Administration

January 13, 2015

## **U.S. households to pay an average \$750 less for gasoline in 2015**

---

In its new forecast, the U.S. Energy Information Administration expects the average U.S. household to spend \$750 less for gasoline this year compared to 2014.

The price for regular gasoline this year is forecast to average \$2.33 per gallon. The average pump price is expected to rise to \$2.72 per gallon in 2016.

Gasoline prices have already fallen for 15 weeks in a row, matching the record streak in price declines set at the end of 2008.
