

V

HIV-1/SIVcpz Proteins

V-1 Introduction

This erratum contains the correct HIV-1 Vpu alignment—the *HIV Sequence Compendium 2009* erroneously contains a second copy of the Vif alignment instead of the Vpu alignment.

Table with columns for protein domains (transmembrane domain, cytoplasmic domain) and Vpu end. Rows list various HIV-1 Vpu protein sequences with their corresponding amino acid residues and domain annotations.
