(B) the amount of any import duties imposed by the country of exportation which have been rebated, or which have not been collected, by reason of the exportation of the subject merchandise to the United States, and

(C) the amount of any countervailing duty imposed on the subject merchandise under part I of this subtitle to offset an export subsidy, and

(2) reduced by—

(A) except as provided in paragraph (1)(C), the amount, if any, included in such price, attributable to any additional costs, charges, or expenses, and United States import duties, which are incident to bringing the subject merchandise from the original place of shipment in the exporting country to the place of delivery in the United States, and

(B) the amount, if included in such price, of any export tax, duty, or other charge imposed by the exporting country on the exportation of the subject merchandise to the United States, other than an export tax, duty, or other charge described in section 1677(6)(C) of this title.

(d) Additional adjustments to constructed export price

(1) The price of identical subject merchandise sold by the exporter or producer to an unaffiliated person.

(2) The price of other subject merchandise sold by the exporter or producer to an unaffiliated person.

If there is not a sufficient quantity of sales to provide a reasonable basis for comparison under paragraph (1) or (2), or the administering authority determines that neither of the prices described in such paragraphs is appropriate, then the constructed export price may be determined on any other reasonable basis.

(f) Special rule for determining profit

EFFECTIVE DATE OF 1984 AMENDMENT

Amendment by Pub. L. 98-573 effective Oct. 30, 1984, see section 626(a) of Pub. L. 98-573, set out as a note under section 1671 of this title.

§ 1677b. Normal value

(a) Determination

In determining under this subtitle whether subject merchandise is being, or is likely to be, sold at less than fair value, a fair comparison shall be made between the export price or constructed export price and normal value. In order to achieve a fair comparison with the export price or constructed export price, normal value shall be determined as follows:

(1) Determination of normal value

(A) In general

The normal value of the subject merchandise shall be the price described in subparagraph (B), at a time reasonably corresponding to the time of the sale used to determine the export price or constructed export price under section 1677a(a) or (b) of this title.

(B) Price

The price referred to in subparagraph (A) is—

(i) the price at which the foreign like product is first sold (or, in the absence of a sale, offered for sale) for consumption in the exporting country, in the usual commercial quantities and in the ordinary

course of trade and, to the extent practicable, at the same level of trade as the export price or constructed export price, or

(ii) in a case to which subparagraph (C) applies, the price at which the foreign like product is so sold (or offered for sale) for consumption in a country other than the exporting country or the United States, if—

(I) such price is representative,

(II) the aggregate quantity (or, if quantity is not appropriate, value) of the foreign like product sold by the exporter or producer in such other country is 5 percent or more of the aggregate quantity (or value) of the subject merchandise sold in the United States or for export to the United States, and

(III) the administering authority does not determine that the particular market situation in such other country prevents a proper comparison with the export price or constructed export price.

(C) Third country sales

This subparagraph applies when—

(i) the foreign like product is not sold (or offered for sale) for consumption in the exporting country as described in subparagraph (B)(i),

(ii) the administering authority determines that the aggregate quantity (or, if quantity is not appropriate, value) of the foreign like product sold in the exporting country is insufficient to permit a proper comparison with the sales of the subject merchandise to the United States, or

(iii) the particular market situation in the exporting country does not permit a proper comparison with the export price or constructed export price.

For purposes of clause (ii), the aggregate quantity (or value) of the foreign like product sold in the exporting country shall normally be considered to be insufficient if such quantity (or value) is less than 5 percent of the aggregate quantity (or value) of sales of the subject merchandise to the United States.

(2) Fictitious markets

No pretended sale or offer for sale, and no sale or offer for sale intended to establish a fictitious market, shall be taken into account in determining normal value. The occurrence of different movements in the prices at which different forms of the foreign like product are sold (or, in the absence of sales, offered for sale) in the exporting country after the issuance of an antidumping duty order may be considered by the administering authority as evidence of the establishment of a fictitious market for the foreign like product if the movement in such prices appears to reduce the amount by which the normal value exceeds the export price (or the constructed export price) of the subject merchandise.

(3) Exportation from an intermediate country

Where the subject merchandise is exported to the United States from an intermediate
