, a youth hiking program that is engaging local students in healthy outdoor activities while fostering an appreciation for the natural environment. In December 2010, in partnership with Hazard Community and Technical College, the OSM/VISTA member secured a grant of \$10,000 from the Community Foundation of Hazard and Perry County to jumpstart the program which began in June 2011 with a two week camp for 30 children ages 6-13 and 10 teen mentors. During the first week, teen leaders became certified in CPR and provided training in plant identification, extensive field first aid training, general counseling, gentle discipline, and how to provide a safe hiking experience for school-age children. During the second week, children were lead on various hikes, educated about local water quality issues, and encouraged to write journal entries about their experiences. The children will participate in monthly hiking trips for the next 12 months.

An OSM/VISTA member with the Crooked Creek Watershed Association and Evergreen Conservancy helped create interpretive signs for Waterworks Park, a wetlands and recreation area located on the site of an abandoned mine treatment system, remediated wetlands, and kayak launch area. Under the direction of the Indiana County Conservation District, OSM/VISTA worked with an Indiana University of PA geography graduate student to create four panel signs on local mining history, AMD remediation, wetlands flora and fauna, and a map of the kayak water trail in the local creek. The OSM/VISTA member stated, "I am excited that I will contribute a physical installment in the area and enhance a local park made from a previous eyesore." The signs were completed and installed in the park at the end of the summer for visitors. "It is a great accomplishment to see my work in writing in a public setting." Fiscal Year 2012: No Current Data Available Fiscal Year 2013: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

Each proposed watershed project must clearly enhance the sustainability of the watershed organization and must contribute directly to the remediation of acid mine drainage. Candidates must be able to organize their work, work well with community groups and on their own, have an understanding of acid mine drainage remediation and the national Clean Streams program, and write well.

15.255 SCIENCE AND TECHNOLOGY PROJECTS RELATED TO COAL MINING AND RECLAMATION

FEDERAL AGENCY:

Office of Surface Mining, Department of the Interior

AUTHORIZATION:

Surface Mining Control and Reclamation Act of 1977 (SMCRA), Public Law 95-87; Federal Grant and Cooperative Agreement Act of 1977, Public Law 95-224.

OBJECTIVES:

The Office of Surface Mining Reclamation and Enforcement (OSM) Science Technology Grants Program supports three separate but related efforts:

(1) projects that develop and demonstrate improved technologies to address public safety and environmental issues related to the mining of coal and reclamation of the lands affected after mining (applied science projects),

(2) projects that encourage efforts to collect, preserve and convert into digital format, maps of the underground mines and other relevant geologic, hydrologic and biologic data that provide valuable information regarding: miner safety; mine pool evaluation; mine subsidence investigation, and protection of the public and the environment from the adverse effects of underground coal mining (underground mine map projects); and,

(3) projects that convert into digital form, mine permit data and maps related to evaluating the impacts of coal mining so that the information may be used in a geographic information system (GIS) accessible by all Federal, state, and tribal agencies for assessing impacts of coal mining and reclamation on the environment (data conversion projects). Data conversion projects may also convert existing legacy databases to modern database software, and/or provide hardware and programming assistance for states to transition to managing and using this digital data.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Projects must focus on issues related to mining in the United States and its territories. Funding will be limited to projects that can be completed without additional funding from the Office of Surface Mining (OSM). PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2011: OSM Applied Science Projects completed in FY 2011 provided final reports on new science and technology related to: (1) CO2 Flux Field Delineation for Construction on Reclaimed Mine Land; (2) Hardwood Tree Growth Using the Forestry Reclamation Approach in West Virginia; (3) Assessment of Environmental Impacts in Coal Mining Sites Using a Predictive GIS-based Environmental Mining Decision Support System (EMDSS); and (4) Field Investigation of Best Practices for Steep-Slope Mine Reclamation Employing the Forestry Reclamation Approach.

The Underground Mine Map program funded 21 projects in FY 2011 from six states in the Appalachian region, four states from the Mid-Continent Region, and four states from the Western Region. Projects funded in previous years have made thousands of previously unreachable mine maps available to the public in digital form, thereby increasing protection of the public and miner safety, environmental quality, and property from adverse effects of underground coal mines.

Data Conversion Projects were first funded under this program in FY 2011. These projects will result in high quality digital data sets related to coal mines permitted under SMCRA that Federal agencies, states and tribes may use for coordinated permitting and inspection activities. The digital data will be suitable for populating national geographic information systems like OSM's prototype GeoMine. AUTHORIZATION:

43 U.S.C. 1345 (e); 43 U.S.C. 1346 Section 20.

OBJECTIVES:

The Bureau of Ocean Energy Management (BOEM) provides major economic and energy benefits on a national and local level to the taxpayers, states and the American Indian community. The BOEM oversees the exploration and development of oil, natural gas and other minerals and renewable energy alternatives on the nations outer continental shelf. BOEM continues to look for better ways to serve the American people and to ensure that the nation receives the best value for its resources now and into the future. The program not only supports decisions made within the Department of Interior, but also provides coastal states and local governments with the information necessary to ensure that all stages of offshore energy and mineral activities are conducted in a manner to protect both the human and natural environments. Outer Continental Shelf Lands Act (OCSLA) Section 1346 mandates the conduct of environmental and socioeconomic studies needed for the assessment and management of environmental impacts on the human, marine, and coastal environments which may be affected by oil and gas or other mineral development. OCSLA Section 1345 authorizes the use of cooperative agreements with affected States to meet the requirements of OCSLA, including sharing of information, joint utilization of available expertise, formation of joint monitoring arrangements to carry out applicable Federal and State laws, regulations, and stipulations relevant to outer continental shelf operations both onshore and offshore. The purpose of the Alaska Coastal Marine Institute is to use highly qualified scientific expertise at local levels to collect and disseminate environmental information needed for OCS oil and gas and marine minerals decisions; address local and regional OCS-related environmental and resource issues of mutual interest; and strengthen the BOEM-State partnership in addressing OCS oil and gas and marine minerals information needs.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

The Environmental Studies Program allocates up to \$750,000 per year for cooperative research at the University of Alaska. The University of Alaska invites proposals that are reviewed by a Technical Steering Committee including the University, State of Alaska, and BOEM, and funds individual awards. Applications must be for scientific research projects which are within the BOEM' area of responsibility. The majority of funds are used to support research that will enhance understanding of long-term effects of oil and gas,

and marine minerals projects. Funds can also be used for attendance at national conferences for the dissemination of project results. Funds are not normally used for capitalization.

Applicant Eligibility:

University of Alaska may make application for support by a named principal investigator. Non-UA scientists may participate in collaboration with a UA principal investigator.

Beneficiary Eligibility:

Research scientists, Federal, State and local decision-makers, Native American Organizations, and the general public will ultimately benefit from the program.

Credentials/Documentation:

Evidence of the applicants qualifications for performance of the proposed research including past professional publications, resumes, and lists of past projects. This program is excluded from coverage under OMB Circular No. A-87.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. OMB Circular No. A-110 applies to this program. Proposals are requested for mission-relevant research likely to provide needed information for OCS oil and gas resource management decisions. Proposals must include a full statement of work, estimated budget, and resumes. The standard SF-424 application forms required by 2 CFR Part 215.12, and the Department of the Interior Code of Federal Regulations at 43 CFR Part 12, Subpart F, or its revisions, must be used.

Award Procedure:

Awards are made on the basis of a competitive peer review of proposals by a panel consisting of government research managers and external reviewers, as appropriate. Criteria for judging proposals include mission relevance, technical merit, and the quality and appropriateness of the personnel including past performance and publication record, project management, logistics plan, safety management, permits and interagency coordination, outreach, budget/matching funds, and where appropriate, minimization of impacts. Notification of an award is issued. It is anticipated that 6-12 applications will be received and 6 awards will be granted in FY 2012.

The Bureau of Ocean Energy Management, Regulation, and Enforcement, Department of the Interior

AUTHORIZATION:

43 U.S.C. 1345 (e); 43 U.S.C. 1346 Section 20.

OBJECTIVES:

The Bureau of Ocean Energy Management (BOEM) provides major economic and energy benefits on a national and local level to the taxpayers, States and the American Indian community. The BOEM oversees the exploration and development of oil, natural gas and other minerals and renewable energy alternatives on the nations outer continental shelf. BOEM continues to look for better ways to serve the American people and to ensure that the nation receives the best value for its resources now and into the future. The program not only supports decisions made within the Department of Interior, but also provides coastal states and local governments with the information necessary to ensure that all stages of offshore energy and mineral activities are conducted in a manner to protect both the human and natural environments. Outer Continental Shelf Lands Act Section 1346 mandates the conduct of environmental and socioeconomic studies needed for the assessment and management of environmental impacts on the human, marine, and coastal environments which may be affected by oil and gas or other mineral development. OCSLA Section 1345 authorizes the use of cooperative agreements with affected States to meet the requirements of OCSLA, including sharing of information, joint utilization of available expertise, formation of joint monitoring arrangements to carry out applicable Federal and State laws, regulations, and stipulations relevant to outer continental shelf operations both onshore and offshore. The purpose of the Louisiana State University Coastal Marine Institute (CMI) is to use highly qualified scientific expertise at local levels to collect and disseminate environmental information needed for OCS oil and gas and marine minerals decisions; address local and regional OCS-related environmental and resource issues of mutual interest; and strengthen the BOEM-State partnership in addressing OCS oil and gas and marine minerals information needs.

The Bureau of Safety and Environmental Enforcement (BSEE) program provides major economic and energy benefits on a national and local level to the taxpayers and states. The Agency oversees the exploration and development of oil, natural gas and other materials and renewable energy alternatives on the Nation's outer continental shelf. BSEE continues to look for better ways to serve the American people and to ensure that the nation receives the best oversight and regulation of National resource development now and into the future. The program not only supports decisions made within the Department of the Interior, but also provides coastal states and local governments with the information necessary to ensure that all stages of offshore energy and mineral activities are conducted in a manner to protect both the human and natural environments. The Outer Continental Shelf Lands Act (OCSLA) Sections 1347 and 1348 respectively mandate the development and enforcement of regulations that protect safety, health and the environment. OCSLA Section 1345 authorizes the use of cooperative agreements with affected States to meet the requirements of OCSLA, including sharing of information, joint utilization of available expertise, formation of joint monitoring arrangements to carry out applicable Federal and State laws, regulations, and stipulations relevant to outer continental shelf operations both onshore and offshore. FOR RECOVERY ACT: American Recovery and Reinvestment Act of 2009 (ARRA) (P.L. 111-5).

OBJECTIVES:

Title XVI of Public Law 102-575, as amended (Title XVI), directs the Secretary of Interior, acting through the Commissioner, to undertake a program to identify and investigate opportunities to reclaim and reuse wastewaters and naturally impaired ground and surface water in the 17 Western States and Hawaii. Title XVI also provides authority for the Secretary to provide up to the

lesser of 25 percent of, or the Federal appropriations ceiling (typically \$20 million), for the cost of planning, design, and construction of specific water recycling projects, as well as up to 50 percent of the cost of Title XVI feasibility studies. FOR RECOVERY ACT: For ARRA funded projects and in addition to the program objectives above, the Section 3 of the ARRA states the following objectives: (1) To preserve and create jobs and promote economic recovery. (2) To assist those most impacted by the recession. (3) To provide investments needed to increase economic efficiency by spurring technological advances in science and health. (4) To invest in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits. (5) To stabilize State and local government budgets, in order to minimize and avoid reductions in essential services and counterproductive state and local tax increases.

TYPES OF ASSISTANCE:

Formula Grants (Cooperative Agreements)

USES AND USE RESTRICTIONS:

The Title XVI Program applies to reclamation, recycling, and reuse of municipal, industrial, domestic, and agricultural wastewater and to naturally impaired ground and surface waters. Through this program, Reclamation provides financial and technical assistance for feasibility studies, demonstration projects, and full-scale construction of facilities to deliver and/or treat wastewater for reuse applications. For purposes of the Title XVI Program, a water reuse project is a project (including the necessary facilities and features) that reclaims and reuses municipal, industrial, domestic, or agricultural wastewater and naturally impaired groundwater and/or surface waters. Consistent with State law, reclaimed water can be used, for a variety of purposes including, but not limited to, environmental restoration, fish and wildlife, groundwater recharge, municipal, domestic, industrial, agricultural, power generation, or recreation. Funds can be used for water treatment features where the improvement of the water quality is necessary to allow for reuse. Reclamation has general authority to participate in planning, research and demonstration of water recycling projects. Specific project authority is required for Reclamation to participate in the construction of a project.

Applicant Eligibility:

Eligible recipients of Title XVI funding are identified under the 1902 Act and include a State, regional, or local authorities; Indian tribes or tribal organizations; or other entities such as a water conservation or conservancy district, wastewater district, rural water district, all located within the 17 Western States or Hawaii. To be eligible to receive funding for construction activities, a water reclamation and reuse project must be specifically authorized under Title XVI.

Beneficiary Eligibility:

Water users, including municipal, industrial, and agricultural, that benefit from the additional drought resistant water source created.

Credentials/Documentation:

To be eligible to receive funding for construction activities, a water reclamation and reuse project must be specifically authorized under Title XVI. Funds for construction activities associated with an individual project will not be disbursed until all Title XVI pre-construction requirements have been met for that project. These include: (1) a finding that the feasibility study meets the requirements of Title XVI; (2) complete compliance with the National Environmental Policy Act and other environmental clearances; (3) an approved determination of financial capability; and (4) an executed grant or cooperative agreement for financial assistance. OMB Circular No. A-87 applies to this program.

Federal funding for Title XVI construction projects is limited to 25% of the total project or a specified maximum amount, whichever is less. The maximum amount varies by project. Generally, projects authorized after 1996 have a ceiling of \$20 million or less; the specific details are available in the authorizing legislation. If a project conducted under the Title XVI Program includes planning, design, and construction, the Reclamation Wastewater and Groundwater Study and Facilities Act of 1992 (the Act) requires the sponsor to provide at least 75 percent of all the costs incurred, including Reclamations administrative costs. In addition, the sponsor must pay all operation, maintenance and replacement (OM&R) costs of the project.

Some of the Title XVI water reuse benefits include improving water-use efficiency, providing flexibility during water shortages, and diversifying the water supply. In areas where municipalities and industry (M&I) are looking to agriculture as a water source, Title XVI projects reduces the need to transfer agricultural water to M&I uses. Fifty-three projects are specifically authorized to receive funds for construction. Two demonstration projects have also been undertaken through the general authority. Since the programs inception in 1992, more than \$558 million in Federal cost-share has been leveraged to design and construct water recycling projects. EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2011: The Delta Diablo Sanitation District, in Antioch, California, received \$150,000 in FY 2011 Title XVI funding to assess options for expanding and improving the District's current tertiary treatment system. The feasibility study will examine the operations of the overall system for ways to maximize recycled water production and conveyance, while minimizing operations costs, including energy costs. The Victor Valley Wastewater Reclamation Authority received \$2 million in FY 2011 Title XVI funding which will be used to construct two sub-regional water reclamation plants to produce high quality effluent that will be used to recharge the groundwater basin and serve recycled water customers in the City of Hesperia and the Town of Apple Valley. Once completed, the project phase will make available 2,240 acre-feet of recycled water annually. Fiscal Year 2012: In the Bay Area, the City of Redwood City's recycled water project will replace potable water with recycled water for landscape irrigation and other uses. Approximately \$1.1 million in Reclamation funding will be used by the City to convey recycled water to the Seaport area, making approximately 245 acre-feet of water each year available for other uses. The project is intended to improve reliability of the local water supply and to reduce the City's demand on imported water. Fiscal Year 2013: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

Reclamation will place priority on funding projects that reduce existing water diversions or address specific water supply issues in a cost-effective manner,

address environmental and water quality concerns, are economically justified, and meet other program goals. For ARRA funded projects: The purposes of the Recovery Act are, among others, to quickly and prudently commence activities that preserve and create jobs and to promote economic recovery, and to invest in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits. To meet these purposes, Reclamation will allocate funds based on the criteria set forth in the Recovery Act and the accompanying conference report, and will target activities that quickly infuse money into the economy.

Preapplication Coordination:

Environmental compliance for this program may be required depending on the scope of the specific project funded. This may result in the need for an environmental impact assessment or environmental impact statement prior to the commencement of project activities. An environmental impact statement is required for this program. An environmental impact assessment is required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2011: A number of projects will address the connection between water use and energy use. For example, the Three Sisters Irrigation District in Oregon will replace 20,000 feet of open canal with pipe expected to result in 750 acre-feet of water savings annually. The District also will install a 950-kilowatt capacity turbine generator as part of the project.

Several projects will save energy through water conservation. For example, the Lower Colorado River Authority in Texas will automate 11 check gate structures, expected to result in 2,560 acre-feet of water savings annually. The Authority estimates that completion of the project will decrease pumping needs and reduce energy consumption by approximately 132,000 kilowatt-hours per year.

Other projects are expected to make contributions to environmental restoration by conserving water or making other improvements that benefit endangered or threatened species. For example, in California, the Los Molinos Mutual Water Company will undertake water management improvements with expected savings of approximately 3,000 acre-feet of water annually. The conserved water will remain in Mill Creek, a tributary of the Sacramento River, to benefit Chinook salmon and steelhead migration.

Examples of all projects funded to date are available at <http://www.usbr.gov/WaterSMART/weeg/>. Fiscal Year 2012: No Current Data Available Fiscal Year 2013: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

Projects should seek to conserve and use water more efficiently, increase the use of renewable energy and improve energy efficiency, protect endangered and threatened species, facilitate water markets, or carry out other activities to address climate-related impacts on water or prevent any water-related crisis or conflict.

For ARRA funded projects:

The purposes of the Recovery Act are, among others, to quickly and prudently commence activities that preserve and create jobs and to promote economic recovery, and to invest in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits. To meet these purposes, Reclamation has allocated funds based on the criteria set forth in the

Recovery Act and the accompanying conference report, and has targeted activities that quickly infused money into the economy.

Applicant Eligibility:

State and local public agencies, Indian tribes, nonprofit organizations, and individuals may submit a proposal which will be considered by Reclamation. Foreign entities and Federal agencies are not eligible to apply.

An environmental NEPA document may be required depending on the nature of the proposal and its impact on the environment. Compliance with National Historic Preservation Act and Endangered Species Act is also required. Summit and Walker Lakes Preapplication Coordination:

Although it is not mandatory, Reclamation strongly encourages offerors to submit a pre-proposal to eliminate the possibility of submitting a full proposal that would not be considered for award. The pre-proposal should describe 1) how the proposal will provide water to the terminal lake, 2) the quantity of water anticipated to be provided, 3) the associated estimated cost, 4) potential environmental impacts, 5) state, local and other permits or approvals needed to implement the proposal. Pyramid Lake Pre-application Coordination: On a periodic basis, a pre-proposal solicitation announcement is issued by Reclamation; the initial solicitation occurred in FY05. No additional solicitation is planned in FY12. An environmental impact statement is required for this program. An environmental impact assessment is required for this program. For Summit Lake, Reclamation will only accept proposals from the Summit Lake Paiute Tribe, since the lake is entirely within the reservation boundaries and any proposal affecting the lake would need the consent of the Tribe. For Walker Lake, Reclamation may accept applications after the applicant provides enough pre-application information to Reclamation to assure that the proposed work will provide water to Walker Lake, the associated cost is reasonable, and it is likely Reclamation can satisfy its federal Indian trust, endangered species, environmental, and other responsibilities. For Pyramid Lake, a Funding Opportunity Announcement (FOA) is issued periodically by Reclamation. Discretionary funding opportunities will be posted on Grants.gov. Submission of a complete technical proposal and a project budget proposal in accordance with the instructions in the FOA is mandatory. In addition, applicants must submit all applicable SF424 forms, which are referenced in the FOA. Reclamation is not accepting unsolicited applications in FY12 because all remaining funding has been obligated except that which will be used for program administration.

Award Procedure:

For Summit Lake, Walker Lake, and Pyramid Lake, proposals are evaluated using a merit-based review process. Pyramid Lake proposals were also reviewed on the basis of a competitive, merit-based review process, and are rated in accordance with the evaluation criteria stated in the FOA. Reclamation will make awards to the highest-rated proposals based on the amount of funding available each solicitation period. Reclamation reserves the right to prioritize projects based on availability of funds and to ensure balance among the program objectives listed in the FOA.

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Contact Reclamation for the range of time when proposals are approved or disapproved.

Appeals:

Reclamation will, however, provide all applicants with information on why their proposals were not selected.

Award Procedure:

Reclamation will solicit proposals and award funding through a Funding Opportunity Announcement (FOA) process. The FOA will request proposals from public and private sectors that would control salinity based on cost per ton. The proposals will be ranked based on their cost effectiveness for preventing salt from entering the Colorado River system. The ranking would consider risk factors that might affect the project's performance. Upon receipt of applications/proposals by the date identified in the announcement(s), the applications will be reviewed to determine if application/proposal(s) are consistent with requirements identified in the announcements. EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2011: One example of a current funded project is the Uncompahgre Phase 5 Basinwide Salinity. This project located in Western Colorado will replace approximately 19.0 miles of existing unlined earthen irrigation laterals in the Uncompahgre Projects East, Loutzenhizer, and Selig Canal systems with buried pipe. Construction under this agreement will involve replacement of facilities operated and maintained by UVWUA and will be performed by or under the direction of UVWUA with technical assistance and program oversight provided by Reclamation. Construction of the pipelines is tentatively scheduled to begin in Summer of 2011 and conclude in 2015. Miscellaneous construction and cleanup activities will continue through the end of the Agreement Period of Performance (see Section 4). The UVWUA will implement a habitat replacement plan concurrent with the lateral piping project. Fiscal Year 2012: Not Available. Fiscal Year 2013: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

In 1984, the Salinity Control Act was amended to direct the Secretary of the Interior to give preference to units which reduce salinity at the least cost per unit of salinity reduction (or cost-effectiveness). Cost-effectiveness is defined as the Salinity Program's annual cost per ton of salt prevented from entering the Colorado River system. Conceptually, cost-effectiveness is analogous to determining the cost per mile to own and operate a car. That computation combines the annual expenses (loan payments, gas, maintenance, etc.) and divides by the miles traveled each year. The key to understanding this approach is to appreciate that the government evaluates all projects as if the money is borrowed from a loan institution and repaid in annual installments over the life of the project. This economic evaluation principle is required by the "Economic and Environmental Principles Guidelines for Water and Related Land Resources Implementation Studies", March 1983. This method lends consistency in the comparison of non-federally financed alternatives (which must borrow funds) to Federally financed projects. Each proposal will be evaluated by a technical review panel in accordance with the following criteria and corresponding percentage weights: (a) Technical merit - those passing will be evaluated further, (b) Cost effectiveness 70 percent of the annual cost for each ton of salt load reduction, expressed in dollars per ton, (c) Performance risk 30 percent of performance risk will evaluate the cost and effectiveness risks of the proposal. More detailed information will be included in each funding announcement or may be obtained from the Salinity Control Program contacts listed above. For Recovery Act projects: The purposes are among others, to quickly and prudently commence activities that preserve and create jobs and to promote economic recovery, and to invest in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits. To meet these purposes, Reclamation will allocate funds based on the criteria set forth in the Recovery Act and the accompanying conference report, and will target activities that quickly infuse money into the economy.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2011: The following are examples of funded projects under this program: Rio Rancho Open Space Habitat Restoration Phase, State Trust Land Bosque Riparian Restoration and Outreach Project, and Restoring Loosestrife Pond Expanding Flycatcher Habitat and Controlling Invasive Plants. The Rio Rancho Open Space Habitat Restoration phase will plan, design, and construct river and riparian habitat restoration projects in the Albuquerque Reach of the Middle Rio Grande. The project area is represented by a riparian cottonwood forest and associated vegetated mid-stream islands and bars. Channel degradation has resulted in disconnection of the historic floodplain from the natural flooding regime in much of the area that has contributed to the near extinction of the endangered Rio Grande silvery minnow. The objective of the project is to increase habitat for the silvery minnow in the upper portion of the Albuquerque Ranch in a manner that integrates with other ecological features of the river. In addition, the restoration will benefit stop-over habitat for the southwestern willow flycatcher and other migratory avian species. In 2004, the State Trust Land Bosque Riparian Restoration and Outreach

Project began an effort called Phase 1 to reverse the decline in health of the project area, a tract of riparian land located within the South Diversion Channel Subreach of the Albuquerque Reach of the Rio Grande. Thereafter, Phases II and III followed and are currently underway and comprise holistic project goals that seek to restore sustainability to the riparian system by restoring vegetative communities and natural fluvial processes while also administering an outdoor education and outreach program. This project has two main elements: restoration of the native vegetative community and function and hydrologic restoration of the natural fluvial processes. Restoring the vegetative community to its natural state without invasive species will aid in the development suitable habitat for the endangered Southwest willow flycatcher. Hydrologic restoration will promote natural fluvial processes and reconnect the floodplain to the river, thereby creating more suitable and diverse aquatic habitats for the endangered Rio Grande silvery minnow.

The project, Restoring Loosestrife Pond: Expanding Flycatcher Habitat and Controlling Invasive Plants, consists of removal of invasive trees and shrubs, carefully targeted earthwork to deepen and enhance sections of an existing high-flow channel and allow surface flows from the Rio Grande to reach the site at lower water levels than at present, and enhancing native vegetation by planting native coyote and other willows to expand the area of potential flycatcher nesting habitat. Additionally, the Pueblo will be planning other fruit-bearing shrubs in other areas to enhance food sources for other migratory birds and planting herbaceous wet-meadow and marsh plants to replace removed purple loosestrife and provide insect habitat for flycatcher foraging needs. The total restoration project area includes 31.0 acres and encompasses just over 2000 feet of the west bank of the Rio Grande beginning (at its downstream end) about 850 feet upstream of the Highway 74 bridge and about 1.4 river miles above the Rio Chama confluence. Within the overall project area, the 24-acre buffer area received some restoration work in 2004-2006. The 7.2 acres of flycatcher habitat to be expanded has so far received no restoration at all except for the removal of previously monocultural purple loosestrife. The existing occupied patch of flycatcher habitat, covering about 21 acres, has received no restoration work or other disturbance since 1998 when some mitigation work was done in connection with the construction of the new Highway 74 bridge. It will expand by 34% to just over 28 acres after this project. After completion of this project, the occupied habitat will be located within a contiguous area of 60 acres of restored bosque in which additional suitable habitat can develop in the future, buffered from grazing or other commodity land uses. Fiscal Year 2012: Not Available. Fiscal Year 2013: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

Specific evaluation criteria for projects benefiting the Rio Grande Silvery Minnow and the Southwestern willow flycatcher within the Middle Rio Grande will be included in the funding announcements posted on www.grants.gov.

Fiscal Year 2012: Not Available. Fiscal Year 2013: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

The Las Vegas Wash Coordination Committee has decided that the SNWA will be the lead agency for receiving funding for this program due to the high costs and types of environmental improvement and enhancement, and ability to maintain restoration projects. The Las Vegas Wash Program plays an important role in environmental and water resource issues in Southern Nevada. Historically, the Las Vegas was an ephemeral stream carrying storm flows from the Las Vegas Valley to Lake Mead and the Colorado River. Urban development over the past 60 years has resulted in the formation of the wetlands that helped remove nutrients from these wastewater flows. As the rate of discharges increased, erosion also increased, gradually destroying the existing natural treatment systems and wildlife habitat and creating a large delta in the Las Vegas Bay of Lake Mead. Accelerating erosion, declining water quality, and loss habitat are some of the more pressing issues. Proposals submitted will be reviewed and awarded based on priority fulfillment of the 44 action items identified in the Plan and the availability of funding appropriations.

11.407 Interjurisdictional Fisheries Act of 1986; 15.608 Fish and Wildlife Management Assistance; 15.611 Wildlife Restoration

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2011: The Colorado Division of Wildlife investigated and produced a publication on the development of rainbow trout brood stocks resistant to Whirling Disease, a disease that has negatively impacted the states native rainbow trout populations in recent years. The Division is working to establish brood stocks (breeding adults) of candidate rainbow trout strains that may be partially resistant to infection and evaluate these strains for resistance under laboratory and field conditions. The primary benefit of finding a Whirling Disease resistant strain of rainbows would be the ability to repopulate streams decimated by whirling disease with reproducing populations of resistant strains.

The Kentucky Department of Fish and Wildlife Resources conducted surveys of the state's public fishing lakes and major reservoirs and tail waters to gather information on water quality, fish population status, and fishing results that shape management strategies; to conduct various individual studies; perform habitat enhancement work; rear and stock fish as needed; operate and maintain district offices; and provide technical guidance to assure resources meet the state's recreational fishing public needs.

The Massachusetts Division of Marine Fisheries surveyed some of their more important coastal sport fish species. The Division biologically characterized striped bass landings by implementing a striped bass tagging program; they looked at shark distribution and relative abundance; developed an age-length key for tautog; studied inshore-offshore movements of striped bass; and studied the biology and behavior of an undisturbed group of spawning Atlantic cod. The project will improve marine fisheries management in coastal waters of Massachusetts. Fiscal Year 2012: The Florida Fish and Wildlife Conservation Commission will continue to collect important data that will be used by fisheries managers to determine trends in relative abundance of juvenile and adult sport fishes. Age, size, and sex composition data will be obtained for management of important recreationally-caught species, primarily hogfish, grouper, and snapper. Monitoring the adult fishes enables the stock assessment group to estimate the status of the fishable stocks.

The California Department of Fish and Game will continue its Anadromous Sport Fish Management and Research project. The project will conduct habitat mapping for Coho salmon and steelhead populations on coastal streams of San

Mateo and Santa Cruz counties, as well as the Pajaro River watershed. A priority list of habitat restoration projects will be developed. Restoration partnerships will be developed. Baseline life-history studies on fishes in the Butte and Big Chico Creeks will be conducted.

The Vermont Fish and Wildlife Departments aquatic resource education program aims to increase understanding and support of land conservation issues, facilitate a land stewardship ethic in Vermont citizens and support responsible fish and wildlife-based recreation, consistent with resource management goals. This will be accomplished through the Green Mountain Conservation Camps Program, which provides hands-on training in watershed and wetland function as well as information regarding fishing and fisheries. The program provides teacher training through Aquatic WILD workshops and a summer Teachers' Course and angler education including family clinics on fishing skills, ethics and aquatic ecology. The educational experience will enable new and existing anglers to enjoy sport fish resources in a safe and responsible way. Fiscal Year 2013: Program has not yet selected projects for funding. Program anticipates funding projects that increase sport fishing and recreational boating opportunities through wise investment of excise tax dollars in sport fishery development and management projects.

CRITERIA FOR SELECTING PROPOSALS:

The State, the District of Columbia, Commonwealth, or territorial agency having lead responsibility for the management of their fish resources must submit the projects. The State, the District of Columbia, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

RELATED PROGRAMS:

15.605 Sport Fish Restoration Program; 15.631 Partners for Fish and Wildlife

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2011: 1) Replaced an undersized culvert on VanHellen Creek at Roth Road, Black River Watershed, MI. The project reconnected 4 miles of stream for native brook trout. The aging concrete culvert (25ft long, 3ft) was replaced with a corrugated steel arched culvert (60 ft long, 69in x 45in). Road widening and approach work will reduce sediment input to the system. 2) Rock Rubble Humps were placed in Leaser Lake, PA to enhance bottom substrate and provide habitat for several fish species. 3) Native aquatic plants were purchased, cultivated and planted for the purpose of reestablishing aquatic vegetation in Lake Palestine, TX. Native vegetation

provides cover for fish and macroinvertebrate populations in the lake. Fiscal Year 2012: (anticipated): 1) Clear Creeks Stream Habitat Restoration in NY. The project will use natural channel design approaches to restore stream habitat and floodplain function along 2,000 linear feet of Clear Creek. This reach is located immediately downstream of and will complement the Clear Creek Stream Habitat Restoration and Fish Passage Projects being implemented in summer 2011.

2) A multi-cell treatment system including a sediment basin, wetland marsh/forested treatment area, and lower aquatic environment cells will be constructed to reduce nutrient and sediment delivery to McKinley Lake.

3) Woody and rock structure will be added to Smith Lake, MO to stabilize eroding shoreline and replace standing timber that has deteriorated since the reservoir impoundment. Fiscal Year 2013: 1) The Sevenmile Creek proposed project will replace an inefficient fish diversion screen resulting in the reconnection from Upper Klamath Lake to its headwaters permanently opening 7 miles of high-quality habitat and eliminating entrainment at the uppermost diversion.

2) The National Fish Habitat Partnership has not yet selected projects for funding. Program anticipates funding projects that protect, restore and enhance the habitats of the Nations marine and freshwater fish populations.

3) The National Fish Passage Program is a non-regulatory initiative that provides financial and technical assistance. The program anticipates funding projects that aid in the removal or bypass of artificial barriers that impede the movement of fish and contribute to their declining numbers.

RELATED PROGRAMS:

15.605 Sport Fish Restoration Program; 15.615 Cooperative Endangered Species Conservation Fund; 15.626 Hunter Education and Safety Program

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2011: The Alaska Department of Fish and Game funded 58 projects to address needs in research, survey, planning, management and coordination related to Alaska wildlife populations. These projects benefit over 96,979 hunting license buyers, approximately 600,000 state residents and over a million visitors. Planning, research and management provide for over 400,000 recreational days of hunting, allowing a harvest of over 61,000 big game animals plus numerous furbearers, small game and waterfowl. Over 50% of Alaskans and 69% of visitors observe or photograph wildlife. Assessing populations, understanding natural systems, protecting habitat, controlling disease, managing state refuges and disturbance, and monitoring harvest and other mortality are critical to maintaining this important resource.

The California Department of Fish & Game annually determines population size, distribution, sex and age structure of black bear, as required by their management plan. The State determines the number and locations of depredation complaints and allows a reasonable assessment of the black bears range and population trend to develop and employ information and techniques to reduce the number of adverse interactions between people and bears.

Connecticuts Department of Energy and Environmental Protection provided instruction in the safe use of hunting equipment, hunter responsibility, and knowledge of wildlife management via a trained corps of volunteer instructors. Approximately 5,000 students annually go through the Conservation Education/Firearm Safety, bow, and trapping programs. Fiscal Year 2012: The Colorado Division of Wildlife will continue to estimate post-hunt deer population size, sex and age ratios for deer across various parts of the state. Specifically, the Division will estimate annual doe, winter fawn and buck survival rates using radio-marked deer. In addition, the Division will estimate deer harvest and hunter recreation days across the State. The Division will also continue to maintain databases of all deer population data, deer harvest data, and deer licenses sold. Accomplishment of the objectives will help the Division continue to improve its ability to collect and manage Colorados deer populations and ensure sound management of its deer populations in accordance with herd management plans.

The North Carolina Wildlife Resources Commission will work on a project to complete a comprehensive inventory of all game lands allocated to the agency for wildlife management. The project includes inventory of habitats, infrastructure (roads, gates, and bridges), public access, and associated needs. The Commission will also upgrade and renovate permanent fire lines, bridges and parking areas as well as handicap accessible areas to improve wildlife management and public use. The Texas Parks and Wildlife Department will continue to provide technical assistance to land managers and other concerned individuals and organizations through seminars, demonstrations and individual contacts to assist them in the management, conservation, development, and enhancement of wildlife habitat in Texas. Providing technical assistance to land managers will promote cost effective wildlife management practices, counteract the effects of habitat loss and fragmentation, help prevent waste or depletion of wildlife resources, and provide increased opportunities for public recreation. Technical assistance targeted at conserving and improving wildlife populations and habitat on private lands will have long term positive results,

especially in a state where 94 percent of the land is privately owned. Working with landowners to conserve key habitat types will benefit a diversity of species including rare and declining plants and animals. Fiscal Year 2013: Program anticipates funding projects to restore, conserve, manage and enhance wild birds and mammals and their habitats; and provide hunter development and safety programs.

CRITERIA FOR SELECTING PROPOSALS:

The State, Commonwealth, or territorial agency having lead responsibility for the management of their wildlife resources must submit the projects. The State, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

15.623 North American Wetlands Conservation Fund

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2011: Browns Island Project, Cataret County, NC The North Carolina Wildlife Resources Commission, along with the North Carolina Coastal Land Trust will acquire a 45-acre parcel on Browns Island located near Cape Lookout National Seashore. Browns Island is a 600-acre undeveloped island. The parcel contains a diversity of wildlife habitats including 31.5 acres of salt and brackish marsh, pocosin, and 13.5 acres of maritime live oak and longleaf pine forest. The project would protect habitat for eight federally listed species, 10 state listed species, 18 coastal dependent and/or migratory bird species, and conserve four priority habitat types: forested wetlands, estuarine emergent wetlands, longleaf pine habitat, and maritime forest.

Riverside Ranch Restoration Project, Humboldt County, CA The California Coastal Conservancy will restore the natural ecosystem functions of the Salt River Delta in the Eel River estuary. The 446-acre Riverside Ranch sits at the confluence of the Salt and Eel Rivers was acquired with a 2007 National Coastal Wetland Conservation Grant. The Salt River watershed has been degraded by a century of diking and gating. This project will restore and enhance a total of 334 acres of estuarine tidal marsh, riparian forest, and other estuarine habitats, and 112 acres of associated uplands for numerous Federal and State listed and other wetland-dependent fish and wildlife species.

Sisters of Notre Dame Conservation Easement, Ipswich, MA The Massachusetts Department of Conservation and Recreation, partnering with Essex County and the Town of Ipswich, will permanently protect

approximately 78.05 acres of coastal salt marsh, freshwater marsh and ponds, and associated upland buffer. The Great Marsh is the largest salt marsh in New England covering over 25,000 acres. The project area is located at the mouth of Eagle Hill River, which drains into Plum Island Sound and Ipswich Bay. It is part of a 7,000-acre conservation corridor that includes Parker River National Wildlife Refuge four miles to the north. Fiscal Year 2012: Long Cove, Seal Cove and Oscars Pond Wetlands Acquisition Project, Addison, ME The Maine Department of Inland Fisheries and Wildlife will acquire 177 acres of essential upland, freshwater wetland and intertidal lands that will be part of the newly created Pleasant Bay Wildlife Management Area in Downeast Maine. The goal of the project is the long-term conservation of coastal wetland ecosystems that support many threatened and endangered species, important fishery resources, migratory shorebirds, and migratory wintering waterfowl.

Boyles Island Tract Acquisition Project, Lower Altamaha River, GA The Georgia Department of Natural Resources, partnering with The Nature Conservancy, Knobloch Foundation, the U.S. Marine Corps, USFWS (NAWCA), proposes to acquire 6,142 acres river floodplain forested wetlands in the lower Altamaha River floodplain, including 8.7 miles of river frontage on the Altamaha River. Designated by The Nature Conservancy as one of the Last Great Places, the Altamaha River watershed boasts the highest documented number of rare plants, animals and natural community occurrences in Georgia.

Union River Estuary Habitat Restoration Project, Belfair, WA The Washington Department of Fish and Wildlife will to restore 31 acres of estuarine habitat in Puget Sound. The goal of the project is to restore tidal influence to estuarine marsh habitat associated with the lower river as part of a larger initiative which has protected over 300 acres of Lynch Cove. The Union River is considered the strong-hold in the Lower Hood Canal for Federally listed summer chum salmon and is crucial for salmon recovery efforts. Fiscal Year 2013: The Program has not yet selected projects for funding. Program anticipates funding projects that include protection of coastal wetlands through fee acquisition or perpetual conservation easements, restoration and enhancement of coastal wetlands through hydrological reconnection and restoration of tidal flow, removal of invasive species and revegetation, and installation of living shorelines.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2011: In Fiscal Year 2011, \$53 million in grants was awarded to 17 states to support conservation planning and acquisition of vital habitat for threatened and endangered fish, wildlife, and plants.

For example, the State of Wisconsin was awarded an HCP Land Acquisition grant in the amount of \$360,000 to fund the Karner Blue Butterfly Land Acquisition project in Jackson County. With this grant, the Wisconsin Department of Natural Resources will protect 240 acres of land within the Bauer-Brockway Barrens State Natural Area and the Jackson County Forest. The addition of these lands will connect existing protected habitats to benefit this disturbance-dependent endangered butterfly and a large number of additional rare species that depend on the barrens ecosystem.

An HCP Planning Assistance grant in the amount of \$978,439 was also awarded in FY 2012 to support the Development of Habitat Conservation Plans for the Cumberland Region, Tennessee, project to protect aquatic and forest resources. Several mammals, mussels, reptiles, amphibians, fish, and aquatic invertebrates will benefit from these planning efforts in this ecologically diverse region that is beginning to experience increased development and resource extraction issues.

An FY 2011 Recovery Land Acquisition grants was awarded to the Chesapeake Bay Puritan Tiger Beetle Habitat Conservation project in Maryland. The State of Maryland Department of Natural Resources, in partnership with the Fish and Wildlife Service Chesapeake Bay Field Office, Eastern Shore Conservancy, Girl Scouts of the Chesapeake Bay Council, and five private landowners requested funding to purchase permanent conservation easements on six properties. The properties total 456 acres of forestland and eroding cliffs and support three sub-populations of the federally threatened Puritan tiger beetle.

Finally, the State of Oregon received a Traditional Conservation grants to fund population estimates for the endangered Taylors checkerspot butterfly in Fiscal Year 2011. Fiscal Year 2012: For Fiscal Years 2012 and 2013, the program has not yet selected projects for funding. However, we expect to award an estimated 560 grants to fund similar projects that benefit threatened and endangered species on non-Federal lands. Fiscal Year 2013: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

Proposals for grant funding must be submitted by the State fish and wildlife agency. The State must have an approved cooperative agreement with the Secretary of the Interior which provides for sharing responsibilities for endangered species, prior to receiving Cooperative Endangered Species Conservation Fund (section 6 of the Endangered Species Act) funds. Individual project proposals must compete with other State submissions for funding. For additional information please visit <http://www.fws.gov/endangered/grants/index.html>.

RELATED PROGRAMS:

Not Applicable.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2011: The State of Florida's Clean Vessel Act Inland Program will increase the total number of inland marina pumpout facilities, renovations, operations, maintenance, and sewage hauling projects by 15 as well as increase the knowledge of the program to boaters and marine facility operators. The education initiative includes program information through the internet, outreach events, brochures, radio and television PSAs, and presentations. The focus areas for pumpout facilities will be areas of high vessel traffic, with sensitive bodies of water.

South Carolina's Marine Resources Division developed a CVA plan under a 1994 grant that was based on a comprehensive survey. The survey covered all marinas within the state's eight county coastal zones. Since its inception several pumpout facilities have been established. The state also has a comprehensive public awareness/outreach component to their CVA Program. Three new fixed pump out units will be installed and outreach will be conducted to include information on waste disposal regulations, steps to properly handle and discharge sewage waste, the effects of sewage pollution on aquatic habitats and boater responsibilities. Information will continue to be distributed at large marina trade shows, outreach events, and expositions. In addition, a "dock walker" will be utilized to distribute CVA information during peak boating season and will also survey boaters to determine attitudes and behaviors towards pumpouts and sewage pollution.

The Georgia Department of Natural Resources worked with marinas to construct, renovate, operate and maintain pumpout stations and waste reception facilities for recreational boaters. Funds will also be used for outreach

materials to inform boaters of the importance of properly disposing of boat sewage and keeping our waters clean. Fiscal Year 2012: The Massachusetts Division of Marine Fisheries (DMF), through the State CVA Pumpout Program will provide resources for the administration of the program, including conducting compliance checks on all CVA funded pumpout installations in Massachusetts, and to continue the information and education component of the CVA Program in the State. Funding will also be used to purchase 1 pumpout boat and replace 4 older pumpout boats, install 3 new shoreside stations, and to replace 2 boat motors.

The North Carolina Wildlife Resources Commission proposes to construct two new pumpouts and renovate current facilities as needed. The state will also conduct an education/outreach program by producing and distributing brochures and pamphlets and by conducting workshops. The anticipated result of this grant work is a reduction in illegal overboard sewage discharge.

The Connecticut Department of Energy and Environmental Protection Funding will be funding a CVA Pumpout Program to purchase and install 4 new pumpout/dump station facilities and 1 new pumpout boat in the coastal area of the State, as well as to upgrade and/or replace existing equipment in need to be replaced or upgraded. Funding will also be used to operate and maintain approximately 40 stationary facilities and 18 pumpout boats, as well as for the continuation of the CVA Pumpout Education Program and the administration of the Program in Connecticut. Pumpout facilities in CT prevent the discharge of boat sewage in CT waters and service not only CT boaters but also boaters from other States visiting or passing through the State waters. Fiscal Year 2013: The Program has not selected proposals for funding but projects will feature pumpout stations, floating restrooms, pumpout boats and educational programs about the benefits of pumpouts and keeping sewage out of recreational waters.

CRITERIA FOR SELECTING PROPOSALS:

Projects must be submitted by the State, the District of Columbia, Commonwealth, or territorial agency given responsibility for the program by the Governor of that State, the District of Columbia, Commonwealth, or territory. Purpose of the project must be consistent with the purpose and conditions of the Act. The criteria for selecting proposals for coastal States are based upon the extent the project will contribute to conducting a survey; develop a plan for installing pumpouts/dump stations; and construct pumpouts/dump stations according to the approved plan. Criteria for selecting proposals for all States, the District of Columbia, Commonwealths, or territories are based upon the extent the project will contribute to public/private partnerships; innovative approaches to increasing availability and use of pumpouts/dump stations; implementation of an education program; contribution toward protecting sensitive areas; and lowering the ration of vessels with holding tanks and portable toilets to pumpouts and dump stations.
