Primary Measure: classifies respondents as sexual assault victims if one or more incidents of unwanted sexual contact are specified for P2.

Two-Step 1: classifies respondents as sexual assault victims if one or more incidents of unwanted sexual contact are specified for P2, but removes respondents determined not to be sexual assault victims based on open-ended responses to VQ or ILF3.

Two-Step 2: classifies respondents as sexual assault victims if one or more incidents of unwanted sexual contact are specified for P2, but removes respondents who provided only missing or unsure responses to ILF1 (when the incident(s) occurred).

Two-Step 3: classifies respondents as sexual assault victims if one or more incidents of unwanted sexual contact are specified for P2, but removes respondents who provided only missing or no responses to ILF2 (type of victimization).

Two-Step 4: classifies respondents as sexual assault victims if one or more incidents of unwanted sexual contact are specified for P2, but removes respondents who provided only missing or no responses to ILF3 (tactic(s) used).

Two-Step 5: classifies respondents as sexual assault victims if one or more incidents of unwanted sexual contact are specified for P2, but removes respondents who (1) were determined not to be sexual assault victims based on open-ended responses to VQ or ILF3, (2) provided only missing or unsure responses to ILF1 (when the incident(s) occurred), (3) provided only missing or no responses to ILF2 (type of victimization), or (4) provided only missing or no responses to ILF3 (tactic(s) used).

Behavioral Screener: classifies respondents who endorsed any of the sub-items in LCA2 as sexual assault victims

Sexual Misconduct 1: classifies respondents as victims if one or more incidents of unwanted sexual contact are specified for P2 or if respondents endorsed emotional coercion (EC1)

Sexual Misconduct 2: classifies respondents as victims if respondent (1) specified one or more incidents of unwanted sexual contact for P2, (2) endorsed emotional coercion (EC1), or (3) endorsed any of the sub-items in SH1 (sexual harassment)

^aPrior to calculating estimates, weights were standardized within schools such that each school's weights summed to the same weight total and thus schools contributed equally to overall totals. This was done to be consistent with the LCA estimates and mirror, as closely as possible, the overall estimate calculations used in the remainder of the report.

SE= standard error

Table E-67. Unbiased estimates vs. current estimates of sexual assault victimization among undergraduate females, by year of study, 2014-2015 academic year

Year of Study	Unbiased				Current (<i>Survey Item P2</i>) ^a			
	Estimate		SE		Estimate		SE	
Year 1	12.8	%	0.6	%	12.1	%	0.4	%
Year 2	11.6		0.6		10.6		0.4	
Year 3	10.1		0.6		9.9		0.4	
Year 4	8.9		0.5		8.8		0.3
