11.407 Interjurisdictional Fisheries Act of 1986; 15.608 Fish and Wildlife Management Assistance; 15.611 Wildlife Restoration

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2012: The California Department of Fish & Game (Department) Aquatic Education Program is divided into five projects; Conservation Education, Classroom Aquarium Education, Fishing-in-the-City, Interpretive Services and Mobile Fish Exhibit. The Departments Program is designed to broaden public awareness and create stewards of Californias vital aquatic ecosystems.

The Kentucky Department of Fish and Wildlife Resources continued to conduct surveys of the state's public fishing lakes and major reservoirs and tail waters to gather information on water quality, fish population status, and fishing results that shape management strategies; to conduct various individual studies; perform habitat enhancement work; rear and stock fish as needed; operate and maintain district offices; and provide technical guidance to assure resources meet the state's recreational fishing public needs.

The Nevada Department of Wildlifes Aquatic/Angler Education program focused on employing different strategies and approaches (new classes and clinics, lapsed angler outreach, species specific seminars, etc.), aimed at recruiting new anglers and retaining existing current or lapsed anglers. Fiscal Year 2013: The Florida Fish and Wildlife Conservation Commission will continue to collect important data that was used by fisheries managers to determine trends in relative abundance of juvenile and adult sport fishes. Age, size, and sex composition data will be obtained for management of important recreationally-caught species, primarily hogfish, grouper, and snapper. Monitoring the adult fishes enables the stock assessment group to estimate the status of the fishable stocks.

The California Department of Fish and Game will continue its Anadromous Sport Fish Management and Research project. The project will conduct habitat mapping for Coho salmon and steelhead populations on coastal streams of San Mateo and Santa Cruz counties, as well as the Pajaro River watershed. A priority list of habitat restoration projects will be developed. Restoration partnerships will be developed. Baseline life-history studies on fishes in the Butte and Big Chico Creeks will be conducted.

The Vermont Fish and Wildlife Departments aquatic resource education program will continue to aim to increase understanding and support of land conservation issues, facilitate a land stewardship ethic in Vermont citizens and support responsible fish and wildlife-based recreation, consistent with resource management goals. This will be accomplished through the Green Mountain Conservation Camps Program, which provides hands-on training in watershed and wetland function as well as information regarding fishing and fisheries. The program provides teacher training through Aquatic WILD workshops and a summer Teachers' Course and angler education including family clinics on fishing skills, ethics and aquatic ecology. The educational experience will enable new and existing anglers to enjoy sport fish resources in a safe and responsible way. Fiscal Year 2014: Program has not yet selected projects for funding to date. Program anticipates funding projects that increase sport fishing and boating opportunities through wise investment of excise tax dollars in sport fishery development and management projects.

CRITERIA FOR SELECTING PROPOSALS:

The State, the District of Columbia, Commonwealth, or territorial agency having lead responsibility for the management of their fish resources must submit the projects. The State, the District of Columbia, Commonwealth, or territorial agency selects those projects submitted for funding under the

program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

RELATED PROGRAMS:

15.605 Sport Fish Restoration Program; 15.615 Cooperative Endangered Species Conservation Fund; 15.626 Hunter Education and Safety Program

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2012: The Alaska Department of Fish and Game continued to fund projects to address the needs in research, survey, planning, management and coordination related to Alaska wildlife populations. These projects benefit over 96,000 hunting license buyers, approximately 600,000 state residents and over a million visitors. Wildlife is very important as a food resource for Alaskans. Planning, research and management provide for over 400,000 recreational days of hunting, allowing a harvest of over 61,000 big game animals plus numerous furbearers, small game and waterfowl. Over 50% of Alaskans and 69% of visitors observe or photograph wildlife. Assessing populations, understanding natural systems, protecting habitat, controlling disease, managing state refuges and disturbance, and monitoring harvest and other mortality are critical to maintaining this important resource.

The California Department of Fish & Game together with five other partners continue to develop, manage, and maintain over 35,000 acres of diverse habitats for over 550 wildlife and plant species that inhabit or migrate through the San Joaquin Valley Wildlife Habitat Development Area.

Connecticuts Department of Energy and Environmental Protection provided instruction in the safe use of hunting equipment, hunter responsibility, and knowledge of wildlife management via a trained corps of volunteer instructors. Approximately 5,000 students annually go through the Conservation Education/Firearm Safety, bow, and trapping programs. Fiscal Year 2013: The Colorado Division of Wildlife will continue to estimate post-hunt deer population size, sex and age ratios for deer across various parts of the state. Specifically, the Division will estimate annual doe, winter fawn and buck survival rates using radio-marked deer. In addition, the Division will estimate deer harvest and hunter recreation days across the State. The Division will also continue to maintain databases of all deer population data, deer harvest data, and deer licenses sold. Accomplishment of the objectives will help the Division continue to improve its ability to collect and manage deer populations.

Harvest data will help ensure sound management of Colorado's deer populations in accordance with herd management plans. The North Carolina Wildlife Resources Commission will work on a project to complete a comprehensive inventory of all game lands allocated to the agency for wildlife management. The project includes inventory of habitats, infrastructure (roads, gates, and bridges), public access, and associated needs. The Commission will also upgrade, renovate and improve infrastructure where needed to improve wildlife management and public use. Upgrades will be made to permanent fire lines, bridges and parking areas, as well as handicap accessible areas.

The Texas Parks and Wildlife Department will continue to provide technical assistance to land managers and other concerned individuals and organizations through seminars, demonstrations and individual contacts to assist them in the management, conservation, development, and enhancement of wildlife habitat in Texas. Providing technical assistance to land managers will promote cost effective wildlife management practices, counteract the effects of habitat loss and fragmentation, help prevent waste or depletion of wildlife resources, and provide increased opportunities for public recreation. Technical assistance targeted at conserving and improving wildlife populations and habitat on private lands will have long term positive results, especially in a state where 94

percent of the land is privately owned. Working with landowners to conserve key habitat types will benefit a diversity of game and nongame species including rare and declining plants and animals. Fiscal Year 2014: Program anticipates funding projects to restore, conserve, manage and enhance wild birds and mammals and their habitats; and provide hunter development and safety programs.

CRITERIA FOR SELECTING PROPOSALS:

The State, Commonwealth, or territorial agency having lead responsibility for the management of their wildlife resources must submit the projects. The State, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

15.623 North American Wetlands Conservation Fund

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2012: Upper Knik Arm Coastal Wetlands Conservation Project The Alaska Department of Natural Resources, in partnership with the Great Land Trust, propose to permanently protect 3,091 acres of coastal wetlands located in the Upper Cook Inlet. The project area provides nesting and rearing habitat for 168 species of migratory birds and estuarine habitat important to Beluga whales. This project is part of a larger conservation strategy called the Knik Arm Coastal Wetland Initiative to protect wetland areas adjacent to the Palmer Hay Flats State Game Refuge, Goose Bay State Game Refuge, Chugach State Park, and other important estuarine and near shore habitat in the Matanuska-Susitna Borough. Once acquired, the Alaska Department of Fish and Game will incorporate 988 acres of the project acreage into the Palmer Hay Flats State Game Refuge. A conservation easement on the remaining 2,000 acres will be held by the Great Land Trust.

Long Cove, Seal Cove and Oscars Pond Wetlands Acquisition Project The Maine Department of Inland Fisheries and Wildlife (MDIFW), partnering with the Pleasant River Wildlife Foundation, , proposes to purchase in fee 177 acres of essential upland, freshwater wetland and intertidal lands that will be part of the newly created Pleasant Bay Wildlife Management Area (WMA) in Downeast Maine. The goal of the project is the long-term conservation of coastal wetland ecosystems that support many threatened and endangered species, important fishery resources, migratory shorebirds, and migratory

wintering waterfowl. This project will benefit American black ducks, migratory dabbling ducks, numerous shorebirds, American woodcock, raptors, Atlantic salmon, and shellfish. The WMA project will also provide public access to this stretch of coastline and numerous recreational opportunities. The MDIFW considers the development threat to this region of the State to be significant.

Nooksack River: Smugglers Slough Estuary Restoration Phase III The Washington Department of Ecology, partnering with the Lummi Indian Nation, proposes to acquire 101 acres of Nooksack River palustrine emergent wetlands, historic salt marsh and forested wetlands. This project builds on previous phases that acquired 415 acres of estuarine wetlands and provided hydrologic connectivity to the project area. The Smugglers Slough projects main objective is to reconnect a relic estuarine slough channel between Lummi and Bellingham Bays in the Nooksack River watershed and restore adjacent wetlands and salt marsh habitats. In addition to the property acquisition, the project will also partially fund the construction of a berm, replace existing tidegates with tidal regulators, install new tidegates, remove a levee access road, regrade drainage channels and excavate new tidal channels. Implementation of this project will support the Pacific Coast Joint Venture Strategic Plan. Fiscal Year 2013: Program has not yet selected projects for funding. Program anticipates funding projects that acquire, restore, and enhance wetlands in coastal States. Fiscal Year 2014: Program has not yet selected projects for funding. Program anticipates funding projects that acquire, restore, and enhance wetlands in coastal States.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2012: \$45 million in grants was awarded to 50 states and territories to support conservation planning and acquisition of vital habitat for threatened and endangered fish, wildlife, and plants.

For example, the State of California was awarded an HCP Land Acquisition grant in the amount \$4,000,000 to support the acquisition of approximately 900 acres of land in Riverside County. This acquisition will benefit 13 federally listed species including California gnatcatcher, Arroyo southwestern toad, and Quino checkerspot butterfly. The acquisition will support the assembly of a 500,000-acre preserve that is part of the Western Riverside MSHCP by protecting large blocks of coastal sage scrub, chaparral, and grassland habitats.

An HCP Planning Assistance grant in the amount of \$300,250 was also awarded in FY 2012 to the State of Florida to assist in initiating the planning effort for a county-wide HCP for scrub habitats, the Florida scrub-jay, eastern indigo snake, sand skink, blue-tailed mole skink, and other dry scrub species. Implementation of an HCP in Highlands County marks a significant step forward for scrub conservation in the heart of Floridas central ridge and will enhance similar conservation efforts in neighboring counties.

A Recovery Land Acquisition grant in the amount of \$1,242,209 was awarded to the State of Texas to acquire the 289-acre Barker tract located in Hays County to benefit the golden-cheeked warbler and black-capped vireo and will also provide benefits to seven listed Edwards Aquifer species. The acquisition will provide additional protected habitat for these species that lie adjacent to the existing 463-acre Purgatory Creek Natural Area. Acquisition of the Barker Tract will protect an area of documented golden-cheeked warbler habitat and provide suitable nesting areas for the black-capped vireo, both of which are spotlight species for the region.

Finally, the State of Rhode Island received a Traditional Conservation grant to fund monitoring and management activities to benefit the American burying beetle in Fiscal Year 2012. Fiscal Year 2013: The program has not yet selected projects for funding. However, we expect to award an estimated 560 grants to fund similar projects that benefit threatened and endangered species on non-Federal lands. Fiscal Year 2014: The program has not yet selected projects for funding. However, we expect to award an estimated 560 grants to fund similar projects that benefit threatened and endangered species on non-Federal lands.

CRITERIA FOR SELECTING PROPOSALS:

Proposals for grant funding must be submitted by the State fish and wildlife agency. The State must have an approved cooperative agreement with the Secretary of the Interior which provides for sharing responsibilities for endangered species, prior to receiving Cooperative Endangered Species Conservation Fund (section 6 of the Endangered Species Act) funds. Individual project proposals must compete with other State submissions for funding. For additional information please visit <http://www.fws.gov/endangered/grants/index.html>.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2012: Prairies Without Borders phase 3, South Dakota - The goal of Prairies Without Borders is to use multiple NAWCA grants to protect 26,000 acres of wetlands and grasslands in the eastern areas of the Prairie Pothole Region. The long-term benefits of these actions are primarily accomplished through perpetual conservation easements and the promotion of sustainable grassland ranching. The 3,217 acres of habitat preserved by this project will provide direct benefits not only to waterfowl, but also to numerous species of shorebirds, wading birds, marsh birds, and grassland songbirds and other grassland-dependent wildlife species.

Heads of the Estuaries Partnership phase 2, Maine - The Heads of the Estuaries Partnership, a consortium of government agencies, regional conservation organizations and local land trusts, is engaged in a five-year campaign to protect 25 miles of coastline, 5,000 acres of coastal uplands and 2,500 acres of coastal wetlands along the tidal embayments stretching from the Corea Peninsula to Machias Bay in coastal Downeast Maine a region of concentrated, high-value wetland habitat for waterfowl and shorebirds. This project will permanently protect 11 parcels totaling 1,217 acres. Surveys indicate that the wetlands targeted for permanent protection provide habitat for waterfowl, and the project region provides roosting and feeding areas for tens of thousands of migrating shorebirds of at least 36 species.

Ace Basin phase 6: Edisto River Corridor, South Carolina - The purpose of the ACE Basin: Edisto River Corridor initiative is to create the largest forested wetland preserve possible (20,000 acres or more) at the Audubon Center and Sanctuary at the Francis Beidler Forest (Beidler Forest) in Four Holes Swamp, and to add substantively to the matrix of protected lands within the riparian and coastal zone of the Edisto River and the ACE Basin. Beidler Forest in Four Holes Swamp of the Edisto River Corridor is on the Ramsar List of Wetlands of International Importance and is ACE a Registered National Natural Landmark. This proposal is the sixth phase of a multi-year project to protect strategic freshwater, forested and estuarine wetlands, and associated uplands in the ACE Basin and the Edisto River corridor, and will protect 13 new tracts, totaling 2,803 new acres, including 935 acres of wetlands and 1,868 acres of upland to benefit breeding, migrating, and wintering birds. Fiscal Year 2013: Projects are still being selected. RELATED PROGRAMS:

15.605 Sport Fish Restoration Program; 15.608 Fish and Wildlife Management Assistance; 15.611 Wildlife Restoration; 15.615 Cooperative Endangered Species Conservation Fund

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2012: Massachusetts Department of Fish and Game incorporated a property into their Wildlife Management Area system through the fee purchase of 106.95 acres of important habitat. The purchase permanently protects the parcel from development, provides critical habitat for species of greatest conservation need, and protects a clearly identified, vital natural resource area. The purchase also expands compatible recreational opportunities for hunters, fishermen, naturalists, birders and anyone with an interest in the outdoors.

In the District of Columbia, a project teaches citizens the importance of backyard habitats, how citizens can develop them and how these improved sites can help provide needed habitat for wildlife (especially birds and small mammals) while enhancing peoples' properties and environments. Participants increase their knowledge and understanding of local wildlife ecology while developing 200 active backyard habitat sites to increase wildlife habitat for urban species, increase citizen awareness and knowledge of the importance of habitat and how they can take action to help provide it, and reduce the amount of fertilizer and pesticides (nonpoint source pollution) used on District lands.

In Illinois, funds result in production of 27,000,000 fish at fish hatcheries each year, which are stocked in public waters throughout the State, promoting high quality fishing in Illinois. These efforts establish sport fisheries in new waters, restore and maintain sport fisheries in existing waters, and reduce the gap between supply and demand for quality angling days in Illinois. Fiscal Year 2013: New Hampshire plans for wildlife management on public lands, develops and maintains these lands for wildlife, and provides for consumptive and non-consumptive public use of these resources on 208,400 acres of owned or leased land at 326 sites statewide. The benefits from this work include more diverse and stable wildlife populations and more, better, and safer access to wildlife related recreation in New Hampshire.

In Minnesota, funds restore, conserve, manage and enhance approximately 70,000 acres of farmland, prairie, and grassland habitats on State Wildlife Management Areas (WMAs) annually, as well as 30,000 acres of forest habitats located on State WMAs. The project also restores wetlands habitats on 200,000 acres and 1,000 existing sites on State WMAs annually. The project results in increased wildlife-dependant recreation by providing hunting opportunities, and improved wildlife habitat.

In Rhode Island, funds support construction of a building to provide conservation development activities. This building replaces the obsolete structure at Round Top WMA which was destroyed by fire in March, 2009. This building provides improved facilities for housing and repairing maintenance equipment used on Fish and Wildlife public access facilities and management areas in Northern Rhode Island. Fiscal Year 2014: Program has not selected new projects for funding but anticipates funding projects similar in scope to those of FY 13 and FY 14.

CRITERIA FOR SELECTING PROPOSALS:

The State, the District of Columbia, Commonwealth, or territorial agency having lead responsibility for the management of their wildlife resources must submit the projects. The State, the District of Columbia, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

RELATED PROGRAMS:

15.611 Wildlife Restoration

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2012: The Mississippi Department of Wildlife, Fisheries and Parks

worked to complete and maintain the Turcotte Shooting Range and education facility in order to promote public shooting sports and introduce hunting among youth and physically impaired persons. Advanced and regular hunter education, instructor training and public programs will be held at the facility. This project will ensure that hunting in Mississippi remains a safe and responsible recreational activity.

The Kentucky Department of Fish and Wildlife Resources certified educators and others to teach archery shooting and safety skills to 350,000 Kentucky physical education students in grade 4 through 12. The Archery in the Schools program gives many young people exposure to a sport they otherwise would not have been introduced to. This also provides an avenue for introducing Hunter Education to a non-traditional audience through activities and clubs outside the school program thus enhancing Kentucky's Hunter Education Program.

The Colorado Department of Natural Resources continued to upgrade the indoor range facility at the Northwest Facility Center located in Grand Junction. Upgrades include the following: bullet traps range lane target retriever system, ventilation system, electrical, and steel wall plating protection. The indoor shooting range will allow hunters and the shooting sports enthusiast to practice and improve their shooting skills at a supervised and safe facility. This will help ensure an enjoyable experience for all individuals interested in shooting sports. Fiscal Year 2013: The Louisiana Department of Wildlife and Fisheries will continue work at the Bodcau Shooting Range and provide additional features to improve and enhance range.. The Department will also: develop the Floy McElroy Wildlife Management Area to provide hunter education instruction for the general public; and provide for shotgun shooting opportunities at the Lafourche Parish Range for the public in an area of the state where few exist. Other planned activities include: the use of enhancement funding to maintain and upgrade various shooting ranges for public recreational shooting opportunities.

The North Carolina Wildlife Resources Commission will provide an enhanced level of support and service to volunteer instructors in the Hunter Education Program which will in turn improve instructor retention rates and increase the quality of student instruction. The Commission will also continue to develop and refine an Internet Hunter Education course. Archery education, including a pilot program for youth archery in schools will be developed. Muzzleloader education, advanced wing shooting education and tree stand safety will be added to the overall program. All of these components will contribute to increased hunter education classes offered to the public via internet and traditional classes, educate archery and muzzleloader hunters about the use of their specialized equipment and safety, educate bird hunters on bird wounding loss and how to increase their hunting skills to reduce loss, and how to use fall restraint systems for various elevated tree stand types thus reducing tree stand accidents.

The Tennessee Wildlife Resources Agency will be working on educating the public regarding deer herd health, population dynamics, and safety. The agency will be increasing the number of public hunter education programs and further developing their Scholastic Clay Target Program (SCTP) to provide for a safe and convenient location for participants. Fiscal Year 2014: Program has not yet selected projects for funding. Program anticipates funding Section 10 Hunter Educational projects and activities that are eligible each year.

CRITERIA FOR SELECTING PROPOSALS:

The State, Commonwealth, or territory agency having responsibility for the management of their resources must submit the projects. The State, Commonwealth's, or territory's wildlife resources must submit the projects. The State, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

RELATED PROGRAMS:

15.631 Partners for Fish and Wildlife

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2012: Anguilla Brook Fish Restoration Project - The Coastal Program worked with many partners throughout the Long Island Sound to protect and restore important habitats for trust species. In collaboration with Connecticut's Division of Inland Fisheries and The Nature Conservancy, the Coastal Program modified a dam to allow fish passage, removed another rock and earthen dam, and restored 300 feet of stream channel. The project reopened 13 river miles and 51 acres of wetlands - restoring the river herring's entire historic spawning range.

Knik Islands Conservation Project - The Coastal Program worked with different partners to prioritize land for conservation in the Matanuska-Susitna Borough, located in the south-central region of Alaska. The Knik Island, located at the confluence of the Matanuska and Knik Rivers, were identified as critical for conservation. The Coastal Program biologists were instrumental in gaining landowner support for this conservation project and providing funding support for strategic habitat prioritization. Program biologists helped conduct habitat assessments, participated in landowner outreach, and facilitated a conservation partnership cooperative agreement between private landowner, Eklutna, Inc., and the Great Land Trust. The Knik Islands Conservation Project safeguards, in perpetuity, approximately 5,000 acres containing an anadromous river system, nationally-declining estuarine wetlands, and upland habitat. The conservation area contains extraordinary migratory bird habitat, significant spawning and rearing habitat for Pacific salmon, which in turn, support the federally-endangered Cook Inlet Beluga Whales - a species that relies on the salmon as a main food source. The conservation area is located adjacent to the Palmer Hayflats State Game Refuge, which is over 40 square miles of conserved land, and the 780-square mile Chugach State Park. This conservation project provides a permanently protected habitat corridor between the refuge and the park.

Schaus Swallowtail Habitat Restoration - Following the Schaus swallowtail butterfly listing, the U.S. Fish and Wildlife prepared a recovery plan that identified specific conservation actions needed to ensure the survival of the species. The Coastal Program, working with the National Park Service and other partners, provided technical and financial assistance to remove over two acres of invasive vegetation, and replant the area with torchwood and wild lime. In addition to restoring important habitat for the Schaus swallowtail butterfly and a variety of migratory birds, the project provided enhanced significant socio-economic benefits to the park and local economy by enhancing park visitors' experience and drawing additional visitors to the park. Fiscal Year 2013: The Coastal Program has not yet selected projects to support. The Program anticipates funding projects that help protect and restore fish and wildlife habitat such as coastal wetlands and watersheds that benefit Federal trust species. Fiscal Year 2014: The Coastal Program has not yet selected projects to support. The Program anticipates funding projects that help protect and restore fish and wildlife habitat such as coastal wetlands and watersheds that benefit Federal trust species.

CRITERIA FOR SELECTING PROPOSALS:

All projects must benefit Federal trust species and be cost effective. Project selection occurs at the field level. See the annual "Notice of Availability of Federal Assistance" in <http://grants.gov> for more details.

15.630 Coastal Program

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2012: Teeland River Rangers Matanuska-Susitna County, AK
With the Partners For Fish and Wildlife Program approximately two hundred 7th graders participated in a restoration project to improve riparian habitat that has been degraded by human use, such as vehicle traffic or trampling. This teaches students valuable techniques of stream bank restoration and instills why this work is necessary and important. It also gives the students the opportunity to contribute to the well-being of their local salmon-bearing streams. The end results of this project are a restored stream bank, healthy waterways and the cultivation of stream stewards, scientists, and informed citizens for the future.
Coolidge Fish Ladder Fremont County, Wyoming - In partnership with The Tribes, BIA and the State of Wyoming, the Partners for Fish and Wildlife Program addressed one of four fish passage obstructions. Coolidge Irrigation on the Little Wind River was modified to open an additional 20 miles in the South and North Forks of the Wind River while removal of the Ray canal dam opened an additional 10 miles of the South Fork. A fish ladder constructed adjacent to the concrete weir spanning the river provides passage for the Little Wind River. This project benefits Tribal designated priority species of Yellowstone cutthroat trout, ling and mountain whitefish. For this project, the Service provided funding, design input, obtained permits and was involved in construction management. Through this collaborative partnership, fish passage on 30 miles of the Little Wind River was restored, saving 500,000 fish annually.

Cape Code New England Cottontail Habitat Restoration Barnstable County, Massachusetts -

On Cape Cod, the Partners for Fish and Wildlife has joined forces with various partners to return fire to the land and restore resilient habitats for both New England cottontails and the residents. The team targeted areas with the most burnable vegetation and strategically cut undergrowth, thinned the forest, and conducted controlled, planned burns that will continue the natural renewal process and reduce fire danger to nearby homes and businesses. With over 8,000 homes valued at \$2.5 billion, the town of Mashpee was designated a community at risk to wildfire in 2001 due to volatile pitch pines and scrub oaks in the neighboring Mashpee National Wildlife Refuge. The Service provided technical and financial assistance and partners cleared over vegetation from 64,000 feet of roads. The team successfully burned 13.5 acres in an effort to restore fire-dependent systems on Cape Cod, improve habitat for the New England cottontail and protect an estimated 250 homes worth \$87 million.
Fiscal Year 2013: Balmoral Dam Restoration Project- Balmoral Dam is the first barrier to passage on the Shawsheen River, and both impounds riverine habitat and restricts fish movement. A Feasibility Study has preliminarily identified the preferred alternative of removing this structure to improve habitat connectivity and allow free access to migratory fish such as American shad, river herring and American eel. Removing the Balmoral Dam will restore 165 feet of fluvial habitat, reconnect over five miles of river, and provide diadromous fish passage up to the base of the Marland Place Dam. Once fish passage has been secured at all three dams, diadromous fish will have access to over 20 miles of mainstem and tributary habitat. Fiscal Year 2014: The Program has not yet selected projects to support. The Program anticipates funding projects that help protect and restore fish and wildlife habitats that benefit Federal trust species.

CRITERIA FOR SELECTING PROPOSALS:

All projects must benefit Federal trust species, involve on-the-ground habitat restoration, and be cost-effective. Specific criteria for reviewing and ranking projects were established in the national Partners policy, at <http://www.fws.gov/policy/640fw1.html>. The program gives high priority to proposed projects that benefit the National Wildlife Refuge System, species at risk, conserve globally or nationally imperiled habitats; and reduce habitat fragmentation. 15.605 Sport Fish Restoration Program; 15.608 Fish and Wildlife Management Assistance; 15.611 Wildlife Restoration; 15.615 Cooperative Endangered

Species Conservation Fund; 15.634 State Wildlife Grants

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2012: Kansas Department of Wildlife and Parks used funds to restore, protect, and enhance 5000 acres of upland habitat, 500 acres of wetland, and 200 miles of stream/riparian habitat to benefit targeted at-risk species. Implementation of this objective will be based on issues and concerns identified in Kansas' Comprehensive Wildlife Conservation Strategy.

In Alabama, funds established the Middle Tennessee River Habitat Restoration Initiative to expand protection and restoration efforts on private lands with an emphasis on 48 species of special concern. The project improved approximately 14 miles of streamside habitat and 170 acres of streamside buffer. Gates and fences were installed on selected cave habitat for bat species of conservation concern. This effort continues the community-based approach to education of landowners and other stakeholders on land use practices that benefit protected species and their habitat.

North Carolina provided financial assistance to private landowners who are undertaking management actions to restore or enhance Red-cockaded woodpecker habitat under the Safe Harbor Program. This project also provides assistance for restoration or enhancement of longleaf pine ecosystem subtypes, or associated wetland communities, harboring other species at risk in addition to the targeted woodpeckers. Fiscal Year 2013: In New Hampshire, funds will help develop a program to assist private landowners in protecting and managing at-risk species and their habitats. The program will also identify quantifiable outcomes that can evaluate progress in restoring and conserving habitats and viable populations of species at risk on private lands. The expected benefits of this grant are improved conditions for at-risk species on private lands throughout state and expanded partnerships with private landowners in conserving these species.

In Virginia, program funds provide, via technical assistance, private landowners and partners with information and techniques necessary to restore, protect, enhance, and manage important habitats on their properties resulting in significant gains for species recovery and conservation. Virginia expects that implementing this grant will result in improved and protected habitat for at least 100 at-risk species and improved water quality in at least five of the major river systems (Upper Tennessee, New, Roanoke, James and Shenandoah) of Virginia.

In Utah, funds protect species of greatest conservation need in Cache, Juab, and Sanpete counties through acquisition of conservation easements including: Green Canyon (Cache County) - 434 acres for Bonneville cutthroat trout and sharp-tailed grouse; Crawford, Sanpete County - 75 acres for Columbia spotted frog and southern leatherside chub; Graham, Sanpete County - 20 acres for Columbia spotted frog and southern leatherside chub; Turpin, Sanpete County - 100 acres for Columbia spotted frog and southern leatherside chub; and Mills Valley, Juab County - 110 acres for least chub. Fiscal Year 2014: The program does not anticipate funding any projects in FY 14.

CRITERIA FOR SELECTING PROPOSALS:

The State, the District of Columbia, Commonwealth, or territorial agency having lead responsibility for the management of their fish and wildlife resources must submit the projects. The State, the District of Columbia, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

15.623 North American Wetlands Conservation Fund

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2012: U.S.-Mexico Grassland Bird Conservation X This project will continue work funded by the NMBCA since 2002 to conserve high-priority and declining grassland bird species of western North America. This phase focuses on implementing conservation actions to reduce and mitigate threats to Spragues pipits, mountain plovers and 26 other high-priority grassland bird species. Strategies include: outreach to engage grassland owners in habitat management and restoration in wintering habitat in Chihuahua; protecting shortgrass prairie in a portion of the 200,000-acre Mountains to Plains conservation area in northern Colorado; and management, monitoring, education and law enforcement to benefit mountain plover and other high-priority grassland bird species on 55,000 acres in this same conservation area in Colorado.

Protecting and Restoring Migratory Bird Habitat in the Osa Peninsula This project will protect wintering habitat for migratory birds on properties managed by Osa Conservation; restore degraded and deforested habitat; and create conservation agreements with neighboring landowners to protect habitat important for wintering migratory birds. Neotropical migratory species of concern that will be positively impacted by this project include swallow,tailed kite, mangrove cuckoo, olive, sided and willow flycatchers, wood thrush, and golden,winged warbler.

Harmonizing Rice Cultivation with Migratory Bird Conservation in Paraguay

Rice fields act as temporary wetlands and have been documented to provide important habitat, especially for feeding, for waterbirds such as buff-breasted sandpiper, lesser yellowlegs, solitary sandpiper, American golden plover and bobolink. Through a previous NMBCA-funded project, Guyra Paraguay began documenting the importance of the rice fields in southern Paraguay for conservation of neotropical migrants. Through the current project, partners will expand knowledge of the importance of rice fields in southern Paraguay for conservation of neotropical migrants; promote and test the adoption of best management practices that benefit both migratory birds and rice production; restore wetland habitats for neotropical migrants; and continue to raise awareness among producers of the importance of rice fields for the conservation of migratory birds. Fiscal Year 2013: Projects not yet selected. Program expects to fund 25-35 awards to support public-private partnerships carrying out projects in the United States, Canada, Latin America, and the Caribbean that promote the long-term conservation of Neotropical migratory birds and their habitats through 1) Protection and management of neotropical migratory bird populations; 2) Maintenance, management, protection, and restoration of neotropical migratory bird habitat; 3) Research and monitoring; 4) Law enforcement; and 5) Community outreach and education. Fiscal Year 2014: Projects not yet selected. Program expects to fund 25-35 awards to support public-private partnerships carrying out projects in the United States, Canada, Latin America, and the Caribbean that promote the long-term conservation of Neotropical migratory birds and their habitats through 1) Protection and management of neotropical migratory bird populations; 2) Maintenance, management, protection, and restoration of neotropical migratory bird habitat; 3) Research and monitoring; 4) Law enforcement; and 5) Community outreach and education.

CRITERIA FOR SELECTING PROPOSALS:

Proposals will be screened and selected for funding primarily on the basis of criteria contained in 16 U.S.C. 6101. However, proposals will also be evaluated on: scope and significance of effort; importance of resource values; relationship of project to other efforts locally/regionally; and feasibility and cost-effectiveness. Selection criteria are available on the program website.

15.636 ALASKA SUBSISTENCE MANAGEMENT

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Alaska National Interest Lands Conservation Act (ANILCA) of 1980, Title VIII, Public Law 96-487, 16 U.S.C. 3101-3233, Section 809. Fish and Wildlife Coordination Act (16 U.S.C. 661 to 666).

OBJECTIVES:

To identify and provide information needed to sustain subsistence fisheries and wildlife management on Federal public lands, for rural Alaskans, through a multidisciplinary, collaborative program. Three programs are administered under ANILCA to fulfill this objective. The Fisheries Resource Monitoring Program (Monitoring Program) funds approximately 80 studies annually to provide information on stock status and trends, harvests, and traditional ecological knowledge to manage and regulate Federal subsistence fisheries. The Partners for Fisheries Monitoring Program (Partners Program) strengthens Alaska Native and rural involvement in subsistence fisheries management and research. The program provides funds directly to Alaska Native and rural organizations to hire fishery biologists, social scientists, and educators to implement fisheries monitoring projects and rural internship programs. The Liaison and Staff Support Grant to the State of Alaska is directed specifically to the Alaska Department of Fish and Game. The grant defrays salary and travel expenses that occur in support of the coordination between State and Federal subsistence fish and wildlife programs.

Award Procedure:

For the Monitoring Program, an inter-agency technical review committee evaluates proposals, and, for those selected for further consideration, subsequently the full investigation plans. The committee develops a draft monitoring program from the highest priority projects, based on their technical review and available funds. The draft monitoring plan is reviewed by ten regional advisory councils and the public. An inter-agency staff committee reviews all recommendations, and provides recommendations. The Federal Subsistence Board selects projects for the Monitoring Plan taking into account all recommendations and comments. Funding of the Monitoring Plan is administered by the Office of Subsistence Management (OSM).

For the Partners Program, an internal review is conducted to evaluate proposals and make recommendations for funding. The evaluations are based on the criteria outlined in the request for federal assistance. The proposals are ranked and the OSM Assistant Regional Director selects proposals that best support the program within available funding. Once a Monitoring Program project or Partners Program position is selected for funding, a funding instrument, i.e., notice of award, between Fish and Wildlife Service and the recipient is drafted by the OSM. The award is processed by OSM through the contracting office and sent to the recipient for signature. The award is considered executed when signed copies of the agreement are received from the recipient and the contracting office has obligated funds to the agreement. The awards are administered by OSM. For the Liaison and Staff Support Grant, the Alaska Department of Fish and Game is the only non-Federal entity with management authority over fish and wildlife resources. RELATED PROGRAMS:

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2012: Ex. 1 - 12-352 Upper Kuskokwim River Whitefish Climate Change Trends. This three-year project examines whitefish harvests within the broader context of non-salmon harvest efforts in two Kuskokwim River drainage communities, Lime Village and Nikolai. Given the importance of whitefish subsistence harvests in the upper Kuskokwim River, this research will attempt to determine why harvest levels for key species have declined over the past few decades.

Ex. 2 - 12-500 Copper River Chinook Salmon RFID Feasibility. This two-year project examines the feasibility of placing radio frequency identification readers into a Copper River tributary to monitor Chinook salmon escapement.

Ex. 3 - 12-207 Yukon River Bering Cisco Spawning Origins Telemetry. This three-year project would use radio telemetry to document the spawning locations and timing of Bering cisco in the Yukon River drainage. Fiscal Year 2013: No new awards. Fiscal Year 2014: No new awards until completion of investigation plan reviews in 2013 and Federal Subsistence Board approval in January 2014. An example as identified in the Information Needs document for the 2014 Funding Opportunity:

For the Northern Alaska Region, the 2014 Request for Proposals is focused on the following priority information needs:

Baseline and ongoing harvest assessment and monitoring of subsistence fisheries in the Northwest Arctic and North Slope regions to supplement available information.

Historic trends and variability in harvest locations, harvests, and uses of non-salmon fish, particularly for North Slope communities.

Ipiaq natural history of fish, land use, place name mapping, species distribution, and methods for and timing of harvests, and Ipiaq taxonomy of nonsalmon fish species.

CRITERIA FOR SELECTING PROPOSALS:

For the Monitoring Program, each proposal is evaluated using the following four criteria: (1) Strategic Priorities: Studies must be responsive to identified issues and information needs. All projects must have a direct association to a Federal subsistence fishery, and either the subsistence fishery or fish stocks in question must occur in waters within or adjacent to Federal public lands; (2) Technical and Scientific Merit: Technical quality of the study design must meet accepted standards for information and collection, compilation, analysis, and

reporting. Studies must have clear objectives, appropriate sampling design, correct analytical procedures, and specified progress and final reports; (3) Investigators Ability and Resources: Investigators and their organizations should have demonstrated technical and administrative expertise to complete prior studies, or have co-investigators or appropriate partnerships with other organizations to meet all requirements of the study; (4) Partnership-Capacity Building: Studies must include appropriate partners and contribute to building capacities of rural organizations, local communities, and residents to participate in fisheries resource management. Investigators and their organizations should be able to demonstrate the ability to maintain effective local relationships and a commitment to capacity building. For the Partners Program, each proposal is evaluated using the following equally weighted criteria: (1) Each project must have direct linkage to Monitoring Program projects; (2) Ability to successfully implement program identified under section IV, ii, Content and Form of Application, Describe the Program; (3) Strategic priority and past performance of the Monitoring Program projects identified in the proposal; (4) Letters of support from tribal and rural organizations, government agencies, project investigators, and schools/ universities; (5) Annual and total cost of the proposal, including use of in-kind or matching contributions that either decrease cost or expand support for implementing the Partners Program; (6) Past performance on implementing Monitoring Program projects; (7) Past performance on current or past agreements with the Office of Subsistence Management; (7) Previous experience in mentoring, training, and supervising personnel; and (8) Past and current accounting practices to ensure deliverables and accountability.

Each of these items carries a "Go/No-Go" impact: direct linkage of a Monitoring Program project, enrollment in CCR; affirming in writing in your application that you have enrolled in CCR; providing your DUNS Number; submission of completed SF-424, SF-424A, and SF-424B package; and submission of approved Indirect Cost Negotiation Agreement if requesting reimbursement for indirect costs. For the Liaison and Staff Support Grant, the Alaska Department of Fish and Game is the only non-federal entity with management authority over fish and wildlife resources. This grant agreement is not open to competition outside the Alaska Department of Fish and Game.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2012: Lamprey Conservation in the Umpqua Basin Project 2012 ‐ \$200,000

The Cow Creek Band of Umpqua Indians partnered with the Service to affect long-term change toward conservation of lamprey in the Umpqua Basin and meet the goals established in the Pacific Lamprey Conservation Plan. The Pacific lamprey is a culturally important species to the Tribe and an historic food source. Restoration of this unique fish can meet tribal and Service objectives.

Kukutali Preserve 2012 ‐ \$200,000

The Swinomish Indian Tribal Community will inventory, manage, protect, and enhance wildlife and habitat resources on the 118 acres of tidelands, nearshore, and old growth forests of Kukutali Preserve on the Swinomish Reservation in Washington. A key element will include the creation of a 50‐year management plan for the Kukutali Preserve by the Tribe and Washington State Parks as co‐owners and managers of the Preserve. The restoration project is designed to protect the threatened Skagit Chinook salmon by providing protection to critical rearing habitat.

Roundtail Chub Conservation Management 2012 ‐ \$186,707

The endangered Roundtail chub is found throughout the Colorado River basin from Colorado and Wyoming to the northern Sonora. The Southern Ute Indian Tribe Wildlife department is taking measures to insure the stability of chub populations in reservation riverine habitats. Targeted sites will include typically open areas in the deepest pools and eddies of middle sized to larger streams.

15.647 MIGRATORY BIRD CONSERVATION

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Fish and Wildlife Act of 1956, as amended, 16 U.S.C. 742a-754; Fish and Wildlife Coordination Act of 1958, 16 U.S.C.661-667(e); Fish and Wildlife Conservation Act, 16 U.S.C. 2901-2911; and Migratory Bird Treaty Act, 16 U.S.C. 709a.

OBJECTIVES:

To maintain and enhance populations and habitats of migratory bird species found in the Upper Midwest (IL, IN, IA, MI, MN, MO, OH, WI).

TYPES OF ASSISTANCE:

DIRECT PAYMENTS FOR A SPECIFIED USE; Project Grants

(Discretionary)

USES AND USE RESTRICTIONS:

Grants and payments may be used for the conservation of any bird species protected by the Migratory Bird Treaty Act and occurring in U.S. Fish and Wildlife Service (USFWS) Region 3 (Upper Midwest, including IL, IN, IA, MI, MN, MO, OH, and WI). Special emphasis will be placed on Birds of Concern in the Midwest (see <http://www.fws.gov/midwest/midwestbird/concern.html>) as these species are experiencing known or suspected population declines, are recreationally important, or are causing biological or social conflicts. Implementing national, regional, and flyway bird conservation plans, including the Partners in Flight North American Landbird Conservation Plan (<http://www.partnersinflight.org>), U.S. Shorebird Conservation Plan (<http://shorebirdplan.fws.gov>), North American Waterbird Conservation Plan (<http://www.waterbirdconservation.org>), North American Waterfowl Management Plan (<http://www.fws.gov/birdhabitat/NAWMP/index.shtm>), and Mississippi Flyway bird management plans, is the USFWS's highest priority, and proposals related to the priorities identified in these plans and Bird Conservation Region and state-level bird conservation planning efforts will receive high funding consideration. The following activities are also of high interest to the USFWS: a) Population surveys, monitoring, and assessments to determine the status, trends, distribution, and demography of bird species and groups of concern. Emphasis will be placed on landscape-level applications of standardized inventory and monitoring protocols as identified through the Midwest Coordinated Bird Monitoring Partnership (<http://midwestbirdmonitoring.ning.com>). Local-scale bird monitoring (e.g., local land management units) will generally not be a focus of this grant program, nor will support for long-term operational bird monitoring efforts. Rather, the program seeks to address coordination of monitoring efforts and development and evaluation of new survey and monitoring techniques (both field and analytical); b) Conservation of focal species for which conservation plans and/or working groups have been developed and research, monitoring, and other priorities have been identified. Examples of focal species include: Golden-winged Warbler, Cerulean Warbler, Henslows Sparrow, Bobolink, other Midwestern grassland birds, American Woodcock, Wilsons Phalarope, Upland Sandpiper, Marbled Godwit, Common Tern, Black Tern, King Rail, and Lesser Scaup (for further information on focal species, contact Steve Lewis, USFWS, steve_j_lewis@fws.gov); c) Strategic Conservation, wherein the USFWS integrates biological planning, landscape design, conservation delivery, and monitoring and evaluation in a way that generates the adaptive feedback loops that enable sound decisions and constantly improve our efficiency and effectiveness in saving birds (<http://www.fws.gov/midwest/science/SHC/FAQ.htm>). Strategic conservation involves applied research, including studies of bird habitat requirements, threats, limiting factors, and population responses to habitat conservation activities; and use of Geographic Information Systems, modeling, and similar tools to identify bird habitat focus areas and further bird conservation planning efforts; d) Avian health and disease. Increasing expansion of human populations has led to habitat fragmentation, changes in land-use patterns, and increased pressure on wild bird populations, and globalization of marketing and distribution has increased avian zoonotic and emerging disease risks. Many of these emerging diseases involve avian reservoirs or susceptible hosts. Increasing the complexity of this picture are changes in climate; avian populations may need to alter site fidelity in response to weather patterns, and this will introduce new opportunities for transmission of avian diseases and place pressure on populations already stressed by anthropogenic factors. To address these issues, the USFWS has established the Avian Health and Disease Program to conduct work in avian health and disease surveillance, response, and management in wild bird populations. Among our areas of interest are: establishing avian health baselines; identifying existing and emerging avian health and disease risks, especially related to trematodiasis, Newcastle disease, avian influenza, and botulism; ensuring avian disease preparedness and prevention; and developing, guiding, and implementing appropriate and effective avian disease management actions; e) Bald Eagle Permitting Information Needs: In 2007, the Bald Eagle was removed from the Endangered Species List and in 2009 the USFWS established two types of permits that allow for limited take and disturbance of Bald Eagles that may be the result of otherwise legal activities. We seek proposals that address information needs related to the processing of these permits. In particular, we are interested in

research that addresses the following subjects, in priority order: Bald Eagle migration pathways; Bald Eagle local flight pathways and behavior; and approaches for assessing the impacts of wind development, powerlines, and other disturbances near Bald Eagle nests or roosts. 100%.

OBJECTIVES:

The U.S. Fish and Wildlife Service (USFWS) uses a science-based, adaptive framework for setting and achieving broad-scale conservation objectives that strategically address the problems fish and wildlife will face in the future. This framework, called Strategic Habitat Conservation, is based on the principles of adaptive management and uses population and habitat data, ecological models, and focused monitoring and assessment efforts to develop and implement strategies that result in measurable fish and wildlife population outcomes. This process uses the best available scientific information to predict how fish and wildlife populations will respond to changes in the environment, thus enabling the USFWS to focus habitat conservation and other management activities where they will be most effective. In addition, the USFWS needs focused, applied science directed at high impact questions surrounding threats to fish and wildlife resources for which management and/or mitigation is required to maintain species at healthy, sustainable, desired levels. USFWS must base its decisions on the best science available, in order to defend its regulatory decisions, biological opinions and species conservation recommendations to land managers.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

Support will be provided for science projects: to include species risk and vulnerability assessments, inventory and monitoring, population and habitat assessments, biological planning and conservation design, management evaluation and research, and conservation genetics; to identify and implement landscape-scale conservation solutions to such issues as climate change, land use change, invasive species spread, and fire frequency changes; and to address high impact questions surrounding threats to fish wildlife, and plants, providing answers needed to manage species to healthy, sustainable, desired levels. 15.672 WILDLIFE WITHOUT BORDERS AMPHIBIANS IN DECLINE FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Endangered Species Act of 1973, as amended (16 U.S.C. 1531-43).

OBJECTIVES:

The goal of this grants program is to provide funding for specific conservation actions that have a high likelihood of creating durable benefits to amphibian species facing immediate threat of extinction, such as: Protection of at-risk populations; Veterinary/wildlife health interventions; Activities related to execution of species survival plans; Strengthening local capacity to conserve the target species; Actions addressing unsustainable exploitation; Efforts to mitigate or stop wildlife-human conflict; and Rehabilitation and rescue. Proposed project work should occur within the species range, or, if work is to be conducted outside of the range, the proposal should show a clear relevance to its conservation.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

The program will fund projects that conserve the worlds rapidly declining amphibian species. Species eligible for funding are those frogs, toads, salamanders, newts, and caecilians that face a very high risk of extinction in the immediate future. Species should meet the criteria to be listed as Critically Endangered or Endangered on the International Union for the Conservation of Nature (IUCN) Red List. Species listed as Data Deficient on the IUCN Red List are also eligible if the applicant can provide information that suggests a similar urgency for conservation action. Species listed as Extinct in Wild are eligible if the applicant is proposing a reintroduction attempt. The following species are NOT eligible for funding: Species with natural habitat range located primarily within the United States, territories of the United States, Canada, and the high income economies of Europe; and Non-amphibian species.

Applied research projects should address specific management needs and actions. Funds provided under this program will not be used for: the purchase of firearms or ammunitions; buying of intelligence information or paying informants; gathering information by persons who conceal their true identity; law enforcement operations that prompt suspects to carry out illegal activities so they may be arrested (entrapment); or any activity that would circumvent sanctions, laws or regulations of either the U.S. or the country in which the activity would occur. Funds may not be used to provide material support or resources to individuals, entities, or organizations of countries that have been identified by the U.S. Department of State as state sponsors of terrorism. This program is administered in compliance with the Federal Grants and Cooperative Agreements Act of 1977, as amended. These funds may not be used towards training U.S. Federal Government personnel. Project work should occur in countries outside of the United States that have within their boundaries amphibian habitats and be conducted by any person or group with the demonstrated expertise required for the successful implementation of the proposed project. 100%.

Applicant Eligibility:

Applications may be submitted by any non-domestic (outside of the United States) government agency responsible for amphibian conservation and any other U.S.-based or non-domestic public or private organization or institution or individual with demonstrated experience in amphibian conservation.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2012: The program supported 1) a conservation effort for multiple amphibian species in the Atlantic Forest of Brazil, by determining the prevalence of chytrid fungus infection among six endangered frog species in relation to the abundance of the non-native American bullfrog (*Lithobates catesbeianus*). Specific activities include: field surveys at five Atlantic Forest sites to determine the abundance of American bullfrogs; field surveys of chytrid fungus prevalence among focal endangered species; DNA sequence analysis of the chytrid fungus detected at the survey sites to determine the relative distribution and frequency of different chytrid genotypes; and outreach to government personnel and other key stakeholders to inform them of the presence of chytrid fungus in the Atlantic forest, the association between chytrid, bullfrog farms, and escaped bullfrogs, and to discuss mitigation measures. 2) a conservation effort for a harlequin frog species (*Atelopus varius*) in southeastern Costa Rica, by establishing the species status and by preventing the spread of the chytrid fungal pathogen. Specific activities include: field surveys to determine the species distribution, community, and ecology in Las Tablas Protected Area in the Talamanca region, where a remnant population was detected in 2009 after most populations had gone extinct; field surveys of native and non-native predators, including trout; field surveys of chytrid prevalence and of potential carriers of the fungal pathogen; and community outreach to reduce water contamination and to promote endangered species conservation. 3) Conducted field surveys in areas outside the Lao Newts known distribution and by working with local communities and other key stakeholders to reduce unsustainable harvest. Specific activities include: training of field assistants from the National University of Laos Faculty and Science Department on survey techniques; field surveys in the southern part of the Nam Et Phou Louey National Protected Area and the Kham District along the Vietnam border to determine if the species occurs within a protected area and outside its known distribution; outreach to local communities to inform villagers of the species status and legal protection and to reduce harvesting for the illegal international pet trade; and (4) collaboration with the Provincial Agriculture and Forestry Services Offices to ensure that the species occurs within a conservation area. Fiscal Year 2013: Program has not yet selected projects for funding. Fiscal Year 2014: Program has not yet selected projects for funding.

CRITERIA FOR SELECTING PROPOSALS:

To be considered for funding, proposals must specify a conservation action for an eligible species. The Division of International Conservation ranks proposals by scoring how well each addresses the program priority areas and the requested proposal elements. High priority, well-justified and feasible projects that address all of the requested proposal elements will receive higher scores.

These scores are not the sole determining factor for final funding decisions.

Other review criteria include considering the degree to which a project:

Demonstrates the high degree of threat or extinction risk that the target species experiences;

Addresses a conservation need of a species that is exceptional ecologically, evolutionarily, or in conservation (Note that it is the responsibility of the applicant to articulate what quality makes the species exceptional, but examples would include a species that strongly influences the ecological community in which it occurs, a species that is genetically distinct with few close relatives, a species that exhibits a distinctly unusual behavior, or a species whose conservation would catalyze the conservation of multiple species);

Occurs in a region or conserves a taxon poorly represented in the Amphibians in Decline portfolio;

Makes a significant and durable contribution to the survival of the species, or to the integrity of its habitat or an area with significant conservation value for

the species;

Addresses a conservation need identified by a specialist group or by a regional, national or global strategy;

Applies the best scientific and technical information and methods available in support of project activities;

Includes the participation of local partners in project activities, including meaningful involvement of government, community or civil society stakeholders;

Is feasible and likely to be successfully implemented as stated;

Advances the practice of conservation by being designed and implemented in a way that the successes and failures of activities can be credibly assessed and shared;

Emphasizes conservation action rather than data collection; and

Implements activities or provides benefits that have the potential to be sustaining beyond the period of performance of the grant, including training that develops local capacity to implement or manage conservation projects.

The above considerations are not listed in any order of importance. All considerations listed do not necessarily apply to every proposal. Following review, applicants may be asked to revise the project scope and/or budget before a final funding decision can be made.

15.673 WILDLIFE WITHOUT BORDERS CRITICALLY ENDANGERED ANIMAL CONSERVATION FUND

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Endangered Species Act of 1973, as amended (16 U.S.C. 1531-43).

OBJECTIVES:

The goal of this grants program is to reduce threats to highly endangered wildlife in their natural habitat. Proposals should identify specific conservation actions that have a high likelihood of creating durable benefits, such as: Protection of at-risk populations; Veterinary/wildlife health interventions; Activities related to execution of species survival plans; Strengthening local capacity to conserve the target species; Actions addressing unsustainable exploitation; Efforts to mitigate or stop wildlife-human conflict; and Rehabilitation and rescue.

Project activities that emphasize data collection and status assessment should describe a direct link to management action, and explain how lack of information has been a key limiting factor for management action in the past. Proposals that do not identify how actions will reduce threats, or do not demonstrate a strong link between data collection and management action, have a lower likelihood of being selected. Proposed project work should occur within the species range, or, if work is to be conducted outside of the range, the proposal should show a clear relevance to its conservation.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2012: The program supported 1) A conservation effort for the snow leopard (*Panthera uncia*) in the Annapurna and Manaslu Conservation Areas, Nepal, by reducing predation on livestock and improving animal husbandry practices. Specific activities include: stakeholder meetings to build consensus on project goals, to develop village plans to reduce depredations, and to promote animal husbandry practices that deter predation; a corral survey to identify depredation hotspots and husbandry practices; predator-proofing of at least six corral sites; and a camera trap and genotype study to engage communities in monitoring and to identify individual problematic snow leopards. 2)The protection of remaining Siamese crocodile breeding colonies in the Cardamom Mountains of southwest Cambodia and supplementing the wild population through the release of captive juveniles. Specific activities include: release of at least 20 juveniles into the wild from the Phnom Tamao Wildlife Rescue Centre, including five individuals with radio-telemetry tags for post-release monitoring; field surveys of crocodile abundance and reproduction; community patrols of at least three wetland sites and one reintroduction site to deter and report illegal activities; development of income-generating projects that establish livelihood alternatives to poaching and encroachment on natural habitats; and government and stakeholder meetings to build support for six national crocodile sanctuaries and to coordinate activities between groups. 3) A conservation effort for the Chinese crested tern (*Sterna bergsteini*) in the Jiushan Islands, China, by using bird decoys and audio playbacks to encourage terns to nest on suitable islands. Specific activities include: an island survey to identify suitable nesting habitat; installation of at least 400 decoys, at least 3 audio playback systems, and observation blinds to encourage use of endangered species and to monitor human disturbance; and outreach with government officials and local communities to build support for endangered species conservation. High priority, well-justified and feasible projects that address all of the requested proposal elements will receive higher scores. These scores are not the sole determining factor for final funding decisions. Other review criteria include considering the degree to which a project:

- Demonstrates the qualification of the target species as experiencing a high degree of threat or extinction risk; Addresses a conservation need of a species that is exceptional ecologically, evolutionarily, or in conservation (Note that it is the responsibility of the applicant to articulate the exceptional quality of the species, but examples would include a species that strongly influences the ecological community in which it occurs, that is genetically distinct with few close relatives, that exhibits a distinctly unusual behavior, or whose conservation would catalyze the conservation of multiple species); Occurs in a region or conserves a taxon poorly represented in the CEACF portfolio;
- Makes a significant and durable contribution to the survival of the species, or to the integrity of its habitat or an area with significant conservation value for the species;
- Addresses a conservation need identified by a specialist group or by a regional, national or global strategy;
- Applies the best scientific and technical information and methods available in support of project activities;
- Includes the participation of local partners in project activities, including meaningful involvement of government, community or civil society stakeholders;
- Is feasible and likely to be successfully implemented as stated;
- Advances the practice of conservation by being designed and implemented in a way that the successes and failures of activities can be credibly assessed and shared;
- Emphasizes conservation action rather than data collection; and
- Implements activities or provides benefits that have the potential to be sustaining beyond the period of performance of the grant, including training that develops local capacity to implement or manage conservation projects.

These considerations are not listed in order of importance. All considerations listed do not necessarily apply to every proposal. The Division of International Conservation occasionally receives and funds proposals outside of the announced submission deadlines that are of such a critical nature (examples include projects resulting from a natural disaster, disease outbreak, other imminent threats or population crash, among others) that they warrant immediate consideration.

(National Register)

National Historic Preservation Act of 1966, as amended, Public Law 89-665, 16 U.S.C. 470, 80 Stat. 915 et seq.; Executive Order 11593, May 13, 1971; Tax Reform Act of 1976, Public Law 94-455; Public Law 94-442; 90 Stat. 1519; Revenue Act of 1978; Public Law 95-600; National Historic Preservation Act Amendments of 1980; Public Law 96-515; Tax Treatment Extension Act of 1980; Public Law 96-541; Economic Recovery Tax Act of 1981, Public Law 97-340; Tax Reform Act of 1984, Public Law 98-369; Tax Reform Act of 1986, Public Law 99-514; National Historic Preservation Act Amendments of 1992, Public Law 102-575; Executive Order 13287, March 3, 2003.

OBJECTIVES:

To expand and maintain the National Register of Historic Places for planning, preservation, research, public education and tourism efforts; to make the information on districts, sites, buildings, structures and objects of historical, architectural, archeological, engineering and cultural significance more accessible to the public in order to increase and broaden the public's understanding of the information, foster a national preservation ethic, and to promote greater appreciation of America's heritage; to coordinate with Federal agencies, State and Tribal preservation offices, and the Advisory Council on Historic Preservation in the implementation of laws and policies pertaining to historic preservation; and to establish liaison with and give guidance to communities under Title I of the Housing and Community Development Act of 1974 (see 14.218).

TYPES OF ASSISTANCE:

ADVISORY SERVICES AND COUNSELING

USES AND USE RESTRICTIONS:

Professional advice is provided in determining whether a property qualifies for inclusion in the National Register according to the Criteria for Evaluation contained in 36 CFR Part 60. Listing does not affect the range of actions an owner may take, as long as Federal funding, licensing or assistance is not involved and no governmental unit receives any authority or control over the property, including its use and disposition. However, if a Federal project might have an effect on a property listed or eligible for listing, the agency involved must provide the Advisory Council on Historic Preservation a reasonable opportunity to comment pursuant to 36 CFR Part 800. Registered properties also become eligible to receive grants from the Historic Preservation grant-in-aid program of the Department of the Interior (see 15.904), when funding is available, to receive home improvement loans from the Department of Housing and Urban Development under Title I of the National Housing Act

as amended on October 18, 1974, or to participate in the community grant program provided by the Housing and Community Development Act of 1974. Major Federal tax advantages can be received on certain rehabilitation expenditures for "certified historic structures" and for charitable contributions for conservation purposes of partial interests in historic properties.

Applicant Eligibility:

Eligible applicants are the States and territories as defined in the National Historic Preservation Act, operating under programs administered by State Historic Preservation Officers appointed by the Governors (listed in Appendix IV of the Catalog); or the Tribal Preservation Officers; Federal agencies required to nominate and consider historic properties within their jurisdiction or as a result of the National Environmental Policy Act of 1969 and Executive Order 11593, and the National Historic Preservation Act operating under programs administered by representatives (listed in Appendix IV of the Catalog) appointed by the heads of the agencies; and, in States without approved State Historic Preservation Programs, persons and local governments. Applicants eligible for Federal Tax benefits include owners of individually listed properties and properties certified by the Secretary of Interior as being historic and in a district certified as historic.

Beneficiary Eligibility:

Public and private owners of historic properties listed in the National Register of Historic Places or of properties certified by the Secretary of Interior as being historic and in a district certified as historic.

Credentials/Documentation:

Nominations are submitted on standard nomination forms provided upon request to the State Historic Preservation Officers, Federal Preservation Officers, and Tribal Preservation Officers who must certify that each property was properly nominated. Procedures for National Register nominations are found in 36 CFR Part 60. Request for determinations of eligibility must be adequately documented as described in Appendix A of 36 CFR Part 63. Requests for certification of historic properties must be documented as described in Section 36 CFR Part 67 and requests for certification of State and local statutes and districts must be documented as described in Section 36 CFR Part 67. To participate in the program, each State must have an approved review board, an approved State staff, and an accepted State historic preservation plan. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

For National Register nominations the signature of the State Historic Preservation Officer on the nomination form certifies that the State review board has reviewed the nomination and that all applicable procedures, including notification to the property owner at least once during the nomination process, have been followed. The signature of the Federal Preservation Officer for Federal property or the Tribal Preservation Officer on Tribal lands on the nomination form certifies that the property has been nominated in compliance with the National Historic Preservation Act. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Anyone may prepare a National Register nomination. After the property is approved by the State Historic Preservation Officer, Tribal Preservation Officer, or Federal Preservation Officer, the nomination form or letter of request for a determination of eligibility should be forwarded to the Keeper of the National Register, National Park Service, Department of the Interior, 1849 C Street, NW, Mail Stop 2280, Washington, DC 20240. Nominations submitted for review are announced in the Federal Register to provide a period of comment. Documentation for certification for Federal tax benefits of historic buildings and structures, State and local statutes and districts should be forwarded to the appropriate State Historic Preservation Office, which sends it to the appropriate National Park Service Office.

Award Procedure:

The professional review staff of the National Register determines whether the properties meet the National Register criteria as contained in 36 CFR Part 60. Properties that meet the criteria are then officially listed in the National Register

and become eligible for Federal tax benefits and Historic Preservation Fund grants when they are available.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

After nomination by State, 45 days at Federal level.

OBJECTIVES:

To provide financial assistance to the States and their political subdivisions for the preparation of Statewide Comprehensive Outdoor Recreation Plans (SCORPs) and acquisition and development of outdoor recreation areas and facilities for the general public, to meet current and future needs.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Land acquisition and development grants may be used for a wide range of outdoor recreation projects, such as picnic areas, inner city parks, campgrounds, tennis courts, boat launching ramps, bike trails, swimming pools, playing fields, and support facilities such as roads, water supply, etc. Facilities must be open to the general public and not limited to special groups. Every park or outdoor recreation area acquired or developed with assistance under this program must remain available and accessible for public outdoor recreation use forever. Development of basic rather than elaborate facilities is favored. Operation and maintenance of facilities are not eligible expenses for funding. States only are also eligible to apply for grants to revise and update existing SCORPs; prepare new SCORPs; conduct statewide surveys, technical studies, data collection and analysis; and for other planning purposes that are clearly related to SCORP refinement and improvement.

Applicant Eligibility:

For planning grants, only the State agency formally designated by the Governor or State law as responsible for the preparation and maintenance of the SCORP is eligible to apply. (Treated as States for this purpose are the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands, and Guam.) For acquisition and development grants, the above designated agency may apply for assistance for itself, or on behalf of other State agencies or political subdivisions, such as cities, counties, and park districts. Additionally, Indian tribes that are organized to govern themselves and perform the functions of a general purpose unit of government qualify for assistance. Individuals, nonprofit organizations, and private organizations are not eligible.

Beneficiary Eligibility:

The general public. For planning grants, same as Applicant Eligibility.

Credentials/Documentation:

The State Liaison Officer (SLO), who is appointed by the Governor or designated in State legislation to administer the program in the State or Territory, must provide assurance that the project is consistent with the SCORP; i.e., that it meets high priority recreation needs shown in the action program portion of the Plan. The State must have a sufficient balance of LWCF funding and the required match available for the project. The sponsoring agency must permanently dedicate the project to public outdoor recreation and assume responsibility for its operation and maintenance. SCORPs must cite the State's legal authority to participate in the Land and Water Conservation Fund program. Eligibility of costs will be determined in accordance with OMB Circular A-102 (43 CFR Part 12, Subpart C), "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments" and OMB Circular A-87, Cost Principles for State, Local and Indian Tribal Governments. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

The SLO has the prerogative for initial determination of project eligibility, priority need, and order of fund assistance within the State. All project proposals are submitted to the National Park Service by the SLO. Environmental impact information is required for this program; a screening form is used to determine whether an EA or EIS is necessary. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." If the State has selected the program for review, the applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires when applying for federal assistance. An environmental impact statement is required for this program. An environmental impact assessment is required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

OMB Circular No. A-102 applies to this program. This program is excluded from coverage under OMB Circular No. A-110. States and Territories must have a current SCORP approved by NPS to be eligible to submit grant applications. Proposals selected by the State to forward to NPS must be accompanied by the standard federal application forms required by 43 CFR Part 12, Subpart C, "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments." Proposal budgets must comport with OMB Circulars A-87 and A-102. Basic environmental information or evaluation is required and will be assessed by the National Park Service to determine whether an environmental impact statement is needed. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." If the State has selected the program for review, the applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires when applying for federal assistance.

Award Procedure:

Proposals are reviewed by the NPS field office, where final action may be taken. All grants are made to the State lead agency and if applicable passed through to the project sponsor, whether State or local government.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

Approximately 30-60 days for acquisition and development projects; 60 days for planning projects.

Appeals:

State may appeal to the Secretary of the Interior.

Renewals:

Project agreements may be amended to change the scope, funding amount, or duration. Must be approved by the National Park Service.

Formula and Matching Requirements:

Statutory Formula: Each year, States and Territories receive an overall allocation of funds based on a statutory formula. Depending on the amount appropriated by Congress, a certain percentage (forty percent of appropriations of up to \$225 million, thirty percent of the next \$275 million, and twenty percent of any additional appropriation) is split equally among the 51 States (for this purpose American Samoa, the District of Columbia, Guam, the Northern Mariana Islands, Puerto Rico, and the Virgin Islands are treated as one State and split an apportionment). The remaining percentage is apportioned on the basis of need.

Matching Requirements: The Land and Water Conservation Fund Act requires that the share of federal funds not exceed 50 percent of the total project cost. Generally, match must be derived from State, local, or private sources, but under certain conditions all or part of the project sponsor's matching share may be from other Federal assistance programs, such as Community Development Block Grants, when such use is allowable under the other programs sponsoring legislation. Otherwise, no other Federal funds may be applied to the project cost, even if all matching requirements are met.

MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Funds are available for obligation during the fiscal year in which they are appropriated and for the two following fiscal years. The assistance period for individual projects varies and may be extended but on average is three years. Complex projects may be broken down into stages, with one being initially approved and the remainder qualified for activation at a later date. Except for project preparation costs, all costs must be incurred within the project period to be eligible for reimbursement. Planning projects may not be phased. See the following for information on how assistance is awarded/released: On an average of three years.

Reports:

Program reports are not applicable. Cash reports are not applicable. All projects are monitored for progress through consolidated performance reports, which should be at least annually. State inspection reports are submitted every 5 years on completed projects stating whether the properties acquired and/or developed with fund assistance are still being used in accordance with the agreement. For planning projects, end products are specified in the application for assistance. Financial reports are required with all billings which should be at least annually. Consolidated performance reports are required which should be at least annually.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. HPF Hurricane Sandy Relief Grant Program

FEDERAL AGENCY:

National Park Service, Department of the Interior

AUTHORIZATION:

Disaster Relief Appropriations Act, 2013 (P.L. 113-2)

National Historic Preservation Act, as amended, 16 U.S.C. 470(e) and (h), Establishment of Historic Preservation Fund

National Historic Preservation Act, as amended, 16 U.S.C. 470a(j), Develop and implement a comprehensive preservation education and training program.

OBJECTIVES:

The purpose of this supplemental funding is to provide technical assistance and emergency repairs to historic and archeological resources impacted by Hurricane Sandy. Only hurricane-related damage is eligible for grant assistance. The NPS will rely on the assessment and documentation of the SHPO offices to determine eligibility of storm damaged resources and eligible grant expenditures related to the storm damage.

TYPES OF ASSISTANCE:

Formula Grants; Project Grants

USES AND USE RESTRICTIONS:

Hurricane Sandy HPF relief grants must be used to preserve properties listed in or eligible for listing in the National Register of Historic Places. States may also use the funds for 1) hiring additional term, temporary, or contractor staff to enable the SHPOs to expeditiously conduct the reviews of all Federally funded or sponsored projects required by Section 106 of the National Historic Preservation Act, 2) providing technical assistance to local government officials and to all owners of properties listed in or considered eligible by the State Historic Preservation Officer for listing in the National Register of Historic Places; and 3) architectural/engineering plans and specifications, economic feasibility studies, survey and damage assessments, construction work to stabilize and repair historic and archeological properties, and survey of hurricane-damaged properties.

Applicant Eligibility:

Eligible applicants are State and Tribal Historic Preservation Offices located within areas receiving major disaster declarations from FEMA.

Beneficiary Eligibility:

States and Tribes.

The standard application forms required by 43 CFR 12, Subparts C and F, must be used. In addition, applicants must also submit an Action Plan Narrative providing an overview of needs in the State.

Award Procedure:

Using the FEMA major disaster declarations as a starting point for determining the method of apportioning the \$47.5 million, the NPS will divide the appropriation into two groups. Group 1 includes \$38 million and will be apportioned to the four States containing counties that FEMA designated as eligible to receive both Individual and Public Assistance Connecticut, New Jersey, New York, and Rhode Island. The remaining funds will comprise Group 2, and will be awarded to the remaining eight States, the District of Columbia, and any Federally-recognized Indian Tribes located in those States, through an application process and based on need as described in proposals submitted by the States and Tribes to the NPS.

In apportioning the \$38 million from Group 1 that will be assigned to CT, NJ, NY, and RI, because State Historic Preservation Offices (SHPO) in those States have not yet completed damage assessments to historic properties, there is no single best method of determining need. Funds will be distributed using a formula that takes into account three evaluation factors, each having equal weight: 1) population of counties eligible for both IA and PA, 2) land area of counties eligible for both IA and PA, and 3) the number of properties listed in the National Register of Historic Places in counties eligible for both IA and PA.

16.111 JOINT LAW ENFORCEMENT OPERATIONS (JLEO)

FEDERAL AGENCY:

Criminal Division, Department of Justice

AUTHORIZATION:

Comprehensive Crime Control Act of 1984, 28 U.S.C 524(c)(1)(I).

OBJECTIVES:

The Department of Justice Asset Forfeiture Program (the Program) is a Federal law enforcement initiative that removes the tools of crime from criminal organizations, deprives wrongdoers of the proceeds of their crimes, recovers property that may be used to compensate victims, and deters crime. Section 524(c)(1)(I) of title 28, United States Code, states that the Assets Forfeiture Fund (AFF) may be used for payment of overtime salaries, travel, fuel, training, equipment, and other similar costs of State or local law enforcement officers that are incurred in a joint law enforcement operation with a Federal law enforcement agency participating in the Assets Forfeiture Fund.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Under the statutes enacted by Congress, the primary function of the AFF is to fund the operations of the federal forfeiture program, including victim compensation payments and equitable sharing. Congress has enabled the Department to use remaining funds in various ways to support federal law enforcement activities. As available, DOJ makes funding available for State and local cost incurred in joint law in joint law enforcement operations. Use of the AFF for State and local law enforcement operation is neither appropriate nor available in every situation where State and local law enforcement is seeking operational funding. Assets Forfeiture Fund (AFF) may be used for payment of overtime salaries, travel, fuel, training, equipment, and other similar costs of State or local law enforcement officers that are incurred in a joint law enforcement operation with a Federal law enforcement agency participating in the Assets Forfeiture Fund.

Applicant Eligibility:

A state or local law enforcement agency must be part of a joint law enforcement operation with a Federal law enforcement agency participating in the AFF. The AFF may reimburse only those expenses authorized by the statute within Department policy. The statute does not authorize the payment of basic salaries of state or local officers, either directly or indirectly.

Beneficiary Eligibility:

To be eligible for reimbursement from the AFF, the costs must be incurred in direct support of the joint law enforcement operation under an existing pre-approved agreement that is in effect for the period the eligible costs are incurred.

Credentials/Documentation:

No request or reimbursement including terms negotiated in a task force or other agreement is final until approved by the designated federal official with JLEO funding authority. OMB Circular No. A-87 applies to this program.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

From 60 to 90 days. Generally from 60 to 90 days after submission of eligible expenses under authorized JLEO agreements, however, longer periods may be required in complex cases.

Administered jointly by OJPs Bureau of Justice Assistance (BJA) and the OVC, grant funding is made available each year to state and local law enforcement agencies and victim services organizations in support of multidisciplinary, victim-centered task forces dedicated to investigating trafficking crimes and providing culturally competent assistance to victims. These task forces include federal law enforcement agencies, such as the Federal Bureau of Investigation (FBI) and Immigration and Customs Enforcement (ICE), as well as U.S. Attorneys Offices and state and local prosecutors.

OVC also makes annual grant funding available exclusively for direct, comprehensive services tailored to the needs of human trafficking victims. These services include intensive case management, food, clothing, shelter, medical and dental care, mental health treatment, translation and interpretation services, immigration legal assistance, and more. ITVERP provides reimbursement for victims of acts of international terrorism that occur outside the United States for expenses associated with that victimization.

TYPES OF ASSISTANCE:

AEAP funds are available specifically for services to victims of terrorism and/or intentional mass criminal violence. Funded activities may include compensation, emergency relief, including crisis response efforts, assistance, and ongoing assistance, including during any investigation or prosecution to victims of terrorist acts or mass violence occurring within and outside the United States. Nonmonetary assistance is available for training and technical assistance. ITVERP provides direct reimbursement for out-of-pocket expenses to victims of international terrorism. Claimants may seek reimbursement for expenses incurred for medical, mental health, funeral and burial, property loss, and other miscellaneous costs (including emergency travel, temporary lodging, and telephone costs).

Applicant Eligibility:

AEAP: Criteria will vary depending on the grant. For terrorism or mass violence occurring within or outside the U.S., eligible applicants for funding under VOCA, Title II, 42 U.S.C. 10603b, 1404B, include states, victim service organizations, and public agencies (including federal, State and local governments) and non-governmental organizations that provide assistance to victims of crime. With the exception of ITVERP, OVC does not provide funding directly to individual crime victims. ITVERP: For an applicant to be eligible to receive reimbursement under ITVERP as authorized under VOCA, Title II, 42 U.S.C. 10603c, 1404C, an individual must be a national of the United States or an officer or employee of the U.S. Government, as of the date on which the act of terrorism occurred. Beneficiary Eligibility:

AEAP: Public and private nonprofit victim assistance agencies; victims of domestic and international terrorism. Eligibility depends on the nature of the grant. ITVERP: The law requires that the individual victim must have suffered direct physical or emotional injury or death as a result of an act of international terrorism occurring on or after October 23, 1983, with respect to which an investigation or prosecution was ongoing or was commenced after April 24, 1996. In the case of a victim who is a minor, incompetent, incapacitated, or is killed, a family member or legally designated representative of the victim may receive expense reimbursement on behalf of the victim. In addition to the victim, claimants may include the following: Spouse of the victim, Parents of the victim, Children of the victim, Siblings of the victim, Legally designated victim representative.

Proposals submitted by State crime victim assistance administrators, and all other applicants seeking crime victim assistance, should include the following: (1) type of crime and description of the criminal event; (2) identification of the lead law enforcement agency conducting the investigation; (3) estimated number of victims affected by the crime; (4) description of the applicant's role in responding to the victim population since the date of the incident; (5) description of services that this funding will support and how these efforts will complement services already in place or will respond to an unmet need; (6) the amount of funding requested and the time frame for support; and (7) description of outreach and coordination with other public and private entities during the process of preparing the request for assistance. Once approved for applying, an AEAP solicitation, with detailed instructions on applying as well as reporting requirements, will be posted on the OJP electronic Grants Management System (GMS). Applicants, except Federal agencies, must submit through GMS (1) SF-424, Application for Federal Funding and applicable assurances and forms; and (2) Budget and budget narrative including a description of all other federal and nonfederal contributions (cash or in-kind). Applications for the AEAP must be submitted to the OVC Director as soon as practical following a terrorist or mass violence event by the appropriate State or federal official or private victim service and non-governmental organizations. ITVERP: All potential applicants shall submit a written application along with all supporting documentation to OVC for consideration. Claimants may apply for itemized, interim emergency, or supplemental reimbursement. An Itemized application should be used by those eligible claimants who are making a first-time request for reimbursement of out-of-pocket expenses that were paid following an international terrorism event. An Interim Emergency application should be used by eligible claimants seeking funds for an immediate need such as medical treatment, short-term lodging, or emergency transportation. A Supplemental application should be used by eligible claimants whose expenses have changed since they submitted an initial application. The supplemental application is for bills that may have been received late, or for new services that were not originally thought necessary or included in the original application. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is required. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. AEAP: Whereas the previously submitted proposal letter, budget, and budget narrative were key factors in determining eligibility for funding, they were submitted prior to the posting of a solicitation. Application materials submitted electronically through GMS in response to either the assistance or compensation solicitation become permanent parts of the award file. Thus, it will be necessary to resubmit the proposal letter, budget, and budget narrative documents as part of the application package. Applications will be accepted following an incident of terrorism or mass violence in accordance with the timetable set forth in the AEAP Guidelines. There are two factors that determine the application submission requirements for the AEAP: (1) the applicant status, i.e., government agency (Federal, State, or local), non-governmental organization, or victim service organization; and (2) the type of support requested, i.e., crisis response, consequence management, criminal justice, victim compensation, technical assistance (nonmonetary assistance). Application requirements are listed below. Application requirements for State crime victim compensation programs - Funding will be made available to State crime victim compensation programs in response to an incident of terrorism or intentional mass criminal violence within the United States in the form of a grant. Requests for funding from State crime victim compensation programs may be made at any time in the aftermath of an incident and should include: (1) Responses to the questions or issues raised in the AEAP Compensation Solicitation ; (2) Proposal letter ; (3) Budget.; (4) Budget narrative; and (5) SF-424, Application for Federal Assistance and applicable assurances and forms.. Application requirements for all other recipients of funds -All other applicants seeking Antiterrorism Emergency Reserve support are required to submit: (1) Responses to the questions or issues raised in the AEAP Assistance Solicitation; (2) Proposal letter; (3) Budget; (4) Budget narrative; and (5) SF-424, Application for Federal Assistance and applicable assurances and

forms. While no direct funding is available, OVC may provide its own consultants to meet the training and technical assistance needs of applicants. Training and technical assistance may be requested by submitting a letter describing the nature of the problem; the type of expertise or assistance needed; the duration of assistance; and the projected outcomes of the technical assistance or training. See OVC guidelines published in the Federal Register (Vol. 67, No. 21, Thursday, January 31, 2002) for additional information on application requirements for the AEAP. ITVERP: Step 1: Identify the type of application you are applying for by marking the appropriate type at the top of the application form. In addition, a supplemental sheet must be filled out by applicants. Sections B, F and H should be answered by all applicants; section G should be answered by Itemized and Supplemental applicants only. Detailed instructions are included. Step 2: If you believe that you are an eligible victim of a "designated" international terrorism event, please use the following forms and information to prepare your application for reimbursement. Required Documentation: A victim is required to submit documentation that provides proof of identity, citizenship, employment, and damage/injury sustained during the international terrorism event. A victim's family member or representative is required to submit documentation of his/her relationship to the victim plus medical information or a death certificate as appropriate, in addition to the items named above. In all cases, receipts for expenses incurred in the recovery process will be required. If any of the required documents have been destroyed and are unavailable from any other source, you must provide and certify a list of destroyed documents and how each would apply to your ITVERP application.

Award Procedure:

AEAP: Upon receipt and internal review of a complete application, it is the intention of OVC to notify applicants of funding decision within 5 business days or as soon as practicable. The applicant may be notified by telephone, Internet or facsimile. ITVERP: After review of each application, the Director shall determine the eligibility of the victim or representative and the amount, if any, eligible for reimbursement, specifying the reasons for such determination and the findings of fact and conclusions of law supporting it. A copy of the determination shall be mailed to the claimant at his last known address.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

AEAP: It is OVC's intention to make a funding decision within 5 business days of receipt of a complete application or as soon as practicable. ITVERP: It is OVC's intention to review and process payments as soon as practicable. For itemized and supplemental claims, range of approval/disapproval is dependant upon receipt of an official determination of a reasonable indication of an act of international terrorism from the Assistant Attorney General of National Security for a particular event. Processing time is also dependant upon timely response by claimants of any outstanding documents or information required to process claim applications. Claimants may apply for an interim emergency payment, prior to a determination under Section 94.21(a). If the Director determines that such payment is necessary to avoid or mitigate substantial hardship that may result from delaying reimbursement until complete and final consideration of an application, such payment may be made to cover immediate expenses such as those of medical care, funeral and burial, short-term lodging, and emergency transportation.

Appeals:

For both programs, hearing by the Assistant Attorney General, Office of Justice Programs.

Renewals:

AEAP: See OVC guidelines for Antiterrorism and Emergency Assistance Program for Terrorism and Mass Violence Crimes published in the Federal Register, Vol. 67, No. 21, Thursday, January 31, 2002. ITVERP: Not applicable.

16.540 JUVENILE JUSTICE AND DELINQUENCY PREVENTION ALLOCATION TO STATES

State Formula Grants

FEDERAL AGENCY:

Office of Juvenile Justice and Delinquency Prevention, Department of Justice

AUTHORIZATION:

Juvenile Justice and Delinquency Prevention Act of 2002, Sections 221-223, 42 U.S.C. Sections 5631-5633.

OBJECTIVES:

To increase the capacity of State and local governments to support a variety of programs related to delinquency prevention and reduction, juvenile justice system improvement, research, evaluation, statistical analysis, and training and technical assistance.

TYPES OF ASSISTANCE:

FORMULA GRANTS; PROJECT GRANTS

USES AND USE RESTRICTIONS:

This program, established by the Juvenile Justice and Delinquency Prevention (JJDP) Act of 2002, allocates formula grant funds to States and territories on the basis of their relative population under age 18. The minimum allocation to each State is \$600,000 and to the Territories is \$100,000. States/Territories must demonstrate compliance with four core requirements of the JJDP Act in order to receive their full allocation of Formula Grants funds. The core requirements are: Section 223(a) (11) deinstitutionalization of status offenders; (12) separation of adults and juveniles in secure custody; (13) removal of juveniles from adult jails and lockups; and (22) the elimination of the disproportionate contact of minority juveniles, where such conditions exist. The State's allocation is reduced by 20 percent for each core requirement with which the State is in non-compliance. Technical Assistance: Not in excess of two percent of the funds available each fiscal year to formula grants is available for

grants and contracts with public and private agencies, organizations and individuals to provide assistance to States, units of general local governments, and combinations thereof, and local private agencies to facilitate compliance with Section 223 of the JJDP Act and implementation of the State Plan approved by OJJDP. Technical assistance provided under this provision is coordinated with the State agencies designated to implement the formula grants program. To be eligible for formula grant funds, a State must submit electronically a comprehensive plan applicable to a 3-year period embodying the purposes of the Act and including provisions that: (1) provide for an advisory group appointed by the chief executive of the State to carry out specified functions and to participate in the development and review of the State's juvenile justice plan; (2) provide that juveniles who are charged with or who have committed offenses that would not be criminal if committed by an adult, or offenses which do not constitute violations of valid court orders or such non-offenders as dependent and neglected children, are removed from secure juvenile detention and secure correctional facilities; (3) provide that juveniles alleged to be or found to be delinquent and youths within the purview of the deinstitutionalization core requirement not be confined or detained in any institution in which they have contact with adult persons incarcerated because they have been convicted of a crime or are awaiting trial on criminal charges; (4) provide that no juvenile shall be detained or confined in any jail or lockup for adults (with specified exceptions); and (5) provide for programs to eliminate the disproportionate contact of minority juveniles where such condition exists. Once the plan is approved, each State determines the specific programs to be funded. The States are responsible for processing applications for subgrants and administering funded projects. Two-thirds of funds must be passed through to units of general local government, private nonprofit agencies, and Indian Tribes performing law enforcement functions unless a waiver is granted.

Applicant Eligibility:

The Chief Executive of each State which chooses to apply for a formula grant shall establish or designate a State agency as the sole agency for supervising the preparation and administration of the plan, in accordance with the Juvenile Justice and Delinquency (JJDP) Act of 2002. Technical Assistance: Grants and contracts may only be made to agencies, organizations and individuals that have experience in providing technical assistance to State agencies in implementing State plans, and in facilitating compliance with Section 223 of the JJDP Act, Public Law 102-586.

missing and exploited children cases; (3) promotes information sharing and provides technical assistance by networking with regional nonprofit organizations, State missing children clearinghouses, and law enforcement agencies; (4) develops publications that contain practical, timely information; and (5) provides information regarding programs offering free or low-cost transportation services that assist in reuniting children with their families. On a periodic basis, as funding is designated by Congress for this purpose, conduct national incidence studies to determine the type and extent of missing children in America. Support law enforcement demonstration programs (e.g., the Internet Crimes Against Children Task Force Program) to enhance the investigative response to missing and exploited children cases. Support research to broaden understanding of a wide range of missing and exploited children issues (e.g., abduction homicide investigation solvability factors), to inform training and technical assistance efforts and to identify promising practices and programs for replication. Develop training programs for law enforcement, child protective services, medical personnel, and prosecutors to enhance coordination and effectiveness of missing and exploited children investigations and to enhance the overall system response. 16.576 CRIME VICTIM COMPENSATION**FEDERAL AGENCY:**

Office for Victims of Crime, Department of Justice

AUTHORIZATION:

42 U.S.C. 10602 (a).

OBJECTIVES:

The Office for Victims of Crime (OVC), Department of Justice, administers the Crime Victim Compensation formula grant program. OVC annually awards a grant to each state, the District of Columbia, the U.S. Virgin Islands, and the Commonwealth of Puerto Rico to support state crime victim compensation programs. These programs help pay for some of the expenses resulting from crimes involving violence or abuse.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

Funds under this program shall be used by the States for awards of compensation benefits to crime victims, with the following exception: States may retain up to 5 percent of their total grant for administrative and training purposes. As provided in recent VOCA amendments, formula grant funds to an eligible State crime victim compensation program is based on 60 percent of the amounts States expended during the fiscal year preceding the year of collections for the Crime Victims Fund, other than amounts awarded for

property damage. If the sums available in the Fund for grants under this program are insufficient to provide grants of 60 percent as provided above, grants from the sums available will be made to each eligible crime victim compensation program so that all such programs receive the same percentage of the amounts awarded by such programs during the preceding fiscal year, other than amounts awarded for property damage. A crime victim compensation program is an eligible crime victim compensation program if (1) such program is operated by a State and offers compensation to victims and survivors of victims of criminal violence, including drunk driving and domestic violence for: (A) medical expenses attributable to a physical injury resulting from a compensable crime, including expenses for mental health counseling and care; (B) loss of wages attributable to a physical injury resulting from a compensable crime; and (C) funeral expenses attributable to a death resulting from a compensable crime; (2) such program promotes victim cooperation with the reasonable requests of law enforcement authorities; (3) such State, possession or territory certifies that grants received under this program will not be used to supplant funds otherwise available to provide crime victim compensation; (4) such program, as to compensable crimes occurring within the State, possession or territory, makes compensation awards to victims who are nonresidents of the State, possession or territory on the basis of the same criteria used to make awards to victims who are residents of the State, possession or territory; (5) such program provides compensation to victims of Federal crimes occurring within the State on the same basis that such program provides compensation to victims of State crimes; (6) such program does not, except pursuant to rules issued by the program to prevent unjust enrichment of the offender, deny compensation to any victim because of that victim's familial relationship to the offender, or because of the sharing of a residence by the victim and the offender; (7) such program does not provide compensation to any person who has been convicted of an offense under Federal law with respect to any time period during which the person is delinquent in paying a fine, other monetary penalty, or restitution imposed for the offense; and (8) such program provides such other information and assurances related to the purposes of this section as the Director may reasonably require. Section 1403(c), any amount of crime victim compensation that the applicant receives through a crime victim compensation program under this section shall not be included in the income of the applicant until the total amount of assistance that the applicant receives from all such programs is sufficient to fully compensate the applicant for losses suffered as a result of the crime. As used in this section: (1) the term "property damage" does not include damage to prosthetic devices, eyeglasses or other corrective lenses, or dental devices; (2) the term "medical expenses" includes, to the extent provided under the eligible crime victim compensation program, expenses for eyeglasses and other corrective lenses, for dental services and devices and prosthetic devices, and for services rendered in accordance with a method of healing recognized by the law of the State; (3) the term "compensable crime" means a crime the victims of which are eligible for compensation under the eligible crime victim compensation program, and includes crimes involving driving while intoxicated and domestic violence; and (4) the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, and any other possession or territory of the United States.

The final payment process requires that all applications and all data be fully processed and verified before any payments are made. Inmate data will be verified by the ICE, who will attempt to match the inmate data records provided to records in its databases to obtain the maximum number of confirmed matches. These matches are expected to include three categories: 1) those positively identified (matched) as qualifying undocumented criminal aliens; 2) those unknowns and 3) those positively identified as non- criminal aliens. Applicants will be given credit for a percentage of inmates whose eligibility cannot be determined through positive identification or "match," but have valid foreign countries of birth. Payments will be based on the days of incarceration for the verified number of aliens incarcerated by each applicant. Payments are granted by the Director of the Bureau of Justice Assistance, Office of Justice Programs, Department of Justice. The payment must be accepted on-line and the acceptance will effect a simultaneous assurance of compliance with conditions. Acceptance of the payment on-line initiates the automatic electronic transfer of funds from OJP to the recipient.

16.607 BULLETPROOF VEST PARTNERSHIP PROGRAM (BVP)

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

Bulletproof Vest Partnership Grant Act of 1998, Public Law 105-181, June 16, 1998, and Bulletproof Vest Program Act of 2000, Public Law 106-517.

OBJECTIVES:

To protect the lives of law enforcement officers by helping State, local, and tribal law enforcement agencies provide officers with armored vests.

TYPES OF ASSISTANCE:

DIRECT PAYMENTS FOR A SPECIFIED USE

USES AND USE RESTRICTIONS:

The program pays up to 50 percent of the total cost of each vest order. Total cost includes the cost of the vests, vest carriers, attachments, inserts, and covers considered integral or essential for its proper care, use, and wearability, shipping, handling, fitting charges, and applicable taxes. The total invoiced price, after all vendor and prompt payment discounts have been deducted, is what the Bureau of Justice Assistance (BJA) uses to determine the Federal match. This program only allows the purchase of body armor that has been tested and found to comply with applicable ballistic and stab standards promulgated by the National Institute of Justice's (NIJ) Standard 0101.06 Ballistic Resistance of Police Body Armor. In FY 2001, stab-resistant body armor was also included in the program as an allowable purchase.

Applicant Eligibility:

Only chief executives of jurisdictions (or their designees) may apply for funds. Jurisdictions are defined as general purpose units of local government (e.g.,

cities, towns, townships, boroughs, counties, etc.), Federally-recognized Indian tribes, the 50 State governments, the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, American Samoa, Guam, and the Northern Mariana Islands. The chief executive of the jurisdiction registers on-line, submits the jurisdiction application, and requests payment for completed vest orders.

Beneficiary Eligibility:

Only law enforcement officers may receive vests through this program. According to the Act, "law enforcement officer" means any officer, agent, or employee of a State, unit of local government, or an Indian tribe authorized by law or by a government agency to engage in or supervise the prevention, detection, or investigation of any violation of criminal law, or authorized by law to supervise sentenced criminal offenders. Eligible officers may be full-time, part-time, paid or volunteer.

Credentials/Documentation:

Eligible jurisdictions must be general purpose units of local government, Federally-recognized Indian tribes, the 50 state governments, the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, American Samoa, Guam, and the Northern Mariana Islands. The validity of the on-line registration process is verified through independent reviews which may include certification by the banking institutions serving the jurisdiction, the U.S. Census Bureau, and agencies within the U.S. Department of Justice. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

This is an Internet-based program. The jurisdiction is required to complete and submit an on-line registration form, providing information about the jurisdiction's chief executive officer, program contact person, and electronic banking information. The registration process is handled through the program's web site <http://vests.ojp.gov>. Only those jurisdictions with approved registrations are permitted to make application. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. The jurisdiction submits the application to BJA via the Internet web site <http://vests.ojp.gov>. On-line instructions guide the jurisdiction through the application process. Law enforcement agencies or agencies with law enforcement functions which meet the Act's definition, will assist in completing the jurisdiction's on-line application by indicating the types, numbers, and costs of vests they intend to order. Only those jurisdictions that complete and submit applications will be eligible for matching funds from BJA.

Award Procedure:

Applications received by BJA are reviewed for completeness, accuracy, and compliance with all program requirements. Each application is then checked against the availability of funds to cover up to 50 percent of the application's total cost, in keeping with established criteria for program fund allocation. When all checks are complete and the application approved, the jurisdiction is notified through e-mail that the necessary funds have been obligated.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

A minimum of 15 working days may be required for complete registration validation, although jurisdictions and law enforcement agencies will have immediate access to certain program components during this validation process.

A minimum of 60 working days may be required after the program closes for approval of the jurisdiction's application for funding. A minimum of 25 working days may be required for the electronic transfer of funds from the U.S. Treasury to the jurisdiction's bank account, once the request for funds has been received, reviewed, and approved by the Office of Justice Programs.

Appeals:

Not Applicable.

Renewals:

Not Applicable.

Formula and Matching Requirements:

This program has no statutory formula. Matching Requirements: Percent: 50.%. The program requires that each applicant jurisdiction be responsible for providing at least 50 percent of the cost of each vest purchased. Tribal governments may use Federal funds to provide this match; all other jurisdictions must use nonfederal match funds. Nonfederal fund sources include State and/or local jurisdiction revenues, private or personal funds, and contributions from insurance or workman's compensation consortiums. Asset forfeiture funds may also be used to meet the jurisdiction's matching requirement. Beginning in FY 2002, changes (Bulletproof Vest Partnership Act of 2000; Public Law 106-517) gives preference to small jurisdictions (those populations below 100,000) guaranteeing them the full 50 percent match payment before payments are calculated and approved for larger jurisdictions. MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Jurisdictions with approved applications must request the federal match no later than August 31st of the second federal fiscal year following the end of the federal fiscal year in which their application was approved. In other words, the jurisdiction has two years beyond the year of their application to request payments for vests contained in that application. Payments of the federal match will be made whenever the jurisdiction indicates that at least part of the approved vest order was received and invoiced. See the following for information on how assistance is awarded/released: See program office for more information.

Reports:

No reports are required.

Audits:

This program is excluded from coverage under OMB Circular No. A-133. Payments and transactions are subject to audits by the General Accounting Office, Department of Justice's Office of the Inspector General, state or local government auditors, and auditors from independent public accounting firms. Jurisdictions must follow their local procurement policies and procedures, including maintenance of reliable and accurate accounting systems, record keeping, and systems of internal control.

Records:

Recipients of federal funds are expected to retain documentation supporting all program transactions for at least three years after the closure of audit reports related to such funding. If any litigation, claim, negotiation, audit, or other action involving records has been started before the expiration of the three-year period, the records must be retained until completion of the action and resolution of all related issues, or until the end of the regular three-year period, whichever is later.

Renewals:

Subject to annual appropriations.

Formula and Matching Requirements:

Statutory Formula: Title I, Chapter Subchapter V, Part A, Subpart 42 USC 3756. Statutory Formula: Once each fiscal years overall JAG Program funding level is determined, BJA partners with the Bureau of Justice Statistics (BJS) to begin a four-step grant award calculation process which consists of:

1. Computing an initial JAG allocation for each state and territory, based on their share of violent crime and population (weighted equally).
2. Reviewing the initial JAG allocation amount to determine if the state or territory allocation is less than the minimum (de minimus) award amount defined in the JAG legislation (0.25 percent of the total). If this is the case, the state or territory is funded at the minimum level, and the funds required for this are deducted from the overall pool of JAG funds. Each of the remaining states

receives the minimum award plus an additional amount based on their share of violent crime and population.

3. Dividing each state's final award amount (except for the territories and District of Columbia) between state and local governments at a rate of 60 and 40 percent, respectively.

4. Determining local unit of government award allocations, which are based on their proportion of the state's three-year violent crime average. If a local eligible award amount is less than \$10,000, the funds are returned to the state to be awarded to these local units of government through the state agency. If the eligible award amount is \$10,000 or more, then the local government is eligible to apply for a JAG award directly from BJA.

Matching requirements are not applicable to this program.
MOE requirements are not applicable to this program.

16.741 DNA BACKLOG REDUCTION PROGRAM

FEDERAL AGENCY:

National Institute of Justice, Department of Justice

AUTHORIZATION:

Department of Justice Appropriations Act, 2012; 42 USC 14136a; 42 USC 14136e(b); 42 USC 14135(j).

OBJECTIVES:

To assist eligible States and units of local government to process, record, screen, and analyze forensic DNA and/or DNA database samples, and to increase the capacity of public forensic DNA and DNA database laboratories to process more DNA samples, thereby helping to reduce the number of forensic DNA and DNA database samples awaiting analysis.

TYPES OF ASSISTANCE:

FORMULA GRANTS; Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

Expenditures from Forensic DNA Backlog Reduction Program awards may include the following:

(1) Salary and benefits of additional laboratory employees: Funds may be used to hire additional full-time or part-time laboratory employees to directly process, record, screen, and/or analyze forensic DNA and/or DNA database samples. Funds may also be used to hire additional full-time or part-time laboratory employees to directly perform capacity enhancement-specific activities, such as validating new DNA analysis technologies for the forensic DNA laboratory and/or the laboratory responsible for analysis of DNA database samples.

Funds are subject to applicable restrictions on supplanting and may be used to retain full-time or part-time laboratory employees for the above purposes if there are no other funding sources allocated for the retention of such personnel (e.g., personnel acquired through previous Federal assistance). Matching funds are not required.

Note: NIJ makes no assurance that funds will be available for this purpose in future award announcements.

(2) Overtime for existing laboratory staff: Funds may be used to pay overtime for existing laboratory employees to directly process, record, screen, and/or analyze forensic DNA and/or DNA database samples. Funds may also be used to pay overtime for existing laboratory employees to directly perform capacity enhancement-specific activities such as validating new DNA analysis technologies for the forensic DNA or DNA database laboratory. Any payments for overtime must be in accordance with the applicable provisions of the OJP Financial Guide, available at www.ojp.usdoj.gov/financialguide/.

(3) Training: Funds may be used for appropriate training of forensic DNA and DNA database laboratory personnel. Existing members of the DNA Unit: Appropriate training includes internal or external training, continuing education/training opportunities, and/or applicable graduate-level coursework that is directly related to the applicant's forensic DNA or DNA database laboratory operation and is for members of the DNA laboratory.

Funds used towards travel and registration expenses for appropriate continuing education/training opportunities that are associated with professional meetings and conferences (including workshops provided at such meetings and conferences) are limited to no more than 5 percent of the total award. Funds used towards travel expenses, registration fees, and tuition and required learning aids (e.g., textbooks) for appropriate training and continuing education opportunities that are not associated with professional meetings and conferences are not subject to the 5-percent cap.

In general, funds used for training are intended to aid existing members of the DNA laboratory to meet continuing education requirements mandated in the DNA Quality Assurance Standards established by the Director of the Federal Bureau of Investigation. New members of the DNA Unit: States and units of local government that wish to use funds to train new employees to process, record, screen, and/or analyze forensic DNA and/or DNA database samples should submit a detailed plan in their proposal. There is no fixed-percentage cap on use of funds for this purpose.

(4) Travel (Limited): Funds may be used for travel to conduct required site visits to public or private accredited laboratories that will be conducting DNA analyses on behalf of the applicant agency to review procedures and practices prior to initial sample shipment; funds may also be used to make one additional unannounced site visit. Funds may be used for travel associated with DNA training, described in 3, above. Travel expenses must be reasonable and must comply with the applicable provisions of the OJP Financial Guide.

Note that, absent prior express written approval from NIJ, rates for lodging charged to any award under this solicitation may not exceed the posted GSA rate for the location. If an award recipient opts to book lodging at a higher rate, the cost differential, including associated taxes, may not be charged to the award.

(5) Equipment: Funds may be used to upgrade, replace, or purchase laboratory equipment, instrumentation, and computer hardware for the forensic DNA and/or the DNA database laboratory.

(6) Laboratory supplies for validation: Allowable supply expenses include the purchase of laboratory supplies that can be directly attributed to the validation of new DNA analysis technologies.

(7) Supplies for DNA database sample collection: Convicted offender and/or arrestee related sample collection kits may be purchased.

(8) Laboratory supplies for in-house processing, recording, screening, and analysis of forensic DNA casework and/or DNA database samples.

(9) Renovation: Funds may be used to renovate existing space within the crime laboratory, if it can be demonstrated that the renovation will directly and specifically improve the efficiency of the analysis of forensic DNA samples

and/or DNA database samples. Expenses that may be allowable include the purchase or upgrade of benches, cabinets, interior dividing walls, plumbing, HVAC systems, electrical wiring, evidence examination and preparation rooms, evidence storage rooms, drying rooms, walk-in freezers, and extraction or amplification rooms.

If renovations are requested, they must be justified in the application and renovations must be completed within the initial award period of 18 months. Grant recipients should not anticipate that NIJ will approve no-cost extensions in order to complete renovation projects. Renovations may not be requested as part of a Grant Adjustment Notice once the award has been made.

(10) Contracts for analysis of forensic DNA casework samples or DNA database samples by public or private accredited DNA laboratories: Funds may be used to send forensic DNA and/or DNA database samples to fee-for-service laboratories to conduct DNA analyses. Funds may also be used to enter into agreements with government-owned laboratories to conduct forensic DNA and/or DNA database sample analyses, perform data review, enter eligible DNA profiles into CODIS and, where applicable, upload to NDIS.

Every laboratory that is contracted to conduct forensic DNA or DNA database sample analyses under this program must undergo an external audit, not less than once every 2 years, in order to demonstrate compliance with the requirements of the Quality Assurance Standards for Forensic DNA Testing Laboratories and/or the Quality Assurance Standards for DNA Database Laboratories established by the Director of the Federal Bureau of Investigation, and must be accredited by a nonprofit professional organization actively involved in forensic science that is nationally recognized within the forensic science community.

Note: All contracts and procurements made under this program are subject to the standards set forth in 28 C.F.R. section 66.36 and other applicable Federal law, including the provisions of 28 C.F.R. section 66.36 that relate to competition. Prior approval from OJP is required for all sole-source procurements in excess of \$100,000. Approval may be obtained in the form of a sole-source request with adequate justification submitted directly to GMS with the application for funding.

(11) Contracts for DNA audits (after September 30, 2012): DNA laboratories may establish contracts with vendors (individuals or entities) that can provide an external DNA audit once every 2 years, as required by the Quality Assurance Standards for Forensic DNA Testing and DNA Database Laboratories established by the Director of the Federal Bureau of Investigation. DNA Backlog Reduction Program funds may not be used to defray the cost of an external DNA audit that is part of an accreditation inspection/assessment, or of an internal DNA audit.

An award recipient is expected to examine carefully any costs charged by the vendor for a DNA Audit, including auditor fees (not to exceed \$450 per auditor for each day on site) and auditor travel expenses, and to determine whether all such charges are reasonable and justified. All audit-related costs must be detailed in the budget. Note that NIJ will use the rates established by the GSA schedule (www.gsa.gov/portal/category/21287) as a benchmark in examining the reasonableness of audit-related travel expenses.

Auditors must meet the requirements specified in the Quality Assurance Standards for Forensic DNA Testing and/or DNA Database Laboratories and, must reside outside the State where the laboratory to be audited operates. The same auditors cannot be used in consecutive audits, and all auditors must sign a conflict of interest and nondisclosure form prior to performing any work.

(12) Additional contracts and contractor services: Contracts may be established to purchase and install DNA modules to existing Laboratory Information Management Systems (LIMS), or for service, maintenance, or licenses for the DNA unit users for an existing LIMS system.

Contracts may be established for Lean Six Sigma-type studies or process mapping. One example of the potential benefits from such approaches is highlighted in the following report:

Contracts may be established to hire contract staff to process, record, screen, and analyze forensic DNA casework; to process, record, and analyze DNA database samples; or to validate new DNA analysis technologies. Contracts may be established for data review in accordance with the Quality Assurance Standards for Forensic DNA Testing and DNA Database Laboratories.

Contracts may also be established for in-house training, or for validation testing.

(13) Direct administrative expenses or indirect costs: Up to 3 percent of the Federal portion of an award under this program may be used for either: (1) direct administrative expenses specifically related to grant administration and management, or (2) indirect costs. Applicants may not request both direct administrative expenses and indirect costs.

16.813 NICS ACT RECORD IMPROVEMENT PROGRAM

NARIP

FEDERAL AGENCY:

Bureau of Justice Statistics, Department of Justice

AUTHORIZATION:

The NICS Improvement Amendments Act of 2007, Public Law 110-180.

OBJECTIVES:

To improve the FBI's National Instant Criminal Background Check System (NICS) by providing assistance to states to improve the completeness, automation and transmittal to state and federal systems the records utilized by the NICS. Such records include criminal history records, records of felony convictions, warrants, records of protective orders, convictions for misdemeanor involving domestic violence and stalking, records of mental health adjudications, and others, which may disqualify an individual from possessing or receiving a firearm under federal law. Helping states to automate these records will also reduce delays for law-abiding gun purchasers.

The NICS Improvement Act amends the Brady Handgun Violence Prevention Act of 1993 (the Brady Act) (Public Law 103-159), under which the Attorney General established NICS. The Brady Act requires Federal Firearms Licensees (FFLs) to contact the NICS before transferring a firearm to an unlicensed person for information on whether the proposed transferee is prohibited from receiving or possessing a firearm under state or federal law.

The NICS Improvement Act was enacted in the wake of the April 2007 shooting tragedy at Virginia Tech. The Virginia Tech shooter was able to purchase firearms from an FFL because information about his prohibiting mental health history was not available to the NICS and the system was therefore unable to deny the transfer of the firearms used in the shootings.

The Act seeks to address the gap in information available to NICS about such prohibiting mental health adjudications and commitments and other prohibiting backgrounds. Filling these information gaps will better enable the system to operate as intended to keep guns out of the hands of persons prohibited by federal or state law from receiving or possessing firearms.

The Act authorized two grant programs to assist states in providing certain information to the NICS, and prescribes grant penalties for non-compliance with the Acts record completeness goals. Pursuant to the Act, there are certain conditions, described below, that a state must satisfy in advance of receiving grants under the Act. The NICS Improvement Act has provisions that require states to meet specified goals for completeness of the records submitted to the Attorney General on individuals prohibited by federal law from possessing firearms. The records covered include automated information needed by the NICS to identify felony convictions, felony indictments, fugitives from justice, drug arrests and convictions, prohibiting mental health adjudications and commitments, domestic violence protection orders, and misdemeanor crimes of domestic violence.

The Act provides for a number of incentives for states to meet the goals it sets for greater record completeness. First, the Act allows states to obtain a waiver, beginning in 2011, of the state matching requirement under the National Criminal History Improvement Program (NCHIP) grant program, if a state provides at least 90 percent of its records identifying persons in specified prohibited categories. Second, the Act authorizes grant programs described herein, which, pursuant to the Act, are being administered consistent with NCHIP, for state executive and judicial agencies to establish and upgrade information automation and identification technologies for timely submission of final criminal record dispositions and other information relevant to NICS checks. Finally, the Act provides for discretionary and mandatory Byrne Justice Assistance Grant (JAG) program grant penalties, beginning 3 years after enactment, for non-compliance with specified record completeness requirements within certain timeframes: after 3 years, 3 percent may be withheld in the case of less than 50 percent completeness; after 5 years, 4 percent may be withheld in the case of less than 70 percent completeness; and after 10 years, 5 percent shall be withheld in the case of less than 90 percent completeness (although the mandatory reduction can be waived if there is substantial evidence of the state making a reasonable effort to comply).

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

The Act outlines the allowable uses of grant funds:

Grants to States:

Section 103 of the NICS Improvement Act, regarding implementation assistance to the states, provides that the grants "shall be used by the States and Indian tribal governments, in conjunction with units of local government and State and local courts, to establish or upgrade information and identification technologies for firearms eligibility determinations." In accordance with the Act, a grant to a state, territory or Indian tribes may only be used to:

Create electronic systems, which provide accurate and up-to-date information which is directly related to checks under the NICS, including court disposition and corrections records;

Assist states in establishing or enhancing their own capacities to perform NICS background checks;

Supply accurate and timely information to the Attorney General concerning final dispositions of criminal records to databases accessed by NICS;

Supply accurate and timely information to the Attorney General concerning the identity of persons who have a federally prohibiting mental health adjudication or commitment;

Supply accurate and timely court orders and records of misdemeanor crimes of domestic violence for inclusion in federal and state law enforcement databases used to conduct NICS background checks;

Collect and analyze data needed to demonstrate levels of state compliance with the Act; and

Maintain the required relief from disabilities program in accordance with the Act however, not less than 3 percent and no more than 10 percent of each grant shall be used for this purpose.

State Court Grants

Section 301 of the Act provides that grants shall be made to each state and territory, consistent with the states plans for the integration, automation, and accessibility of criminal history records, for use by the court systems to improve automation and transmittal to federal and state repositories of: (1) criminal history dispositions; (2) records relevant to determining whether a person has been convicted of a misdemeanor crime of domestic violence or a prohibiting domestic violence protection order; and (3) prohibiting mental adjudications and commitments. Further, the law provides that the amounts granted shall be used by the state court system only to:

Carry out, as necessary, assessments of the capabilities of state courts to automate and transmit arrest and conviction records, court orders, and mental health adjudications or commitments to federal and state record repositories; and

Implement policies, systems, procedures to automate and transmit arrest and conviction records, court orders, and mental health adjudications or commitments to federal and state record repositories.

Applicant Eligibility:

Applications must be submitted by (a) the agency designated by the Governor to administer the National Criminal History Improvement Program (NCHIP); (b) the state or territory central administrative office or similar entity designated by statute or regulation to administer federal grant funds on behalf of the jurisdiction's court system; or (c) a federally recognized Indian tribal government.

Beneficiary Eligibility:

In accordance with the NICS Improvement Amendments Act (see 18 U.S.C. 922 note), there are two specific conditions that each state must satisfy before being eligible to receive grants:

1. First, each State shall provide the Attorney General with a reasonable estimate, as calculated by a method determined by the Attorney General of the number of the records subject to the NIAA completeness requirements. (Id.)
2. Second, to be eligible for a grant under this [program], a State shall certify, to the satisfaction of the Attorney General, that the State has implemented a relief from disabilities program. (Id.)

For the purpose of this solicitation, a relief from disabilities program is a program that permits persons who have been adjudicated a mental defective or committed to a mental institution to obtain relief from the firearms disabilities imposed by law as a result of such adjudication or commitment. This relief must be based on a finding, in accordance with principles of due process, by a state court, board, commission, or other lawful authority, that the circumstances of the disability and the persons record and reputation are such that the person will not be likely to act in a manner dangerous to the public safety and that the granting of relief would not be contrary to the public interest. 16.818 CHILDREN EXPOSED TO VIOLENCE

Defending Childhood

FEDERAL AGENCY:

Department of Justice

AUTHORIZATION:

Department of Justice Appropriations Act, 2012, Public Law 112-55, 552 Stat. 615.

OBJECTIVES:

Every year, millions of children and adolescents in the United States are

victimized and exposed to violence in their homes, schools, and neighborhoods. Child victims of or witnesses to violence may suffer devastating consequences beyond physical harm, which may include attachment difficulties, regressive behavior, anxiety, depression, and aggression. When these problems go unaddressed, children are at greater risk for school failure, substance abuse, repeat victimization, delinquency, gang involvement, and criminal behavior during adulthood. In short, mitigating children's exposure to violence is central to breaking the cycle of violence.

The Children Exposed to Violence program builds on and incorporates the knowledge gained through research, programs, and demonstration initiatives that have addressed the problem of children exposed to violence over the past decade. The Program features a comprehensive effort to identify successful policies and practices that address the trauma and harm that children exposed to violence experience in their homes, communities, and schools. The Program supports prevention, intervention, treatment, and community organizing strategies to implement a comprehensive continuum of care for children and teens, from birth through age 17, which have been exposed to violence. The ultimate goals of the Children Exposed to Violence Program is to reduce the severity of violence, reduce the frequency of violence, reduce the short- and long-term traumatic impact of violence, increase community safety and accountability, improve the response to children exposed to violence, improve the safety and well-being of children, and create a national dialogue on the issue of children exposed to violence.

16.820 POSTCONVICTION DNA TESTING PROGRAM

Kirk Bloodsworth Program

FEDERAL AGENCY:

National Institute of Justice, Department of Justice

AUTHORIZATION:

Department of Justice Appropriations Act, 2012, Public Law 112-55.

OBJECTIVES:

This program offers assistance to States to help defray the costs associated with postconviction DNA testing of cases of violent felony offenses where actual innocence might be demonstrated. Specifically, funding may be used to review postconviction cases of violent felony offenses (as defined by State law), and to locate and analyze biological evidence samples associated with these cases. Where a strong justification is provided, a small percentage of Federal award funds (not to exceed 15 percent) may be used for permissible case identification activities. For the purposes of this program Case identification means performing outreach and/or initial screening activities, other than case review as defined below, designed to identify postconviction cases of violent felony offenses (as defined by State law) where DNA analysis might demonstrate

actual innocence. Permissible outreach and initial screening mechanisms are face-to-face meetings, closed-circuit television meetings, eligibility letters/questionnaires/applications, telephone calls, and computerized searches of state court records. Case review means review of files or documentation of postconviction cases of violent felony offenses (as defined by State law) by appropriate persons (e.g., prosecutors, public defenders, law enforcement personnel, and medical examiners) to determine whether biological evidence exists that might, through DNA analysis, demonstrate the actual innocence of the person previously convicted. Locate evidence means seeking to locate, following a case review, biological evidence that, through DNA analysis, might demonstrate actual innocence, through activities such as the searching of files, storage facilities, and evidence rooms. DNA analysis of biological evidence includes the handling, screening, and DNA analysis of biological evidence located in connection with a case review. States receiving Postconviction DNA Testing Assistance funds are expected to--1. Review appropriate postconviction cases to identify those in which DNA testing could prove the actual innocence of a person convicted of a violent felony offense(s) as defined by State law. 2. Locate biological evidence associated with such postconviction cases. 3. Perform DNA analysis of appropriate biological evidence.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

Funds may be used to acquire laboratory supplies for DNA analysis of biological evidence; pay overtime for people directly engaged in case review, location of evidence, or DNA analysis of biological evidence; to hire consultants and/or temporary contract staff to conduct case reviews, locate evidence, or conduct DNA analysis of biological evidence; for contracts with accredited fee-for-service vendors to conduct DNA analysis of biological evidence; to upgrade, replace, lease, or purchase computer hardware or software that will be used exclusively for case review, location of evidence, or DNA analysis of biological evidence; for salaries and benefits of additional full- or part-time employees to the extent such employees are directly engaged in case review, location of evidence, or DNA analysis of biological evidence; and, in limited cases, for case identification activities. Funds may not be used for salaries and benefits for victim advocacy services; laboratory equipment; construction; renovation; and outreach and initial screening activities not included in case identification."

Provides postconviction DNA testing of specified biological evidence under a State statute, or under State rules, regulations, or practices, to persons convicted after trial and under a sentence of imprisonment or death for a State offense of murder or forcible rape, in a manner intended to ensure a reasonable process for resolving claims of actual innocence. 2. Preserves biological evidence secured in relation to the investigation or prosecution of a State offense of murder or forcible rape, under a State statute, local ordinances, or State or local rules, regulations, or practices, in a manner intended to ensure that reasonable measures are taken by all jurisdictions within the State to preserve such evidence. This report is targeted to state, county, and local juvenile justice authorities charged with the custodial care and supervision of youth in the juvenile justice system, with particular focus on those authorities who oversee residential treatment and correctional and detention facilities that house juveniles via court-ordered placements. The principles outlined in this document may also apply to emergency planning for youth in out-of-home placement.

16.922 EQUITABLE SHARING PROGRAM**FEDERAL AGENCY:**

Criminal Division, Department of Justice

AUTHORIZATION:

The Controlled Substances Act, 21 U.S.C 881(e); Civil Asset Forfeiture Reform

Act (CAFRA), 18 U.S.C 981(e).

OBJECTIVES:

The Department of Justice Asset Forfeiture Program (the Program) is a nationwide law enforcement initiative that removes the tools of crime from criminal organizations, deprives wrongdoers of the proceeds of their crimes, recovers property that may be used to compensate victims, and deters crime. The most important objective of the Program is law enforcement. Equitable sharing further enhances this law enforcement objective by fostering cooperation among federal, state, and local law enforcement agencies. Federal law authorizes the Attorney General to share federally forfeited property with participating state and local law enforcement agencies. The exercise of this authority is discretionary and limited by statute. The Attorney General is not required to share property in any case. The U.S. Department of the Treasury administers its own Asset Forfeiture Program. For policies and program detail, please visit the Treasury Executive Office for Asset Forfeiture website www.treas.gov/offices/enforcement/teofaf/.

TYPES OF ASSISTANCE:

Direct Payments for Specified Use (Cooperative Agreements)

USES AND USE RESTRICTIONS:

The Comprehensive Crime Control Act of 1984 authorized federal officials to implement a national asset forfeiture program, asset forfeiture has become one of the most powerful tools for targeting criminals, including drug dealers and white collar criminals who prey on the vulnerable for financial gain. Forfeiture statutes are now prevalent throughout the federal legal code and their use, along with other important anti-crime measures, has had a significant impact on crime. One of the most important provisions of asset forfeiture is the authorization to share federal forfeiture proceeds with cooperating state and local law enforcement agencies. The Department of Justice Asset Forfeiture Program serves not only to deter crime but also to provide valuable additional resources to state and local law enforcement agencies. The Guide to Equitable Sharing for State and Local Law Enforcement Agencies Guide, as revised from time to time, serves to promote and maintain the integrity of the equitable sharing program so that it can continue to merit public confidence and support. The Guide is supplemented with the National Code of Professional Conduct for Asset Forfeiture (see Appendix B) and all seizing and prosecutorial agencies must ensure compliance with the Code. The Guide seeks to assist state and local law enforcement agencies participating in the program by clarifying the directives they must follow to obtain and use equitably shared funds. The goal is to make the process as clear as possible so that local communities and the nation can thrive from reduced crime and from quality law enforcement. Except as noted in the Guide, equitably shared funds must be used by law enforcement agencies for law enforcement purposes only. Subject to laws, rules, regulations, and orders of the state or local jurisdiction governing the use of public funds available for law enforcement purposes, specified expenses are pre-approved as permissible uses of shared funds and property. To avoid a conflict of interest or the appearance of a conflict of interest, any employee of any federal, state, or local governmental agency (or members of his or her immediate family or those residing in his or her household) who was involved in the investigation which led to the forfeiture of the property to be sold by the USMS contractor is prohibited from purchasing, either directly or indirectly, forfeited property. Additionally, Department of Justice employees and contractors may not, without prior written approval of a designated agency official, directly or indirectly purchase property that has been forfeited to the United States; or personally use such property that has been directly or indirectly purchased from the United States by a member of his or her immediate family. The fact that shared property was forfeited as a result of a particular federal violation does not limit its use. For example, when an agency receives a share of property that was forfeited for a federal drug violation, the recipient is not limited in its use of the property in the recipient agency's drug enforcement program. Among the permissible uses of equitable sharing funds, priority should be given to supporting community policing activities, training, and law enforcement operations. Except as noted in the Guide, equitably shared funds must be used by law enforcement agencies for law enforcement purposes only. Subject to laws, rules, regulations, and orders of the state or local jurisdiction governing the use of public funds available for law enforcement purposes, specified expenses are pre-approved as permissible uses of shared funds and property. The fact that shared property was forfeited as a result of a

particular federal violation does not limit its use. For example, when an agency receives a share of property that was forfeited for a federal drug violation, the recipient is not limited in its use of the property in the recipient agency's drug enforcement program. Among the permissible uses of equitable sharing funds, priority should be given to supporting community policing activities, training, and law enforcement operations.

Applicant Eligibility:

A state or local law enforcement agency meeting eligibility requirements set forth in the Guide and that directly participates in an investigation or prosecution that results in a federal forfeiture may request an equitable share of the net proceeds of the forfeiture. For purposes of equitable sharing, the Department of Justice defines law enforcement agency as a state or local government organization authorized to engage in as its primary function the investigation and apprehension, or the prosecution of individuals suspected or convicted of offenses against the criminal laws of the United States or of any state, county, municipality, or territory of the United States. A state National Guard generally does not meet the law enforcement agency criteria for participation in the Department of Justice Equitable Sharing Program because its primary mission is a military or other non-law enforcement purpose. An individual National Guard unit, however, may qualify for sharing if: (1) It is a distinct unit of a state National Guard that has counterdrug activities as its primary mission and receives funding solely for this purpose; or (2) It is a military police or similar state National Guard unit that provides support to federal law enforcement agencies in counterdrug activities. No sharing request or recommendation, including shares negotiated in a task force or other agreement, is final until approved by the federal deciding authority. In accordance with the Crime Victims Rights Act and the Attorney Generals authority, the Department of Justice gives priority in the distribution of forfeited assets to valid owners, lien holders, federal financial regulatory agencies, and victims (in that order) through petitions for remission or mitigation or requests for restoration. After losses to the above parties have been satisfied, any remaining net proceeds can be shared with eligible state and local law enforcement agencies.

Beneficiary Eligibility:

A state or local law enforcement agency meeting eligibility requirements set forth in the Guide and that directly participates in an investigation or prosecution that results in a federal forfeiture may request an equitable share of the net proceeds of the forfeiture.

Credentials/Documentation:

No sharing request or recommendation pertaining to an eligible equitable sharing participant, including shares negotiated in a task force or other agreement, is final until approved by the federal deciding authority as set forth in the Guide. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. After the seizure in a joint investigation or adoption in an adoptive case, a participating state or local agency meeting all requirements set forth in the Guide may request a share of the property by submitting a Form DAG-71, Application for Transfer of Federally Forfeited Property, to the federal seizing agency. A separate Form DAG-71 must be completed for each asset to be shared. An eligible state or local law enforcement agency requesting federal adoption of a state or local seizure must comply with all applicable state laws and regulations pertaining to the transfer of seized property to a federal law enforcement agency, including any requirement for a state judicial order or prosecutorial consent (e.g., declination letter) for such transfer.

Award Procedure:

Federal law authorizes the Attorney General to share federally forfeited property with participating state and local law enforcement agencies. The exercise of this authority is discretionary and limited by statute. The Attorney General is not required to share property in any case. No sharing request or

recommendation is final until approved by the federal deciding authority. The equitable sharing deciding authority levels are specified in the Guide.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

From 120 to 180 days. Generally from 120 to 180 days after forfeiture, however longer periods may be required in complex cases.

Appeals:

The exercise of this authority is discretionary and limited by statute. It is not subject to appeal or court review.

Renewals:

Not Applicable.

Formula and Matching Requirements:

This program has no statutory formula.

This program has no matching requirements. Equitable Sharing funds are eligible to cover the costs associated with paying a state or local law enforcement agency's matching contribution or share in a federal grant program, provided that the grant funds are used for a permissible law enforcement purpose in accordance with the Guide or where such use is authorized by federal law. Equitable Sharing awards have Non-supplanting requirements.

MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Not Applicable. See the following for information on how assistance is awarded/released: Funds are disbursed to participating agencies upon approval of individual asset sharing decisions.

Reports:

To ensure effective management, promote public confidence in the integrity of the Equitable Sharing Program, and protect the Program against potential waste, fraud, and abuse, the Department of Justice has established reporting requirements for participating law enforcement agencies that include the annual submission of the Equitable Sharing Agreement and Certification form and, if applicable, an audit report. A state or local law enforcement agency must be in compliance with the reporting requirements set forth in this Guide to receive any distribution of money or property under the Equitable Sharing Program. As a prerequisite to participating in the Department of Justice Equitable Sharing Program, a state or local law enforcement agency must annually submit to AMIL'S a signed Equitable Sharing Agreement and Certification form. The agreement must be signed by the head of the law enforcement agency and a designated official of the governing body. By signing the Affidavit, the signatories agree to be bound by the statutes and guidelines that regulate the equitable sharing program and certify that the law enforcement agency will comply with these guidelines and statutes. State and local law enforcement agencies must submit this form within 60 days after the end of an agency's fiscal year, regardless of whether funds were received or maintained during the fiscal year. The report must be completed electronically and emailed to aca.submit@usdoj.gov. Please see description under "Program Report". Please see description under "Program Report". DEPARTMENT OF LABOR

17.201 REGISTERED APPRENTICESHIP**FEDERAL AGENCY:**

Employment Training Administration, Department of Labor

AUTHORIZATION:

National Apprenticeship Act of 1937 (Fitzgerald Act), Title 29, Part 29, Public Law 075-75-308, 50 Stat. 664, 29 U.S.C 50-50a-50b.

OBJECTIVES:

To promote, engage, and assist industry in the development, expansion, and improvement of Registered Apprenticeship. This program is designed to provide the skilled workers required by U.S. employers, ensure equal employment opportunities, and the quality of all new and existing Registered Apprenticeship programs.

TYPES OF ASSISTANCE:

Information; Project Grants (for specified projects); Training

USES AND USE RESTRICTIONS:

Under the Office of Apprenticeship (OA), apprenticeship training programs and apprentices are registered in 25 States. OA also provides technical assistance and works closely with State Apprenticeship Agencies (SAAs) in the remaining 25 States, the District of Columbia, Guam, and two territories that register programs and apprentices in accordance with Federal standards. OA provides information on existing and recommended standards of training in Registered Apprenticeship. The wage rates of apprentices in registered programs (Federal and State) are exempt from the prevailing wage requirements of the Davis-Bacon Act and the Service Contract Act.

Registered Apprenticeship combines job-related technical instruction with structured on-the-job learning experiences in a skilled occupation. Registered programs are driven directly by the demands of the labor market. The training is industry-recognized, voluntarily sponsored by an individual business or an employer association and may be partnered with a labor organization through a collective bargaining agreement. OA brings these entities together, as appropriate, to formulate Registered Apprenticeship training programs which meet the federal standards. Various educational institutions, including institutions employing distance and computer-based learning approaches, and sponsors provide related instruction, technical training, or other certified training. Registered Apprenticeship is highly active in traditional industries

such as construction and manufacturing. With the goal to provide a pipeline of skilled workers, the program is also instrumental in providing skill occupational training in other sectors such as health care, energy, and homeland security.

The Advisory Committee on Apprenticeship (ACA) is an advisory board to the Secretary of Labor whose members represents employers, labor organizations, members of the public, as well as the education community, and others entities with an interest in skill training. The ACA provides advice and recommendations to the Secretary of Labor on apprenticeship and training issues. Special grants are provided to eligible organizations to assist employers and labor unions in placement and retention of women in apprenticeship and nontraditional occupations.

Applicant Eligibility:

For Registered Apprenticeship programs, employers, a group of employers, or an association of employers, or individual employers with or without in each case the participation of a labor union. There are no grant funds available to employers for construction of training facilities, curricula development, and apprentices' subsidies. Women in Apprenticeship and Non-Traditional Occupations (WANTO) grants fund innovative projects that are designed to improve women's participation in Registered Apprenticeship programs for nontraditional occupations in a broad range of industries. These grants are jointly administered by the Department of Labor's Women's Bureau and the Employment and Training Administration.

Beneficiary Eligibility:

Registered Apprenticeship program sponsors identify the minimum qualifications to apply into their apprenticeship programs. Individuals applying for acceptance into an apprenticeship program must be at least 16 years old. To be an apprentice in a hazardous occupation, the individual must usually be 18 years. Program sponsors may also identify additional minimum qualifications and credentials to apply, e.g., education, ability to physically perform the essential functions of the occupation, ability to complete the related technical instruction, proof of age.

The program will be registered if it meets Federal requirements covering (a) the apprenticeability of the occupation(s) and (b) the suitability of the training standards for providing apprentices with sufficient knowledge to become skilled workers. Grants for projects are awarded on a competitive basis, announced in Solicitation for Grant Applications (SGAs) in the Federal Register and also on the Employment and Training Administration's (ETA's) Internet website at <http://www.doleta.gov>. To compete for a grant, organizations develop a proposal and budget that demonstrate how the organization will provide services to a targeted population. The SGA provides all of the necessary information for applying for federal assistance.

Award Procedure:

Not applicable for advisory services and counseling type of assistance. Procedure for award is specified in the applicable request for applications.

Generally, the procedure is as follows: A technical review panel will carefully evaluate applications against the selection criteria. These criteria are based on the policy goals, priorities, and emphases set forth in the Solicitation for Grant Award. The ranked scores (which may include the mathematical normalization of review panels) will serve as the primary basis for selection of applications for funding, in conjunction with other factors such as geographic balance, the availability of funds, and which proposals are most advantageous to the government. Award Notices are posted on the Employment and Training Administration (ETA) Homepage (<http://www.doleta.gov>). Disability Employment Initiative (DEI): The Disability Employment Initiative (DEI) was established by Congress in 2010. Through three rounds of grant awards, DOL has awarded \$63 million in competitive grants to 23 state WIA-administering entities to improve educational, training, and employment opportunities and outcomes of youth and adults with disabilities who are unemployed, underemployed, and receiving Social Security disability benefits. By October 1, 2013, DOL will be awarding a fourth round of DEI grants to fund cooperative agreements with state WIA administering entities for 40 months. DOL anticipates funding approximately six DEI grants for a total of \$18 million. USES AND USE RESTRICTIONS:

Organizations that receive grants use the funds to create and pay for part-time community service training positions for unemployed persons age 55 and above whose income is at or below 125 percent of the poverty level. The individuals who are enrolled may be trained in work assignments at local 501(c)(3) non-profit or government agencies. (If justified, the seventy-five percent funding requirement can be reduced to sixty-five percent with the ten percent funds used for additional participant training.) The remaining funds may be used to provide participants with classroom training and supportive services. No more than 13.5 percent of the Federal share of the costs may be spent for administration. (If justified, a waiver to 15 percent may be provided by the Department of Labor.). 17.245 TRADE ADJUSTMENT ASSISTANCE

FEDERAL AGENCY:

Employment Training Administration, Department of Labor

AUTHORIZATION:

Trade Act of 1974, as amended, Title II, Public Law 93-618, 88 Stat. 1979, 19 U.S.C 2271-2322.

OBJECTIVES:

To provide adjustment assistance to qualified workers adversely affected by foreign trade which will assist them to obtain suitable employment.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

State Workforce Agencies (SWAs) serve as agents of the United States for administering the worker adjustment assistance benefit provisions of the Trade Act. SWAs, through the local offices, provide testing, counseling, and job placement services; job search and relocation assistance; training; and payment of weekly trade readjustment allowances (TRA). State unemployment compensation and extended benefits must be exhausted before TRA is paid to eligible claimants. Trade impacted workers are eligible to receive job search and relocation allowances in addition to the costs of training. They may be paid subsistence and transportation allowances to attend approved training outside the normal commuting distance of a worker's regular place of residence.

Applicant Eligibility:

In FY 2012 ETA administered three separate TAA programs the program implemented by the Trade Adjustment Assistance Extension Act of 2011 (TAAEA) that is in effect for petitions filed on or after October 21, 2011; the program implemented by the Trade and Globalization Adjustment Assistance Act of 2009 (TGAAA), that is in effect for petitions filed between May 18, 2009 and February 15, 2011; and the program administered under the Trade Act as amended by the TAA Reform Act of 2002, which existed before May 18, 2009, and resumed after February 15, 2011 as part of the Omnibus Trade Act of 2010. The TAAEA maintained the expansions to the program made by the

TGAAA: expanded TAA coverage to more workers and firms, including workers and firms in the service sector; made benefits available to workers whose jobs have been off-shored to any country (as opposed to covering a more limited set of shifts in production), improved workers training options, and increased the affordability of health insurance coverage. The TAAEA maintained the TGAAA's expansion in the scope of the program to better assist adversely affected workers in finding new employment. It reauthorized funding for employment and case management services, and encouraged the type of long-term training necessary for jobs in the 21st century economy through an extension of income support, an increase in the cap for training funding, and access to training for adversely affected incumbent workers. The TAAEA differs slightly from the TGAAA in the amount and type of weekly income support, as well as the benefit level of the wage supplement program for older workers.

For a worker to be eligible to apply for TAA, the worker must be part of a group of workers that are the subject of a petition filed with the Department. Three workers of a company, a company official, a union or other duly authorized representative, or a One-Stop Career Center operator or One-Stop partner may file that petition with the Department. In response to the filing, the Department institutes an investigation to determine whether foreign trade was an important cause of the workers job loss or threat of job loss. If the Department determines that the workers meet the statutory criteria for group certification of eligibility for the workers in the group to apply for TAA, the Department grants the petition and issues a certification.

Once covered by a certification, individual workers apply for benefits and services through the One-Stop delivery system. Most benefits and services have specific individual eligibility criteria that must be met, such as previous work history, unemployment insurance eligibility, and individual skill levels.

Beneficiary Eligibility:

The TAA program currently offers the following services to eligible individuals: training, weekly income support, out-of-area job search and relocation allowances, case management and employment services, assistance with payments for health insurance coverage through the utilization of the Health Coverage Tax Credit (HCTC), and wage insurance for some older workers through ATAA or RTAA. ATAA is the wage insurance option available to reemployed older workers authorized by the TAA Reform Act of 2002. As a pilot project under this legislation, ATAA provides wage insurance to reemployed older workers for adversely affected workers covered by certifications of petitions filed before May 18, 2009 and after February 15, 2011 through October 21, 2011. Under the TGAAA, ATAA was replaced with RTAA, which is a wage insurance benefit for older workers that provided expanded eligibility options and benefits in comparison with the ATAA program. Under the TAAEA, RTAA was reauthorized, but at the 2002 benefit levels.

Credentials/Documentation:

No Credentials or documentation are required. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. To apply for TAA under the Trade Act of 1974, as amended, a "Petition for Trade Adjustment Assistance" must be filed directly with the Office of Trade Adjustment Assistance at the address listed below and with the State official or organization designated by the Governor of the State in which the workers' firm or subdivision is located. OTAA and State contact information, as well as petition forms in English and Spanish, are available through the State Workforce Agencies or from the Office of Trade Adjustment Assistance listed below. The Petition forms may also be downloaded from our web-site, or filed online, at: <http://www.doleta.gov/tradeact>. Petitions must be filed with both the OTAA and the State agency in which the worker group's plant is located. Notice of such filing shall be promptly published in the Federal Register.

Within 10 days after publication, the petitioner or any other person found by the Secretary to have a substantial interest may request a hearing and be afforded the opportunity to be present, to present evidence, and to be heard.

Award Procedure:

A Certification of Eligibility to apply for worker adjustment assistance may be issued by the Secretary of Labor to groups of workers who have been found by the Department of Labor to have met the requirements concerning foreign trade-affected separations from employment. Individual workers covered by the certification can apply to the local office of their State Workforce Agency for individual determinations of eligibility to receive benefits.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

From 30 to 60 days. For the TAA program, eligibility investigations begun by the receipt of a valid petition are completed, and a determination issued, within 40 calendar days of the receipt of the petition.

Appeals:

From 30 to 60 days. There are two courses of appeal, one administrative and the other judicial. Petitioners aggrieved by a final determination by the Secretary may, within 30 days after notice of such determination is published in the Federal Register, file an application for reconsideration with the Director of the Office of Trade Adjustment Assistance. If the determination following reconsideration is negative, they may, within 60 days after notice of the negative determination upon reconsideration, file a petition for review of such determination with the United States Court of International Trade in New York City. Aggrieved petitioners may request judicial appeal without first seeking administrative reconsideration, within 60 days after notice of such determination is published in the Federal Register.

Cash trade readjustment allowances (TRA) generally becomes payable only after workers have exhausted their entitlement to State unemployment compensation including extended benefits. For TAA certifications on petitions filed between May 18, 2009 and February 15, 2011, the maximum number of weeks of State unemployment compensation, extended benefits and trade readjustment allowances cannot exceed 52 weeks except that up to 78 additional weeks may be paid to workers while participating in approved training and an additional 26 weeks for workers whose approved training program includes pre-requisite and/or remedial education. Participation in RTAA allows older workers, for whom retraining may not be appropriate, to accept reemployment at a lower wage and receive a wage subsidy instead of benefits under the regular TAA program. The RTAA allows for payments of 50 percent of the wage difference between old employment and new employment, not to exceed \$12,000 for up to two years. The individual must earn not more than \$55,000 a year in wages in reemployment, and must not return to employment from which the worker was separated. Base formula funding grants for training services are provided to States at the beginning of the year; additional funds may be requested by States based on additional needs above the base funding provided.

FEDERAL AGENCY:

Employment Training Administration, Department of Labor

AUTHORIZATION:

Workforce Investment Act of 1998, Title I, Part subtitle B, Section Chapter 5, Public Law 105-220, 20 U.S.C 9201.

OBJECTIVES:

To prepare workers -- particularly disadvantaged, low-skilled, and underemployed adults -- for good jobs by providing job search assistance and training. Program performance is measured by entry into unsubsidized employment, retention in unsubsidized employment, and earnings. The program serves individuals and helps employers meet their workforce needs. The employment goals will be measured using the Unemployment Insurance Wage Records Information System and customer satisfaction goals will be measured by sampling.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

The Act specifies that most services for adults will be provided through the American Job Centers, also known as One Stop Career Centers. The Act authorizes three levels of service which are available to all jobseekers. "Core" services include outreach, job search, placement assistance, and labor market information, and are available to all jobseekers. "Intensive" services include more comprehensive assessments, development of "Individual Employment Plans" (IEP) and counseling, and career planning. Those customers who need additional services to find or retain employment may receive "training" services linked to job opportunities in their communities, including both occupational training and training in basic skills. To promote customer choice and involvement in career decisions, participants use an "Individual Training Account (ITA)" to select an appropriate training program from an eligible training provider. The Act also authorizes the provision of supportive services (e.g., transportation and child care assistance) to enable an individual to participate in the program. Consistent with the allowable activities in the statute.

Applicant Eligibility:

Under WIA, the organizations eligible to receive funding from the Department are the 50 States, Puerto Rico, the District of Columbia and the outlying areas. Funds are allotted based on a statutory formula. The states in turn allocate funds to local workforce investment boards (approximately 600), by formula.

Beneficiary Eligibility:

All adults 18 years and older are eligible for core services. Priority for intensive and training services must be given to public assistance recipients and low income populations when funds are limited. Priority of service is given to veterans and other covered persons. States and local areas are responsible for establishing procedures for applying the priority requirements.

The governor submits a single Strategic State Plan in accordance with one of the Planning Guidances, either Stand-Alone or Unified, issued through the Federal Register. The Planning Guidances provide detailed instruction on what must be included in the State Plan. The Unified Planning Guidance provides a framework for collaboration across programs and integration of services beyond WIA Title I programs and Wagner-Peyser Activities, including non-DOL programs and other ETA and non-ETA DOL programs. The plan is submitted to the Federal Coordinator for Plan Review and Approval (currently Robert Kight), Division of WIA Adult Services and Workforce System, Office of Workforce Investment, Employment and Training Administration, Department of Labor, 200 Constitution Avenue, NW, Room S-4209, Washington, DC 20210.

Award Procedure:

Those portions of the State Plan over which the Assistant Secretary for Employment and Training exercises authority are reviewed and approved by the Employment and Training Administration. Formula funds are awarded to the states based on a statutory formula provided in the authorizing legislation.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

From 60 to 90 days. State plans will be reviewed in accordance with 20 CFR 661.220(e), which provides that the Secretary must approve all state plans within 90 days of their submission, unless the Secretary determines in writing that: (1) the State Plan is inconsistent with the provisions of Title I of WIA or the WIA regulations, including 29 CFR Part 37; or (2) the portion of the State Plan impacting the Wagner-Peyser Act plan does not satisfy the criteria for approval in Section 8(d) of the Wagner-Peyser Act or the Wagner-Peyser Act regulations at 20 CFR Part 652.

OBJECTIVES:

To carry out innovative programs consistent with the purposes of Title I of WIA (Workforce Investment Systems), Title II of WIA (Adult Education and Family Literacy Act (AEFLA), 20 U.S.C. 9201 et seq.), the Carl D. Perkins Vocational and Applied Technology Education Amendments of 1998 (Public Law 105-332, 20 U.S.C. 2301 et seq.) or a combination of two or more of these acts.

TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

States have great flexibility in using these funds and are not limited to conducting only one type of innovative program. However, the use of grant funds must be consistent with WIA Section 503, including the requirement that they be used for innovative programs which further the purposes of WIA Titles I and II, AEFLA and/or the Perkins Act. In addition, grantees must comply with the requirements of whichever program the innovation affects. For example, if the incentive funds will be used for innovations in the delivery of youth activities under WIA Title I, the program must be consistent with WIA Title I provisions applicable to youth activities and the WIA regulations at 20 CFR part 664. States must submit a plan describing the innovative activities to be funded with this grant. States are expected to use funds for services and activities: (1) beyond those provided with regular funds from the three programs, particularly those authorized by one of these programs and another program; (2) which serve the needs of populations intended to be served by one or more of these programs; and (3) targeted to improving the performance of State systems of employment, training, and education. In addition, States are encouraged to plan activities that promote cooperation and collaboration among the agencies administering WIA Title I, AEFLA, and Perkins Act programs. States may only use funds in accordance with WIA, AEFLA, or Perkins Law III/IV.

Applicant Eligibility:

A listing of States eligible to receive incentive grants for program year 2010 performance was published in the Federal Register on May 25, 2012. To qualify for a grant, a State must exceed performance levels agreed to by the Secretary of Education, the Secretary of Labor, the Governor, and the State Education Officer, for outcomes in Titles I and II of the Workforce Investment Act (WIA) and the American Education and Family Literacy Act (AEFLA), which include

The SGAs provide all of the necessary information for applying for federal assistance.

Award Procedure:

Procedures for each project are specified in the applicable request for proposals. Generally, the procedure is as follows: A technical review panel composed of staff from ETA program offices as well as peer reviewers evaluates eligible submitted applications. The panel prepares a report for the ETA Grant Officer identifying the strengths and weaknesses of the application and the cumulative rating. Selections are made based on the best rated proposals, as well as other factors cited in the SGA. Once selections are made by the Grant Officer, an Award Notification is sent through the appropriate congressional channels for notification. After awardees are notified, the list of awardees is posted on the ETA website at www.doleta.gov. 17.276 HEALTH CARE TAX CREDIT (HCTC) NATIONAL EMERGENCY GRANTS (NEGS)

FEDERAL AGENCY:

Employment Training Administration, Department of Labor

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009 (Public Law 111-5), Trade Act of 1974 (Public Law 93-618), as amended; Trade Adjustment Assistance (TAA) Reform Act of 2002 (Public Law 107-210), as reauthorized by the TAA Extension Act of 2011; Workforce Investment Act Section 173(g)(29 U.S.C. 2918), Public Law 111-5.

OBJECTIVES:

To provide health insurance coverage assistance and support related services to individuals eligible for Trade Adjustment Assistance (TAA), alternative TAA, or a PBGC pension, as authorized under the Trade Adjustment Assistance Reform Act of 2002, and reauthorized under the TAA Extension Act of 2011.

TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

Please Note: The legislation that authorizes the HCTC program expires on January 1, 2014 and the tax credit will no longer be available. With the expiration of the IRS HCTC program, ETA will no longer accept applications or award HCTC NEGs.

There are two types of HCTC NEGs: infrastructure and Gapfiller. Infrastructure NEG funds can be used to help states establish the systems and procedures needed to make healthcare benefits available for eligible individuals. Gapfiller NEGs can be used to provide assistance and support services, including qualifying health insurance coverage, transportation, child care, dependent care and income assistance, to eligible individuals waiting to receive payments through the HCTC. The HCTC is equal to 72.5 percent of the amount paid by an eligible individual for qualified health coverage. Monthly payments are made directly to a health plan administrator on behalf of participants, allowing them to receive the benefit of the tax credit at the time of need. States may request HCTC NEG funds to cover up to three months of gap payments to support 72.5 percent of the qualified premium for eligible individuals. The gap period is defined as the period after the state determines a candidate's eligibility for HCTC until the IRS enrolls, processes, and pays a candidate's first payment under the HCTC program. This period is usually one month, but depending on the timing and other factors can take up to three months, and sometimes slightly longer in rare instances. NEG funding for gap periods is predicated on the fact that the individual remains eligible for the HCTC for all gap months. NEGs funds are discretionary.

17.278 WIA DISLOCATED WORKER FORMULA GRANTS

(WIA Dislocated Workers)

FEDERAL AGENCY:

Employment Training Administration, Department of Labor

AUTHORIZATION:

Workforce Investment Act of 1998, Title I, Part Subtitle B, Section Chapter 5, Public Law 105-220, 20 U.S.C 9201.

OBJECTIVES:

The purpose of the WIA Dislocated Worker program is to help dislocated workers become reemployed through job search assistance and/or training that builds their occupational skills to meet labor market needs. This program's success is measured by participants' entry into unsubsidized employment, retention in unsubsidized employment, and average earnings.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

The Act authorizes three levels of service for dislocated workers. "Core" services include outreach, job search and placement assistance, and labor market information. "Intensive" services include more comprehensive assessments, development of individual employment plans and counseling, and career planning. Customers who cannot find employment with their current skills may receive "training" services linked to job opportunities in their communities, including both occupational training and training in basic skills. To promote customer choice and involvement in career decisions, participants use an "Individual Training Account" (ITA) to select an appropriate training program from an eligible training provider. The Act also authorizes the provision of supportive services (e.g., transportation and child care assistance) to enable an individual to participate in the program. Funds reserved by the Secretary are also used for technical assistance and training and demonstration programs.

Beginning in Program Year (PY) 2010 CFDA number 17.260 will no longer be used for any new funding. Funding previously covered under 17.260 which is allocated after June 30, 2010 will be referenced using several new CFDA numbers: 17.277 for National Emergency Grants (NEGs), 17.278 for WIA Dislocated Worker Formula Grants, 17.280 WIA Dislocated Worker National Reserve Demonstration Grants, and 17.281 WIA Dislocated Worker National Reserve Technical Assistance and Training Grants. All subsequent information listed here under 17.278 refers to WIA Dislocated Worker Formula Grants. Funds must be used in accordance with the statute and regulations.

Applicant Eligibility:

Under the Act, the organizations eligible to receive formula-based funding from the Department are the 50 states, Puerto Rico, the District of Columbia and the outlying areas. Funds are allotted based on a statutory formula and states, in turn, allocate funds to local workforce investment boards (approximately 600), by formula prescribed by the governor.

Beneficiary Eligibility:

Individuals eligible for assistance through the Act include workers who have lost their jobs, including those dislocated as a result of plant closings or mass layoffs, and are unlikely to return to their previous industry or occupation; formerly self-employed individuals; and displaced homemakers who depend on income of another family member, but are no longer supported by that income. Priority of Service is given to veterans and other covered persons.

Credentials/Documentation:

Formula-funded programs are subject to an agreement between the Governor and Secretary and an approved State Plan. States sign a grant document agreeing to comply with the Act and regulations for the formula-allotted program. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is required. Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

OMB Circular No. A-102 applies to this program. This program is excluded from coverage under OMB Circular No. A-110. The governor submits a single Strategic State Plan in accordance with one of the Planning Guidance, either Stand-Alone or Unified, issued through the Federal Register. The planning guidance provides detailed instruction on what must be included in the State Plan. The Unified Planning Guidance provides a framework for collaboration across programs and integration of services beyond WIA Title I programs and Wagner-Peyser Activities, including non-DOL programs and other DOL programs. The plan is submitted to the Federal Coordinator for Plan Review and Approval (currently Robert Kight), Division of WIA Adult Services and Workforce System, Office of Workforce Investment, Employment and Training Administration, Department of Labor, 200 Constitution Avenue, NW, Room S-4209, Washington, DC 20210.

Award Procedure:

Those portions of the State Plan over which the Assistant Secretary for Employment and Training exercises authority are reviewed and approved by the Employment and Training Administration. Formula funds are awarded to the states based on a statutory formula provided in the authorizing legislation.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

From 60 to 90 days. State plans will be reviewed in accordance with 20 CFR 661.220(e), which provides that the Secretary must approve all state plans within 90 days of their submission, unless the Secretary determines in writing that: (1) the state plan is inconsistent with the provisions of Title I of WIA or the WIA regulations, including 29 CFR Part 37; or (2) the portion of the state plan impacting the Wagner-Peyser Act plan does not satisfy the criteria for approval in section 8(d) of the Wagner-Peyser Act or the Wagner-Peyser Act regulations at 20 CFR Part 652.

17.279 GREEN JOBS INNOVATION FUND GRANTS

Green Jobs Innovation Fund Grants

FEDERAL AGENCY:

Employment Training Administration, Department of Labor

AUTHORIZATION:

Workforce Investment Act of 1998, Title 1, Section 171, Public Law 105-220, 1

U.S.C 171.

OBJECTIVES:

The Green Jobs Innovation Fund is part of the Department's vision for ensuring that workers have the necessary skills, knowledge, and abilities to succeed in a knowledge-based economy that includes high growth and emerging green industries. Green industries include the energy efficiency and renewable energy industries as well as sectors that impact our environment such as transportation, green construction, environmental protection, sustainable agriculture, forestry, and recycling and waste reduction. The Green Jobs Innovation Fund will allow ETA to build upon the lessons learned from the green job investments provided under the American Recovery and Reinvestment Act. Through a competitive grant opportunity, the Department is emphasizing critical steps along green career pathways by: 1) forging linkages between Registered Apprenticeship and pre-apprenticeship programs, and/or 2) integrating the delivery of technical and basic skills training through community-based partnerships. The Fund will help workers receive job training in green industry sectors and occupations and access green career pathways.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

The funds must be used to train workers for careers in green industry sectors and occupations and help them access green career pathways. Specific rules and requirements are published in each Solicitation for Grant Application. Approximately one hundred percent of available funds are used for discretionary activities. Grant opportunities are published in the Federal Register. See Applicant Eligibility Requirements in the Solicitation for Grant Application (SGA). A small portion of the funds will be used to provide technical assistance to Green Job Innovation Fund grantees to support successful performance.

Applicant Eligibility:

See above.

Beneficiary Eligibility:

The scope of potential trainees is very broad. Specific requirements are published in each Solicitation for Grant Application (SGA). WIA Section 171 authorizes demonstration programs to serve unemployed workers, dislocated workers, and incumbent workers. Within these categories, grantees may serve a wide range of individuals, such as individuals receiving public assistance, high school dropouts, new entrants to the workforce, individuals with disabilities, veterans, Indians and Native Americans, and individuals with Limited English Proficiency. Eligible participants must be at least 16 years of age. If participants are 16-18 years of age, then they must be high school dropouts or out of school youth.

Credentials/Documentation:

Grantees must demonstrate an adequate organizational capacity, both fiscally and programmatically, including a project management structure. Additionally, grantees must provide evidence of the use of data systems to track outcomes in a timely and accurate manner. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. Grants for projects are awarded on a competitive basis, announced in Solicitation for Grant Applications (SGAs) in the Federal Register and also on ETA's Internet Web site at <http://www.doleta.gov>. To compete for a grant, organizations develop a proposal and budget that demonstrate how the organization will provide services to a targeted population. The SGA provides all of the necessary information for applying for federal assistance.

Award Procedure:

Procedures for each project are specified in the applicable request for proposals. Generally, the procedure is as follows: A technical review panel composed of

federal staff and peer reviewers evaluates eligible submitted applications. The panel prepares a report for the ETA Grant Officer identifying the strengths and weaknesses of each application and the cumulative rating. Selections are made based on the best rated proposals, as well as other factors as cited in the SGA. Once selections are made by the Grant Officer, an Award Notification is sent through the appropriate congressional channels for notification. After awardees are notified, the list of awardees is posted on the ETA website at www.doleta.gov. If an application is rejected, a letter is sent to the applicant as notification that they were not selected as a recipient of the grant.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

From 90 to 120 days. ETA announces grant recipients once the paneling process is complete, generally 90 to 120 days after the application deadline.

Appeals:

Procedures for each project are specified in the applicable Solicitation for Grant Application (SGA).

Renewals:

Renewals with funds are not available. However, with significant justification ETA may elect to exercise its option to award no-cost extensions to these grants for an additional period at its own discretion, based on the success of the program and other relevant factors.
