Environmental Assessment
DOI-BLM-CO-110-2013-0099-EA
Lease Parcel Review June 2014

DECISION:

It is my decision that a total of 3 parcels in their entirety and portions of 9 parcels of land, comprising 7,935.89 acres, will be offered for lease in the June 2014 oil and gas competitive lease sale. Maps of the parcels that will be offered for lease can be found in Attachment 1 of this Decision Record and legal descriptions of the parcels can be found in Attachment 3.

The State Director has the discretion to determine if parcels should be offered or deferred from leasing. This decision would defer from sale approximately 33 parcels in their entirety and portions of another 9 parcels totaling 57,231.38 acres (compared to what was nominated; see Attachment 2 of this Decision Record).

This decision has various changes from Alternative 3 of the EA (DOI-BLM-CO-110-2013-0099-EA). The first difference from Alternative 3 is regarding the deferral of parcels containing lands with wilderness characteristics. Approximately 360 acres that were considered for deferral under Alternative 3 are being recommended for sale (Table 1) because the BLM would be able to mitigate any potential impacts to wilderness characteristics by careful siting of facilities (see discussion in Section 3.4.3.3 of the EA)

Table 1: Change of lands to be offered for lease between Alternative 3 and this Decision

Parcel Number	Considered for Sale in Alternative 3		Recommended for Sale in this Decision	
	Legal Description	Acres	Legal Description	Acres
6765	<u>T.0050S., R.1010W., 6TH PM</u> Section 18: Lot 5,8,9,12; Section 18: W2NE,NESW	280	T.0050S., R.1010W., 6TH PM Section 7: E2SE Section 18: Lot 5, 8, 9, 12 Section 18: NENE,W2NE,NESW	400
6776	<u>T.0040S., R.1010W., 6TH PM</u> Section 3: NWNW; Section 4: N2N2,S2NW,SWNE, SW,SWSE; Section 9: N2SW,SWSW; Section 18: E2NE,SWNE,NW;	920	<u>T.0040S., R.1010W., 6TH PM</u> Section 3: NWNW, NENW; Section 4: N2N2,S2NW,SWNE, SENE, SW,NWSE, SWSE; Section 9: N2SW,SWSW, SESW; Section 18: E2NE,SWNE,NW;	1,080
6778	<u>T.0010N., R.1030W., 6TH PM</u> Section 17: NESW; Section 30: E2SW;	120	<u>T.0010N., R.1030W., 6TH PM</u> Section 17: NESW; Section 30: E2NW, E2SW;	200

The second difference from Alternative 3 is based upon protests received from Trout Unlimited. Nine parcels (6765, 6766, 6768, 6769, 6770, 6771, 6772, 6773, and 6777) will be deferred until the completion of the Oil and Gas Development Resource Management Plan Amendment which considers more restrictive stipulations to protect important water resources and fisheries.

The third change was to revise Alternative 3 to expand the timing limitation for sage-grouse nesting habitat on parcel 6816, based upon a protest from WildEarth Guardians (see Section 3.4.2.4 of the EA).

As discussed in Section 2.3 of the EA, the BLM considered leasing parcels within sage-grouse priority habitat but decided not to analyze this alternative in detail since WO-IM-2012-043 states that “field offices retain the discretion to not move forward with a nomination, or defer making a final decision on a leasing nomination until the completion of the LUP process described in the National Greater Sage-Grouse Planning Strategy for the affected area”. The Northwest Colorado Greater Sage-Grouse Draft Land Use Plan Amendment and Environmental Impact Statement was published for public comment in August 2013; the Record of Decision for that document will determine which sage-grouse habitat areas should be available for leasing and under what lease stipulations. The parcels (or portions of parcels) containing preliminary priority habitat have been removed from consideration for leasing (Table 2). Deferring leasing of important habitat within mapped sage-grouse general habitat was analyzed in detail in Alternative 3 and is included in this decision (see Attachment 2 of this Decision Record).

Table 2. Parcels Containing Preliminary Priority Habitat

Parcel ID	Original Nominated Acreage	Acreage within Priority Habitat
6756	2,366.01	0
6757	2,221.04	0
6759	2,509.12	0
6763	1,275.16	1,275.16
6767	1,043.3	1,043.3
6768	1,983.47	1,263.47
6772	1,920	440
6774	1,989.72	1,989.72
6775	706.58	706.58
6781	2,405.18	2,405.18
6782	715.48	715.48
6814	345.89	120
6815	800	80
6816	2,079.22	159.22
6818	641.52	641.52
6819	1,920.08	1,920.08
6820	1,330	1,330
6821	897.5	897.5
6822	482	482
6823	1,121.5	1,121.5
Totals	28,752.77	16,590.71

Terms/Conditions/Stipulations:

For all parcels, standard terms and conditions, as well as the lease notices and stipulations identified by parcel in Attachment 3 of this Decision, would apply to the lease parcels.

AUTHORITIES:

The authority for this decision is contained in 43 Code of Federal Regulations (CFR) § 3100.

PLAN CONFORMANCE:

The proposed action and alternatives have been reviewed and found to be in conformance with the approved White River Record of Decision and Approved Resource Management Plan (White River ROD/RMP) (July 1997).

COMPLIANCE WITH MAJOR LAWS:

The decision and proposed oil and gas leases with stipulations are in compliance with all applicable law, regulations, and policies, including the following:

- Endangered Species Act
- Migratory Bird Treaty Act
- Clean Water Act
- National Historic Preservation Act
- Clean Air Act

MONITORING:

No monitoring would be required in the sale and issuance of the lease parcels. Should the parcels be developed, monitoring may be required.

ALTERNATIVES CONSIDERED:

Alternative 1: No Action Alternative -- Under the No Action Alternative, the BLM would not sell nor issue any of the leases that have been nominated. Surface management would remain the same and ongoing oil and gas development would continue on surrounding federal, private, and state leases.

Alternative 2: Lease All Nominated Parcels in Conformance with the RMP Outside of Greater Sage-Grouse Preliminary Priority Habitat – Under this alternative, all nominated parcel outside of preliminary priority greater sage-grouse habitat would be offered for sale and subsequent oil and gas leasing. The lands proposed for leasing under this alternative total 48,576.56 acres of federal mineral estate in 33 parcels. This includes 44,216.56 acres of federal lands and 4,360 acres of split estate (see Attachment A-1 of the EA). The leases would include the standard lease terms as well as stipulations to protect other surface and subsurface resources, as prescribed by the 1997 White River RMP.

Alternative 3: Deferral of Parcels Containing Important Greater Sage-Grouse General Habitat, Lands with wilderness characteristics, 100-year floodplains, or are within the proposed Dinosaur Trail MLP – Under this alternative, the BLM would offer 21 parcels totaling 17,453.51 acres for lease and defer 31,123.05 acres from the sale parcels outside of preliminary priority greater sage-grouse habitat. Of the acres available for lease, 13,443.51 are federal lands and 3,680 acres are split estate (see Attachment C of the EA). The leases would include standard lease terms as well as stipulations to protect other surface and subsurface resources, as prescribed by the 1997 White River RMP.

RATIONALE FOR DECISION:

The decision to offer the parcels described in Attachment 3 of this Decision is based upon the following: 1) consistency with the approved resource management plan; 2) national policy; 3) agency statutory requirements; 4) relevant resource and economic issues; 5) application of measures to avoid or minimize environmental impacts.

1. This decision is in conformance with the White River ROD/RMP, 1997.
2. It is the policy of the Bureau of Land Management (BLM) as derived from various laws, including the Mineral Leasing Act of 1920, as amended [30 U.S.C. 181 *et seq.*] and the Federal Land Policy and Management Act of 1976, to make mineral resources available for disposal and to encourage development of mineral resources to meet national, regional, and local needs.
3. The decision is consistent with all federal, state, and county authorizing actions required for leasing of Federal oil and gas mineral estate.
4. Economic benefits derived from implementation of the proposed action are considered important and have been analyzed in the EA.
5. The decision avoids unnecessary impacts to lands with wilderness characteristics, important greater sage-grouse general and priority habitat, and the 100 year floodplain of the White River. Because the WRFO is in the process of developing a Resource Management Plan Amendment to address oil and gas development, the decision was made to defer parcels that did not have adequate stipulations to avoid unnecessary impacts to resources or preclude specific decisions in that document.
6. Standard terms and conditions as well as special stipulations would apply. Lease stipulations (as required by 43 CFR 3131.3) were added to each parcel as identified by the White River Field Office to address site specific concerns or new information not identified in the land use planning process.
7. The rationale for the deferral of leasing areas that have been identified as lands with wilderness characteristics is based on the likely adverse impacts to this resource as a result of subsequent development of these leases. The Proposed Oil and Gas Development RMP Amendment/Final EIS is expected to be published prior to the June 2014 lease sale and would provide management direction for oil and gas development within these units. However, not all areas containing lands with wilderness characteristics are recommended for deferral. There are portions of five lease parcels under Alternative 2 where wilderness characteristics could be protected by mitigation developed during a site-specific analysis of development proposals. The BLM has the authority to require relocation of operations under 43 CFR 3101.1 to minimize adverse impacts to other resources (Table 21 of the EA). These tracts contain anywhere from less than one acre to up to 13 acres of identified lands with wilderness characteristics, but all of this acreage is located less than 200 meters (660 feet) from the boundary of each of these listed tracts. Therefore the leasing of these tracts and subsequent development would not result in impacts to lands with wilderness characteristics in these areas when considering that it is considered to be consistent with lease rights granted to require relocation of operations by 200 meters (43 CRF 3101.1).
8. There are some areas mapped as preliminary general sage-grouse habitat that are recommended for sale in the June 2014 lease sale. Sage-grouse mapping is an inclusive exercise that is not

intended to imply that all habitat circumscribed by the mapping polygons represent suitable, much less occupied habitat for sage-grouse. Based on site-specific vegetation and terrain features, grouse habitat preferences, and the history of grouse use, those parcels of general habitat not recommended for deferral represent habitat largely unsuited to the support of sage-grouse and, at best, constitute discontinuous fragments marginally suited to occasional and brief occupation by pioneering birds and are not positioned to facilitate functional movements. The WRFO does not consider these parcels important in the support or recovery of sage-grouse in their respective population areas. Consideration of relevant site-specific conditions or information when weighing the merits of deferring fluid mineral authorizations in general habitat is explicitly consistent with BLM policy (IM 2012-043).

9. The rationale for deferring parcels that are identified as occupied Colorado River cutthroat trout habitat is based on potential impacts as a result of subsequent development of these leases. The Proposed Oil and Gas Development RMP Amendment/Final EIS is expected to be published prior to the June 2014 lease sale and would provide management direction for oil and gas development within this habitat. The Oil and Gas Development Resource Management Plan Amendment has proposed more restrictive stipulations to protect important water resources and fisheries.

FINDING OF NO SIGNIFICANT IMPACT:

Based on the analysis of potential environmental impacts contained in the referenced environmental assessment (EA), and considering the significance criteria in 40 CFR 1508.27, a Finding of No Significant Impact (FONSI) was prepared. The preferred alternative will not have a significant effect on the human environment. Therefore, preparation of an environmental impact statement is not necessary. This finding is based on the context and intensity of the alternatives as detailed in the FONSI.

PUBLIC COMMENTS:

On November 27, 2013, this EA was made available for a 30-day public comment period. The BLM received seven comment letters as a result of this comment period; 3 letters from special interest organizations and 4 letters from county and local governments. All comments were received electronically (some followed up with a hard copy of the same comment letter via US Postal Service) identifying a variety of concerns for the parcels within Garfield, Moffat, and Rio Blanco Counties. No new significant issues requiring further analysis or alternative development in the EA were identified in the review of the comments. However, changes to the areas of greater sage-grouse habitat identified in the EA (Table 1 of the EA) were revised to correct errors. A review of substantive comments is included as Attachment F in the EA. Three letters supported Alternative 2 and the sale of the lease parcels.

On March 14, 2014, the Bureau of Land Management provided notice that parcels of land would be offered in a competitive oil and gas lease sale on June 12, 2014; this lease sale notice initiated a 30-day protest period for the lease sale. Two protests were received, one from Trout Unlimited which was upheld, and one from WildEarth Guardians (et.al.) which was dismissed. However, based on WildEarth Guardians' protest an additional timing stipulation was added to parcel 6816 and rationale was added to the EA.

ADMINISTRATIVE REMEDIES:

APPEALS:

This decision may be appealed to the Interior Board of Land Appeals, Office of the Secretary, in accordance with the regulations contained in 43 CFR, Part 4 and Form 1842-1 (copy attached). If an appeal is taken, your notice of appeal must be filed in this office (at the above address) within 30 days from your receipt of this decision. The appellant has the burden of showing that the Decision appealed from is in error.

If you wish to file a petition for a stay of the effectiveness of this Decision during the time that your appeal is being reviewed by the Board, the petition for stay must accompany your notice of appeal. A copy of the notice of appeal and petition for a stay must also be submitted to each party named in this decision and to the Interior Board of Land Appeals (IBLA) and to the appropriate Office of the Solicitor (see 43 CFR 4.413) at the same time the original documents are filed with this office. If you request a stay, you have the burden of proof to demonstrate that a stay should be granted. A petition for a stay is required to show sufficient justification based on the standards listed below.

Standards for Obtaining a Stay:

Except as otherwise provided by law or other pertinent regulation, a petition for a stay of a decision pending appeal shall show sufficient justification based on the following standards:

1. The relative harm to the parties if the stay is granted or denied;
2. The likelihood of the appellant's success of the merits;
3. The likelihood of immediate and irreparable harm if the stay is not granted, and;
4. Whether the public interest favors granting the stay.

Approved by:

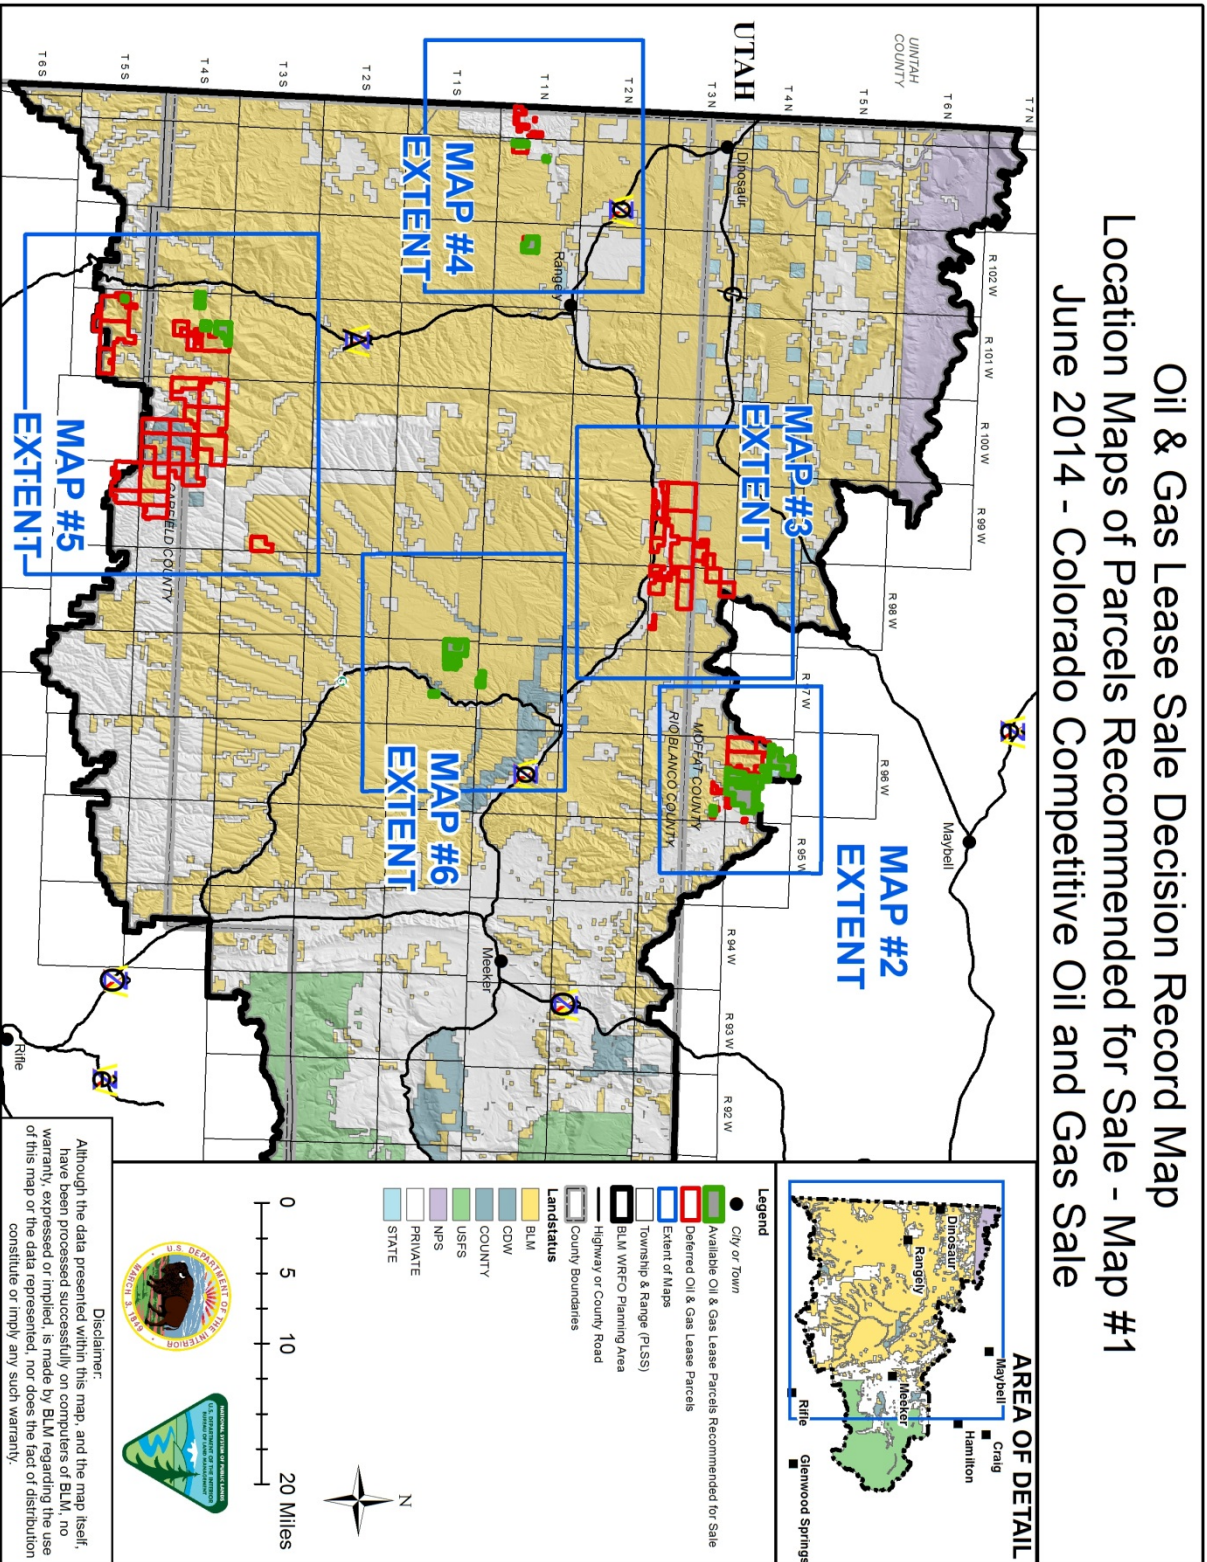

John Beck, Acting Deputy State Director
Division of Energy, Lands, and Minerals
