Fiscal Year 2014: Since Fiscal Year (FY) 2013, Applied Science Grants for the Desert and Southern Rockies LCCs combined more than \$2.1 million in Federal funding to enhance the management of natural and cultural resources that have

a nexus to water resource management. For example, once completed, the funded projects are expected to develop decision support tools and methodologies to address the effects of climate change; develop a decision support tool for incorporating ecological flows into water management models used for basin-wide water supply planning; develop new biological information about springs and seeps; develop a web-based tool to facilitate conservation planning and inform management decisions related to riparian and wetland species and climate change; develop a tool that can be used to predict the water volume in snowpack and soil moisture response to various forest treatments; and linking forest landscape management and climate change to the conservation of riparian habitat in the Grand Canyon. RELATED PROGRAMS:

15.507 Water 2025

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: Desert LCC: The Environmental Defense Fund (EDF) will use modeling tools and data from the 2014 Minute 319 pulse flow to develop an integrated system that will assist with future pulse flow release experimental determinations. The Minute 319 pulse flow is a temporary release of water to mimic natural spring floods in the Colorado River Delta to study how best to restore native riparian habitat. The new system will integrate data and models such as environmental conditions and designed pulse flow releases with targeted environmental variables to predict the environmental reaction to future pulse flow releases, thereby supporting adaptive management and planning in the future. By linking data and models together into an integrated system, EDF intends to reduce the time required to analyze scenarios and to provide data that would help guide the pulse flow design.

Southern Rockies LCCs: The Museum of Northern Arizona will leverage tools previously developed through its Springs Stewardship Initiative to help resource managers in the southwestern U.S. collect, analyze, report upon, monitor and archive the complex and inter-related information associated with springs and spring-dependent species in the region. Building upon those past efforts, the project will include compilation of existing springs-related information to make the information more readily available online and further development of interactive online maps and climate change risk assessment tools of springs-dependent sensitive plant and animal species. This project builds on an effort funded in FY 2013 to complete similar work for the Desert LCC. Fiscal Year 2015: Information not available. Fiscal Year 2016: Information not available.

CRITERIA FOR SELECTING PROPOSALS:

Specific evaluation criteria will be included in the funding announcements posted on www.grants.gov. All applications will be evaluated using criteria that give priority to a project's technical merit, the relevance to the LCC, dissemination of results to Reclamation and LCC partners, connections to Reclamation activities and exceed the minimum 50 percent non-Federal cost-share requirement.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2014: The primary objective of the Dixie Valley Ground Water Export Study is to determine how much water is available for export from Dixie Valley. The original plan of study included evaluating the feasibility of conveying the water to various points of use within Churchill County, Nevada. It was to be completed in three phases over a 5 year period, beginning in early 2009, concluding in 2014. The first phase included data collection/analysis to develop an understanding of the study areas hydrogeologic framework, ground-water flow, and water quality. The second phase was to include development of ground-water models for estimating hydrologic impacts and analyses of associated economic and environmental impacts. The third phase was contingent on Phase 2 results and would include pipeline design and cost estimating activities. Phase 1 is complete and reports of findings are either published or in publishing. The Phase 2 groundwater modeling is ongoing. The Phase 2 economic and environmental analyses, as well as the Phase 3 design and cost estimating work, will not be completed due to inadequate funds.

A one-year extension was requested and granted which postponed completion to January 25, 2015 and a second extension request is imminent. It is anticipated the extension request will be for 6 months and the project will be completed during July 2015. Fiscal Year 2015: No information available. EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: Under its award, the Maryland Department of Natural Resources worked on Health Investigations of Striped Bass and Other Fishes in Maryland Waters. The focus was to collect resident striped bass and to determine age-specific prevalence of mycobacteriosis; identify mycobacterial species and characterize bacterial flora in striped bass and to use epidemiology model(s) to examine disease dynamics (i.e. rates of change) over time using ongoing MD striped bass disease database. The total project cost was \$200,812 (Federal - \$150,609; Non-federal - \$50,207).

The Delaware Division of Fish Wildlife carried out a project titled, The Age and Growth of Delaware Black Drum. This project characterized the age structure of Delaware's black drum spawning stock. Samples for aging were collected from existing Division of Fish and Wildlife, commercial and recreational fisheries sampling programs. Accurate age information necessary for future stock assessments, developing management plans, and understanding life history. Age structure characteristics provide an understanding of the lifespan of black drum needed to estimate natural mortality, an essential parameter for stock assessment. The total project cost was \$13,684 (Federal - \$10,263; Non-federal - \$3,421).

The Colorado Parks and Wildlife Department completed their second year of funding the Navajo boat ramp project. The original ramp was built by the US Bureau of Reclamation in 1963. The goal of this project was to resurface approximately 30,000 square feet of the existing Navajo boat ramp, a reinforced concrete structure 1470 feet long, 80 feet wide and 6 inches thick. Total project cost was \$400,000 (Federal - \$300,000; Non-federal - \$100,000). Fiscal Year

2015: The Minnesota Department of Natural Resources will use Sport Fish Restoration Program funds for its Statewide fisheries research grant. The States major research areas over the next 10 years include evaluating and fine tuning existing fishing regulations; the effects of these changes on the community; stocking effects on other species; new holistic approaches to fish management; new habitat improvement techniques; forecasts of impacts to sport fisheries due to future climate change; population assessment tools; Lake Superior salmonid assessments; and the long term monitoring on the effects of fish rearing and biomanipulation of wetlands.

Four Southeastern states (Alabama, Georgia, Missouri, and North Carolina) will work together on The Southeastern Cooperative Fish Disease Project. Many fish diseases are still poorly understood and improved methods are needed to detect, identify and treat fish pathogens. The benefits of this study will be reduced loss of fish to diseases, both in the wild and in State hatcheries.

New Hampshire Fish and Game Department's Aquatic Resources Education project continues to fund two main programs that teach aquatic ecology, aquatic resource management, and angler education to various audiences: the Watershed Education Program (WEP) and the Let's Go Fishing (LGF) Program. Total project cost is \$398,500 (Federal - \$298,500; Non-federal - \$99,500). Fiscal Year 2016: The Program has not yet selected projects for funding. The Program anticipates funding projects that increase sport fishing and boating opportunities through wise investment of excise tax dollars in sport fishery development, research, and management projects.

CRITERIA FOR SELECTING PROPOSALS:

The States, the District of Columbia, Commonwealths, or territorial agencies having lead responsibility for the management of their fish resources must submit the projects. If approved, projects must meet the basic criteria outlined in the regulations and the U.S. Fish and Wildlife Service Manual.

RELATED PROGRAMS:

15.605 Sport Fish Restoration Program; 15.631 Partners for Fish and Wildlife

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: Increased native fish population numbers and expanded range are priority activities for delisting threatened and endangered species and preventing additional species listing. Habitat degradation and fragmentation have been identified as the leading cause for native fish population decline and range contraction. Impassable road crossing restricts native fish passage and excludes them from habitats upstream of the crossing. This project worked with the Dickinson County, KS, Public Works Department and successfully restored fish passage at 649 Paint Road where it intersects the Lyons Creek tributary, Dickinson County, KS. Evidence of fish passage objectives included spanning the creek with a structure that exceeded bankfull widths. Constructing channel spanning structures that exceed bankfull width were documented to facilitate fish passage. Fiscal Year 2015: Program has not yet selected projects for funding. Program anticipates funding projects that support the native aquatic species restoration and preservation through habitat restoration, science, and monitoring, and projects that reduce threats to their survival. Fiscal Year 2016: Program has not yet selected projects for funding. Program anticipates funding projects that support the native aquatic species restoration and preservation through habitat restoration, science, and monitoring, and projects that reduce threats to their survival.

RELATED PROGRAMS:

15.605 Sport Fish Restoration Program; 15.615 Cooperative Endangered Species Conservation Fund; 15.626 Hunter Education and Safety Program

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: The South Carolina Department of Natural Resources (SCDNR) and the National Wild Turkey Federation (NWTf) entered into an agreement for the development of a shooting range complex on approximately 300 acres of NWTf property. Currently NWTf has a small sporting clays course and rifle range on their property. Once completed this facility will provide a safe and functional outdoor facility for recreational shooting, firearm safety and hunter education, with particular emphasis on promoting youth involvement. The total cost is \$2,000,000 (\$1.3M federal (4C funds); \$666,667 non-federal).

The California Department of Fish and Wildlife (CDFW) funded a project with the overall purpose to have approximately 850 California Hunter Education Instructors teach an average of 2,000 Hunter Education (HE) classes for 25,000 and 32,000 students each year. The total cost is \$2.3M (\$1.77M federal; \$590,000 non-federal).

The Idaho Department of Fish and Game (IDFG) wants to develop a better understanding of the population drivers of pronghorn in various habitat types including native shrub-steppe, altered shrub-steppe, and agricultural communities. This information is necessary for conservation and management decisions, including hunting seasons, habitat improvement efforts, and technical assistance to public and private landowners. Fiscal Year 2015: Oregon has a Statewide Habitat Management grant that covers habitat restoration efforts in seven distinct Watershed Districts (Deschutes, John Day, Malheur, Klamath, Rogue, South Willamette, and Umpqua). Goals of the project are to: (1) Maintain, restore, or enhance wildlife habitat on public and private lands to optimize wildlife populations, while paying particular attention to listed species; (2) Evaluate, protect, or enhance existing habitat conditions or restore lost habitats on private and public lands; (3) Assist landowners by providing resources to restore and improve fish and wildlife habitat; and (4) Provide technical advice and assistance to local, State, and Federal agencies regarding land-use activities and proposed developments to promote conservation of fish and wildlife habitats.

The Alaska Department of Fish and Game (ADF&G) will be funding a project titled How do regenerating burns influence moose populations and harvest in Interior Alaska? Moose provide a considerable food resource to Alaskans and moose harvest also contributes to the economy of Alaska. The State of Alaska recognizes the importance of moose to its residents by including the species in laws designed to elevate harvest through intensive management. In accordance with this law, ADF&G developed plans to increase moose densities through habitat enhancement. However, no comprehensive plan exists for utilizing naturally-occurring burn scars to increase moose density and maximize harvest.

Indiana will develop the Willow Slough Shooting Range, replacing a shooting in Newton County using \$2 million of Section 4 Hunter Education funds. A modern range will enhance the safety of the range while accommodating the demand. Development of this range is expected to increase the number of hunters and recreational shooters using the facilities to 15,000 users per year. Safety, customer service, and accessibility enhancements will all contribute to customer satisfaction. Fiscal Year 2016: The Program has not selected projects for funding. The Program anticipates funding projects to restore, conserve, manage and enhance wild birds and mammals and their habitats and to provide hunter development and safety programs.

CRITERIA FOR SELECTING PROPOSALS:

The State, Commonwealth, or territorial agency having lead responsibility for the management of their wildlife resources must submit the projects. The State, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

RELATED PROGRAMS:

15.605 Sport Fish Restoration Program; 15.611 Wildlife Restoration; 15.634 State Wildlife Grants

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: \$45.4 million in grants awarded to 53 states and territories to support conservation planning and acquisition of vital habitat for threatened and endangered fish, wildlife, and plants. Examples are: 1) Traditional Conservation grant in the amount of \$19,000 to the State of North Dakota for inventory, mapping, and data management activities that support conservation efforts for the Western prairie fringed orchid.

2) HCP Planning Assistance grant to the State of California in the amount of \$717,271 to support the Bakersfield Regional HCP in Kern County. A key element of the new plan would be to establish standardized avoidance and take minimization measures for the San Joaquin kit fox, a federally listed endangered species that utilizes the urban environment within the City of Bakersfield.

3) Recovery Land Acquisition grant in the amount of \$180,000 to the State of Michigan to purchase three parcels of land to protect and assist in the recovery of the endangered Mitchells satyr butterfly and the eastern massasauga rattlesnake, a candidate for ESA listing.

4) HCP Land Acquisition grant in the amount of \$2,000,000 to the State of California to purchase approximately 700 acres of important habitat land for many of the species covered in the East Contra Costa HCP, including federally listed species such as the San Joaquin kit fox, California red-legged frog, and vernal pool tadpole shrimp. The acquisition of these properties added to the reserve system and provided protection for lands that have rich on-site resources and support a diverse mosaic of habitat types. Fiscal Year 2015: The program has not yet selected projects for funding. However, we expect to award over 200 grants to fund projects similar to those supported in FY14 that benefit threatened and endangered species on non-Federal lands. Fiscal Year 2016: The program has not yet solicited States and Territories for proposals. However, we expect to award over 200 grants to fund projects that benefit threatened and endangered species on non-Federal lands.

CRITERIA FOR SELECTING PROPOSALS:

Proposals for grant funding must be submitted by the State fish and wildlife agency. The State must have an approved cooperative agreement with the Secretary of the Interior which provides for sharing responsibilities for endangered species, prior to receiving Cooperative Endangered Species Conservation Fund (section 6 of the Endangered Species Act) funds. Individual project proposals must compete with other State submissions for funding. For additional information please visit <http://www.fws.gov/endangered/grants/index.html>.

Florida Coastal \$1,410,651, Inland \$770,126 The Florida Department of Environmental Protection constructed 30 coastal and 15 inland pumpout stations to replace or install new facilities for the many boaters in Florida. They expanded their ongoing CVA boater education program.

Indiana Coastal \$104,518, Inland \$257,518 The Indiana Department of Environmental Management constructed and renovated both inland and coastal pumpouts with partners. They covered operation and maintenance funds for partners already involved in providing pumpouts for the boater. In addition, they informed the boaters and public about the Clean Vessel Act grant program through social media and other educational opportunities.

Texas Coastal \$240,000, Inland \$225,000 The Texas Parks and Wildlife Department (TPWD) enhanced the infrastructure of their pumpouts throughout the state by installing seven coastal and nine inland pumpout facilities. TPWD also provided maintenance funds to keep existing pumpouts operational. TPWD continued their boater education program by developing and distributing educational materials related to CVA and conducting workshops throughout Texas.

Washington - Coastal \$1,500,000 The Washington State Parks and Recreation Commission (WSPRC) installed new pumpout facilities and maintained and replaced aging units throughout the State. WSPRC continued a strong educational program, informing the public about the detrimental impacts to the environment of improper sewage disposal throughout the state. Fiscal Year 2015: Program has not yet selected projects for funding. Program anticipates funding projects that construct, renovate, operate, and maintain sewage pumpout stations, waste reception facilities, and pumpout boats for recreational boaters and for educational programs that inform boaters of the importance of proper disposal of their sewage. Fiscal Year 2016: Program has not yet selected projects for funding. Program anticipates funding projects with similar objectives as those in FY15.

CRITERIA FOR SELECTING PROPOSALS:

The criteria for selecting proposals are based upon the extent the project will contribute to public/private partnerships; innovative approaches to increasing availability and use of pumpouts/dump stations; implementation of an education program; contribution toward protecting sensitive areas; and lowering the ratio of vessels with holding tanks and portable toilets to pumpouts and dump stations.

RELATED PROGRAMS:

15.605 Sport Fish Restoration Program; 15.611 Wildlife Restoration; 15.614 Coastal Wetlands Planning, Protection and Restoration Act; 15.635 Neotropical Migratory Bird Conservation

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: Example of US Standard grant project, Glaciated Wetlands and Prairies of ND and MN IV- This is phase four of a project designed to protect wetland and grassland communities using a landscape-level approach to planning. It is also the third project to span the borders of North Dakota and Minnesota in the Prairie Pothole Joint Venture to protect critical habitat for migratory birds. Through this project, 3,456 acres of native grassland and 594

acres of wetland habitat will be secured by perpetual easements resulting in significant benefits for grassland birds. Protection of native prairie surrounding the important prairie wetland habitats in the project area will: 1) provide nesting habitat for waterfowl and other species, and 2) minimize the influx of sediments, herbicides and pesticides into these wetlands. Example of Small grant project, Humboldt Bay Spartina Eradication- Tidal marshes in the Humboldt Bay National Wildlife Refuge are being dominated by invasive Spartina, a noxious weed that degrades the habitat quality and makes it difficult for native salt marsh plants to grow. This project will restore 40 acres of marshes by eradicating the invasive Spartina plants and by continuing to maintain the area for native plant communities. The wetlands surrounding Humboldt Bay, California's second largest natural bay, host more than 260 bird species including 39 shorebird species and 26 raptor species that rely on the bay as they travel the Pacific Flyway. Fiscal Year 2015: Example of US Standard Grant project, Central Flyway Migration Corridor- This effort brings together an extensive list of partners to achieve diverse wetland conservation results at a landscape scale. The grantee will conserve 4,279 acres and enhance 840 acres of the conserved land. The project will permanently protect 382 acres of wetlands, much of which will be added to the Talmo Marsh Wildlife Management Area. Conducting 15 individual projects to restore and enhance wetland habitat conditions, the grantee will also plant new vegetation to support foraging birds during spring migration. Mallard, pintail, and White-Fronted Goose populations greatly depend on these habitats in the Rainwater Basin, as do shorebirds. Fiscal Year 2016: Program has not yet selected projects for funding. Program anticipates funding projects that protect and improve habitat for migratory birds and other wetland-associated species. More examples of NAWCA projects can be found at <http://www.fws.gov/birdhabitat/Grants/NAWCA>.

CRITERIA FOR SELECTING PROPOSALS:

The Council selects proposals based on factors given in Section 5 of the North American Wetlands Conservation Act, results of site visits, available funds and other factors deemed important to meeting Act objectives.

RELATED PROGRAMS:

15.611 Wildlife Restoration

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: The Kentucky Department of Fish and Wildlife Resources (KDFWR) funded the Kentucky Archery in the Schools Program, total cost: \$96,000 (\$72,000 federal; \$24,000 non-federal). During the grant period, 552 Kentucky schools conducted archery programs with 105,398 students participating during regular school hours. The Archery in the Schools Program trained 555 new archery instructors in 64 Basic Archery Instructor training classes, including agency staff at the 3 KDFWR conservation camps. Educational documents were added to the KDFWR website to better inform interested schools about the advantages of the program, as well as a "how to" guide providing information on implementing the program in a school. The Alabama Wildlife and Fresh Water Fisheries Division continued to fund

Firearms and Archery Range Development. The total cost is \$180,000 (\$135,000 federal; \$45,000 non-federal). New Shooting Ranges and educational facilities will be developed to ensure the public has a safe, convenient place to shoot and attend hunter education classes.

The Washington Department of Fish and Wildlife provided funds for their Hunter Education Program, which provided funds to law enforcement officers to participate and train students and instructors, purchases needed equipment and supplies, do outreach, develop courses, recruit volunteers and instructors, coordinate hunter education classes, and maintain the online registration system. The total cost was \$1.8M (\$1.4M Federal; \$450,000 non-Federal).

Fiscal Year 2015: The Idaho Department of Fish and Game Hunters Education, Bowhunters Education, and Trappers Education programs are designed to educate Idaho hunters and trappers about safe hunting and trapping practices, game management, hunting regulations, and to be responsible, ethical sportsmen and sportswomen. The total cost is \$2.5 M (\$1.8M Federal; \$630,000 non-Federal). This grant utilizes both Section 4 and Section 10 HE funds.

The North Carolina Wildlife Resources Division will partnership with public, private and homeschool organizations to implement the National Archery in Schools Program (NASP) curriculum to teach archery to students in grades four through twelve. All organizations will also work together to train teachers as certified archery instructors and instructor-trainers. Total cost \$108,777 (\$81,583 Federal; \$27,194 non-Federal).

The Georgia Wildlife Resources Division will fund their Range Enhancement and Hunter Development Program. There is a need to introduce youth people to the shooting sports through the School system in an attempt to reverse the decline in hunting license sales. To accomplish this, students and instructors need to be trained properly in the sport of archery to guarantee they participate in the NASP in a safe and ethical manner. Annual events held at various locations statewide will be expanded and additional personnel, equipment and supplies will be provided to support these events. Total cost \$310,000 (\$230,000 Federal; 80,000 non-Federal). Fiscal Year 2016: The Program has not yet selected projects for funding. The Program anticipates funding Section 10 Enhanced Hunter Educational projects and activities that are eligible each year.

CRITERIA FOR SELECTING PROPOSALS:

The State, Commonwealth, or territory agency having responsibility for the management of their resources must submit the projects. The State, Commonwealth's, or territory's wildlife resources must submit the projects. The State, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

RELATED PROGRAMS:

15.605 Sport Fish Restoration Program; 15.611 Wildlife Restoration

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: The funds are utilized primarily by state fish and wildlife agencies to fund conservation in the United States. The amount of funds received by a state fish and wildlife agency is dependent, in part, on the number of hunting and fishing licenses sold by a state. The Multistate Conservation Grant Program is a competitive grant program and funded annually with \$6M via the WSFR Program.

The Association of Fish and Wildlife Agencies (AFWA) continued its work with the project, National Fish Habitat Action Plan Implementation and Promoting Strategic Fish Habitat Conservation through Regionally-coordinated Science and Collaboration. This project broadened community support for fish habitat conservation by raising public awareness of the role healthy fish habitats play in the quality of life and economic well-being of local communities; and communicated the conservation outcomes produced collectively by Fishery Habitat Partnerships.

The American Sport Fish Association completed a project, Increase Participation and State Revenues through State-Industry Cooperative Research into Churn Rates and First Time License Buyers. This project collected data to improve current science-based knowledge of angler dropout and license churn rates and to identify the primary factors that encouraged first-time anglers to try the sport.

The National Shooting Sports Foundation (NSSF) continued its project, Increase Hunting License Buyers and Excise Tax Receipts through State-Industry Cooperative Recruitment and Retention Research and Testing. The project reviewed 10 years of license data in 16+ States to assess renewal and churn rates to learn more about active and lapsing hunters; to identify the factors that have influenced first-time license buyers; to apply results to the ongoing NSSF-state outreach efforts; and to scientifically evaluate program effectiveness and to identify improvements. Fiscal Year 2015: The Wildlife Management Institute will begin a project to develop and implement a National Hunting and Shooting Sports Action Plan. This plan will incorporate a suite of solution guides designed to align needed programs, efforts, and funding with specific threats documented by research and experience to be negatively impacting the population of hunters and shooters in the United States.

The Association of Fish and Wildlife Agencies (AFWA) will start a project to look into improving the conservation of fish and wildlife populations and habitats during energy exploration. There is a need to advance the state fish

and wildlife agencies leadership role and responsibilities, particularly with respect to coordination with federal agencies, in policy discussions relating to minimizing the impacts of energy development on fish and wildlife resources and their habitats.

The American Sportfishing Association will begin a project, Boosting Fishing Participation by Boat Owners. The objectives are to determine how the boating and sportfishing communities can increase efforts to help recruit and retain anglers and to maximize days of participation and boost license sales. This will be accomplished by mining existing license and boat registration data for correlations between boat ownership and angling, including avidity, churn rates, barriers to participation and other issues identified by states and industry. Fiscal Year 2016: The Program has not yet selected projects for funding. The Program anticipates funding projects that address species or habitat research activities, hunting and fishing recruitment and retention information collection, aquatic or hunter education activities, conservation planning, outreach and coordination.

CRITERIA FOR SELECTING PROPOSALS:

Projects will be reviewed and evaluated for scope, significance, feasibility, and cost effectiveness. In addition, projects must address one or more focus areas as described in the National Conservation Needs established annually by the Association of Fish and Wildlife Agencies (AFWA).

Activities included providing training to 100 Forest Guards posted in habitats occupied by hoolock gibbons; carrying out 5- 7 days of intensive, residential courses on hoolock gibbon conservation comprised of lectures, seminars, group discussions, individual and group assignments and field study at the Gibbon Wildlife Sanctuary; and carrying out pre- and post- training assessments of the trainees knowledge and attitudinal change resulting from the course; 2) A project to determine the presence and relative densities of chimpanzees in areas of southeastern Senegal to understand the impacts of proposed large-scale mining and to identify key habitats for future protection; and 3) A project to reduce the risk of disease transmission between people and mountain gorillas by improving the health and hygiene of Batwa communities that neighbor Bwindi Impenetrable National Park, Uganda. Fiscal Year 2015: Program has not yet selected projects for funding. Program anticipates funding projects that are effective for the long-term conservation of great apes, and those that are similar in scope to FY14. Fiscal Year 2016: Program anticipates funding projects that are effective for long-term conservation of great apes, and those that are similar in scope to FY14.

RELATED PROGRAMS:

15.623 North American Wetlands Conservation Fund

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: San Bernardino Neotropical Migratory Bird Habitat Restoration III - The grantee and partners will work on both sides of the border to restore 2,500 acres of upland grasslands to benefit more than 250 neotropical migratory bird species, including Montezuma Quail and Bells Vireo. Another project activity is restoring a key tributary to the Rio San Bernardino to benefit species of continental concern such as Yellow-billed Western Cuckoo and Cassins Kingbird. The grantee will cultivate a native grass seed bank to secure the sustainability of future grassland restoration, monitor grassland- and riparian-related bird species of regional and continental concern, and conduct outreach with local landowners educational institutions to promote conservation and restoration work on their lands.

U.S.-Mexico Grassland Bird Conservation XII - This project will continue work funded by the NMBCA since 2002 to conserve high-priority declining grassland bird species. In this project phase, the grantee will expand work with landowners in the Valles Centrales of Chihuahua to improve habitat for Spragues Pipit and other grassland birds on at least 25,500 acres; advance research on limiting factors for overwinter survival of grassland birds in the Chihuahuan Desert; and permanently protect 800 acres of short and mixed grass prairie in a priority conservation area in western Nebraska that provides breeding and stopover habitat for these same species. The grantee expects to double the wintering population of Spragues Pipits and other high priority species including Bairds Sparrow and Chestnut-collared Longspur on project sites in Chihuahua over the next 5 years.

Reforestation of Critical Wintering Habitat for Neotropical Migrants V - The American Bird Conservancy and its in-country partners will: plant 140,000 native trees and coffee bushes; enhance or manage at least 695 acres; and contribute to the ongoing protection of 16,557 acres as significant wintering habitat for migratory birds in Ecuador and Peru. Partners will also measure migrant warbler density and habitat use to guide adaptive management for future restoration work. These efforts will focus on the Cerulean Warbler and will benefit 20 additional neotropical migratory bird species, as well as many resident bird species. Activities will also engage coffee growers and cattle ranchers, through technical workshops and outreach, to improve bird habitat on their lands and to encourage people living on public lands within the Alto Mayo Protection Forest to sign conservation agreements empowering local people to use agricultural practices that benefit migratory birds. Fiscal Year 2015: Projects not yet selected. Program expects to fund 25-35 awards to support

public-private partnerships carrying out projects in the United States, Canada, Latin America, and the Caribbean that promote the long-term conservation of Neotropical migratory birds and their habitats through: 1) Protection and management of neotropical migratory bird populations; 2) Maintenance, management, protection, and restoration of neotropical migratory bird habitat; 3) Research and monitoring; 4) Law enforcement; and 5) Community outreach and education. Fiscal Year 2016: Projects not yet selected. Program expects to fund 25-35 awards to support public-private partnerships carrying out projects in the United States, Canada, Latin America, and the Caribbean that promote the long-term conservation of Neotropical migratory birds and their habitats through: 1) Protection and management of neotropical migratory bird populations; 2) Maintenance, management, protection, and restoration of neotropical migratory bird habitat; 3) Research and monitoring; 4) Law enforcement; and 5) Community outreach and education.

CRITERIA FOR SELECTING PROPOSALS:

Proposals will be screened and selected for funding primarily on the basis of criteria contained in 16 U.S.C. 6101. However, proposals will also be evaluated on: scope and significance of effort; importance of resource values; relationship of project to other efforts locally/regionally; and feasibility and cost-effectiveness. Selection criteria are available on the program website.

15.636 ALASKA SUBSISTENCE MANAGEMENT

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

OBJECTIVES:

To identify and provide information needed to sustain subsistence fisheries and wildlife management on Federal public lands, for rural Alaskans, through a multidisciplinary, collaborative program. Three programs are administered under ANILCA to fulfill this objective. The Fisheries Resource Monitoring Program (Monitoring Program) funds approximately 80 studies annually to provide information on stock status and trends, harvests, and traditional ecological knowledge to manage and regulate Federal subsistence fisheries. The Partners for Fisheries Monitoring Program (Partners Program) strengthens Alaska Native and rural involvement in subsistence fisheries management and research. The program provides funds directly to Alaska Native and rural organizations to hire fishery biologists, social scientists, and educators to implement fisheries monitoring projects and rural internship programs.

Award Procedure:

For the Monitoring Program, an inter-agency technical review committee evaluates proposals, and, for those selected for further consideration, subsequently the full investigation plans. The committee develops a draft monitoring program from the highest priority projects, based on their technical review and available funds. The draft monitoring plan is reviewed by ten regional advisory councils and the public. An inter-agency staff committee reviews all recommendations, and provides recommendations. The Federal Subsistence Board selects projects for the Monitoring Plan taking into account all recommendations and comments. Funding of the Monitoring Plan is administered by the Office of Subsistence Management (OSM).

For the Partners Program, an internal review is conducted to evaluate proposals and make recommendations for funding. The evaluations are based on the criteria outlined in the request for federal assistance. The proposals are ranked and the OSM Assistant Regional Director selects proposals that best support the program within available funding. Once a Monitoring Program project or Partners Program position is selected for funding, a funding instrument, i.e., notice of award, between Fish and Wildlife Service and the recipient is drafted by the OSM. The award is processed by OSM through the contracting office and sent to the recipient for signature. The award is considered executed when signed copies of the agreement are received from the recipient and the contracting office has obligated funds to the agreement. The awards are administered by OSM.

Deadlines:

Apr 04, 2014 Contact the regional office for application deadlines. RELATED PROGRAMS:

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: Project Number: 14-208. Koyukuk River summer chum salmon (*Oncorhynchus keta*) stocks makeup one of the largest contributors to the Yukon River summer chum population, yet accurate information on their overall abundance and distribution is severely lacking.

The proposed project will use radio telemetry to estimate the proportional distribution of chum salmon throughout the tributaries of the Koyukuk River (middle Yukon River Drainage). Fiscal Year 2015: FY15: Project number: 14-252. Whitefish resources are a critical subsistence resource and an emerging commercial one; however, the management of these species is not well informed regarding stock status, harvest levels, or critical life history variables given the paucity of research on these species.

Objectives: Document local knowledge related to traditional and contemporary patterns of subsistence whitefish harvests in Alakanuk, Nunam Iqua, Saint Marys, and Kotlik, including:

- a. species utilized and local names used with introductory nomenclature analysis
- b. fish ecology, including information about habitat, spawning and seasonal movements
- c. contemporary and traditional methods and timing of harvest
- d. contemporary and traditional methods of preparation and preservation
- e. spatial mapping of harvest areas and other significant habitats by species and season
- f. traditional management practices and the effects on fish populations
- g. fish-related place-names
- e. relative abundance and population trends.

1. Estimate subsistence harvest levels and percentages of households using, harvesting, giving away, and receiving resident freshwater fish species (nonsalmon) for the calendar years 2014 and 2015 by species and season for the communities of Alakanuk, Kotlik, Nunam Iqua, Saint Marys, Pilot Station, and Marshall in the lower Yukon River. Harvest data set will also include basic demographic information, households assessment of harvests and use compared to recent years, and questions tracking the harvest, processing, and sharing networks present within and between communities.

2. Explore Indexing method of estimating annual community subsistence harvests of whitefish species in the lower Yukon River area. Appropriate statistical tests will be applied to collected variables to identify significant factors in whitefish harvests. Further exploration will occur using multiple regression to identify more complex relationships in collected data, and inform the development of adjustment factors to the mean of the index community. Fiscal Year 2016: Continuing project 14-103 Fisheries managers have long recognized the importance of Dolly Varden to subsistence users on the North Slope. The number of Dolly Varden harvested for subsistence purposes is largely undocumented in northern Alaska, but it is known that residents of villages in this region rely heavily upon this fish species.

Objectives: The objectives of this proposed project are:

1. Describe baseline ecological information about Dolly Varden tagged in the lagoons near Kaktovik, Alaska, including:
 - a. Timing of outmigration to the Beaufort Sea
 - b. Summer dispersal
 - c. Temporal and spatial distribution
 - d. Depth and temperature occupancy
2. Describe temporal and spatial distribution in relation to areas where human activities such as shipping and hydrocarbon extraction are taking place to provide information to the public, biological resource managers and marine gas and oil resource managers to better understand potential interactions among Dolly Varden and human activities in the Beaufort Sea.

CRITERIA FOR SELECTING PROPOSALS:

For the Monitoring Program, each proposal is evaluated using the following five criteria: (1) Strategic Priorities: Studies must be responsive to identified issues and information needs. All projects must have a direct association to a Federal subsistence fishery, and either the subsistence fishery or fish stocks in question must occur in waters within or adjacent to Federal public lands; (2) Technical and Scientific Merit: Technical quality of the study design must meet accepted standards for information and collection, compilation, analysis, and reporting. Studies must have clear objectives, appropriate sampling design, correct analytical procedures, and specified progress and final reports; (3) Investigators Ability and Resources: Investigators and their organizations should have demonstrated technical and administrative expertise to complete prior studies, or have co-investigators or appropriate partnerships with other organizations to meet all requirements of the study; (4) Partnership-Capacity Building: Studies must include appropriate partners and contribute to building capacities of rural organizations, local communities, and residents to participate in fisheries resource management. Investigators and their organizations should be able to demonstrate the ability to maintain effective local relationships and a commitment to capacity building and; cost benefits. (5) Applicants cost/price proposal will be evaluated for reasonableness. For a price to be reasonable, it must represent a price to the government that a prudent person would pay when consideration is given to prices in the market. Normally, price reasonableness is established through adequate price completion, but may also be determined through cost and price analysis techniques.

For the Partners Program, each proposal is evaluated using the following equally weighted criteria: (1) Each project must have direct linkage to Monitoring Program projects; (2) Ability to successfully implement program identified under section IV, ii, Content and Form of Application, Describe the Program; (3) Strategic priority and past performance of the Monitoring Program projects identified in the proposal; (4) Letters of support from tribal and rural organizations, government agencies, project investigators, and schools/universities; (5) Annual and total cost of the proposal, including use of in-kind or matching contributions that either decrease cost or expand support for implementing the Partners Program; (6) Past performance on implementing Monitoring Program projects; (7) Past performance on current or past agreements with the Office of Subsistence Management; (7) Previous experience in mentoring, training, and supervising personnel; and (8) Past and current accounting practices to ensure deliverables and accountability.

Each of these items carries a "Go/No-Go" impact: direct linkage of a Monitoring Program project, enrollment in CCR; affirming in writing in your application that you have enrolled in CCR; providing your DUNS Number; submission of completed SF-424, SF-424A, and SF-424B package; and submission of approved Indirect Cost Negotiation Agreement if requesting reimbursement for indirect costs.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: Nez Perce Tribe (\$200,000) Restoration of Bighorn Sheep Populations and Habitats along the Salmon River, Idaho Final Phase: Funding is being used to complete the Salmon River Bighorn Sheep Study and collect data on study objectives for the final two field seasons. Objectives include: (1) gaining a better understanding of movements, distribution, and status of bighorn sheep along the remote South Fork Salmon portion of the project area, and (2) obtain more robust population trend data across the project area. Study data, particularly establishing better trend data for tracking population status including population numbers, ewe production, and lamb survival will be instrumental in addressing ongoing legal challenges of Federal decisions and Federal land use planning NEPA reviews.

Passamaquoddy Tribe - Pleasant Point Reservation (\$198,885) Alewife Migration Behavior and Food Web Interactions in the St. Croix River and Estuary: The project represents the first steps in raising awareness and improving environmental conditions for the betterment of future generations. The Project provides an opportunity for the Pleasant Point Passamaquoddy to build our capacity to safeguard the resources we have left by hiring a fisheries ecologist. That person will pursue monitoring studies important to the tribe as well as represent the tribes interest in meetings that will affect the fate of natural ecosystems in our Ancestral Homeland. Restoring alewife to the St. Croix River is a top priority for us and we believe success will be readily achievable with qualified, professional personnel representing the tribes interests at the meeting table and in the field.

15.647 MIGRATORY BIRD CONSERVATION

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Fish and Wildlife Act of 1956, as amended, 16 U.S.C. 742a-754; Fish and Wildlife Coordination Act of 1958, 16 U.S.C.661-667(e); Fish and Wildlife Conservation Act, 16 U.S.C. 2901-2911; and Migratory Bird Treaty Act, 16 U.S.C. 709a.

OBJECTIVES:

To maintain and enhance populations and habitats of migratory bird species found in the Upper Midwest (IL, IN, IA, MI, MN, MO, OH, WI).

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

Grants may be used for the conservation of any bird species protected by the

Migratory Bird Treaty Act and occurring in U.S. Fish and Wildlife Service (USFWS) Region 3 (Upper Midwest, including IL, IN, IA, MI, MN, MO, OH, and WI). Special emphasis will be placed on Birds of Concern in the Midwest (see <http://www.fws.gov/midwest/midwestbird/concern.html>) as these species are experiencing known or suspected population declines, are recreationally important, or are causing biological or social conflicts. Implementing national, regional, and flyway bird conservation plans, including the Partners in Flight North American Landbird Conservation Plan (<http://www.partnersinflight.org>), U.S. Shorebird Conservation Plan (<http://shorebirdplan.fws.gov>), North American Waterbird Conservation Plan (<http://www.waterbirdconservation.org>), North American Waterfowl Management Plan (<http://www.fws.gov/birdhabitat/NAWMP/index.shtm>), and Mississippi Flyway bird management plans, is the USFWS's highest priority, and proposals related to the priorities identified in these plans and Bird Conservation Region and state-level bird conservation planning efforts will receive high funding consideration. The following activities are also of high interest to the USFWS: a) Population surveys, monitoring, and assessments to determine the status, trends, distribution, demography, and responses to management of bird species and groups of concern. Emphasis will be placed on landscape-level applications of standardized inventory and monitoring protocols as identified through the Midwest Coordinated Bird Monitoring Partnership (<http://midwestbirdmonitoring.ning.com>). Local-scale bird monitoring (e.g., local land management units) will generally not be a focus of this grant program, nor will support for long-term operational bird monitoring efforts. Rather, the program seeks to address coordination of monitoring efforts and development and evaluation of new survey and monitoring techniques (both field and analytical); b) Conservation of focal species for which conservation plans and/or working groups have been developed and research, monitoring, and other priorities have been identified. Examples of focal species include: Golden-winged Warbler, Cerulean Warbler, Henslows Sparrow, Bobolink, other Midwestern grassland birds, American Woodcock, Wilsons Phalarope, Upland Sandpiper, Marbled Godwit, Common Tern, Black Tern, King Rail, and Lesser Scaup (for further information on focal species, contact Steve Lewis, USFWS, steve_j_lewis@fws.gov); and c) Strategic Conservation, wherein the USFWS and partners integrate biological planning, landscape design, conservation delivery, and monitoring and evaluation in a way that generates the adaptive feedback loops that enable sound decisions and constantly improve our efficiency and effectiveness in saving birds (<http://www.fws.gov/midwest/science/SHC/FAQ.htm>). Strategic conservation involves applied research, including studies of bird habitat requirements, threats, limiting factors, and population responses to habitat conservation activities; and use of Geographic Information Systems, modeling, and similar tools to identify bird habitat focus areas and further bird conservation planning efforts. 25%.

This material was graded and screened, and 50,000 cubic yards of appropriately sized gravel and cobble were placed in the river to create nearly 1.25 miles of spawning habitat and create a juvenile rearing side channel. Fiscal Year 2015: The Anadromous Fish Restoration Program (AFRP) anticipates implementing fish passage projects on Deer Creek, Cottonwood Creek, and Mill Creek in the Upper Sacramento River Basin; funding channel and floodplain restoration projects in the Yuba River, Stanislaus River, and American River; restoring 6 acres of floodplain and place approximately 28,000 cubic yards of spawning gravel in the Merced River; and receiving 40 applications and issuing 15 awards. Fiscal Year 2016: The AFRP anticipates implementing fish passage projects on Deer Creek, Cottonwood Creek, Mill Creek, and Cow Creek in the Upper Sacramento River Basin; funding channel and floodplain restoration projects in the Yuba, Stanislaus, Sacramento, American, Stanislaus and Merced rivers; and receiving 30 applications and issuing 12 or more awards.

RELATED PROGRAMS:

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: 1) Working with the National Fish Passage Program, the local landowner and other interested parties, the AFRP worked to remove a barrier to fish passage on the Calaveras River and to replace the barrier with a fish friendly box culvert. The newly designed and constructed river crossing allows the property owner better year-round access to his property while removing a barrier to fish passage. 2) The AFRP funded the removal of Hammer Dam on South Fork Cottonwood Creek. The dam had provided power for 70 years to the landowner. The U.S. Fish and Wildlife Service was able to provide designs and equipment for a solar power system to replace the electricity generated by the dam and a fish screen to provide water. Once the

dam was removed 5 miles of stream habitat was opened to the native anadromous fish. 3) AFRP funded the continuation of rotary screw trap monitoring on the Merced River. This monitoring provides information on the timing and abundance of juvenile chinook salmon leaving the Merced River. Fiscal Year 2015: The AFRP: 1) Anticipates funding phase 2 of the Lower Deer Creek Falls Fish Passage project. This phase of the project includes completing all of the environmental documentation required prior to construction activities planned in future years; 2) Plans to fund the Yuba River Narrows Restoration which will remove shotrock (material left over from the Englebright Dam Construction) from key sections of the canyon immediately downstream from the dam. Removal of this material is expected to increase the quality of habitat for anadromous salmonids; 3) Funds a project to determine the age, growth, and fin ray microchemistry of Sturgeon in the Sacramento and San Joaquin River Delta. This project will evaluate the effects of trace elements and organic contaminants, especially selenium and PCBs on the health of adult white and green Sturgeon, including the viability of their gametes and development of their offspring. Fiscal Year 2016: AFRP has not yet selected projects for funding. AFRP anticipates funding projects that: (a) Protect, restore, and enhance fish, wildlife, and associated habitats in the Central Valley and Trinity River basins of California; (b) Address impacts of the Central Valley Project on fish, wildlife and associated habitats; (c) Improve the operational flexibility of the Central Valley Project; (d) Increase water-related benefits provided by the Central Valley Project to the State of California through expanded use of voluntary water transfers and improved water conservation; (e) Contribute to California's interim and long-term efforts to protect the San Francisco Bay/Sacramento-San Joaquin Delta Estuary; and (f) Achieve a reasonable balance among competing demands for use of Central Valley Project water, including the requirements of fish and wildlife, agricultural, and municipal, industrial and power contractors.

CRITERIA FOR SELECTING PROPOSALS:

Proposals will be reviewed by a team of Federal staff based on the following criteria: Addresses high priority need as described in the Request for Proposal (RFP) "Purposes and Funding Priorities"; Clearly stated goals, objectives, hypotheses, and relevance of idea; Approach is valid and technically sound; Primary Investigators and/or subcontractors record of performance and expertise; Budget is reasonable and provides good value for funds requested; and Cost sharing or in-kind contributions.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: Adverse impacts to trust species and their habitats from historical industrial releases of hazardous substances in the Ashtabula River, Ashtabula, OH - Several restoration projects were completed. Restoration activities on various newly purchased properties included invasive plant removal, planting of native trees and shrubs within the wetland and riparian areas, improvement of a nature trail, installation of a primitive canoe launch, and construction of a boardwalk and observation deck over a wetland and pool area. Another restoration project involved a 6.4 acre peninsula; activities included the creation of a hydrologic connection between the peninsula with the main channel of the Ashtabula River, establishment of emergent wetlands along the newly constructed channel, and replacement of invasive plant species with a diverse array of native plants and trees. In addition, removal of invasive species and subsequent planting of native plants was completed on 43 acres of Lake Erie shoreline near Walnut Beach, Ashtabula, Ohio, in collaboration with the Army Corps of Engineers.

Adverse impacts to trust species and their habitats from a pipeline oil spill in Santa Barbara County, CA - Several restoration projects were completed. A restoration project removed invasive plant species to restore natural sandy beach and dune habitat. Educational projects designed to reduce human impacts to sensitive, rocky intertidal habitats were also conducted, including installation of educational signs and providing classroom trainings and field trips to over 1,000 students that engaged the students in hands-on monitoring of rocky intertidal habitats. Also, enhancements to a boardwalk and viewing platform (constructed as part of a previous years restoration project related to the case) were finalized, including installation of a free wildlife viewing scope and educational signage.

Adverse impacts to trust species and their habitats from historical industrial releases of PCBs into the Housatonic River, in both Connecticut and Massachusetts - Several restoration projects were completed. One project involved the installation (after several prior years of design, permitting and construction) of a new fishway on Furnace Brook in Cornwall, Connecticut to restore access to upstream spawning habitat for wild and stocked trout. Another restoration project involved the construction of a nature-like bypass channel around the Tingue Dam on the Naugatuck River in Seymour, Connecticut. Additionally, floodplain habitat restoration at Bartholomews Cobble Conservation Area in Massachusetts has continued through management of invasive species and planting native floodplain trees in former agricultural lands. Fiscal Year 2015: We have not selected projects for funding. We anticipate funding projects to restore trust species and their habitats to compensate for injuries from contaminant releases and oil spills. Fiscal Year 2016: We have not selected projects for funding. We anticipate funding projects to restore trust species and their habitats to compensate for injuries from contaminant releases and oil spills.

OBJECTIVES:

The U.S. Fish and Wildlife Service (USFWS) uses a science-based, adaptive framework for setting and achieving broad-scale conservation objectives that strategically address the problems fish and wildlife will face in the future. This framework, called Strategic Habitat Conservation, is based on the principles of adaptive management and uses population and habitat data, ecological models, and focused monitoring and assessment efforts to develop and implement strategies that result in measurable fish and wildlife population outcomes. This process uses the best available scientific information to predict how fish and wildlife populations will respond to changes in the environment, thus enabling the USFWS to focus habitat conservation and other management activities where they will be most effective. In addition, the USFWS needs focused, applied science directed at high impact questions surrounding threats to fish and wildlife resources for which management and/or mitigation is required to maintain species at healthy, sustainable, desired levels. USFWS must base its decisions on the best science available, in order to defend its regulatory decisions, biological opinions and species conservation recommendations to land managers.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: Program funded projects that: 1) helped build and maintain public support for management of the Yukon River salmon through outreach events, weekly teleconferences, and public meetings; 2) dealt with monitoring salmon returns in rivers; and 3) assessed the effectiveness of various gill net sizes and depths at catching chum and Chinook salmon. 15.672 WILDLIFE WITHOUT BORDERS AMPHIBIANS IN DECLINE FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Endangered Species Act of 1973, as amended (16 U.S.C. 1531-43).

OBJECTIVES:

The goal of this grants program is to provide funding for specific conservation actions that have a high likelihood of creating durable benefits to amphibian species facing immediate threat of extinction, such as: Protection of at-risk populations; Veterinary/wildlife health interventions; Activities related to execution of species survival plans; Strengthening local capacity to conserve the target species; Actions addressing unsustainable exploitation; Efforts to mitigate or stop wildlife-human conflict; and Rehabilitation and rescue.

Proposed project work should occur within the species range, or, if work is to be conducted outside of the range, the proposal should show a clear relevance to its conservation.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

The program will fund projects that conserve the worlds rapidly declining amphibian species. Species eligible for funding are those frogs, toads, salamanders, newts, and caecilians that face a very high risk of extinction in the immediate future. Species should meet the criteria to be listed as Critically Endangered or Endangered on the International Union for the Conservation of Nature (IUCN) Red List. Species listed as Data Deficient on the IUCN Red List are also eligible if the applicant can provide information that suggests a similar urgency for conservation action. Species listed as Extinct in Wild are eligible if the applicant is proposing a reintroduction attempt. The following species are NOT eligible for funding: Species with natural habitat range located primarily within the United States, territories of the United States, Canada, and the high income economies of Europe; and Non-amphibian species.

Applied research projects should address specific management needs and actions. Funds provided under this program will not be used for: the purchase of firearms or ammunitions; buying of intelligence information or paying informants; gathering information by persons who conceal their true identity; law enforcement operations that prompt suspects to carry out illegal activities so they may be arrested (entrapment); or any activity that would circumvent sanctions, laws or regulations of either the U.S. or the country in which the activity would occur. Funds may not be used to provide material support or resources to individuals, entities, or organizations of countries that have been identified by the U.S. Department of State as state sponsors of terrorism. This program is administered in compliance with the Federal Grants and Cooperative Agreements Act of 1977, as amended. These funds may not be used towards training U.S. Federal Government personnel. Project work should occur in countries outside of the United States that have within their boundaries amphibian habitats and be conducted by any person or group with the demonstrated expertise required for the successful implementation of the proposed project. 100%.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: Program supported: 1) A project that will re-establish healthy wild populations of Panamanian golden frogs; 2) A project that will highly improve protection of Somuncura frog by alleviating main threats; and 3) A project that will maintain a viable wild population of the critically endangered Togo slippery frog in Ghana. Fiscal Year 2015: Program has not yet selected projects for funding. Program anticipates funding projects that are similar in scope to those awarded in FY 2014. Fiscal Year 2016: Program anticipates funding projects that are similar in scope to FY 2014.

CRITERIA FOR SELECTING PROPOSALS:

To be considered for funding, proposals must specify a conservation action for an eligible species. The Division of International Conservation ranks proposals by scoring how well each addresses the program priority areas and the requested proposal elements. High priority, well-justified and feasible projects that address all of the requested proposal elements will receive higher scores. These scores are not the sole determining factor for final funding decisions. Other review criteria include considering the degree to which a project:

- Demonstrates the high degree of threat or extinction risk that the target species experiences;
- Addresses a conservation need of a species that is exceptional ecologically, evolutionarily, or in conservation (Note that it is the responsibility of the applicant to articulate what quality makes the species exceptional, but examples would include a species that strongly influences the ecological community in which it occurs, a species that is genetically distinct with few close relatives, a species that exhibits a distinctly unusual behavior, or a species whose conservation would catalyze the conservation of multiple species);
- Occurs in a region or conserves a taxon poorly represented in the Amphibians in Decline portfolio;
- Makes a significant and durable contribution to the survival of the species, or to the integrity of its habitat or an area with significant conservation value for the species;
- Addresses a conservation need identified by a specialist group or by a regional, national or global strategy;
- Applies the best scientific and technical information and methods available in support of project activities;
- Includes the participation of local partners in project activities, including meaningful involvement of government, community or civil society stakeholders;
- Is feasible and likely to be successfully implemented as stated;
- Advances the practice of conservation by being designed and implemented in a way that the successes and failures of activities can be credibly assessed and shared;
- Emphasizes conservation action rather than data collection; and
- Implements activities or provides benefits that have the potential to be sustaining beyond the period of performance of the grant, including training that develops local capacity to implement or manage conservation projects.

The above considerations are not listed in any order of importance. All considerations listed do not necessarily apply to every proposal. Following review, applicants may be asked to revise the project scope and/or budget before a final funding decision can be made.

15.673 WILDLIFE WITHOUT BORDERS CRITICALLY ENDANGERED ANIMAL CONSERVATION FUND

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Endangered Species Act of 1973, as amended (16 U.S.C. 1531-43).

Project activities that emphasize data collection and status assessment should describe a direct link to management action, and explain how lack of information has been a key limiting factor for management action in the past. Proposals that do not identify how actions will reduce threats, or do not demonstrate a strong link between data collection and management action, have a lower likelihood of being selected. Proposed project work should occur within the species range, or, if work is to be conducted outside of the range, the proposal should show a clear relevance to its conservation.

CRITERIA FOR SELECTING PROPOSALS:

To be considered for funding, proposals must specify a conservation action for an eligible species, listed above in the Description of Funding Opportunity. The Division of International Conservation ranks proposals by scoring how well each addresses the program priority areas and the requested elements listed in the Application and Format section above. High priority, well-justified and feasible projects that address all of the requested proposal elements will receive higher scores. These scores are not the sole determining factor for final funding decisions. Other review criteria include considering the degree to which a project:

- Demonstrates the qualification of the target species as experiencing a high degree of threat or extinction risk; Addresses a conservation need of a species that is exceptional ecologically, evolutionarily, or in conservation (Note that it is the responsibility of the applicant to articulate the exceptional quality of the species, but examples would include a species that strongly influences the ecological community in which it occurs, that is genetically distinct with few close relatives, that exhibits a distinctly unusual behavior, or whose conservation would catalyze the conservation of multiple species);

- Occurs in a region or conserves a taxon poorly represented in the CEACF portfolio;

- Makes a significant and durable contribution to the survival of the species, or to the integrity of its habitat or an area with significant conservation value for the species;

- Addresses a conservation need identified by a specialist group or by a regional, national or global strategy;

- Applies the best scientific and technical information and methods available in support of project activities;

- Includes the participation of local partners in project activities, including meaningful involvement of government, community or civil society stakeholders;

- Is feasible and likely to be successfully implemented as stated;

- Advances the practice of conservation by being designed and implemented in a way that the successes and failures of activities can be credibly assessed and shared;

- Emphasizes conservation action rather than data collection; and

- Implements activities or provides benefits that have the potential to be sustaining beyond the period of performance of the grant, including training that develops local capacity to implement or manage conservation projects.

These considerations are not listed in order of importance. All considerations listed do not necessarily apply to every proposal. The Division of International Conservation occasionally receives and funds proposals outside of the announced submission deadlines that are of such a critical nature (examples include projects resulting from a natural disaster, disease outbreak, other imminent threats or population crash, among others) that they warrant immediate consideration.

This may include basic or applied research, setting up conferences to discuss research needs or results, conduct of research, information dissemination, and training of students as a byproduct of research. In general the funds are used to study regional, State, or local water problems, but the results may often have national significance. The competitive project grant program supports research focused on water problems of a regional or interstate nature and which relate to program priorities identified jointly by the State institutes and the Geological Survey. Federal funds cannot be used for (1) formal instructional activities and general education, and (2) the cost of permanent buildings, either directly or indirectly.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2014: 18 projects were completed for projects that were awarded in FY11 and FY12. Training and outreach continued to be valued outcomes of the program. The Sonoma Ecology Center's metadata training reached a wide range organizations and individuals in California. One project investigated the transition from FGDC Content Standard for Digital Geospatial Metadata (CSDGM) to internationally accepted geospatial metadata standards (ISO 19115). Other FGDC-endorsed standards promoted this year were the National Vegetation Classification (NVC) Standard and the Wetland Mapping Standard. The standard for Cadastral Data Content benefited from the development of a draft implementation model in Extensible Markup Language/Geographic Markup Language (XML/GML) for parcel data. Oregon held several successful outreach efforts to introduce the benefits and capabilities of sharing data catalogs using open standards and developed training materials available at www.coastalmarinedata.net/resources.

As part of the Fifty States Initiative, three projects were completed in Maine, Maryland, and Nevada to advance each States geospatial business plans. Maine's orthoimagery business plan implementation resulted in greater community involvement, especially in small communities and rural counties. Maryland's plan focused on activities necessary to support the creation,

expansion, and widespread distribution of statewide parcel data. Nevada completed business plans for statewide parcel data and enhanced elevation data, which both point out the need for a single organization to set priorities for geospatial data at a statewide level and coordinate strategies for data acquisition and dissemination.

Iowa, Louisiana, Maryland, and Ohio increased participation in the National States Geographic Information Councils (NSGIC) GIS Inventory System (gisingventory.net), adding metadata containing links to standards-compliant data or data services that support Federal Geoplatform.gov activities. A project completed by the California Emergency Management Agency promoted the adoption of Unified Incident Command Decision Support (UICDS) middleware to achieve geospatial data sharing and interoperability in the emergency management environment.

And finally three Geospatial Platform Cloud Service Testbed projects were completed and provided valuable information about the deployment costs and performance characteristics of secure geospatial cloud services at the State and Tribal levels.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2014: Fiscal Year 2014: A state will inventory and scan 800 mineral survey inventory documents dating from 1930s. These documents are public record and currently available on a limited basis due to their fragility. The collection will be converted to digital format to ensure preservation and made available to the public via the Internet and added to an existing online mineral commodity database. Well-described metadata will be generated for the documents. These inventory reports have been an important source of unpublished information for state agencies and consulting geologists, as well as aiding in ongoing geologic mapping projects. The availability of these digital records will be a highly valuable asset for those researching industrial minerals or metals in the state. The documents will provide a record that can be compared with modern data to track landscape change over time and will provide a baseline for assessing industrial mineral and metal availability in the state.

Another state will convert 2,500 paper geophysical log documents to image files and digitize select logs to preserve and prevent loss of irreplaceable information and provide more efficient, cost effective access by professional and public entities. For these logs, locations and metadata will be improved and linked to other existing information for ease of use and re-distribution to the customers. Interest has increased in resistivity, gamma, and neutron logs, especially in geological units of early Eocene age or older, for natural gas exploration, carbon capture and storage, wastewater injection, and aquifer system studies. Information obtained from digital logs will aid sinkhole studies in various locations throughout the state as well as resource evaluation and determination of aquifer extents for potable and non-potable water sources. Preservation of geophysical log information will aid mineral, water, oil and gas resources determination needed for policy and land use considerations.

Another state will scan and digitally convert approximately 7,100 9x9 black

and white aerial photographs from the 1960s and 1970s in the Chesapeake Bay region. These photographs will be converted to JPGs and TIFFs at a resolution of 1200 dpi. Well-described metadata will be written describing the aerial photographs. These photographs include high altitude aerial photos, color aerial photos, additional county aerial photos, and regional infrared aerial photos. The aerial photos will be used to develop a baseline against which to measure the declining health of the Chesapeake Bay over the past several decades, which has been a cause of concern and intensive study among a myriad of federal, state, and local government agencies. The photos have been used to calculate shoreline rates of change, which coastal planners use to determine shoreline stabilization strategies appropriate for reaches of shoreline subject to different wave energies (and erosion rates). Historic aerial photos are also useful to archeologists, providing important information about historic development - not only buildings, but other, smaller features that are not often mapped, including small roads and fence lines. These features can be useful in reconstructing old plats, as many of these features are vestiges of property boundaries that date back hundreds of years. Fiscal Year 2015: Information Not Available. Fiscal Year 2016: No Current Data Available.

CRITERIA FOR SELECTING PROPOSALS:

Relevance to announced priorities, technical evaluation factors, and prospect of attaining program objectives.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2014: This program focuses on satellite remote sensing data and technologies in support of applied research, K-16 education, workforce development and technology transfer. Federal funds are leveraged to work together with other State organizations, Federal agencies and across States (StateViews). Continued educational and technical working groups to increase efficiencies. Continued work to develop remote sensing curricula that can be shared with and tailored to each participating educational institution (as well as work force training). Select States worked to create a shareable archive of all kinds of remote sensing data that all State organizations can access. Increased

education and training in Earth sciences (K-16). Conducted critical applied research real-time applications relevant to each State, sometimes expanding to a region of the US. Provided feedback to the U.S. Geological Survey to better understand State needs. In the early part of FY 14 AmericaView completed the final report for the previous five year period and was awarded the competitive grant for the National Land Remote Sensing Education Outreach and Research Activity covering a period not to exceed five years. Additionally, AmericaView continues to explore a distributed cloud based network utilizing key educational institutions throughout the U.S. to aid in the more efficient distribution of large data sets such as Landsat. Should subsequent occurrences alter the historic qualities of the property, landmark status may be revoked and the plaque removed. Automatic listing of National Historic Landmark properties in the National Register of Historic Places affords a degree of Federal protection under Section 106 of the Historic Preservation Act of 1966, and fulfills one of the prerequisites for Federal assistance under the National Register grants-in-aid program (see 15.904). Certain landmarks are also made eligible for Federal tax benefits and protections and technical preservation assessment and assistance.

Applicant Eligibility:

Anyone may suggest that a property be considered for inclusion in an appropriate National Historic Landmark theme study, provided the property has a high degree of historic integrity and potential national significance with relation to some broad facet of American history. The owner of the property may be an individual, government, or corporate body. Properties of only State or local significance do not qualify.

Properties nominated to, or already listed in, the National Register of Historic Places at a national level of significance by the State Historic Preservation Officer may be reviewed by the National Historic Landmarks Survey staff.

Award Procedure:

When the property has been investigated, findings, in the form of a thorough NHL nomination form, are presented to the National Park System Advisory Board which evaluates the property's national significance and high integrity and recommends a final action to the Secretary of the Interior. Owners of proposed landmarks are contacted prior to a landmark study, given an opportunity to comment on a final study, and then notified after designation of the landmark.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

15.914 NATIONAL REGISTER OF HISTORIC PLACES

(National Register)

FEDERAL AGENCY:

National Park Service, Department of the Interior

AUTHORIZATION:

National Historic Preservation Act of 1966, as amended, Public Law 89-665, 16 U.S.C. 470, 80 Stat. 915 et seq.; Executive Order 11593, May 13, 1971; Tax Reform Act of 1976, Public Law 94-455; Public Law 94-442; 90 Stat. 1519; Revenue Act of 1978; Public Law 95-600; National Historic Preservation Act Amendments of 1980; Public Law 96-515; Tax Treatment Extension Act of 1980; Public Law 96- 541; Economic Recovery Tax Act of 1981, Public Law 97-340; Tax Reform Act of 1984, Public Law 98-369; Tax Reform Act of 1986, Public Law 99- 514; National Historic Preservation Act Amendments of 1992, Public Law 102-575; Executive Order 13287, March 3, 2003.

OBJECTIVES:

To expand and maintain the National Register of Historic Places for planning, preservation, research, public education and tourism efforts; to make the information on districts, sites, buildings, structures and objects of historical, architectural, archeological, engineering and cultural significance more accessible to the public in order to increase and broaden the public's understanding of the information, foster a national preservation ethic, and to promote greater appreciation of America's heritage; to coordinate with Federal agencies, State and Tribal preservation offices, and the Advisory Council on Historic Preservation in the implementation of laws and policies pertaining to historic preservation; and to establish liaison with and give guidance to communities under Title I of the Housing and Community Development Act of 1974 (see 14.218).

TYPES OF ASSISTANCE:

ADVISORY SERVICES AND COUNSELING

USES AND USE RESTRICTIONS:

Professional advice is provided in determining whether a property qualifies for inclusion in the National Register according to the Criteria for Evaluation contained in 36 CFR Part 60. Listing does not affect the range of actions an owner may take, as long as Federal funding, licensing or assistance is not involved and no governmental unit receives any authority or control over the property, including its use and disposition. However, if a Federal project might have an effect on a property listed or eligible for listing, the agency involved must provide the Advisory Council on Historic Preservation a reasonable opportunity to comment pursuant to 36 CFR Part 800. Registered properties also become eligible to receive grants from the Historic Preservation grant-in-aid program of the Department of the Interior (see 15.904), when funding is available, to receive home improvement loans from the Department of Housing and Urban Development under Title I of the National Housing Act as amended on October 18, 1974, or to participate in the community grant program provided by the Housing and Community Development Act of 1974. Major Federal tax advantages can be received on certain rehabilitation expenditures for "certified historic structures" and for charitable contributions for conservation purposes of partial interests in historic properties.

Applicant Eligibility:

Eligible applicants are the States and territories as defined in the National Historic Preservation Act, operating under programs administered by State Historic Preservation Officers appointed by the Governors (listed in Appendix IV of the Catalog); or the Tribal Preservation Officers; Federal agencies required to nominate and consider historic properties within their jurisdiction or as a result of the National Environmental Policy Act of 1969 and Executive Order 11593, and the National Historic Preservation Act operating under programs administered by representatives (listed in Appendix IV of the Catalog) appointed by the heads of the agencies; and, in States without approved State Historic Preservation Programs, persons and local governments. Applicants eligible for Federal Tax benefits include owners of individually listed properties and properties certified by the Secretary of Interior as being historic and in a district certified as historic.

Beneficiary Eligibility:

Public and private owners of historic properties listed in the National Register of Historic Places or of properties certified by the Secretary of Interior as being historic and in a district certified as historic.

Credentials/Documentation:

Nominations are submitted on standard nomination forms provided upon request to the State Historic Preservation Officers, Federal Preservation Officers, and Tribal Preservation Officers who must certify that each property was properly nominated. Procedures for National Register nominations are found in 36 CFR Part 60. Request for determinations of eligibility must be adequately documented as described in Appendix A of 36 CFR Part 63. Requests for certification of historic properties must be documented as described in Section 36 CFR Part 67 and requests for certification of State and local statutes and districts must be documented as described in Section 36 CFR Part 67. To participate in the program, each State must have an approved review board, an approved State staff, and an accepted State historic preservation plan. This program is excluded from coverage under 2 CFR 200, Subpart E - Cost Principles.

Preapplication Coordination:

For National Register nominations the signature of the State Historic Preservation Officer on the nomination form certifies that the State review board has reviewed the nomination and that all applicable procedures, including notification to the property owner at least once during the nomination process, have been followed. The signature of the Federal Preservation Officer for Federal property or the Tribal Preservation Officer on Tribal lands on the nomination form certifies that the property has been nominated in compliance with the National Historic Preservation Act. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under 2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards. Anyone may prepare a National Register nomination. After the property is approved by the State Historic Preservation Officer, Tribal Preservation Officer, or Federal Preservation Officer, the nomination form or letter of request for a determination of eligibility should be forwarded to the Keeper of the National Register, National Park Service, Department of the Interior, 1849 C Street, NW, Mail Stop 2280, Washington, DC 20240. Nominations submitted for review are announced in the Federal Register to provide a period of comment. Documentation for certification for Federal tax benefits of historic buildings and structures, State and local statutes and districts should be forwarded to the appropriate State Historic Preservation Office, which sends it to the appropriate National Park Service Office.

Award Procedure:

The professional review staff of the National Register determines whether the properties meet the National Register criteria as contained in 36 CFR Part 60. Properties that meet the criteria are then officially listed in the National Register and become eligible for Federal tax benefits and Historic Preservation Fund grants when they are available.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

After nomination by State, 45 days at Federal level.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Land acquisition and development grants may be used for a wide range of outdoor recreation projects, such as picnic areas, inner city parks, campgrounds, tennis courts, boat launching ramps, bike trails, swimming pools, playing fields, and support facilities such as roads, water supply, etc. Facilities must be open to the general public and not limited to special groups. Every park or outdoor recreation area acquired or developed with assistance under this program must remain available and accessible for public outdoor recreation use forever. Development of basic rather than elaborate facilities is favored. Operation and maintenance of facilities are not eligible expenses for funding. States only are also eligible to apply for grants to revise and update existing SCORPs; prepare new SCORPs; conduct statewide surveys, technical studies, data collection and analysis; and for other planning purposes that are clearly related to SCORP refinement and improvement.

Applicant Eligibility:

For planning grants, only the State agency formally designated by the Governor or State law as responsible for the preparation and maintenance of the SCORP is eligible to apply. (Treated as States for this purpose are the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands, and Guam.) For acquisition and development grants, the above designated agency may apply for assistance for itself, or on behalf of other State agencies or political subdivisions, such as cities, counties, and park districts. Additionally, Indian tribes that are organized to govern themselves and perform the functions of a general purpose unit of government qualify for assistance. Individuals, nonprofit organizations, and private organizations are not eligible.

Beneficiary Eligibility:

The general public. For planning grants, same as Applicant Eligibility.

Credentials/Documentation:

The State Liaison Officer (SLO), who is appointed by the Governor or designated in State legislation to administer the program in the State or Territory, must provide assurance that the project is consistent with the SCORP; i.e., that it meets high priority recreation needs shown in the action program portion of the Plan. The State must have a sufficient balance of LWCF funding and the required match available for the project. The sponsoring agency must

permanently dedicate the project to public outdoor recreation and assume responsibility for its operation and maintenance. SCORPs must cite the State's legal authority to participate in the Land and Water Conservation Fund program. Eligibility of costs will be determined in accordance with OMB Circular A-102 (43 CFR Part 12, Subpart C), "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments" and OMB Circular A-87, Cost Principles for State, Local and Indian Tribal Governments. OMB Circular No. A-87 applies to this program. 2 CFR 200, Subpart E - Cost Principles applies to this program.

Preapplication Coordination:

The SLO has the prerogative for initial determination of project eligibility, priority need, and order of fund assistance within the State. All project proposals are submitted to the National Park Service by the SLO. Environmental impact information is required for this program; a screening form is used to determine whether an EA or EIS is necessary. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." If the State has selected the program for review, the applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires when applying for federal assistance. Proposal budgets must comport with OMB Circulars A-87 and A-102. Basic environmental information or evaluation is required and will be assessed by the National Park Service to determine whether an environmental impact statement is needed. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." If the State has selected the program for review, the applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires when applying for federal assistance.

Award Procedure:

Proposals are reviewed by the NPS field office, where final action may be taken. All grants are made to the State lead agency and if applicable passed through to the project sponsor, whether State or local government.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

Approximately 30-60 days for acquisition and development projects; 60 days for planning projects.

Appeals:

State may appeal to the Secretary of the Interior.

Renewals:

Project agreements may be amended to change the scope, funding amount, or duration. Must be approved by the National Park Service.

Formula and Matching Requirements:

Statutory Formula: Each year, States and Territories receive an overall allocation of funds based on a statutory formula. Depending on the amount appropriated by Congress, a certain percentage (forty percent of appropriations of up to \$225 million, thirty percent of the next \$275 million, and twenty percent of any additional appropriation) is split equally among the 51 States (for this purpose American Samoa, the District of Columbia, Guam, the Northern Mariana Islands, Puerto Rico, and the Virgin Islands are treated as one State and split an apportionment). The remaining percentage is apportioned on the

basis of need.

Matching Requirements: Matching Requirements: The Land and Water Conservation Fund Act requires that the share of federal funds not exceed 50 percent of the total project cost. Generally, match must be derived from State, local, or private sources, but under certain conditions all or part of the project sponsor's matching share may be from other Federal assistance programs, such as Community Development Block Grants, when such use is allowable under the other programs sponsoring legislation. Otherwise, no other Federal funds may be applied to the project cost, even if all matching requirements are met. MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Funds are available for obligation during the fiscal year in which they are appropriated and for the two following fiscal years. The assistance period for individual projects varies and may be extended but on average is three years. Complex projects may be broken down into stages, with one being initially approved and the remainder qualified for activation at a later date. Except for project preparation costs, all costs must be incurred within the project period to be eligible for reimbursement. Planning projects may not be phased. See the following for information on how assistance is awarded/released: On an average of three years.

Reports:

Program reports are not applicable. Cash reports are not applicable. All projects are monitored for progress through consolidated performance reports, which should be at least annually. State inspection reports are submitted every 5 years on completed projects stating whether the properties acquired and/or developed with fund assistance are still being used in accordance with the agreement. As a steward of the Nation's natural and cultural heritage, the primary responsibility of the NPS is to preserve and protect park resources and values. The NPS actively manages and conducts research on natural resources in the national park system to meet its statutory responsibility to preserve these resources unimpaired for future generations.

The Natural Resource Stewardship program is the principle means through which the NPS evaluates and improves the health of watersheds, landscapes, and marine and coastal resources, sustains biological communities on the lands and waters in parks, and actively endeavors to improve the resiliency of these natural resources and adapt them to the effects of climate change.

The National Park Service (NPS) conducts natural resource stewardship largely at the park level, utilizing park personnel and contractor or cooperative support. To carry out and further this stewardship responsibility, the Service implements programs that encompass a broad range of research, operational, and educational activities. The NPS inventories, evaluates, documents, preserves, protects, monitors, maintains, and interprets the natural resources at 392 park units, 21 trails and 58 wild and scenic rivers. 15.957 HISTORIC PRESERVATION FUND GRANTS TO PROVIDE DISASTER RELIEF TO HISTORIC PROPERTIES DAMAGED BY HURRICANE SANDY

HPF Hurricane Sandy Relief Grant Program

FEDERAL AGENCY:

National Park Service, Department of the Interior

AUTHORIZATION:

Disaster Relief Appropriations Act, 2013 (P.L. 113-2)

National Historic Preservation Act, as amended, 16 U.S.C. 470(e) and (h), Establishment of Historic Preservation Fund

National Historic Preservation Act, as amended, 16 U.S.C. 470a(j), Develop and implement a comprehensive preservation education and training program.

OBJECTIVES:

The purpose of this supplemental funding is to provide technical assistance and emergency repairs to historic and archeological resources impacted by Hurricane Sandy. Only hurricane-related damage is eligible for grant assistance. The NPS will rely on the assessment and documentation of the SHPO offices to determine eligibility of storm damaged resources and eligible grant expenditures related to the storm damage.

TYPES OF ASSISTANCE:

Formula Grants; Project Grants

USES AND USE RESTRICTIONS:

Hurricane Sandy HPF relief grants must be used to preserve properties listed in or eligible for listing in the National Register of Historic Places. States may also use the funds for 1) hiring additional term, temporary, or contractor staff to enable the SHPOs to expeditiously conduct the reviews of all Federally funded or sponsored projects required by Section 106 of the National Historic Preservation Act, 2) providing technical assistance to local government officials and to all owners of properties listed in or considered eligible by the State Historic Preservation Officer for listing in the National Register of Historic Places; and 3) architectural/engineering plans and specifications, economic feasibility studies, survey and damage assessments, construction work to stabilize and repair historic and archeological properties, and survey of hurricane-damaged properties.

Applicant Eligibility:

Eligible applicants are State and Tribal Historic Preservation Offices located within areas receiving major disaster declarations from FEMA.

Beneficiary Eligibility:

States and Tribes.

Credentials/Documentation:

The standard application forms required by 43 CFR 12, Subparts C and F, must be used. In addition, applicants must also submit an Action Plan Narrative providing an overview of needs in the State.

Award Procedure:

Using the FEMA major disaster declarations as a starting point for determining the method of apportioning the \$47.5 million, the NPS will divide the appropriation into two groups. Group 1 includes \$38 million and will be apportioned to the four States containing counties that FEMA designated as eligible to receive both Individual and Public Assistance Connecticut, New Jersey, New York, and Rhode Island. The remaining funds will comprise Group 2, and will be awarded to the remaining eight States, the District of Columbia, and any Federally-recognized Indian Tribes located in those States, through an application process and based on need as described in proposals submitted by the States and Tribes to the NPS. In apportioning the \$38 million from Group 1 that will be assigned to CT, NJ, NY, and RI, because State Historic Preservation Offices (SHPO) in those States have not yet completed damage assessments to historic properties, there is no single best method of determining need. Funds will be distributed using a formula that takes into account three evaluation factors, each having equal weight: 1) population of counties eligible for both IA and PA, 2) land area of counties eligible for both IA and PA, and 3) the number of properties listed in the National Register of Historic Places in counties eligible for both IA and PA.

OBJECTIVES:

This program provides funds for projects that aid in the protection and location of missing persons living with Alzheimers disease and related dementias and other missing elderly individuals. It is currently estimated that 5.1 million people in the United States alone are living with Alzheimers disease or some form of dementia. Law enforcement agencies often expend resources searching for missing persons with Alzheimers disease, and if not found quickly, they are at high risk of serious injury or even death. In addition, law enforcement officers may not be trained or equipped to handle the special needs of those with Alzheimers, once they are found.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

**16.123 COMMUNITY-BASED VIOLENCE PREVENTION PROGRAM
FEDERAL AGENCY:**

Office of Juvenile Justice and Delinquency Prevention, Department of Justice

AUTHORIZATION:

FY15 (OJJDP CBVP) Pub. L. No. 113-235; 128 Stat. 2130, 2195.

OBJECTIVES:

To support and enhance the coordination of existing community-based violence prevention and intervention programs and strategies that are attempting to replicate models and strategies which have been proven to have a positive impact on the reduction of violence in target communities. The Community-Based Violence Prevention Program has three main goals: to change community norms regarding violence; to provide alternatives to violence when gangs and individuals in the community are making risky behavior decisions; and, to increase the perceived risks and costs of involvement in violence among high-risk young people. This Program will work with community-based organizations to develop and implement strategies to reduce and prevent violence, particularly shootings and killings. This will be accomplished by relying on outreach workers, clergy, and other community leaders to intervene in conflicts or potential conflicts and promote alternatives to violence. The Community-Based Violence Prevention Program will also involve law enforcement in its efforts and depends heavily on a strong public education campaign to instill in people the message that shootings and violence are not acceptable. Finally, the model calls for the strengthening of communities so they have the capacity to exercise informal social controls and to respond to issues that affect them, including community violence. These activities are organized into five core components that address both the community and those individuals who are most at risk of involvement in a shooting or killing: community mobilization, outreach, faith leader involvement, police participation and public education.

TYPES OF ASSISTANCE:

PROVISION OF SPECIALIZED SERVICES

USES AND USE RESTRICTIONS:

The NICS Operations Center conducts NICS background checks by analyzing and evaluating criminal history records to determine whether the transfer of a firearm to an individual may violate State or Federal law. The staff at the Operations Center provides technical and operational support to users, provides customer service to FFLs and State Point of Contacts (POCs), processes appeals of denied transactions, and prepares management and statistical reports on the operation of the NICS.

Applicant Eligibility:

All persons purchasing firearms.

Beneficiary Eligibility:

Credentials/Documentation:

Initial request for services must be from a licensed and enrolled FFL. The FFLs will provide the required descriptive information requested on the Bureau of Alcohol, Tobacco, Firearms and Explosives Form 4473 and each background check is assigned a unique NICS Transaction Number. If a NICS background check results in no matching records, the transfer will be a proceed. If one or more matching records are found, a NICS Legal Instruments Examiner (Examiner) will review the record(s) to determine if the subject of the record may be identical with the prospective purchaser and to determine if the record contains state and/or federal firearm prohibitive criteria which may prohibit the transfer of the firearm. If it is determined that prohibitive criteria exists, the NICS Examiner will advise the FFL to deny the firearm transaction. If potentially prohibitive criteria exists and more information is required in order to make the determination, the NICS Examiner will advise the FFL to

delay the firearm transaction. When a transaction is delayed, the NICS Examiner begins extensive research on the potential prohibitor. The NICS Examiner will contact local, state, and federal law enforcement agencies and courts to resolve questions about an individual who appears to be prohibited from purchasing or possessing a firearm, as well as to request clarification regarding information in a prior record or disposition. When the research is complete, the NICS Examiner calls the FFL and gives a decision on the firearm transaction. Individuals who are denied the purchase of a firearm will be advised by the FFL of the process for appealing the denial decision if he/she believes it is incorrect. This program is excluded from coverage under 2 CFR 200, Subpart E - Cost Principles.

The minimum allocation to each State is \$400,000 and to the Territories is \$75,000. Technical assistance provided under this provision is coordinated with the State agencies designated to implement the formula grants program. To be eligible for formula grant funds, a State must submit electronically a comprehensive plan applicable to a 3-year period embodying the purposes of the Act and including provisions that: (1) provide for an advisory group appointed by the chief executive of the State to carry out specified functions and to participate in the development and review of the State's juvenile justice plan; (2) provide that juveniles who are charged with or who have committed offenses that would not be criminal if committed by an adult, or offenses which do not constitute violations of valid

court orders or such non-offenders as dependent and neglected children, are removed from secure juvenile detention and secure correctional facilities; (3) provide that juveniles alleged to be or found to be delinquent and youths within the purview of the deinstitutionalization core requirement not be confined or detained in any institution in which they have contact with adult.

16.576 CRIME VICTIM COMPENSATION**FEDERAL AGENCY:**

Office for Victims of Crime, Department of Justice

AUTHORIZATION:

42 U.S.C. 10602 (a); and an act appropriating funds for the Department of Justice in the current fiscal year.

OBJECTIVES:

The Office for Victims of Crime (OVC), Department of Justice, administers the Crime Victim Compensation formula grant program. OVC annually awards a grant to each state, the District of Columbia, the U.S. Virgin Islands, and the Commonwealth of Puerto Rico to support state crime victim compensation programs. These programs help pay for some of the expenses resulting from crimes involving violence or abuse.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

Funds under this program shall be used by the States for awards of compensation benefits to crime victims, with the following exception: States may retain up to 5 percent of their total grant for administrative and training purposes. As provided in recent VOCA amendments, formula grant funds to an eligible State crime victim compensation program is based on 60 percent of the amounts States expended during the fiscal year preceding the year of collections for the Crime Victims Fund, other than amounts awarded for property damage. If the sums available in the Fund for grants under this program are insufficient to provide grants of 60 percent as provided above, grants from the sums available will be made to each eligible crime victim compensation program so that all such programs receive the same percentage of the amounts awarded by such programs during the preceding fiscal year, other than amounts awarded for property damage. A crime victim compensation program is an eligible crime victim compensation program if (1) such program is operated by a State and offers compensation to victims and survivors of victims of criminal violence, including drunk driving and domestic violence for: (A) medical expenses attributable to a physical injury resulting from a compensable crime, including expenses for mental health counseling and care; (B) loss of wages attributable to a physical injury resulting from a compensable crime; and (C) funeral expenses attributable to a death resulting from a compensable crime; (2) such program promotes victim cooperation with the reasonable requests of law enforcement authorities; (3) such State, possession or territory certifies that grants received under this program will not be used to supplant funds otherwise available to provide crime victim compensation; (4) such program, as to compensable crimes occurring within the State, possession or territory, makes compensation awards to victims who are nonresidents of the State, possession or territory on the basis of the same criteria used to make awards to victims who are residents of the State, possession or territory; (5) such program provides compensation to victims of Federal crimes occurring within the State on the same basis that such program provides compensation to victims of State crimes; (6) such program does not, except pursuant to rules issued by the program to prevent unjust enrichment of the offender, deny

compensation to any victim because of that victim's familial relationship to the offender, or because of the sharing of a residence by the victim and the offender; (7) such program does not provide compensation to any person who has been convicted of an offense under Federal law with respect to any time period during which the person is delinquent in paying a fine, other monetary penalty, or restitution imposed for the offense; and (8) such program provides such other information and assurances related to the purposes of this section as the Director may reasonably require. Section 1403(c), any amount of crime victim compensation that the applicant receives through a crime victim compensation program under this section shall not be included in the income of the applicant until the total amount of assistance that the applicant receives from all such programs is sufficient to fully compensate the applicant for losses suffered as a result of the crime. As used in this section; (1) the term "property damage" does not include damage to prosthetic devices, eyeglasses or other corrective lenses, or dental devices; (2) the term "medical expenses" includes, to the extent provided under the eligible crime victim compensation program, expenses for eyeglasses and other corrective lenses, for dental services and devices and prosthetic devices, and for services rendered in accordance with a method of healing recognized by the law of the State; (3) the term "compensable crime" means a crime the victims of which are eligible for compensation under the eligible crime victim compensation program, and includes crimes involving driving while intoxicated and domestic violence; and (4) the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, and any other possession or territory of the United States.

Applicant Eligibility:

States, the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, Guam, and any other possession or territory of the United States who have an established eligible crime victim compensation program, and who meet the eligibility requirements discussed above.

16.606 STATE CRIMINAL ALIEN ASSISTANCE PROGRAM (SCAAP)

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

Omnibus Appropriations Act, Public Law 106-113, Division B, Section 1000(a); Immigration and Nationality Act, 8 U.S.C. 1252, Section 242 as Amended; Title II, subtitle C, Section 20301; Violent Crime Control and Law Enforcement Act of 1994, Public Law 103-322; and an act appropriating funds for the Department of Justice in the current fiscal year.

OBJECTIVES:

The State Criminal Alien Assistance Program (SCAAP) is a payment program designed to provide federal assistance to states and localities that incur costs for incarcerating undocumented criminal aliens who are being held as a result of state and/or local convictions. The Bureau of Justice Assistance (BJA) administers this program in conjunction with the Department of Homeland Security's (DHS) Immigration and Customs Enforcement (ICE), and U.S. Citizenship and Immigration Services branches.

TYPES OF ASSISTANCE:

Direct Payments for Specified Use

USES AND USE RESTRICTIONS:

The Department of Justice Reauthorization Act of 2005 (Public Law 109-162, Title XI) included the following requirement regarding the use of SCAAP funds: "Amounts appropriated pursuant to the authorization of appropriations in paragraph (5) that are distributed to a State or political subdivision of a State, including a municipality, may be used only for correctional purposes." All funds must be used for correctional purposes only. To be eligible for reporting, inmates must have been convicted of a felony or second misdemeanor for violations of state or local law, and housed in the applicant's state or local correctional facility for 4 or more consecutive days during the reporting period. Once a person meets these criteria, all pre-trial and post-conviction time served may be included in the application. Salary information reported in the SCAAP application must reflect the total salaries and wages paid to full and part-time correctional officers and others who meet the SCAAP definition. See the SCAAP Guidelines at <http://www.ojp.usdoj.gov/BJA/>. Funds may be used only for correctional purposes. BJA may further define the eligible uses of funds. For further information, see <http://www.ojp.usdoj.gov/BJA/grant/scaap.html>.

Applicant Eligibility:

Eligible applicants include States, the District of Columbia, Puerto Rico, Guam,

the Virgin Islands and localities or local jurisdictions exercising authority with respect to the incarceration of an undocumented criminal alien. This covers state prison facilities (including those housing juveniles convicted as adults of felony offenses or two or more misdemeanors) and local jails, whether operated by counties or cities. Applicants are generally States and units of local government. Note: Only one application is accepted from each separate political division (i.e., State, county, city).

Beneficiary Eligibility:

States, the District of Columbia, Puerto Rico, Guam, the Virgin Islands and localities or local jurisdictions.

Credentials/Documentation:

Applicants who are seeking funding must complete an electronic application form via the Office of Justice Programs Grants Management System (GMS). Inmate data, including the proper inmate identifiers, will either be manually key-stroked into the on-line application system, or submitted on-line by electronically attaching the applicable portions of the applicants inmate databases. The authorized official certifies compliance with all SCAAP requirements, including that the applicant has been authorized by the Chief Executive Officer of the applicable unit of government; the inmate identifiers required have been submitted to BJA in the proper format(s) for Immigration and Customs Enforcement (ICE) verification within the prescribed deadlines; all inmates counted by the applicant have been convicted of either a felony or two misdemeanor offenses under the applicant's law; and, only salary costs for corrections officers were included in the Total Salary Costs. By certifying on-line, the authorizing signing official is also assuring that all federal certifications and assurances are being met. The certification and assurance forms (Assurances, OJP Form 4000/3 and Certifications Regarding Lobbying; Debarment, Suspension and Other Responsibility Matters; and Drug-Free Workplace Requirements, OJP Form 4061/6) are provided on-line to allow applicants to review and accept them electronically. This program is excluded from coverage under 2 CFR 200, Subpart E - Cost Principles.

Preapplication Coordination:

Preapplication coordination is required. Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

This program is excluded from coverage under 2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards. SCAAP applications are administered via the Office of Justice Programs Internet-based Grants Management System. Inmate data, including the proper inmate identifiers, may either be manually key-stroked into the on-line application system, or submitted on-line by electronically attaching the applicable portions of their inmate databases. Awards are announced after the ICE inmate verification process is done. Technical assistance is available to applicants for preparation of the on-line application process by calling the OJP Grants Management System Hotline at 1-888-549-9901.

Award Procedure:

The final payment process requires that all applications and all data be fully processed and verified before any payments are made. Inmate data will be verified by the ICE, who will attempt to match the inmate data records provided to records in its databases to obtain the maximum number of confirmed matches. These matches are expected to include three categories: 1) those positively identified (matched) as qualifying undocumented criminal aliens; 2) those unknowns and 3) those positively identified as non- criminal aliens. Applicants will be given credit for a percentage of inmates whose eligibility cannot be determined through positive identification or "match," but have valid foreign countries of birth. Payments will be based on the days of incarceration for the verified number of aliens incarcerated by each applicant. Payments are granted by the Director of the Bureau of Justice Assistance, Office of Justice Programs, Department of Justice. The payment must be accepted on-line and the acceptance will effect a simultaneous assurance of compliance with conditions. Acceptance of the payment on-line initiates the automatic electronic transfer of funds from OJP to the recipient.

Renewals:

Length and Time Phasing of Assistance:

SCAAP awards are usually obligated and announced by the end of September and released for drawdown by mid-October. There are no restrictions placed on the time permitted to spend the money awarded because SCAAP funds are considered no year funds. Beginning with FY 2007 SCAAP awards, SCAAP funds must be used for correctional purposes only. Jurisdictions receiving SCAAP awards will be asked to report the projected use of these funds at the time the award is accepted. See the following for information on how assistance is awarded/released: SCAAP payments are calculated simultaneously, with applicants receiving a prorated payment based on the appropriation; costs submitted, and inmates as determined by DHS. All SCAAP payments are made electronically to the applicant's bank account of record identified during the application process. All SCAAP payments must go to the jurisdiction's general fund. Please use the jurisdiction's EIN (tax identification) and vendor number when applying for SCAAP funds.

Once SCAAP data has been validated and analyzed, applicants will receive e-mail notification that awards are ready for online acceptance and drawdown. Formal acceptance of an award via GMS is necessary for the electronic transfer of funds into the applicants bank account of record. Applicants have 45 calendar days to accept awards through GMS once notice is provided. SCAAP payments must go to the jurisdictions general fund.

16.607 BULLETPROOF VEST PARTNERSHIP PROGRAM (BVP)**FEDERAL AGENCY:**

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

Bulletproof Vest Partnership Grant Act of 1998, Public Law 105-181, June 16, 1998, and Bulletproof Vest Program Act of 2000, Public Law 106-517. And, an act appropriating funds for the Department of Justice in the current fiscal year.

OBJECTIVES:

To protect the lives of law enforcement officers by helping State, local, and tribal law enforcement agencies provide officers with armored vests.

TYPES OF ASSISTANCE:

DIRECT PAYMENTS FOR A SPECIFIED USE

USES AND USE RESTRICTIONS:

The program pays up to 50 percent of the total cost of each vest order. Total cost includes the cost of the vests, vest carriers, attachments, inserts, and covers considered integral or essential for its proper care, use, and wearability, shipping, handling, fitting charges, and applicable taxes. The total invoiced price, after all vendor and prompt payment discounts have been deducted, is what the Bureau of Justice Assistance (BJA) uses to determine the Federal match. This program only allows the purchase of body armor that has been tested and found to comply with applicable ballistic and stab standards promulgated by the National Institute of Justice's (NIJ) Standard 0101.06 Ballistic Resistance of Police Body Armor. In FY 2001, stab-resistant body armor was also included in the program as an allowable purchase.

Applicant Eligibility:

Only chief executives of jurisdictions (or their designees) may apply for funds. Jurisdictions are defined as general purpose units of local government (e.g., cities, towns, townships, boroughs, counties, etc.), Federally-recognized Indian tribes, the 50 State governments, the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, American Samoa, Guam, and the

Northern Mariana Islands. The chief executive of the jurisdiction registers on-line, submits the jurisdiction application, and requests payment for completed vest orders.

Beneficiary Eligibility:

Only law enforcement officers may receive vests through this program. According to the Act, "law enforcement officer" means any officer, agent, or employee of a State, unit of local government, or an Indian tribe authorized by law or by a government agency to engage in or supervise the prevention, detection, or investigation of any violation of criminal law, or authorized by law to supervise sentenced criminal offenders. Eligible officers may be full-time, part-time, paid or volunteer.

Credentials/Documentation:

Eligible jurisdictions must be general purpose units of local government, Federally-recognized Indian tribes, the 50 state governments, the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, American Samoa, Guam, and the Northern Mariana Islands. The validity of the on-line registration process is verified through independent reviews which may include certification by the banking institutions serving the jurisdiction, the U.S. Census Bureau, and agencies within the U.S. Department of Justice. This program is excluded from coverage under 2 CFR 200, Subpart E - Cost Principles.

Preapplication Coordination:

This is an Internet-based program. The jurisdiction is required to complete and submit an on-line registration form, providing information about the jurisdiction's chief executive officer, program contact person, and electronic banking information. The registration process is handled through the program's web site <http://ojp.gov/bvpbasi/home.html>. Only those jurisdictions with approved registrations are permitted to make application. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under 2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards. The jurisdiction submits the application to BJA via the Internet web site <http://vests.ojp.gov>. On-line instructions guide the jurisdiction through the application process. Law enforcement agencies or agencies with law enforcement functions which meet the Act's definition, will assist in completing the jurisdiction's on-line application by indicating the types, numbers, and costs of vests they intend to order. Only those jurisdictions that complete and submit applications will be eligible for matching funds from BJA.

Award Procedure:

Applications received by BJA are reviewed for completeness, accuracy, and compliance with all program requirements. Each application is then checked against the availability of funds to cover up to 50 percent of the application's total cost, in keeping with established criteria for program fund allocation. When all checks are complete and the application approved, the jurisdiction is notified through e-mail that the necessary funds have been obligated.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

A minimum of 15 working days may be required for complete registration validation, although jurisdictions and law enforcement agencies will have immediate access to certain program components during this validation process. A minimum of 60 working days may be required after the program closes for approval of the jurisdiction's application for funding. A minimum of 25 working days may be required for the electronic transfer of funds from the U.S. Treasury to the jurisdiction's bank account, once the request for funds has been received, reviewed, and approved by the Office of Justice Programs.

Appeals:

Not Applicable.

Renewals:

Not Applicable.

Formula and Matching Requirements:

This program has no statutory formula.

Matching Requirements: Percent: 50%. The program requires that each applicant jurisdiction be responsible for providing at least 50 percent of the cost of each vest purchased. Tribal governments may use Federal funds to provide this match; all other jurisdictions must use nonfederal match funds. Nonfederal fund sources include State and/or local jurisdiction revenues, private or personal funds, and contributions from insurance or workman's compensation consortiums. Asset forfeiture funds may also be used to meet the jurisdiction's matching requirement. Beginning in FY 2002, changes (Bulletproof Vest Partnership Act of 2000; Public Law 106-517) gives preference to small jurisdictions (those populations below 100,000) guaranteeing them the full 50 percent match payment before payments are calculated and approved for larger jurisdictions.

MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Jurisdictions with approved applications must request the federal match no later than August 31st of the second federal fiscal year following the end of the federal fiscal year in which their application was approved. In other words, the jurisdiction has two years beyond the year of their application to request payments for vests contained in that application. Payments of the federal match will be made whenever the jurisdiction indicates that at least part of the approved vest order was received and invoiced. See the following for information on how assistance is awarded/released: Funds will be available approximately three to four months after the application deadline. Applicants will be notified, via email, when the award is made and the funds are available. Please see the main BVP web site for more details:

<http://ojp.gov/bvpbasi/home.html>.

Reports:

No reports are required.

Audits:

This program is excluded from coverage under 2 CFR 200, Subpart F - Audit Requirements. Payments and transactions are subject to audits by the General Accounting Office, Department of Justice's Office of the Inspector General, state or local government auditors, and auditors from independent public accounting firms. Jurisdictions must follow their local procurement policies and procedures, including maintenance of reliable and accurate accounting systems, record keeping, and systems of internal control.

Records:

In accordance with the requirement set forth in 2 CFR 200, Subpart F, grantees must maintain all financial records, supporting documents, statistical records, and all other records pertinent to the award for at least 3 years following the close of the most recent audit.

Since then, the program has trained more than 140,900 law enforcement professionals in 1,381 separate events. SLATT has delivered training in every state in the country.

SLATT's most recent accomplishments include:

In FY 2014, training was provided to 5,937 law enforcement professionals in 40 separate training events.

SLATT's Train-the-Trainer workshop has trained 3,414 individuals, who in turn have provided training to 258,757 individuals.

In FY 2014, SLATT developed and pilot-tested two new instructional training blocks: Protecting Soft Targets and Social Media and Terrorism.

Since January 2014, SLATT has distributed more than 28,000 publications to requesting law enforcement agencies and workshop participants.

Renewals:

Subject to annual appropriations.

Formula and Matching Requirements:

Statutory Formula: Title I, Chapter Subchapter V, Part A, Subpart 42 USC 3756. Statutory Formula: Once each fiscal years overall JAG Program funding level is determined, BJA partners with the Bureau of Justice Statistics (BJS) to begin a four-step grant award calculation process which consists of:

1. Computing an initial JAG allocation for each state and territory, based on their share of violent crime and population (weighted equally).
2. Reviewing the initial JAG allocation amount to determine if the state or territory allocation is less than the minimum (de minimus) award amount defined in the JAG legislation (0.25 percent of the total). If this is the case, the state or territory is funded at the minimum level, and the funds required for this are deducted from the overall pool of JAG funds. Each of the remaining states receives the minimum award plus an additional amount based on their share of

violent crime and population.

3. Dividing each states final award amount (except for the territories and District of Columbia) between state and local governments at a rate of 60 and 40 percent, respectively.

4. Determining local unit of government award allocations, which are based on their proportion of the states three-year violent crime average. If a local eligible award amount is less than \$10,000, the funds are returned to the state to be awarded to these local units of government through the state agency. If the eligible award amount is \$10,000 or more, then the local government is eligible to apply for a JAG award directly from BJA.

Matching requirements are not applicable to this program.

MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Awards of at least \$25,000 or more begin October 1 of the FY and are four years in length. Awards that are less than \$25,000 begin October 1 of the FY and are two years in length. Requests for up to two additional years to complete performance of the award will be granted automatically. Extensions beyond a four- year period for all JAG awards may be approved on a case-by-case basis at the discretion of BJA. See the following for information on how assistance is awarded/released: Reimbursement.

Reports:

No program reports are required. No cash reports are required. Progress reports are required in accordance with the Office of Justice Programs Financial Guide (www.ojp.usdoj.gov/financialguide/index.htm). 16.740 STATEWIDE AUTOMATED VICTIM INFORMATION NOTIFICATION (SAVIN) PROGRAM

(SAVIN)

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

Pub. L. 110-5, emb. secs. 101-104; Pub. L. No. 109-108, 119 Stat. 2290, 2299; 28 U.S.C. 530C(a)(1); and, an act appropriating funds for the Department of Justice in the current fiscal year.

OBJECTIVES:

The SAVIN Program, administered by the Bureau of Justice Assistance (BJA), helps protect victims and survivors of crime from further victimization and ensures their rights are secured by providing registered individuals with timely and accurate information about any important dates and developments relating to the criminal proceedings at issue in their case (e.g., trial dates, times, or changes; probation hearings; inmate relocation; and offender release). This program allows victims and survivors to discretely receive information that can help them make informed decisions about their level of participation in the legal process. Effective SAVIN programs require broad multiagency support, increased victim safety, compliance with legislative requirements, and minimization of costs associated with keeping registered participants informed throughout the criminal justice process. SAVIN programs provide a single point of shared services for victims located anywhere in a state to learn about the status of their offenders case.

Key SAVIN components include:

Governance: An authorized statewide agency to oversee the planning and implementation of the SAVIN program. The administering agency should establish a governance process that includes representatives of criminal justice and law enforcement agencies, technology staff, and victim advocates,

including direct participation of a cross-section of victims of crime to guide the development and delivery of SAVIN services. The governance committee or board should meet (in person or via conference call) on a regular basis to discuss help inform the progress of the grant goals and objectives and the overall SAVIN program.

Technology: The use of technology solutions designed to collect, manage, and share critical information to and from victims that provide these services in a timely, confidential, and cost-effective manner.

Program Management: An organizational structure that will execute the program as directed by the established governance process and will enable the state to establish or expand existing notification capabilities based upon measures of the effectiveness of the program by collecting data on victims and survivors served and cost effectiveness. For example, conducting surveys with victims and survivors to ensure that the system is meeting their needs.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Technology improvement programs. SAVIN grantees are required to use the National Information Exchange Model (NIEM) (www.niem.gov), follow associated SAVIN implementation guidelines, and adopt the guidelines as part of their SAVIN program planning. Funds may not be used to supplant State and local funds.

Applicant Eligibility:

Applicants are limited to state-approved agencies that are authorized to manage the SAVIN program. State-approved agencies must be authorized either through state legislation or identified through the Governors office to manage the planning and implementation of a SAVIN program. Federally recognized Indian tribes (as determined by the Secretary of the Interior) are also eligible to receive grant funding for the planning and implementation of an automated victim notification program.

In order to apply for SAVIN program funding, eligible applicant agencies must include the state legislation designating authority to manage the SAVIN program for their state. If there is no authorizing state legislation, a letter from the Governor must be attached as part of the application. The letter must designate the applicant as the approved SAVIN program manager on behalf of the state.

Beneficiary Eligibility:

States, Territories and Tribal governments.

Credentials/Documentation:

Each applicant must submit a completed application that meets the requirements specified in the program guidance. 2 CFR 200, Subpart E - Cost Principles applies to this program.

The Bureau of Justice Assistance shall not finally disapprove any application (or amendment to that application) without affording the applicant reasonable notice of any deficiencies and providing an opportunity to correction and reconsideration.

Appeals:

For Formula awards, please see 28 CFR Part 18. There are no appeal rights for rejection of a discretionary application, but for discretionary awards, please see section 28 Code of Federal Regulations (CFR) Part 18..

Renewals:

Renewals are subject to annual appropriations.

Formula and Matching Requirements:

Statutory formulas are not applicable to this program.

Matching Requirements: It is not anticipated that a match will be required (depending upon final appropriation authority) but is recommended to promote program sustainability and partnerships across the state. If you include a match in your proposed budget, clearly denote which budget lines items are matching funds. 16.746 CAPITAL CASE LITIGATION INITIATIVE (CCLI)

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

42 U.S.C. Section 14163 and 14163a., 42 U.S.C 14163, 14163a.

OBJECTIVES:

Capital Case Litigation Initiative (CCLI) - In an effort to improve the quality of legal representation and to ensure reliable jury verdicts in state capital cases, the CCLI seeks to improve the quality and effectiveness of representation in death penalty cases through training for both the prosecutors who represent the public and the defense attorneys who represent indigent defendants in state capital cases. Wrongful Conviction Review Program - The objective of the Wrongful Conviction Review Program is to provide high quality and efficient representation for defendants in post-conviction claims of innocence. Post-conviction innocence claims are likely to include complex challenges to the reliability or accuracy of evidence presented at trial that fall mainly into three categories: 1) eyewitness identification evidence; 2) confession evidence; and 3) forensic evidence. In some cases, post-conviction DNA testing alone can establish innocence, but the majority of cases will rely on other forms of evidence, and many will involve DNA testing together with additional sources of proof and/or expert testimony, which may be extremely costly.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Capital Case Litigation Initiative (CCLI): Funds are given to States that currently enforce their death penalty statutes or to a national organization capable of providing training and technical assistance. CCLI funds may not be used to fund, either directly or indirectly, representation in, or prosecution of, specific capital cases. Wrongful Conviction Review Program: Funds are awarded to institutions of higher education, non-profit organizations with missions dedicated (in whole or in part) to exonerating the innocent, to state or local public defender offices, to public and nonprofit organizations that have experience and expertise in providing representation to wrongfully convicted defendants in post-conviction claims of innocence cases, as well as providing training and technical assistance on the subject. Funds may not be used to supplant State and local funds.

Applicant Eligibility:

Capital Case Litigation Initiative: Applicants are limited to state agencies in states that authorize capital punishment and that conduct, or will conduct prosecutions in which capital punishment is sought. For the state agency to be eligible, its state must have an effective system for providing competent legal representation for indigent defendants in capital cases. An effective system is defined in 42 U.S.C. 14163(e) as a system that invests the responsibility for appointing qualified attorneys to represent indigent defendants in capital cases either: (A) In a public defender program that relies on staff attorneys, members of the private bar, or both, to provide representation in capital cases; (B) In an entity established by statute or by the highest state court with jurisdiction in criminal cases, which is composed of individuals with demonstrated knowledge and expertise in capital cases, except for individuals employed as prosecutors; or (C) Pursuant to a statutory procedure enacted before the date of the enactment of the CCLI Act [October 30, 2002] under which the trial judge is required to appoint qualified attorneys from a roster maintained by a state or regional selection committee or similar entity. Wrongful Conviction Review Program - Eligible applicants are limited to institutions of higher education, non-profit organizations with missions dedicated (in whole or in part) to exonerating the innocent, to state or local public defender offices, as well as to public and nonprofit organizations that have experience and expertise in providing representation to wrongfully convicted defendants in post-conviction claims of innocence cases.

Beneficiary Eligibility:

Capital Case Litigation Initiative: Defense counsel, prosecutors and judges in the States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, America Samoa, Guam, and the Northern Mariana Islands that currently enforce their death penalty statutes. Wrongful Conviction Review Program: State or local government public defenders and non-profit organizations dedicated to exonerating the innocent.

Credentials/Documentation:

The applicant must submit a completed Application for Federal Assistance (Standard Form 424), including signed assurances that it will comply with statutory and administrative requirements. By certifying on-line, the authorizing signing official is also assuring that all Federal certifications and assurances are being met. The certification and assurance forms (Assurances, OJP Form 4000/3 and Certifications Regarding Lobbying; Debarment, Suspension and Other Responsibility Matters; and Drug-Free Workplace Requirements, OJP Form 4061/6) are provided on-line to allow applicants to review and accept them electronically.

Regarding the question below relating to the applicability of 2 CFR 200, Subpart E - Cost Principles: The cost principles are generally applicable, except with respect to for-profit entities or to organizations listed at Appendix VIII to 2 CFR Part 200. 2 CFR 200, Subpart E - Cost Principles applies to this program.

Preapplication Coordination:

No formal preapplication coordination is required. While informal preapplication coordination is not required, it is encouraged that applicants coordinate with any facilities for which they have responsibility to detain or incarcerate undocumented criminal aliens.

The application of E.O. 12372 is contingent upon whether the state has designated an entity to coordinate and review proposed federal financial assistance. See list of states that require this at: https://www.whitehouse.gov/omb/grants_spoc. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

16.754 HAROLD ROGERS PRESCRIPTION DRUG MONITORING

PROGRAM

(PDMP)

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

Prescription Drug Monitoring Program was created by the FY 2002 U.S. Department of Justice Appropriations Act (Public Law 107-77) and, an act appropriating funds for the Department of Justice in the current fiscal year.

OBJECTIVES:

To enhance the capacity of regulatory and law enforcement agencies to collect and analyze controlled substance prescription data through a centralized database administered by an authorized state agency and federally recognized Indian tribal governments.

TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

The Harold Rogers Prescription Drug Monitoring Program (PDMP) allows for states discretion as they plan, implement, or enhance a PDMP to accommodate local decision-making based on state laws and preferences, while encouraging the replication of promising practices.

In FY 2012, the program expanded to provide funding to federally recognized Indian tribal governments for the specific purpose of enabling tribal health care providers to provide data to and access data contained within state PDMPs. In FY 2013, the program expanded again to enable applications for data-driven, multidisciplinary approaches to reducing prescription drug abuse, encouraging greater utilization of the PDMPs and their data. In FY 2015 the program added a fourth funding category to promote practitioner and researcher partnerships and contribute to the larger body of knowledge on PDMP best practices.

Grant funds under this program can be used to:

Build a state-level data collection and analysis system to enhance the capacity of regulatory and law enforcement agencies and public health officials for future prevention efforts.

Enhance existing programs abilities to analyze and use collected data to identify drug abuse trends, identify and address sources of diversion, and increase the number of users of the PDMP.

Promote the use of data from the PDMP and other sources to measure drug abuse trends, identify and address sources of diversion, and better inform decision making by prescribers and dispensers.

Facilitate and participate in national evaluation efforts to assess efficiency and effectiveness of potential best practices.

Encourage and implement the exchange of information under the PMIX Architecture among states to prevent cross-border diversion.

Contribute to state level opioid abuse prevention plans and determine methodologies to encourage replication of strategies that are proven to be effective.

Assess the efficiency and effectiveness of state-level programs to make improvements and encourage additional states to implement programs.

Enhance collaborations with law enforcement, prosecutors, treatment professionals, the medical community, pharmacies, and regulatory boards to establish a comprehensive PDMP strategy.

Enable federally recognized Indian tribal governments to establish the policy, legal, and technological infrastructure to share PDMP data from health care facilities with the appropriate state PDMP.

Establish multidisciplinary action groups consisting of county, state, and federal criminal justice professionals; state and local health authorities; and treatment providers to determine best practices for sharing data, regulatory schemes, deconfliction strategies, intelligence gathering, targeted regulatory and enforcement activity, and prioritization of treatment and prevention efforts for at-risk individuals and communities.

Applicant Eligibility:

None.

Beneficiary Eligibility:

Category 1: Implementation and Enhancement: Applicants are limited to state

governments that have a pending or enacted enabling statute or regulation requiring the submission of controlled substance prescription data to an authorized state agency.

Category 3: Data-Driven Multidisciplinary Approaches to Reducing Rx Abuse Grants: Applicants are limited to state agencies (health departments, law enforcement authorities, etc.) and units of county government located in states with existing and operational prescription drug monitoring programs.

Credentials/Documentation:

The applicant must submit a completed Application for Federal Assistance (Standard Form 424), including signed assurances that it will comply with statutory and administrative requirements. Appeals:

Hearing and appeal procedures will follow 28 C.F.R., Part 18.

Renewals:

No renewals are available with Recovery Act funding.

Formula and Matching Requirements:

This program has no statutory formula.

Matching Requirements: The funding for states is allocated based on the number of violent crimes reported by the state from 2005 through 2007 to the FBI's UCR, and the population as provided by the U.S. Census Bureau for 2008.

For purposes of Recovery Act Byrne/JAG, by statute, the initial allocation to each state and Puerto Rico (excluding the remaining territories) is divided between the state and the local jurisdictions at a rate of 60 and 40 percent, respectively.

For the local jurisdictions, the allocation process begins by determining which of the local jurisdictions are eligible to receive an award. To be eligible, a jurisdiction must provide to the FBI's UCR a count of the number of violent crimes reported each year for a minimum of three years in the last ten years. By statute, jurisdictions that have not reported any data for at least three years in the last ten years for which UCR data is available do not receive an award.

For each eligible jurisdiction, BJS computes the average number of violent crimes committed for the three most recent years in which they reported data. Next, BJS uses the sum of these averages to determine the jurisdictions share of the local award they may receive. Finally, BJS examines the initial amount of the award, and jurisdictions that were allocated an initial award that is greater than or equal to \$10,000 receive a direct award from BJA for their own use. If the initial allocation is less than \$10,000, the statute provides that the allocation is given to the state, rather than to the local jurisdiction.

There is no match required at the Federal level. However, matching is an effective strategy for states and local units of government to expand justice funds and build buy-in for local criminal justice initiatives. This program does not have MOE requirements.

The period of formula grant awards under this program is 4 years. See the following for information on how assistance is awarded/released: No information provided.

Second Chance Act Pay for Success Pub. L. No. 110-199; and an act appropriating funds for the Department of Justice in the current fiscal year.

There are currently over 2.2 million individuals serving time in federal and state prisons, and millions of people cycle through local jails every year. Of those in state and federal prison, approximately 95 percent will be released and return to communities across the nation. A majority of these individuals have needs that, if unaddressed in prison, during the reentry process, and after release, will negatively impact their ability to live productive, pro-social, crime-free lives in the community. These needs include housing and employment challenges, relationship and family issues, and substance abuse and mental health problems.

The Second Chance Act of 2007 (Pub. L. 110-199) helps to address these significant challenges by providing comprehensive responses to the significant number of incarcerated adults who are returning to communities from prison, jail, and juvenile residential facilities. Programs funded under the Second Chance Act help to promote public safety by ensuring that the transition individuals make from prison and jail to the community is successful.

16.813 NICS ACT RECORD IMPROVEMENT PROGRAM

(NARIP)

FEDERAL AGENCY:

Bureau of Justice Statistics, Department of Justice

AUTHORIZATION:

Omnibus Crime Control and Safe Streets Act of 1968, as amended; 42 U.S.C. 3732 the NICS Improvement Amendments Act Public Law 110-180 and an act appropriating funds for the Department of Justice in the current fiscal year , Public Law 110-180, 42 U.S.C 3732.

OBJECTIVES:

To improve the FBI's National Instant Criminal Background Check System (NICS) by providing assistance to states to improve the completeness, automation and transmittal to state and federal systems the records utilized by the NICS. Such records include criminal history records, records of felony convictions, warrants, records of protective orders, convictions for misdemeanor involving domestic violence and stalking, records of mental health adjudications, and others, which may disqualify an individual from possessing or receiving a firearm under federal law. Helping states to automate these records will also reduce delays for law-abiding gun purchasers.

The NICS Improvement Act amends the Brady Handgun Violence Prevention Act of 1993 (the Brady Act) (Public Law 103-159), under which the Attorney General established NICS. The Brady Act requires Federal Firearms Licensees (FFLs) to contact the NICS before transferring a firearm to an unlicensed person for information on whether the proposed transferee is prohibited from receiving or possessing a firearm under state or federal law. The NICS Improvement Act was enacted in the wake of the April 2007 shooting tragedy at Virginia Tech. The Virginia Tech shooter was able to purchase firearms from an FFL because information about his prohibiting mental health history was not available to the NICS and the system was therefore unable to deny the transfer of the firearms used in the shootings.

The Act seeks to address the gap in information available to NICS about such prohibiting mental health adjudications and commitments and other prohibiting backgrounds. Filling these information gaps will better enable the system to operate as intended to keep guns out of the hands of persons prohibited by federal or state law from receiving or possessing firearms.

The Act authorized two grant programs to assist states in providing certain information to the NICS, and prescribes grant penalties for non-compliance with the Acts record completeness goals. Pursuant to the Act, there are certain conditions, described below, that a state must satisfy in advance of receiving grants under the Act. The NICS Improvement Act has provisions that require states to meet specified goals for completeness of the records submitted to the Attorney General on individuals prohibited by federal law from possessing firearms. The records covered include automated information needed by the NICS to identify felony convictions, felony indictments, fugitives from justice, drug arrests and convictions, prohibiting mental health adjudications and

commitments, domestic violence protection orders, and misdemeanor crimes of domestic violence.

The Act provides for a number of incentives for states to meet the goals it sets for greater record completeness. First, the Act allows states to obtain a waiver, beginning in 2011, of the state matching requirement under the National Criminal History Improvement Program (NCHIP) grant program, if a state provides at least 90 percent of its records identifying persons in specified prohibited categories. Second, the Act authorizes grant programs described herein, which, pursuant to the Act, are being administered consistent with NCHIP, for state executive and judicial agencies to establish and upgrade information automation and identification technologies for timely submission of final criminal record dispositions and other information relevant to NICS checks. Finally, the Act provides for discretionary and mandatory Byrne Justice Assistance Grant (JAG) program grant penalties, beginning 3 years after enactment, for non-compliance with specified record completeness requirements within certain timeframes: after 3 years, 3 percent may be withheld in the case of less than 50 percent completeness; after 5 years, 4 percent may be withheld in the case of less than 70 percent completeness; and after 10 years, 5 percent shall be withheld in the case of less than 90 percent completeness (although the mandatory reduction can be waived if there is substantial evidence of the state making a reasonable effort to comply).

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

The Act outlines the allowable uses of grant funds:

Grants to States:

Section 103 of the NICS Improvement Act, regarding implementation assistance to the states, provides that the grants "shall be used by the States and Indian tribal governments, in conjunction with units of local government and State and local courts, to establish or upgrade information and identification technologies for firearms eligibility determinations." In accordance with the Act, a grant to a state, territory or Indian tribes may only be used to:

- Create electronic systems, which provide accurate and up-to-date information which is directly related to checks under the NICS, including court disposition and corrections records;
- Assist states in establishing or enhancing their own capacities to perform NICS background checks;
- Supply accurate and timely information to the Attorney General concerning final dispositions of criminal records to databases accessed by NICS;
- Supply accurate and timely information to the Attorney General concerning the identity of persons who have a federally prohibiting mental health adjudication or commitment;
- Supply accurate and timely court orders and records of misdemeanor crimes of domestic violence for inclusion in federal and state law enforcement databases used to conduct NICS background checks;
- Collect and analyze data needed to demonstrate levels of state compliance with the Act; and
- Maintain the required relief from disabilities program in accordance with the Act however, not less than 3 percent and no more than 10 percent of each grant shall be used for this purpose.

State Court Grants

Section 301 of the Act provides that grants shall be made to each state and territory, consistent with the states plans for the integration, automation, and accessibility of criminal history records, for use by the court systems to improve automation and transmittal to federal and state repositories of: (1) criminal history dispositions; (2) records relevant to determining whether a person has been convicted of a misdemeanor crime of domestic violence or a prohibiting domestic violence protection order; and (3) prohibiting mental adjudications and commitments. Further, the law provides that the amounts granted shall be used by the state court system only to:

Carry out, as necessary, assessments of the capabilities of state courts to

automate and transmit arrest and conviction records, court orders, and mental health adjudications or commitments to federal and state record repositories; and

Implement policies, systems, procedures to automate and transmit arrest and conviction records, court orders, and mental health adjudications or commitments to federal and state record repositories.

Applicant Eligibility:

Applications must be submitted by (a) the agency designated by the Governor to administer the National Criminal History Improvement Program (NCHIP); (b) the state or territory central administrative office or similar entity designated by statute or regulation to administer federal grant funds on behalf of the jurisdiction's court system; or (c) a federally recognized Indian tribal government.

Beneficiary Eligibility:

In accordance with the NICS Improvement Amendments Act (see 18 U.S.C. 922 note), there are two specific conditions that each state must satisfy before being eligible to receive grants:

1. First, each State shall provide the Attorney General with a reasonable estimate, as calculated by a method determined by the Attorney General of the number of the records subject to the NIAA completeness requirements. (Id.)
2. Second, to be eligible for a grant under this [program], a State shall certify, to the satisfaction of the Attorney General, that the State has implemented a relief from disabilities program. (Id.)

For the purpose of this solicitation, a relief from disabilities program is a program that permits persons who have been adjudicated a mental defective or committed to a mental institution to obtain relief from the firearms disabilities imposed by law as a result of such adjudication or commitment. This relief must be based on a finding, in accordance with principles of due process, by a state court, board, commission, or other lawful authority, that the circumstances of the disability and the persons record and reputation are such that the person will not be likely to act in a manner dangerous to the public safety and that the granting of relief would not be contrary to the public interest. The certification form is available on the ATF website at www.atf.gov/forms/download/atf-f-3210-12.pdf. For further information, please visit NICS Improvement Act Questions and Answers on the BJS website.

Further, applications submitted on behalf of state court systems must specifically assure that: (1) the court system has the capability to contribute and will transmit pertinent information to the NICS established under section 103(b) of the Brady Handgun Violence Prevention Act (18 U.S.C. 922 note), and (2) that it will coordinate the programs proposed for NARIP funding with other federally funded information technology programs, including directly funded local programs.

Credentials/Documentation:

The applicant must furnish all documentation required by the program solicitation, along with the application for an award, including: a detailed budget, a budget narrative, and a program narrative describing how funds would be utilized. Applicants must also furnish a NICS Record Improvement Plan as part of the application which reflects (a) the formation of a NICS Record Improvement Task Force, an assessment of the quality and availability of qualifying NICS records in the State, obstacles preventing full and complete transmission to the NICS of the available records, and strategies planned to address such challenges and achieve completeness goals.

Regarding the question below relating to the applicability of 2 CFR 200, Subpart E Cost Principles: The cost principles are generally applicable, except with respect to for-profit entities or to organizations listed at Appendix VIII to 2 CFR Part 200. 2 CFR 200, Subpart E - Cost Principles applies to this program.

FEDERAL AGENCY:

Office of Juvenile Justice and Delinquency Prevention, Department of Justice

AUTHORIZATION:

Pub. L. No. 113-235; 128 Stat. 2130, 2193.

OBJECTIVES:

Every year, millions of children and adolescents in the United States are victimized and exposed to violence in their homes, schools, and neighborhoods. Child victims of or witnesses to violence may suffer devastating consequences beyond physical harm, which may include attachment difficulties, regressive behavior, anxiety, depression, and aggression. When these problems go unaddressed, children are at greater risk for school failure, substance abuse, repeat victimization, delinquency, gang involvement, and criminal behavior during adulthood. In short, mitigating childrens exposure to violence is central to breaking the cycle of violence.

The Children Exposed to Violence program builds on and incorporates the knowledge gained through research, programs, and demonstration initiatives that have addressed the problem of children exposed to violence over the past decade. The Program features a comprehensive effort to identify successful policies and practices that address the trauma and harm that children exposed to violence experience in their homes, communities, and schools. The Program supports prevention, intervention, treatment, and community organizing strategies to implement a comprehensive continuum of care for children and teens, from birth through age 17, which have been exposed to violence. The ultimate goals of the Children Exposed to Violence Program is to reduce the severity of violence, reduce the frequency of violence, reduce the short- and long-term traumatic impact of violence, increase community safety and accountability, improve the response to children exposed to violence, improve the safety and well-being of children, and create a national dialogue on the issue of children exposed to violence.
