

Alaska Fisheries Science Center

Science Seminar Series

January 12 Bob McConnaughey

Bottom Trawl Effects and Best Practice Management – The Muir-Pinchot Debate Once Again

January 19 Craig Faunce

An Evaluation of Alternative Sampling Designs for the Deployment of Observers in Alaska

January 26 Sharon Melin

Move, Adapt or Die: California Sea Lion Responses to a Changing California Current System

February 2 Alex De Robertis

Acoustic Trawl Surveys Up North: Baseline Surveys of the Northern Bering and Chukchi Seas

February 9 Dan Lew

Economic Values of Protected Marine Species in the U.S.: Empirical Studies and Challenges for Ecosystem-Based Management

February 16 Matt Eagleton / John Olson

Beyond the EFH 5-Year Review: Developing New Tools to Assess Habitat in the North Pacific

February 23 Mike Sigler

Summer Zoogeography of the Northern Bering and Chukchi Seas

March 1 Kimberly Rand

Examining Two Epifaunal Invertebrate Communities Using Functional Traits and Environmental Variables in and Around Barrow Canyon

March 8 Stan Kotwicki

Reliability of the Survey-Derived Abundance Index

March 15 Dan Cooper

Early Juvenile Flatfish Research in the Eastern Bering Sea

March 22 Lisa Hiruki-Raring

AFSC Education Resources: How Can They Help Communicate Your Research?

March 29 Brian Mason

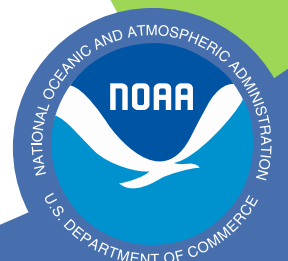

Opportunities and Challenges of Data Collection in the Fishery Dependent Environment

Winter 2016
Tuesdays 10-11 am

NOAA Western Regional Center
Alaska Fisheries Science Center
7600 Sand Point Way NE
Seattle WA 98115
