

Below are Loan Origination Systems (LOS) and Point of Sale (POS) vendors who have submitted an exported test file from the vendor's system and have successfully imported to GUS. GUS currently accepts MISMO AUS 2.3.1 .xml exported files and Fannie Mae MISMO 3.2.0 .xml files.

Currently, the GUS has the ability to import files in the Fannie Mae Desktop Underwriter (DU) or Desktop Originator (DO) loan data file (1003) Version 3.2 format, however the ability to integrate with LOS/POS vendors and lender systems has not yet been developed. We anticipate being able to develop the interface ability sometime during 2013.

| <u>Vendor Name</u>                     | <u>LOS/POS Name</u>          | <u>MISMO<br/>AUS 2.3.1<br/>xml format</u> | <u>Fannie Mae<br/>DU/DO 3.2<br/>Format</u> |

If you represent an LOS/POS vendor, you can contact Kelly Elli at [kelly.elli@stl.usda.gov](mailto:kelly.elli@stl.usda.gov) for more information regarding testing files from your LOS/POS tested and certified for GUS.

If you use a vendor's software that is not on the above list, please have your software vendor contact Kelly Elli for compatibility testing.
